

Annual Management Report of Fund Performance

AGF Global Sustainable Growth Equity Fund

September 30, 2024

Management Discussion of Fund Performance

This management discussion of fund performance represents the portfolio management team's view of the significant factors and developments affecting the fund's performance and outlook.

Investment Objective and Strategies

Pursuant to the Declaration of Trust, the investment objective of AGF Global Sustainable Growth Equity Fund (the "Fund") is to provide long-term capital appreciation by investing primarily in a diversified portfolio of global equity securities which fit the Fund's concept of sustainable development. AGF Investments Inc. ("AGFI"), as portfolio manager, looks for companies that fit the environmental concept of sustainable development which, as defined in a 1987 report of the World Commission on Environment and Development and updated in 2015 through the launch of the Sustainable Development Goals, is economic development that meets the needs of current generations without compromising the ability of future generations to meet theirs. The portfolio manager also looks for companies with no capitalization bias and that may typically possess proven management, proprietary/strategic advantages and financial strength. In the portfolio manager's opinion, these companies have above-average sales or earnings growth potential and favourable valuation levels with respect to these growth expectations. The portfolio manager employs a thematic investing strategy and as a result has identified a number of qualitative sustainability themes such as those associated with the energy transition, circular economy and sustainable agriculture, which may provide an investment framework through which to identify attractive opportunities. Energy transition involves, but is not limited to, companies that manufacture components and solutions that assist in increasing capacity for renewable energy production and other areas that help to decarbonize the economy. Circular economy refers to solutions that look to shift the economy away from the take-make-dispose model, including solutions such as recycling and waste management. Sustainable agriculture addresses inefficiencies in food production, such as minimizing food waste and addressing value chain inefficiencies. All such analysis of these themes are evaluated by the portfolio manager on a qualitative basis. Sustainability themes within the thematic investment strategy utilized by the portfolio manager are not static and are subject to change and/or evolve from time to time at the discretion of the portfolio manager. As a result of this process, the Fund does not invest in certain sectors, such as fossil fuel producers, and may at the portfolio manager's discretion, based on their qualitative research, analysis and assessment of the sustainability themes described above, have a reduced weighting in other sectors due to such sectors' lack of positive exposure to sustainability themes.

During periods of market downturn or for other reasons, a significant portion of the Fund's assets may be held in cash, cash equivalents or fixed income securities.

Risk

The risks of investing in the Fund remain as disclosed in the current prospectus. Any changes to the Fund over the period have not affected the overall level of risk of the Fund.

The Fund continues to be suitable for growth-oriented investors investing for the long-term and who have a medium tolerance for risk. The suitability of the Fund has not changed from what has been disclosed in the prospectus.

Results of Operations

For the year ended September 30, 2024, the Mutual Fund Units of the Fund returned 19.4% (net of expenses) while the MSCI World Net Index returned 31.9%. Unlike the benchmark, the Fund may be subject to valuation adjustments as outlined in the Fund's valuation policies as they relate to non-North American equities held by the Fund. A fair value adjustment can either positively or negatively impact the Fund's rate of return. The performance of the other series of the Fund is substantially similar to that of the Mutual Fund Units, save for differences in expense structure. Refer to "Past Performance" section for performance information of such series.

The Fund under-performed the MSCI World Net Index due to security selection. Security selection in the Information Technology and Consumer Discretionary sectors detracted the most from overall performance. Security selection and an underweight allocation to the Real Estate sector also detracted. This was partially offset by an underweight allocation to the Energy sector, which contributed the most. Security selection and an underweight allocation to the Consumer Staples sector also contributed.

From a country perspective, the U.S. was the biggest detractor, followed by Germany and Japan. On the other hand, Italy was the biggest contributor, followed by France and the Netherlands.

During the reporting period, there were no material changes to the composition of the investment portfolio related to the Fund's environmental, social and governance ("ESG") related investment objectives and/or strategies.

The Fund had net redemptions of approximately \$107 million for the current period, as compared to net redemptions of approximately \$8 million in the prior period. Rebalancing by fund on fund programs resulted in net subscriptions of approximately \$0.3 million in the Fund. The portfolio manager does not believe that redemption/subscriptions activity had a meaningful impact on the Fund's performance or the ability to implement its investment strategy.

This annual management report of fund performance contains financial highlights, but does not contain the complete annual financial statements of the investment fund. You can get a copy of the annual financial statements at your request, and at no cost, by calling 1 800 268-8583, by writing to us at AGF Investments Inc., CIBC SQUARE, Tower One, 81 Bay Street, Suite 4000, Toronto, Ontario, Canada M5J 0G1 attention: Client Services, or by visiting our website at www.agf.com or SEDAR+ at www.sedarplus.ca.

Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

Total expenses before foreign withholding taxes, commissions and other portfolio transaction costs vary period over period mainly as a result of changes in average Net Asset Values (see Explanatory Note (1) a)) and investor activity, such as number of investor accounts and transactions. The decrease in management fees accounted for most of the decrease in expenses during the period as compared to the previous period due to a decrease in average Net Asset Values. Registration fees decreased due to a decrease in subscription activity and interest expense increased due to an increase in overdraft positions throughout the period. The decreases in annual and interim reports and independent review committee fees were due to variances between the accrued amounts versus the actual expenses incurred in the previous period. All other expenses remained fairly consistent throughout the periods.

Recent Developments

Global equities surged during the reporting period driven by a resilient economy and the strong performance of the Information Technology sector through most of 2024. Markets had to contend with high borrowing costs and inflationary pressures throughout the reporting period but felt some relief during the latter half as central banks in the developed world took on a more accommodative stance in their monetary policy. The U.S. Federal Reserve (the "Fed"), the European Central Bank ("ECB") and the Bank of Canada initiated rate cuts midway through 2024 as inflationary pressures on their respective economies began to ease. However, the Bank of Japan ("BoJ") tightened its key policy rate, which resulted in a resurgent Japanese Yen unwinding global carry trades. China's economic slowdown and continuing property sector crisis compounded the macroeconomic obstacles. The People's Bank of China ("PBoC") aggressively implemented multi-pronged stimulus measures to alleviate the deflationary trend of the Chinese economy. The conflict in the Middle East, which began during the start of the reporting period, continued to be a source of major concern as a ceasefire agreement had not materialized, adding to the existing market volatility, especially in the Energy sector.

The U.S. economy recorded a quarter-on-quarter growth of 3.0% in the second calendar quarter of 2024. The growth was primarily driven by rising consumer expenditure, private inventories spending and non-residential business investments. The Fed persisted with its hawkish strategy, with interest rates at 5.25%-5.50%, into the third calendar quarter. However, Fed Chair Jerome Powell announced a 0.5% rate cut during its September 2024 meeting, the first rate cut in 4 years. This came after unemployment reached yearly highs of 4.3% in July and 4.2% in August and inflation cooled to 3.2% in August. In addition, there was a slowdown in the manufacturing sector, with three consecutive months of contraction in activity towards the end of the reporting period. The U.S. equity market continued to perform strongly through the reporting period, with the S&P 500 Index reaching a new record level in July 2024. This rally was largely powered by the performance of several technology stocks amidst the excitement around advances in artificial intelligence. Towards the end of the reporting period,

investors rotated out of large capitalization technology stocks to small capitalization technology stocks and into more defensive sectors, including Real Estate and Utilities.

In Europe, the ECB lowered interest rates twice during the reporting period. Two cuts of 0.25% in its June and September 2024 meetings were announced to drive business and manufacturing activities, as well as employment in the region. Inflation had cooled to 2.2% in August 2024, owing mainly to falling energy and industrial goods prices. Germany, France, Italy and Spain also recorded the biggest drop in inflation in the European block in August. Eurozone manufacturing purchasing managers' index ("PMI") fell to 44.8 in September, marking two years of continuous monthly contractions in the manufacturing sector. The PMI measures the economic health of the manufacturing sector and is compiled based on new orders, inventory levels, production, supplier deliveries and employment environment. An index reading above 50.0 indicates an overall increase in the sector and below 50.0 indicates an overall decrease. The services sector, however, expanded throughout the reporting period and for the eighth consecutive month in September, even as the PMI fell to 50.5. European equities consistently gained during the reporting period, closely tracking the U.S. markets. The STOXX 600 Index crossed and remained above the 500 level since March 2024. Markets dipped briefly in August and September due to fears of an economic slowdown in the U.S.

In Asia, Japan had an eventful reporting period with the BoJ ending its long-standing yield curve control policy and raising its policy rate for the first time since 2016. The BoJ further raised its key short-term policy rate from 0.10% to 0.25% in its July 2024 meeting to manage the depreciating Japanese Yen. This led to the global unwinding of the Yen-funded carry trade in high-yield risky assets and global markets plunged including Japanese equities. This decline, however, did not affect the overall performance of Japanese equities during the reporting period as the Nikkei 225 Index crossed the record 42,000 mark in July 2024. Inflation in Japan fluctuated early in the reporting period and stabilized at 2.8% by July.

China's quarter-on-quarter gross domestic product growth slowed to 0.7% in the second calendar quarter of 2024 from 1.5% growth recorded in the previous quarter, marking the eighth quarter of continuous growth. This slowdown in growth was primarily attributed to high local government debts, the property sector in crisis and weak domestic consumption. Chinese government relaxed purchase rules, motivated local government purchases and rolled over loans over the reporting period to bolster the property sector. The PBoC cut its one-year loan prime rate by 0.1% to 3.35% in July 2024. The PBoC also announced a 0.5% cut to the reserve requirement ratio and lowered the seven-day reverse repo rate by 0.2% to 1.5% in September. China's manufacturing sector's expansion has accelerated over the reporting period but slowed in the last two months. Business confidence in the country declined over the reporting period but recovered in September. China's trade balance also improved as export growth surpassed import growth. Chinese equities, although volatile over the reporting period, ended the period on a high note as investors reposed confidence in the stimulus measures by China.

During the second calendar quarter of 2024, the Biden Administration released a Voluntary Carbon Markets Joint Policy Statement and Principles in May, that outlines observations on existing voluntary carbon markets and provides voluntary guidelines for U.S. market participants to adhere to. Additionally, the Environmental Protection Agency revised its Greenhouse Gas Reporting Program regulations for reporting methane emissions from petroleum and natural gas systems. The final rule aligns with the Methane Emission Reduction Plan under the Biden Administration, aiming to decrease emissions in sectors across the U.S. economy.

In July 2024, Institutional Shareholder Services ESG introduced new industry average emission intensity data, enhancing its existing climate solutions portfolio. This data aims to assist insurance firms and banks in meeting their obligations regarding mandatory climate-related disclosures. Additionally, the European Securities and Markets Authority released a statement regarding the European Sustainability Reporting Standards, alongside its final report on the enforcement guidelines for sustainability information. This public statement highlighted the substantial transformations in sustainability reporting practices resulting from the new European Union ("EU") regulations.

The Corporate Sustainability Due Diligence Directive ("CSDDD"), which was officially adopted by the European Council in May 2024, was published in the Official Journal of the EU in July. Member states are required to incorporate the CSDDD provisions into their national legislation by July 26, 2026. This directive imposes a due diligence obligation on large companies within the EU as well as non-EU companies that have substantial operations in the EU, aiming to mitigate negative human rights and environmental impacts across their own activities, subsidiaries, and supply chains. The implementation of these measures will commence in stages from July 26, 2027, depending on the company's EU location, employee count and revenues.

In August 2024, the California State Teachers' Retirement System announced its focus on climate risk disclosure during the 2024 proxy season, voting against the boards of directors at over 2,250 companies. The press release highlighted the pension fund's expectations for portfolio companies to provide sustainability-related disclosures in line with International Financial Reporting Standards, report scope 1 and scope 2 greenhouse gas emissions and, for high-emission companies including those listed on the Climate Action 100+ list, establish appropriate targets for reducing greenhouse gas emissions.

The portfolio manager believes that 2024 will be a year characterized by steady sustainable project implementations leveraging Inflation Reduction Act ("IRA") tax credits and other federal programs. Capital expenditures have increased meaningfully in renewable, battery and hydrogen projects, particularly in the recent few calendar quarters. The portfolio manager also believes that regardless of the outcome of the 2024 U.S. election, there is a low risk of major changes to the tax credits and grants written into law in part due to the impact on the U.S. economy.

The portfolio manager continues to maintain a positive outlook on global equities. Although U.S. inflation is cooling off, it may be sticky, suggesting that the decrease may take

time, but it has been trending in the right direction. More corporate commitments have been made to leverage subsidies provided through government programs such as the IRA and Creating Helpful Incentives to Produce Semiconductors Act, after the U.S. doubled the pace of cutting carbon emissions since the passing of the IRA.

Related Party Transactions

AGFI is the manager ("Manager") and trustee of the Fund. Pursuant to the management agreement between the Fund and AGFI, AGFI is responsible for the day-to-day business of the Fund. AGFI also acts as the investment (portfolio) manager, managing the investment portfolio of the Fund. Under the management agreement, the Fund (except for Series I, Series O, Series Q and Series W Units, if applicable) pays management fees calculated based on the Net Asset Value of the respective series of the Fund. Management fees of approximately \$4,846,000 were incurred by the Fund during the period ended September 30, 2024.

Certain operating expenses relating to registrar and transfer agency services are paid directly by AGFI and in exchange, a fixed rate administration fee is payable by the Mutual Fund Series, Series F, Series FV, Series I, Series T and Series V Units, as applicable, of the Fund. The administration fee is calculated based on the Net Asset Value of the respective series of the Fund at a fixed annual rate, as disclosed in the current prospectus. Administration fees of approximately \$534,000 were incurred by the Fund during the period ended September 30, 2024.

AGFI is an indirect wholly-owned subsidiary of AGF Management Limited.

Caution Regarding Forward-looking Statements

This report may contain forward-looking statements about the Fund, including its strategy, expected performance and condition. Forward looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates" or negative versions thereof and similar expressions.

In addition, any statement that may be made concerning future performance, strategies or prospects, and possible future Fund action, is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to, among other things, risks, uncertainties and assumptions about the Fund and economic factors.

The forward-looking statements are by their nature based on numerous assumptions, which include, amongst other things, that (i) the Fund can attract and maintain investors and has sufficient capital under management to effect its investment strategies, (ii) the investment strategies will produce the results intended by the portfolio manager, and (iii) the markets will react and perform in a manner consistent with the investment strategies. Although the forward-looking statements contained herein are based upon what the portfolio manager believes to be reasonable assumptions, the portfolio manager cannot assure that actual results will be consistent with these forward-looking statements.

Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements made by the Fund. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, global equity and capital markets, business competition, taxation, changes in government regulations, unexpected judicial or regulatory proceedings, technological changes, cybersecurity, the possible effects of war or terrorist activities, outbreaks of disease or illness that affect local, national or international economies (such as COVID-19), natural disasters and disruptions to public infrastructure, such as transportation, communications, power or water supply or other catastrophic events.

It should be stressed that the above-mentioned list of factors is not exhaustive. You are encouraged to consider these and other factors carefully before making any investment decisions and you are urged to avoid placing undue reliance on forward-looking statements. Further, you should be aware of the fact that the Fund has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise, prior to the release of the next Management Report of Fund Performance.

Financial Highlights

Explanatory Notes

- (1) a) This information is derived from the Fund's audited annual financial statements. Under International Financial Reporting Standards ("IFRS"), investments that are traded in an active market are generally valued at closing price, which is determined to be within the bid-ask spread and most representative of fair value. As a result, there is no difference between the net assets per unit presented in the financial statements ("Net Assets") and the net asset value per unit calculated for fund pricing purposes ("Net Asset Value").
- b) The following series of the Fund commenced operations on the following dates, which represents the date upon which securities of a series were first made available for purchase by investors.

Mutual Fund Units	December 1991
Series F Units	March 2001
Series I Units	January 2018
Series O Units	November 2019
- c) In November 2019, the Fund recommenced the offering of Series O Units that are available to institutional

investors. Series O Units previously commenced offering in October 2015 and was closed due to full redemption by unitholders in April 2016. The financial data of Series O Units includes the results of operations from date of recommencement.

- (2) Net Assets and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the financial period.
- (3) Distributions were paid in cash/reinvested in additional units of the Fund, or both. The computation of the distributions per unit does not take into account the management fee distributions, if applicable (see note 5 below). The characterization of the distributions is based on management's estimate of the actual income for the year.
- (4) This is not a reconciliation of the beginning and ending Net Assets per unit.
- (5) The management expense ratio ("MER") of a particular series is calculated in accordance with National Instrument 81-106, based on all the expenses of the Fund (including Harmonized Sales Tax, Goods and Services Tax and interest, but excluding foreign withholding taxes, commissions and other portfolio transaction costs) and the Fund's proportionate share of the MER, if applicable, of the underlying funds and exchange traded funds ("ETFs") in which the Fund has invested, allocated to that series, expressed as an annualized percentage of average daily Net Asset Value of that series during the period. For new series launched during the period, the MER is annualized from the date of the first external purchase.

AGFI may reduce the effective management fee payable by some unitholders by reducing the management fee it charges to the Fund and directing the Fund to make management fee distributions to these unitholders in amounts equal to the amounts of the management fee reduction. The MER does not take into account the reduction in management fees due to management fee distributions to unitholders.

- (6) AGFI waived certain fees or absorbed certain expenses otherwise payable by the Fund. The amount of expenses waived or absorbed is determined annually on a series by series basis at the discretion of AGFI and AGFI can terminate the waiver or absorption at any time.
- (7) The trading expense ratio represents total commissions and other portfolio transaction costs, including the Fund's proportionate share of the commissions, if applicable, of the underlying funds and ETFs in which the Fund has invested, expressed as an annualized percentage of average daily Net Asset Value during the period.
- (8) The Fund's portfolio turnover rate ("PTR") indicates how actively the Fund's portfolio advisor manages its portfolio investments. A PTR of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's PTR in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable

* represents initial Net Assets

(1), (2), (3), (4), (5), (6), (7) and (8) see Explanatory Notes

capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

PTR is calculated based on the lesser of the cumulative cost of purchases or cumulative proceeds of sales divided by the average market value of the portfolio, excluding short-term investments.

Management Fees

The Fund is managed by AGFI. As a result of providing investment and management services, AGFI receives a monthly management fee, based on the Net Asset Value of the respective series, calculated daily and payable monthly. Management fees in respect of Series I, Series O, Series Q and Series W Units, if applicable, are arranged directly between the Manager and investors and are not expenses of the Fund. AGFI uses these management fees to pay for sales and trailing commissions to registered dealers on the distribution of the Fund's units, investment advice, as well as for general administrative expenses such as overhead, salaries, rent, legal and accounting fees relating to AGFI's role as manager.

	As a percentage of management fees		
	Annual rates	Dealer compensation	General administration and investment advice
Mutual Fund Units	1.65%	50.76%	49.24%
Series F Units	0.65%	-	100.00%

Past Performance*

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional securities of the Fund. Note that the performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. How the Fund has performed in the past does not necessarily indicate how it will perform in the future.

It is AGFI's policy to report rates of return for series in existence greater than one year. The performance start date for each series represents the date of the first purchase of such series, excluding seed money.

All rates of return are calculated based on the Net Asset Value.

Year-By-Year Returns

The following bar charts show the Fund's annual performance for each of the past 10 years to September 30, 2024 as applicable, and illustrate how the Fund's performance has changed from year to year. The charts show, in percentage terms, how much an investment made on the first day of each financial period would have grown or decreased by the last day of each financial period.

Mutual Fund Units

Series F Units

Series I Units

Performance for 2018 represents returns for the period from January 15, 2018 to September 30, 2018.

Series O Units

Performance for 2020 represents returns for the period from December 3, 2019 to September 30, 2020.

Annual Compound Returns

The following table compares the historical annual compound returns for each series with the index, for each of the periods ended September 30, 2024.

* The indicated rates of return shown here are the historical annual compounded total returns including changes in security value and reinvestment of all distributions and do not take into account sales, redemption, distribution or other optional charges by any securityholder that would have reduced returns or performance. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated.

Percentage Return:	1 Year	3 Years	5 Years	10 Years	Since Inception
Mutual Fund Units	19.4	(0.4)	8.6	7.9	N/A
MSCI World Net Index	31.9	11.5	13.5	12.2	N/A
Series F Units	21.0	0.9	10.0	9.2	N/A
MSCI World Net Index	31.9	11.5	13.5	12.2	N/A
Series I Units	21.8	1.6	10.8	N/A	9.3
MSCI World Net Index	31.9	11.5	13.5	N/A	11.4
Series O Units	21.9	1.6	N/A	N/A	10.4
MSCI World Net Index	31.9	11.5	N/A	N/A	13.0

The MSCI World Net Index is a free float-adjusted market capitalization-weighted index net of dividends, that is designed to measure the equity market performance of developed markets.

For a discussion of the relative performance of the Fund as compared to the index, see Results of Operations in the Management Discussion of Fund Performance.

Summary of Investment Portfolio

As at September 30, 2024

The major portfolio categories and top holdings (up to 25) of the Fund at the end of the period are indicated in the following tables. The Summary of Investment Portfolio may change due to ongoing portfolio transactions of the Fund and the next quarterly update will be in the Quarterly Portfolio Disclosure as at December 31, 2024.

Portfolio by Country	Percentage of Net Asset Value (%)
United States	56.1
France	8.7
Japan	6.0
Italy	4.3
Canada	4.1
Sweden	3.5
Ireland	3.1
Denmark	3.1
Switzerland	3.1

Bentley Systems Inc.	2.4
Zoetis Inc.	2.4
Ball Corporation	2.2
Total Net Asset Value (thousands of dollars)	\$ 589,757

Other Material Information

Effective October 1, 2024, the Manager will pay for all the operating expenses of the Fund (except for certain costs as disclosed in the current prospectus) in exchange for an annual fixed rate administration fee payable by the applicable series of the Fund, and in return, the administration fee relating to registrar and transfer agency services will be eliminated. The adoption of the fixed rate administration fee was approved by the securityholders of the Fund at the special securityholder meeting held on June 12, 2024.
