

AGF Asset Allocation Committee recommendations

Based on the outlook of the AGF Asset Allocation Committee, AGF Elements Portfolios were rebalanced on April 24, 2017. The following diagram represents the views of AGF's Asset Allocation Committee which influences the underweight and overweight positioning of the Portfolios.

Allocations to AGF's QuantShares ETFs were introduced to the Portfolios at the rebalance on April 24, 2017. The QuantShares Enhanced Core ETFs, managed by AGFiQ¹, follow an active, proprietary quantitative multi-factor investment process aiming to provide exposure to equity securities of a specific region. By understanding and targeting the multiple factors that drive market returns, AGFiQ's strategy allows for active positions that provide opportunities for total return. At the same time, their unique approach to understanding and managing risk provides important benefits to AGF Elements in the form of protection from significant losses. This combination of strong market participation with better downside protection is a unique value proposition, aligning well with the objectives of the Elements portfolios as they seek to provide long-term capital appreciation with reduced volatility. To learn more about the QuantShares Enhanced Core ETFs please visit www.agfiq.com.

Fixed Income

- Our overall fixed income allocation remains underweight as central bank policy and rising inflation could pressure rates
- Emerging market debt is most preferred within the asset class as the economic backdrop continues to improve
- USD denominated debt was upgraded to moderately overweight, though local denominated debt is still preferred between the two

Cash

- Cash overweight remains*

*Neutral cash weight is 0%

Equities

- Our overall equity view is moderately favourable over fixed income, resulting in a slight overweight, though less so compared to the prior period
- Developed markets continue to be preferred, though prospects for emerging markets are improving
- Within Canada, large-cap equities are preferred over small-cap equities
- Outlook for the U.S. remains positive relative to other developed markets
- Europe was downgraded to moderately underweight due to near-term political risks
- Japan as upgraded to a modest overweight with attractive valuations and supportive central bank policy
- Exposure to Asia Pacific (ex-Japan) remains underweight

¹ AGFiQ Asset Management (AGFiQ) is a collaboration of investment professionals from Highstreet Asset Management Inc. (HAMI), a Canadian registered portfolio manager, and of FFCM, LLC (FFCM), a U.S. SEC-registered adviser. This collaboration makes up the quantitative investment team. Quantshares are ETFs offered by AGF Investments Inc. and managed by Highstreet Asset Management. Quantshares ETFs are listed on the Toronto Stock Exchange and may only be bought and sold through licensed dealers.

CURRENT ALLOCATIONS (as of April 24, 2017)

² AGF Canadian Small Cap Discovery Fund merged into AGF Canadian Small Cap Fund on May 20, 2016.

³ AGF Global Value Fund merged into AGF Global Equity Fund on May 20, 2016. On April 18, 2008, the Fund changed its investment objective to provide long-term capital growth and invest primarily in shares of companies around the world. The Fund may invest up to 25% of its assets in companies in emerging markets.

⁴ AGF Canadian Bond Fund and AGF Inflation Plus Bond Fund merged into AGF Fixed Income Plus Fund on May 20, 2016.

⁵ On April 10, 2012, unitholders approved a change in the investment objective providing the Fund with greater flexibility to invest in high-yield bonds issued or guaranteed by corporations around the world.

Bond Type Allocation

Equity Sector Allocation

QUARTER REVIEW – Q1 2017

Fund Performance

- For the quarter ended March 31, 2017, the AGF Elements Conservative Portfolio returned 2.5%, while the blended benchmark returned 2.6%. The blended benchmark is composed of 24% FTSE TMX Universe Bond Index/30% MSCI All Country World Index/36% Barclays Capital Global Aggregate Bond Index/10% S&P/TSX Composite Index.
- The Portfolio's benchmark asset mix is 60% fixed income and 40% equities. Relative to the benchmark, the Portfolio maintained an overweight to equities and underweight to fixed income for the quarter based on the AGF Asset Allocation Committee's more constructive view for the asset class. This positioning contributed to performance, as fixed income remained in a tight range following a material rise in yields during the prior period caused by reflation trends, rising economic activity and optimism following the U.S. election.
- During the quarter, Canadian equity exposure was further increased as part of reductions to both U.S. equity and emerging market debt exposure. This overweight to Canadian equities in comparison to global equities detracted from performance, causing the Portfolio to slightly underperform relative to the blended benchmark, as global equities generally outperformed Canadian equities during the period, though Canadian equities generally earned positive returns.
- The performance of the underlying funds in the Portfolio was mixed during the quarter. Within the Portfolio's equity exposure, AGF American Growth Class, AGF Dividend Income Fund and AGF Canadian Small Cap Fund outperformed their respective benchmarks, while all other underlying equity funds lagged their respective benchmarks. Underlying fixed income performance was largely positive during the quarter as all funds outperformed their respective benchmarks except for AGF Emerging Market Bond Fund, which lagged its benchmark yet still earned positive returns during the period.

Performance as of March 31, 2017 (NET OF FEES)	PSD	3mo	6mo	YTD	1-Yr	3-Yr	5-Yr	10-Yr	Since PSD

Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the Elements prospectus before investing. Mutual funds are not guaranteed; their values change frequently and past performance may not be repeated. The payment of distributions should not be confused with a fund's performance, rate of return or yield. If distributions paid by the fund are greater than the performance of the fund, your original investment will shrink. Distributions paid as a result of capital gains realized by a fund, and income and dividends earned by a fund are taxable in your hands in the year they are paid. Your adjusted cost base will be reduced by the amount of any returns of capital. If your adjusted cost base falls below zero, you will have to pay capital gains tax on the amount below zero.

The All World Tax Advantage Group is a mutual fund corporation that currently offers approximately 20 different classes of securities. In addition to fund diversification by investment style, geography and market capitalization, a key benefit of investing in any of the classes within the group is the possibility of sharing incurred expenses (and losses) of the combined structure potentially offsetting income earnings to minimize chance of a dividend declaration. For a more detailed explanation, please see AGF.com/disclaimers.
