\$390

million AUM

Every \$1 million invested eliminates 30 cars from the road

The portfolio is **50.6% less** carbon intensive than the MSCI World Index. So, assuming the average car uses 3.774 metric tonnes of CO₂ per year, every **\$1 million invested** in the Fund vs the Index is the equivalent of taking **30 cars off the road**.**

**Assumptions: Using December 31, 2016 data, a \$1 million investment in the Fund would have resulted in a 113.74 tCO₂e lower footprint than a \$1 million investment in the MSCI World Index. 3.774 metric tonnes of CO₂ per vehicle per year = 8,320 lbs of CO₂ per vehicle per year = 17.68 average lbs of CO₂ per gallon of gas × 470.6 average gallons per year (12000 mile average per year / 25.5 average miles per gallon). Therefore, 113.74 tCO₂e savings on investment / 3.774 tCO₂e per vehicle = 30 cars off the road per \$1 million investment in the Fund vs. the Index.
