AGF ASSET ALLOCATION COMMITTEE

The Funds combine the expertise of each underlying fund manager with the oversight of the AGF Asset Allocation Committee. Using proprietary funds in tandem with an active management approach allows the Committee to execute on market opportunities easily and quickly while keeping a focus on income. Jean Charbonneau and Tony Genua are the portfolio managers of the Funds and co-chairs of the asset allocation for the Committee.

JEAN CHARBONNEAU, MBA Senior Vice-President and Portfolio Manager

- Leads the AGF Fixed Income team
- Industry experience since 1984

TONY GENUA Senior Vice-President and Portfolio Manager

- Experience managing investments in a variety of mandates
- Industry experience since 1978

The information contained in this fund profile is designed to provide you with general information related to investment alternatives and strategies and is not intended to be comprehensive investment advice applicable to the circumstances of the individual. We strongly recommend you to consult with a financial advisor prior to making any investment decisions. Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the prospectus before investing. The indicated rates of return are the historical annual compounded total returns including changes in share and/or unit value and reinvestment of all dividends and/or distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any securityholder that would have reduced returns. Mutual funds are not guaranteed; their values change frequently and past performance may not be repeated. The payment of distributions should not be confused with a fund's performance, rate of return or yield. If distributions paid by the fund are greater than the performance of the fund, your original investment will shrink. Distributions paid as a result of capital gains realized by a fund, and income and dividends earned by a fund, are taxable in your hands in the year they are paid. Your adjusted cost base will be reduced by the amount of any returns of capital. If your adjusted cost base falls below zero, you will have to pay capital gains tax on the amount below zero.

The targeted annual distribution is based on the Fund's or Portfolio's previous year-end net asset value and is subject to change. Monthly distributions on Series T and Series V shares may generally be a return of capital so long as there is sufficient capital attributable to the relevant series.
