## REASONS TO INVEST IN THIS FUND

- The Pool's objective is to provide long-term capital growth. It invests primarily in marketable equity securities of issuers outside of Canada and the United States that are listed on major stock exchanges or traded in major over-the-counter markets.

## INVESTMENT PROCESS

- This Pool takes a multi-manager investment approach combining active portfolio management with a tactical overlay to enhance the potential for increased risk-adjusted returns.

## ADDITIONAL INFORMATION

Wilshire Funds Management, a business unit of Wilshire Associates (Wilshire®), a leading global investment services firm, provides advisory services and ongoing active due diligence for the Harmony program. Chosen for their reputation in the institutional space and their experience in the managed asset arena in the U.S. and the U.K., their expertise is available to Canadian investors exclusively through AGF.

The information contained in this fund profile is designed to provide you with general information related to investment alternatives and strategies and is not intended to be comprehensive investment advice applicable to the circumstances of the individual. We strongly recommend you to consult with a financial advisor prior to making any investment decisions. Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the prospectus before investing. The indicated rates of return are the historical annual compounded total returns including changes in share and/or unit value and reinvestment of all dividends and/or distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any securityholder that would have reduced returns. Mutual funds are not guaranteed; their values change frequently and past performance may not be repeated. The payment of distributions should not be confused with a fund's performance, rate of return or yield. If distributions paid by the fund are greater than the performance of the fund, your original investment will shrink. Distributions paid as a result of capital gains realized by a fund, and income and dividends earned by a fund, are taxable in your hands in the year they are paid. Your adjusted cost base will be reduced by the amount of any returns of capital. Monthly distributions on Series T and Series V shares may generally be a return of capital so long as there is sufficient capital attributable to the relevant series. If your adjusted cost base falls below zero, you will have to pay capital gains tax on the amount below zero.

Wilshire Associates (Wilshire®) is a leading global investment technology, consulting and management firm that provides its Wilshire Funds Management advisory services to AGF Investments Inc. Wilshire is not affiliated with AGF Management Limited or any of its affiliates. Wilshire Funds Management, a business unit of Wilshire Associates Incorporated, uses mathematical, statistical and qualitative investment processes to allocate assets, select managers and construct portfolios and funds in ways that seek to outperform their specific benchmarks. Past performance does not guarantee future returns, and processes used may not achieve the desired results. Wilshire® is a registered servicemark of Wilshire Associates Incorporated, Santa Monica, California.
