### REASONS TO INVEST IN THIS FUND

- The Fund aims to deliver maximum cash flow through a balanced portfolio of high dividend-paying stocks and bonds. The Fund targets an annual distribution of 5%, paid monthly.

### INVESTMENT PROCESS

- Once the tactical asset mix is determined, the equity portion is invested in companies paying out a significant portion of their earnings through dividends. The fixed-income portion is managed using top-down fundamental analysis to anticipate changes in interest rates and currencies.

### THE PORTFOLIO MANAGEMENT TEAM

The AGF Asset Allocation Committee (AAC) is responsible for the tactical asset mix decision for the Fund. The equity portion is managed by Peter Frost using fundamental analysis. The fixed-income portion is managed by the AGF Fixed Income Team. Their global approach derives value from four key factors – country allocation, currency, the yield curve and creditworthiness.

#### PETER FROST, MBA, CFA Senior Vice-President and Portfolio Manager

- Draws on his decade-long experience of managing balanced and income mandates for institutional investors
- Industry experience since 1992

#### AGF FIXED INCOME TEAM AGF Investments Inc.

- Includes portfolio managers, associate portfolio managers and credit analysts
- Manage a wide range of Canadian and global fixed income mandates

The information contained in this fund profile is designed to provide you with general information related to investment alternatives and strategies and is not intended to be comprehensive investment advice applicable to the circumstances of the individual. We strongly recommend you to consult with a financial advisor prior to making any investment decisions. Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the prospectus before investing. The indicated rates of return are the historical annual compounded total returns including changes in share and/or unit value and reinvestment of all dividends and/or distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any securityholder that would have reduced returns. Mutual funds are not guaranteed; their values change frequently and past performance may not be repeated. The payment of distributions should not be confused with a fund's performance, rate of return or yield. If distributions paid by the fund are greater than the performance of the fund, your original investment will shrink. Distributions paid as a result of capital gains realized by a fund, and income and dividends earned by a fund, are taxable in your hands in the year they are paid. Your adjusted cost base will be reduced by the amount of any returns of capital. If your adjusted cost base falls below zero, you will have to pay capital gains tax on the amount below zero.

The targeted annual distribution is based on the Fund's or Portfolio's previous year-end net asset value and is subject to change. Monthly distributions on Series T and Series V shares may generally be a return of capital so long as there is sufficient capital attributable to the relevant series.

In order to invest in and maintain participation in the AGF Gold Label program (Series Q and/or W), a minimum of \$100,000 in Series Q and/or W per fund (in each account) or \$250,000 in household assets in Series Q and/or W is required. Management fees (for Series Q and W) as well as service fees (for Series Q only) within the AGF Gold Label program will be taken out directly from client accounts. For AGF Gold Label clients, AGF pays the operating expenses, custody and other administration-related costs (except brokerage commissions, counterparty fees, IRC fees or other extraordinary items). Tier level discounts apply only to the dollar amount(s) grouped in each particular tier.
