REASONS TO INVEST IN THIS FUND

- This global equity fund provides investors with the potential for capital appreciation and global diversification by investing in shares of companies around the world with superior growth potential.

INVESTMENT PROCESS

- The portfolio manager uses a bottom-up earnings growth momentum investment style, looking at a company's revenue, earnings, profitability, earnings quality, growth potential, as well as industry and country strength.

What are you doing after work?

TEAM DESCRIPTION

Tony's team seeks out leading and emerging growth companies in each investment cycle. The team starts off every day with a white sheet of paper, taking an objective look at all the stocks in each portfolio. They must be willing to buy a stock each and every day – otherwise the stock is sold. This approach allows the team to remain objective when seeking to identify and invest in market leaders of tomorrow.

TONY GENUA

Senior Vice-President and Portfolio Manager

- Experience managing investments in a variety of mandates
- Industry experience since 1978

The information contained in this fund profile is designed to provide you with general information related to investment alternatives and strategies and is not intended to be comprehensive investment advice applicable to the circumstances of the individual. We strongly recommend you to consult with a financial advisor prior to making any investment decisions. Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the prospectus before investing. The indicated rates of return are the historical annual compounded total returns including changes in share and/or unit value and reinvestment of all dividends and/or distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any securityholder that would have reduced returns. Mutual funds are not guaranteed; their values change frequently and past performance may not be repeated. The payment of distributions should not be confused with a fund's performance, rate of return or yield. If distributions paid by the fund are greater than the performance of the fund, your original investment will shrink. Distributions paid as a result of capital gains realized by a fund, and income and dividends earned by a fund, are taxable in your hands in the year they are paid. Your adjusted cost base will be reduced by the amount of any returns of capital. If your adjusted cost base falls below zero, you will have to pay capital gains tax on the amount below zero.
