

ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE

AGF Global Bond Fund

SEPTEMBER 30, 2016

What are you doing after work?®

Management Discussion of Fund Performance

This management discussion of fund performance represents the portfolio management team's view of the significant factors and developments affecting the fund's performance and outlook.

Investment Objective and Strategies

Pursuant to the Declaration of Trust, the investment objective of AGF Global Bond Fund (the "Fund") is to provide interest income and capital appreciation by investing primarily in investment grade debt securities of governments, corporations and other issuers around the world.

AGF Investments Inc. ("AGFI"), as portfolio manager, seeks to maximize the total return of the Fund through a top-down fundamental approach that is based on currency, country and category allocation, and duration management, and is complemented with a bottom-up approach to corporate bond selection. A top-down investment approach involves looking at the "big picture" in the economy and financial world and then breaking those components down into finer details. A bottom-up investment approach focuses attention on a specific company rather than on the industry in which that company operates or on the economy as a whole. The portfolio manager invests in a diversified portfolio of investment grade debt and debt-related instruments, and may also invest in sub-investment grade securities with exposure not exceeding 20% of the fixed income allocation. The portfolio manager may engage in active currency management strategies to exploit or hedge the risk of changes in currency exchange rates. In periods of unusual market conditions, a significant portion of the Fund's assets may be held in cash, cash equivalents or fixed income securities.

Risk

The risks of investing in the Fund remain as disclosed in the current prospectus. The principal risks associated with the Fund are changes in legislation risk, counterparty risk, credit risk, derivative risk, exchange traded fund ("ETF") general risks, ETF index risks, ETF industry sector risk, foreign currency risk, foreign market risk, gold and silver ETFs risk, interest rate risk, liquidity risk, repurchase agreement risk, reverse repurchase agreement risk, securities lending risk and substantial securityholder risk. The Fund is suitable for investors investing for the medium term, seeking the income potential of foreign fixed income securities and who have low to medium tolerance for risk.

Results of Operations

For the year ended September 30, 2016, the Mutual Fund Units of the Fund returned 5.1% (net of expenses) while the Bloomberg Barclays Global Aggregate Index (formerly, Barclays Capital Global Aggregate Bond Index) returned 7.3%. The performance of the other series of the Fund is substantially similar to that of the Mutual Fund Units, save for differences in expense structure. Refer to "Past Performance" section for performance information of such series.

This annual management report of fund performance contains financial highlights, but does not contain the complete annual financial statements of the investment fund. You can get a copy of the annual financial statements at your request, and at no cost, by calling 1 800 268-8583, by writing to us at AGF Investments Inc. 55 Standish Court, Suite 1050, Mississauga, Ontario, Canada L5R 0G3 attention: Client Services, or by visiting our website at www.agf.com or SEDAR at www.sedar.com.

Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

The Fund under-performed the Bloomberg Barclays Global Aggregate Index due to its exposure to government bonds and global treasuries, partially offset by active currency management. The Fund's overweight position in government bonds and underweight position in treasuries detracted from relative performance as global treasury bonds outperformed due to the decline in bond yields over the reporting period.

The Fund's overweight exposure to emerging markets bonds contributed to performance, particularly its exposure to local currency emerging markets bonds, which performed strongly during the reporting period as many emerging market currencies rallied against the U.S. dollar. The Fund's off-benchmark allocation to high yield bonds contributed to performance due to spread tightening during the reporting period. During the reporting period, the Fund's average overweight exposure to government issued bonds and emerging market bonds was approximately 35.0% and 11.0%, respectively, and underweight exposure to global treasuries was approximately 40.0%, relative to the Bloomberg Barclays Global Aggregate Index.

Conversely, the Fund's active currency management contributed to performance. The Canadian dollar appreciated as the Bank of Canada kept interest rates unchanged and oil prices rose. As a result, the Fund's underweight exposure to the U.S. dollar, Euro and Pound Sterling (net of hedging) contributed to performance as the Canadian dollar appreciated relative to these currencies. Partially offsetting this was the Fund's underweight exposure to the Japanese Yen, which appreciated as investors fled to the safety of this currency. Within emerging markets, exposure to the Brazilian Real, Colombian Peso, Hungarian Forint and Indonesian Rupiah contributed positively to performance, while exposure to the Peruvian New Sol partially detracted. During the reporting period, the Fund's average underweight exposure to the U.S. dollar, Euro, Japanese Yen and Pound Sterling was approximately 13.0%, 17.0%, 9.0% and 3.0%, respectively, relative to the Bloomberg Barclays Global Aggregate Index.

The Fund entered into foreign exchange forward contracts during the period under review. As of September 30, 2016, the Fund was net long Canadian dollar and net short Euro, New Zealand Dollar, Pound Sterling and U.S. Dollar in order to hedge its currency exposure.

Certain series of the Fund, as applicable, make monthly distributions at a rate determined by AGFI from time to time. If the aggregate amount of the monthly distributions made to a series in a year exceeds the portion of the net income and net realized capital gains allocated to such series, the excess will constitute a return of capital. The portfolio manager does not believe that the distributions made by the Fund had a meaningful impact on the Fund's ability to implement its investment strategy or to fulfill its investment objectives.

The Fund had net subscriptions of approximately \$159 million for the current period, as compared to net subscriptions of approximately

\$72 million in the prior period. Rebalancing by an institutional program resulted in net subscriptions of approximately \$95 million in the Fund. The portfolio manager does not believe that subscription activity had a meaningful impact on the Fund's performance or the ability to implement its investment strategy.

Total expenses before foreign withholding taxes, commissions and other portfolio transaction costs vary period over period mainly as a result of changes in average Net Asset Values (see Explanatory Note (1) a)) and investor activity, such as number of investor accounts and transactions. The increase in management fees accounted for most of the increase in expenses during the period as compared to the previous period due to an increase in average Net Asset Values. All other expenses remained fairly consistent throughout the periods.

Recent Developments

The economic fallout following the Brexit vote towards the end of June 2016 has generally been milder than feared, resulting in economic and market conditions that have been better than expected. However, by the end of the reporting period, it was anticipated that Article 50 (which formally starts the process of the UK's exit from the European Union) will be enacted by early 2017. The portfolio manager will be closely monitoring the situation as it continues to unfold.

While the U.S. Federal Reserve did not hike rates at its September meeting, the portfolio manager believes they will raise in December 2016 as underlying data are likely to hold up strongly enough to support it. The Bank of Japan's shift in monetary policy allows the bank to be more flexible and potentially support more sustainable growth over the long-term.

In the portfolio manager's view, ongoing political risk may result in mixed investor sentiment and could potentially weigh on financial markets going forward, particularly with the U.S. elections in November 2016. The Italian referendum in December 2016 and European Union elections in 2017 also pose medium term risks.

As a number of central banks are potentially approaching their limits on monetary policy, a number of countries have announced plans to implement expansionary fiscal policy, which is likely to be supportive of growth in the medium term. Countries such as Canada, Japan and South Korea have announced fiscal packages, while others such as the U.S. and the UK are likely to follow. While near term growth may improve, the portfolio manager believes longer term benefits will depend on how effectively those policies are deployed. Historically, government spending has not been as productive or supportive of gross domestic product growth as private sector spending, although refurbishing of aging infrastructure does present an opportunity to enhance productivity.

In the near term, the portfolio manager expects bond yields to gradually move higher, supported by more favourable growth and inflation prospects as the economy continues to recover from weak growth earlier in calendar year 2016. However, the portfolio manager anticipates yields to remain in a low range as the global economy continues to experience anemic growth and central bank accommodation remains supportive.

The portfolio manager's outlook is currently neutral as riskier asset classes have rebounded significantly off their mid-February 2016 lows,

making valuations somewhat less attractive. Consequently, the portfolio manager remains more neutral on high yield bonds and maintains an overweight allocation to higher quality, investment-grade corporate bonds. While equities may benefit from monetary and fiscal stimulus as economic activity improves, the portfolio manager's longer term outlook is more restrained due to higher than normal valuations and lacklustre growth prospects due in part to high debt levels.

Related Party Transactions

AGFI is the manager ("Manager") and trustee of the Fund. Pursuant to the management agreement between the Fund and AGFI, AGFI is responsible for the day-to-day business of the Fund. As indicated above, AGFI also acts as the investment (portfolio) manager, managing the investment portfolio of the Fund. Under the management agreement, the Fund (except for Series O, Series Q and Series W Units, if applicable) pays management fees, calculated based on the Net Asset Value of the respective series of the Fund. Management fees of approximately \$4,454,000 were incurred by the Fund during the period ended September 30, 2016.

Effective February 15, 2016, AGF CustomerFirst Inc. ("AGFC"), a wholly owned subsidiary of AGF Management Limited, provides transfer agency services to the Fund pursuant to a services agreement with AGFI. Unitholder servicing and administrative fees of approximately \$70,000 incurred by the Fund were paid to AGFC for the period from February 15, 2016 to September 30, 2016.

Caution Regarding Forward-looking Statements

This report may contain forward-looking statements about the Fund, including its strategy, expected performance and condition. Forward-looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates" or negative versions thereof and similar expressions.

In addition, any statement that may be made concerning future performance, strategies or prospects, and possible future Fund action, is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to, among other things, risks, uncertainties and assumptions about the Fund and economic factors.

Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements made by the Fund. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, global equity and capital markets, business competition, technological change, changes in government regulations, unexpected judicial or regulatory proceedings, and catastrophic events.

It should be stressed that the above-mentioned list of factors is not exhaustive. You are encouraged to consider these and other factors carefully before making any investment decisions and you are urged to avoid placing undue reliance on forward-looking statements. Further, you should be aware of the fact that the Fund has no specific intention of

updating any forward-looking statements whether as a result of new information, future events or otherwise, prior to the release of the next Management Report of Fund Performance.

Financial Highlights

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the past five years as applicable. The Fund adopted International Financial Reporting Standards ("IFRS") on October 1, 2014. All per unit information presented for the period ended September 30, 2014, including opening net assets, reflects retrospective adjustments in accordance with IFRS. Information for the periods prior to October 1, 2013 is derived from financial statements prepared in accordance with Canadian generally accepted accounting principles as defined in Part V of the CPA Handbook ("Canadian GAAP").

Explanatory Notes

(1) a) This information is derived from the Fund's audited annual financial statements. Prior to October 1, 2014, the net assets per unit presented in the financial statements ("Net Assets") differed from the net asset value per unit calculated for fund pricing purposes ("Net Asset Value"), due to differences in valuation techniques of certain investments as required under Canadian GAAP. The adoption of IFRS, effective October 1, 2014, has generally eliminated the difference between Net Assets per unit and Net Asset Value per unit.

For the purpose of comparability with the period ended September 30, 2016, total Net Asset Value and number of units outstanding presented for the period ended September 30, 2015 may have been adjusted to include certain transactions, if applicable. These adjustments have no effect on the Net Asset Value per unit.

b) The following series of the Fund commenced operations on the following dates, which represents the date upon which securities of a series were first made available for purchase by investors.

Mutual Fund Units	June 2010
Series F Units	June 2010
Series Q Units	April 2015
Series S Units	June 2010

c) On May 23, 2014, AGF Global Government Bond Fund merged into the Fund. The financial data of the Fund includes the results of operations of AGF Global Government Bond Fund from the date of the merger.

(2) Net Assets and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the financial period.

(3) Distributions were paid in cash/reinvested in additional units of the Fund, or both. The computation of the distributions per unit does not take into account the management fee distributions (see note 5 below). The characterization of the distributions is based on management's estimate of the actual income for the year.

(4) This is not a reconciliation of the beginning and ending Net Assets per unit.

(5) The management expense ratio ("MER") of a particular series is calculated in accordance with National Instrument 81-106, based on all the expenses of the Fund (including Harmonized Sales Tax, Goods and Services Tax and interest, but excluding foreign withholding taxes, commissions and other portfolio transaction costs) and the Fund's proportionate share of the MER, if applicable, of the underlying funds and ETFs in which the Fund has invested, allocated to that series, expressed as an annualized percentage of average daily Net Asset Value of that series during the period.

AGFI may reduce the effective management fee payable by some unitholders by reducing the management fee it charges to the Fund and directing the Fund to make management fee distributions to these unitholders in amounts equal to the amounts of the management fee reduction. The MER does not take into account the reduction in management fees due to management fee distributions to unitholders.

(6) AGFI waived certain fees or absorbed certain expenses otherwise payable by the Fund. The amount of expenses waived or absorbed is determined annually on a series by series basis at the discretion of AGFI and AGFI can terminate the waiver or absorption at any time.

(7) The trading expense ratio represents total commissions and other portfolio transaction costs, including the Fund's proportionate share of the commissions, if applicable, of the underlying funds and ETFs in which the Fund has invested, expressed as an annualized percentage of average daily Net Asset Value during the period.

(8) The Fund's portfolio turnover rate ("PTR") indicates how actively the Fund's portfolio advisor manages its portfolio investments. A PTR of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's PTR in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

PTR is calculated based on the lesser of the cumulative cost of purchases or cumulative proceeds of sales divided by the average market value of the portfolio, excluding short-term investments.

Management Fees

The Fund is managed by AGFI. As a result of providing investment and management services, AGFI receives a monthly management fee, based on the Net Asset Value of the respective series, calculated daily and payable monthly. Management fees in respect of Series O, Series Q and Series W Units, if applicable, are arranged directly between the Manager and investors and are not expenses of the Fund. AGFI uses these management fees to pay for sales and trailing commissions to registered dealers on the distribution of the Fund's units, investment advice, as well as for general administrative expenses such as overhead, salaries, rent, legal and accounting fees relating to AGFI's role as manager.

(1), (2), (3), (4), (5), (6), (7) and (8) see Explanatory Notes

	As a percentage of management fees		
	Annual rates	Dealer compensation	General administration and investment advice
Mutual Fund Units	1.50%	43.30%	56.70%
Series F Units	0.90%	—	100.00%
Series S Units	1.00%	—	100.00%

Past Performance*

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional securities of the Fund. Note that the performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. How the Fund has performed in the past does not necessarily indicate how it will perform in the future.

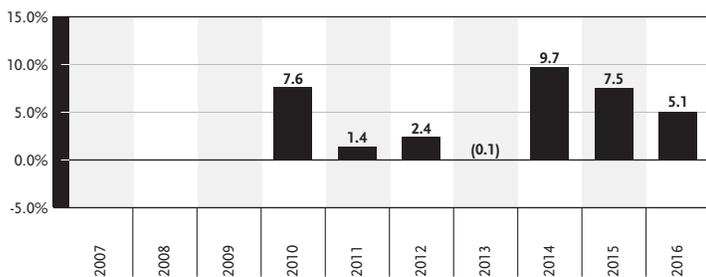

It is AGFI's policy to report rates of return for series in existence greater than one year. The performance start date for each series represents the date of the first purchase of such series, excluding seed money. Series Q Units commenced operations in April 2015. During the ten year period ended September 30, 2016, certain other funds with similar investment objectives merged into the Fund. Generally, for fund mergers, the continuing fund is considered a new fund for the purpose of calculating rates of return and therefore, the rates of return have not been provided for the period of the merger and previous periods. However, the merger of AGF Global Government Bond Fund with the Fund (see Explanatory Note (1) c)) did not constitute a material change to the Fund and accordingly did not impact the ability of the Fund to maintain its historical performance.

All rates of return are calculated based on the Net Asset Value.

Year-By-Year Returns

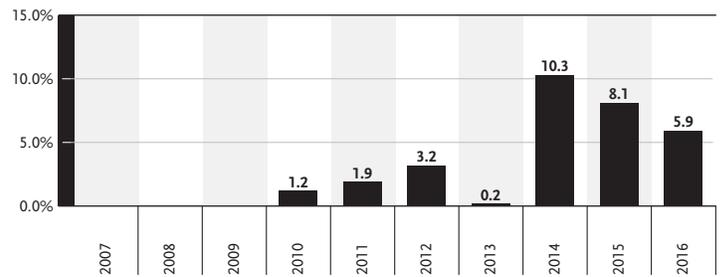

The following bar charts show the Fund's annual performance for each of the past 10 years to September 30, 2016 as applicable, and illustrate how the Fund's performance has changed from year to year. The charts show, in percentage terms, how much an investment made on the first day of each financial period would have grown or decreased by the last day of each financial period.

Mutual Fund Units

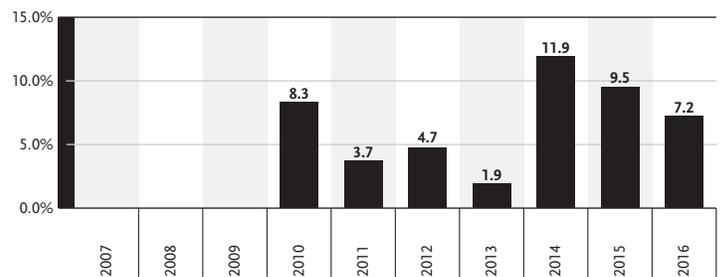

Performance for 2010 represents returns for the period from June 17, 2010 to September 30, 2010.

Series F Units

Performance for 2010 represents returns for the period from August 16, 2010 to September 30, 2010.

Series S Units

Performance for 2010 represents returns for the period from June 15, 2010 to September 30, 2010.

Annual Compound Returns

The following table compares the historical annual compound returns for each series with the index, for each of the periods ended September 30, 2016.

Percentage Return:	1 Year	3 Years	5 Years	10 Years	Since Inception
Mutual Fund Units	5.1	7.4	4.9	N/A	5.3
Bloomberg Barclays Global Aggregate Index	7.3	10.7	6.4	N/A	7.5
Series F Units	5.9	8.1	5.5	N/A	5.0
Bloomberg Barclays Global Aggregate Index	7.3	10.7	6.4	N/A	6.4
Series S Units	7.2	9.5	7.0	N/A	7.5
Bloomberg Barclays Global Aggregate Index	7.3	10.7	6.4	N/A	7.5

The Bloomberg Barclays Global Aggregate Index provides a broad-based measure of the global investment grade fixed income markets.

For a discussion of the relative performance of the Fund as compared to the index, see Results of Operations in the Management Discussion of Fund Performance.

* The indicated rates of return shown here are the historical annual compounded total returns including changes in security value and reinvestment of all distributions and do not take into account sales, redemption, distribution or other optional charges by any securityholder that would have reduced returns or performance. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated.
