

ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE

AGF Global Balanced Fund

SEPTEMBER 30, 2016

What are you doing after work?®

Management Discussion of Fund Performance

This management discussion of fund performance represents the portfolio management team's view of the significant factors and developments affecting the fund's performance and outlook.

Investment Objective and Strategies

Pursuant to the Declaration of Trust, the investment objective of AGF Global Balanced Fund (formerly, AGF World Balanced Fund) (the "Fund") is to provide superior returns with moderate risk through a combination of capital appreciation and interest income. It invests primarily in a mix of shares of companies in countries and industries that are expected to have superior growth, bonds and short-term money market instruments. The Fund uses an asset allocation approach to adjust its holdings among equities and fixed income.

AGF Investments Inc. ("AGFI"), as portfolio manager, uses a proprietary quantitative framework to assist in determining which countries to invest in and the amount to allocate to each country within the equity component. The portfolio manager then uses a bottom-up conservative growth investment philosophy to uncover stocks that are reasonably priced relative to their growth potential. A bottom-up investment approach focuses attention on a specific company rather than on the industry in which that company operates or on the economy as a whole. Within the fixed income component, the portfolio manager uses a top-down fundamental approach that is based on currency, country and category allocation, and duration management, combined with a bottom-up approach to corporate bond selection. A top-down investment approach involves looking at the "big picture" in the economy and financial world and then breaking those components down into finer details. The Fund may also invest in sub-investment grade securities, including emerging market or high yield debt. In periods of unusual market conditions, a significant portion of the Fund's assets may be held in cash or cash equivalents.

Risk

The risks of investing in the Fund remain as disclosed in the current prospectus. The principal risks associated with the Fund are capital erosion risk (Series T and Series V only), changes in legislation risk, concentration risk, counterparty risk, credit risk, depository securities and receipts risk, derivative risk, equity risk, exchange traded fund ("ETF") general risks, ETF index risks, ETF industry sector risk, foreign currency risk, foreign market risk, gold and silver ETFs risk, interest rate risk, liquidity risk, repurchase agreement risk, reverse repurchase agreement risk, securities lending risk and substantial securityholder risk. The Fund is suitable for investors investing for the medium to longer term, seeking a mix of foreign equity and fixed income securities in a single fund and who have medium tolerance for risk.

Results of Operations

For the year ended September 30, 2016, the Mutual Fund Units of the Fund returned 8.8% (net of expenses) while the MSCI All Country World Index, the Bloomberg Barclays Global Aggregate Index (formerly, Barclays Capital Global Aggregate Bond Index) and the Blended Benchmark returned 11.0%, 7.3% and 10.2%, respectively. The Blended Benchmark is composed of 70% MSCI All Country World Index/30% Bloomberg Barclays Global Aggregate Index. The performance of the other series of the Fund is substantially similar to that of the Mutual Fund Units, save for differences in expense structure. Refer to "Past Performance" section for performance information of such series.

The Fund under-performed the MSCI All Country World Index due to inclusion of fixed income and out-performed the Bloomberg Barclays Global Aggregate Index due to inclusion of equities. Equities generally out-performed fixed income during the reporting period, except for high yield bonds, which contributed positively.

The Fund under-performed the Blended Benchmark as a result of country and sector allocation in the equity portion and category allocation in the fixed income portion. Within the equity portion, the Fund's preference for companies in Japan and Germany detracted from performance. The Fund's preference for companies in the financials sector and lower exposure to companies in the materials sector also detracted from performance, though having lower exposure to the consumer discretionary sector partially offset results.

Global treasury bonds benefited from the decline in global bond yields. Relative to the Blended Benchmark, the Fund's underweight exposure to treasuries and overweight exposure to government-related securities detracted from performance. Relative to the Blended Benchmark, the Fund's underweight exposure to emerging markets debt contributed to performance, as emerging markets equities relatively out-performed. However, the Fund's exposure to local currency emerging markets debt, which performed strongly during the reporting period as several emerging markets currencies rallied against the U.S. dollar, contributed to performance. The Fund's out-of-benchmark allocation to high yield bonds contributed to performance due to tightening spreads over the reporting period.

The Fund entered into foreign exchange forward contracts during the period under review. As of September 30, 2016, the Fund was net long Canadian dollar and net short the Euro, New Zealand dollar, Pound Sterling and U.S. dollar in order to hedge its currency exposure.

Certain series of the Fund, as applicable, make monthly distributions at a rate determined by AGFI from time to time. If the aggregate amount of the monthly distributions made to a series in a year exceeds the portion of the net income and net realized capital gains allocated to such series, the excess will constitute a return of capital. The portfolio manager does not believe that the distributions made by the Fund had a meaningful

This annual management report of fund performance contains financial highlights, but does not contain the complete annual financial statements of the investment fund. You can get a copy of the annual financial statements at your request, and at no cost, by calling 1 800 268-8583, by writing to us at AGF Investments Inc. 55 Standish Court, Suite 1050, Mississauga, Ontario, Canada L5R 0G3 attention: Client Services, or by visiting our website at www.agf.com or SEDAR at www.sedar.com.

Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

impact on the Fund's ability to implement its investment strategy or to fulfill its investment objectives.

The Fund had net subscriptions of approximately \$0.2 million for the current period, as compared to net redemptions of approximately \$20 million in the prior period. The portfolio manager does not believe that subscription/redemption activity had a meaningful impact on the Fund's performance or the ability to implement its investment strategy.

Total expenses before foreign withholding taxes, commissions and other portfolio transaction costs vary period over period mainly as a result of changes in average Net Asset Values (see Explanatory Note (1) a)) and investor activity, such as number of investor accounts and transactions. The decrease in management fees accounted for most of the decrease in expenses during the period as compared to the previous period. On the contrary, interest expense increased due to an increase in the number of overdraft positions throughout the period. All other expenses remained fairly consistent throughout the periods.

Recent Developments

While global growth remains lackluster, the portfolio manager remains constructive on global equities, particularly relative to government bonds and given a supportive fundamental backdrop, although future returns are expected to be modest. At current levels, valuations are not particularly demanding. The MSCI All Country World Index is trading at close to its long-run median with relatively attractive valuations in regions such as Japan and the emerging markets. Additionally, the portfolio manager believes that concerns over slowing global growth will continue to support the "lower for longer" interest rate theme for central banks and in turn support equities. In the portfolio manager's view, fiscal stimulus is also likely to be supportive of growth and boost market sentiment, in turn providing a potential momentum for equities. It is also worth noting that a number of countries in both developed markets (Japan, Spain and Italy) and emerging markets (China and Thailand) are implementing reforms that should benefit their economies over the long-term.

In the portfolio manager's opinion, some of the risks include upcoming elections and referendums in a number of countries in the Eurozone and in the U.S., which could contribute to capital market volatility. With interest rates at all-time lows, currency intervention has been increasingly used as a tool to bolster growth as seen in China with the devaluation of the Chinese Yuan. However, continued currency devaluations could also contribute to capital market volatility.

The portfolio manager expects bond yields to gradually move higher in the near term, supported by more favourable growth and inflation prospects as the economy continues to recover from weak growth during first half of 2016. However, the portfolio manager anticipates yields to remain in a low range as the global economy continues to experience anemic growth and central bank accommodations remain supportive.

In this environment, the portfolio manager believes that it is important to have a well-diversified and well-constructed portfolio. Country allocation will also remain key. In the portfolio manager's belief, the Fund is positioned to withstand volatility. A key tenet of portfolio manager's philosophy centers on economic value added ("EVA"), with sales growth, margins and asset turns as the main drivers of the process. The portfolio

manager remains focused on investing in companies that can create positive EVA and that are trading at attractive valuations.

Related Party Transactions

AGFI is the manager ("Manager") and trustee of the Fund. Pursuant to the management agreement between the Fund and AGFI, AGFI is responsible for the day-to-day business of the Fund. As indicated above, AGFI also acts as the investment (portfolio) manager, managing the investment portfolio of the Fund. The Fund was also party to an investment advisory agreement with AGFI and Highstreet Asset Management Inc. ("Highstreet"), wholly owned subsidiaries of AGF Management Limited. Effective July 22, 2016, Highstreet acts as an investment advisor and provides investment advisory services to the Fund. Under the management agreement, the Fund (except for Series O, Series Q and Series W Units, if applicable) pays management fees, calculated based on the Net Asset Value of the respective series of the Fund. Management fees of approximately \$2,614,000 were incurred by the Fund during the period ended September 30, 2016.

Effective February 15, 2016, AGF CustomerFirst Inc. ("AGFC"), a wholly owned subsidiary of AGF Management Limited, provides transfer agency services to the Fund pursuant to a services agreement with AGFI. Unitholder servicing and administrative fees of approximately \$197,000 incurred by the Fund were paid to AGFC for the period from February 15, 2016 to September 30, 2016.

Caution Regarding Forward-looking Statements

This report may contain forward-looking statements about the Fund, including its strategy, expected performance and condition. Forward-looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates" or negative versions thereof and similar expressions.

In addition, any statement that may be made concerning future performance, strategies or prospects, and possible future Fund action, is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to, among other things, risks, uncertainties and assumptions about the Fund and economic factors.

Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements made by the Fund. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, global equity and capital markets, business competition, technological change, changes in government regulations, unexpected judicial or regulatory proceedings, and catastrophic events.

It should be stressed that the above-mentioned list of factors is not exhaustive. You are encouraged to consider these and other factors carefully before making any investment decisions and you are urged to avoid placing undue reliance on forward-looking statements. Further, you should be aware of the fact that the Fund has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise, prior to the release of the next Management Report of Fund Performance.

Financial Highlights

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the past five years as applicable. The Fund adopted International Financial Reporting Standards ("IFRS") on October 1, 2014. All per unit information presented for the period ended September 30, 2014, including opening net assets, reflects retrospective adjustments in accordance with IFRS. Information for the periods prior to October 1, 2013 is derived from financial statements prepared in accordance with Canadian generally accepted accounting principles as defined in Part V of the CPA Handbook ("Canadian GAAP").

Explanatory Notes

(1) a) This information is derived from the Fund's audited annual financial statements. Prior to October 1, 2014, the net assets per unit presented in the financial statements ("Net Assets") differed from the net asset value per unit calculated for fund pricing purposes ("Net Asset Value"), due to differences in valuation techniques of certain investments as required under Canadian GAAP. The adoption of IFRS, effective October 1, 2014, has generally eliminated the difference between Net Assets per unit and Net Asset Value per unit.

For the purpose of comparability with the period ended September 30, 2016, total Net Asset Value and number of units outstanding presented for the period ended September 30, 2015 may have been adjusted to include certain transactions, if applicable. These adjustments have no effect on the Net Asset Value per unit.

b) The following series of the Fund commenced operations on the following dates, which represents the date upon which securities of a series were first made available for purchase by investors.

Mutual Fund Units	June 1988
Series F Units	October 2003
Series O Units	December 2007
Series T Units	August 2007
Series V Units	August 2007

- (2) Net Assets and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the financial period.
- (3) Distributions were paid in cash/reinvested in additional units of the Fund, or both. The computation of the distributions per unit does not take into account the management fee distributions (see note 5 below). The characterization of the distributions is based on management's estimate of the actual income for the year.
- (4) This is not a reconciliation of the beginning and ending Net Assets per unit.
- (5) The management expense ratio ("MER") of a particular series is calculated in accordance with National Instrument 81-106, based on all the expenses of the Fund (including Harmonized Sales Tax, Goods and Services Tax and interest, but excluding foreign withholding taxes, commissions and other portfolio transaction costs) and the Fund's proportionate share of the MER, if applicable, of the underlying funds and ETFs in which the Fund has invested, allocated to that series, expressed as an annualized percentage of average daily Net Asset Value of that series during the period.

AGFI may reduce the effective management fee payable by some unitholders by reducing the management fee it charges to the Fund and directing the Fund to make management fee distributions to these unitholders in amounts equal to the amounts of the management fee reduction. The MER does not take into account the reduction in management fees due to management fee distributions to unitholders.

- (6) AGFI waived certain fees or absorbed certain expenses otherwise payable by the Fund. The amount of expenses waived or absorbed is determined annually on a series by series basis at the discretion of AGFI and AGFI can terminate the waiver or absorption at any time.
- (7) The trading expense ratio ("TER") represents total commissions and other portfolio transaction costs, including the Fund's proportionate share of the commissions, if applicable, of the underlying funds and ETFs in which the Fund has invested, expressed as an annualized percentage of average daily Net Asset Value during the period.
- (8) The Fund's portfolio turnover rate ("PTR") indicates how actively the Fund's portfolio advisor manages its portfolio investments. A PTR of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's PTR in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

PTR is calculated based on the lesser of the cumulative cost of purchases or cumulative proceeds of sales divided by the average market value of the portfolio, excluding short-term investments.

(1), (2), (3), (4), (5), (6), (7) and (8) see Explanatory Notes

Management Fees

The Fund is managed by AGFI. As a result of providing investment and management services, AGFI receives a monthly management fee, based on the Net Asset Value of the respective series, calculated daily and payable monthly. Management fees in respect of Series O, Series Q and Series W Units, if applicable, are arranged directly between the Manager and investors and are not expenses of the Fund. AGFI uses these management fees to pay for sales and trailing commissions to registered dealers on the distribution of the Fund's units, investment advice, as well as for general administrative expenses such as overhead, salaries, rent, legal and accounting fees relating to AGFI's role as manager.

	As a percentage of management fees		
	Annual rates	Dealer compensation	General administration and investment advice
Mutual Fund Units	2.00%	38.31%	61.69%
Series F Units	1.00%	—	100.00%
Series T Units	2.00%	42.96%	57.04%
Series V Units	2.00%	59.64%	40.36%

Past Performance*

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional securities of the Fund. Note that the performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. How the Fund has performed in the past does not necessarily indicate how it will perform in the future.

It is AGFI's policy to report rates of return for series in existence greater than one year. The performance start date for each series represents the date of the first purchase of such series, excluding seed money.

All rates of return are calculated based on the Net Asset Value.

Year-By-Year Returns

The following bar charts show the Fund's annual performance for each of the past 10 years to September 30, 2016 as applicable, and illustrate how the Fund's performance has changed from year to year. The charts show, in percentage terms, how much an investment made on the first day of each financial period would have grown or decreased by the last day of each financial period.

Mutual Fund Units

Series F Units

Series O Units

Performance for 2008 represents returns for the period from December 10, 2007 to September 30, 2008.

Series T Units

Performance for 2007 represents returns for the period from August 27, 2007 to September 30, 2007.

Series V Units

Performance for 2007 represents returns for the period from August 24, 2007 to September 30, 2007.

* The indicated rates of return shown here are the historical annual compounded total returns including changes in security value and reinvestment of all distributions and do not take into account sales, redemption, distribution or other optional charges by any securityholder that would have reduced returns or performance. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated.

Annual Compound Returns

The following table compares the historical annual compound returns for each series with the indices, for each of the periods ended September 30, 2016.

Percentage Return:	1 Year	3 Years	5 Years	10 Years	Since Inception
Mutual Fund Units	8.8	9.4	11.2	1.0	N/A
MSCI All Country World Index	11.0	14.6	16.4	6.6	N/A
Bloomberg Barclays Global Aggregate Index	7.3	10.7	6.4	6.0	N/A
Blended Benchmark	10.2	13.6	13.5	6.7	N/A
Series F Units	10.2	10.7	12.5	2.1	N/A
MSCI All Country World Index	11.0	14.6	16.4	6.6	N/A
Bloomberg Barclays Global Aggregate Index	7.3	10.7	6.4	6.0	N/A
Blended Benchmark	10.2	13.6	13.5	6.7	N/A
Series O Units	11.7	12.3	14.1	N/A	3.1
MSCI All Country World Index	11.0	14.6	16.4	N/A	5.9
Bloomberg Barclays Global Aggregate Index	7.3	10.7	6.4	N/A	6.7
Blended Benchmark	10.2	13.6	13.5	N/A	7.0
Series T Units	9.0	9.6	11.3	N/A	0.5
MSCI All Country World Index	11.0	14.6	16.4	N/A	6.1
Bloomberg Barclays Global Aggregate Index	7.3	10.7	6.4	N/A	6.6
Blended Benchmark	10.2	13.6	13.5	N/A	6.5
Series V Units	8.8	9.4	11.2	N/A	0.5
MSCI All Country World Index	11.0	14.6	16.4	N/A	6.1
Bloomberg Barclays Global Aggregate Index	7.3	10.7	6.4	N/A	6.6
Blended Benchmark	10.2	13.6	13.5	N/A	6.5

The MSCI All Country World Index is a free float-adjusted market capitalization-weighted index that is designed to measure the equity market performance of developed and emerging markets.

The Bloomberg Barclays Global Aggregate Index provides a broad-based measure of the global investment grade fixed income markets.

For a discussion of the relative performance of the Fund as compared to the indices, see Results of Operations in the Management Discussion of Fund Performance.

Summary of Investment Portfolio

As at September 30, 2016

The major portfolio categories and top holdings (up to 25) of the Fund at the end of the period are indicated in the following tables. The Summary of Investment Portfolio may change due to ongoing portfolio transactions of the Fund and the next quarterly update will be in the Quarterly Portfolio Disclosure as at December 31, 2016.

The prospectus and other information about the underlying investment funds are available on the internet at www.sedar.com.
