

ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE

# AGF Diversified Income Class

SEPTEMBER 30, 2016

What are you doing after work?®

## Management Discussion of Fund Performance

This management discussion of fund performance represents the portfolio management team's view of the significant factors and developments affecting the fund's performance and outlook.

### Investment Objective and Strategies

As described in the Simplified Prospectus, the investment objective of AGF Diversified Income Class (the "Fund") is to achieve a high level of current income and long-term growth of capital. To achieve this objective, AGF Investments Inc. ("AGFI"), as portfolio manager, primarily invests the Fund in units of AGF Diversified Income Fund (the "Underlying Fund"). The Underlying Fund invests primarily in a diversified portfolio of income, dividend and distribution paying Canadian securities including common shares, income trusts and other types of equity and fixed income securities. The portfolio manager of the Underlying Fund looks for securities with a history of steady interest, dividend or distribution payouts and whether such securities have the ability to sustain payouts for a reasonable period of time and are favourably priced with respect to these payout expectations. In periods of unusual market conditions, a significant portion of the Fund's assets may be held in cash or fixed income securities.

### Risk

The risks of investing in the Fund remain as disclosed in the current prospectus. The principal risks associated with the Fund are changes in legislation risk, class risk, concentration risk, counterparty risk, credit risk, depository securities and receipts risk, derivative risk, equity risk, exchange traded fund ("ETF") general risks, ETF index risks, ETF industry sector risk, foreign currency risk, foreign market risk, gold and silver ETFs risk, interest rate risk, liquidity risk, repurchase agreement risk, reverse repurchase agreement risk, securities lending risk, substantial securityholder risk and underlying fund risk. The Fund is suitable for investors investing for the medium to long-term, who are income-oriented and have low to medium tolerance for risk.

### Results of Operations

For the year ended September 30, 2016, the Mutual Fund Shares of the Fund returned 4.6% (net of expenses) while the FTSE TMX Canada Universe Bond Index ("FTSE TMX Universe Bond Index") and the Blended Benchmark returned 6.3% and 9.9%, respectively. The Blended Benchmark is composed of 50% FTSE TMX Universe Bond Index/25% Bloomberg Barclays U.S. Corporate High-Yield Bond Index (local\$) (formerly, Barclays Capital U.S. Corporate High-Yield Bond Index (local\$))/15% MSCI All Country World Index (local\$)/10% S&P/TSX Composite Index. The performance of the other series of the Fund is substantially similar to that of Mutual Fund Shares, save for differences in expense structure. Refer to "Past Performance" section for the performance information of such series.

The Fund holds Series S Units of the Underlying Fund, a fund managed by AGFI. The discussion below references performance figures of Mutual Fund Units of the Underlying Fund. The performance of Series S Units is substantially similar to that of the Mutual Fund Units, save for differences in expense structure.

The Fund under-performed the FTSE TMX Universe Bond Index due to security selection in the Underlying Fund, while this was partially offset by the Underlying Fund's overall inclusion of equities, high yield bonds and convertible bonds as these securities out-performed. In addition, the Underlying Fund's lower exposure to provincial bonds also detracted from relative performance. As a result of the Canadian dollar appreciation over the reporting period, the Underlying Fund's inclusion of the U.S. dollar detracted from performance. The Underlying Fund's slightly shorter duration stance relative to the FTSE TMX Universe Bond Index also detracted as a result of declining bond yields over the reporting period. Duration exposure is the sensitivity of the portfolio due to changes in interest rates.

The Fund under-performed the Blended Benchmark due to the inclusion of convertible bonds in the Underlying Fund, which generally under-performed the Blended Benchmark during the reporting period. The Underlying Fund's modest U.S. dollar exposure and shorter duration stance relative to the Blended Benchmark also detracted from performance as the Canadian dollar appreciated relative to the U.S. dollar and yields declined during the reporting period. While the Underlying Fund's slightly higher exposure to high yield bonds contributed positively as spreads tightened during the reporting period, the Underlying Fund's lower exposure to Canadian equities detracted as a result of their out-performance during the period.

The Underlying Fund entered into foreign exchange forward contracts during the period under review. As of September 30, 2016, the Underlying Fund was long Canadian dollar and short Euro, Pound Sterling, Japanese Yen and U.S. dollar in order to hedge its currency exposure.

The Fund had net subscriptions of approximately \$6 million for the current period, as compared to net subscriptions of approximately \$4 million in the prior period. The portfolio manager does not believe that subscription activity had a meaningful impact on the Fund's performance or the ability to implement its investment strategy.

Total expenses before foreign withholding taxes, commissions and other portfolio transaction costs vary period over period mainly as a result of changes in average Net Asset Values (see Explanatory Note (1) a)) and investor activity, such as number of investor accounts and transactions. The decrease in management fees accounted for most of the decrease in expenses during the period when compared to the previous period due to a decrease in average Net Asset Values. On the contrary, custodian fees increased due to the change in third party service provider during the current period. Registration fees increased due to an increase in subscription activity and interest expense increased due to an increase in

This annual management report of fund performance contains financial highlights, but does not contain the complete annual financial statements of the investment fund. You can get a copy of the annual financial statements at your request, and at no cost, by calling 1 800 268-8583, by writing to us at AGF Investments Inc. 55 Standish Court, Suite 1050, Mississauga, Ontario, Canada L5R 0G3 attention: Client Services, or by visiting our website at [www.agf.com](http://www.agf.com) or SEDAR at [www.sedar.com](http://www.sedar.com).

Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

the number of overdraft positions throughout the period. All other expenses remained fairly consistent throughout the periods.

## Recent Developments

The economic fallout following the Brexit vote towards the end of June 2016 has generally been milder than feared, resulting in economic and market conditions that have been better than expected. However, by the end of the reporting period, it was anticipated that Article 50 (which formally starts the process of the UK's exit from the European Union) will be enacted by early 2017. The portfolio manager will be closely monitoring the situation as it continues to unfold.

While the U.S. Federal Reserve did not hike rates at its September meeting, the portfolio manager believes they will raise in December 2016 as underlying data are likely to hold up strongly enough to support it. The Bank of Japan's shift in monetary policy allows the bank to be more flexible and potentially support more sustainable growth over the long-term.

In the portfolio manager's view, ongoing political risk may result in mixed investor sentiment and could potentially weigh on financial markets going forward, particularly with the U.S. elections in November 2016. The Italian referendum in December 2016 and European Union elections in 2017 also pose medium term risks.

As a number of central banks are potentially approaching their limits on monetary policy, a number of countries have announced plans to implement expansionary fiscal policy, which is likely to be supportive of growth in the medium term. Countries such as Canada, Japan and South Korea have announced fiscal packages, while others such as the U.S. and the UK are likely to follow. While near-term growth may improve, the portfolio manager believes longer term benefits will depend on how effectively those policies are deployed. Historically, government spending has not been as productive or supportive of gross domestic product growth as private sector spending, although refurbishing of aging infrastructure does present an opportunity to enhance productivity.

In the near term, the portfolio manager expects bond yields to gradually move higher, supported by more favourable growth and inflation prospects as the economy continues to recover from weak growth earlier in calendar year 2016. However, the portfolio manager anticipates yields to remain in a low range as the global economy continues to experience anemic growth and central bank accommodation remains supportive.

The portfolio manager's outlook is currently neutral as riskier asset classes have rebounded significantly off their mid-February 2016 lows, making valuations somewhat less attractive. Consequently, the portfolio manager remains more neutral on high yield bonds and maintains an overweight allocation to higher quality, investment grade corporate bonds in the Underlying Fund. While equities may benefit from monetary and fiscal stimulus as economic activity improves, the portfolio manager's longer term outlook is more restrained due to higher than normal valuations and lacklustre growth prospects due in part to high debt levels.

On March 22, 2016, the federal budget announced proposals to amend the Income Tax Act (Canada) so that conversions of shares between two classes of a mutual fund corporation (including AGF All World Tax

Advantage Group Limited) will be treated as a disposition of shares at their fair market value if the conversion occurs after September 2016. On July 29, 2016, the Department of Finance Canada released draft tax legislation that extended the effective date from October 1, 2016 to January 1, 2017. Until the proposed amendments become effective, conversions between the Fund and other classes within AGF All World Tax Advantage Group Limited will continue to occur on a tax-deferred basis.

## Related Party Transactions

AGFI is the manager ("Manager") of the Fund. Pursuant to the management agreement between the Fund and AGFI, AGFI is responsible for the day-to-day business of the Fund. As indicated above, AGFI also acts as the investment (portfolio) manager, managing the investment portfolio of the Fund. Under the management agreement, the Fund (except for Series O, Series Q and Series W Shares, if applicable) pays management fees, calculated based on the Net Asset Value of the respective series of the Fund. Management fees of approximately \$683,000 were incurred by the Fund during the period ended September 30, 2016.

Effective February 15, 2016, AGF CustomerFirst Inc. ("AGFC"), a wholly owned subsidiary of AGF Management Limited, provides transfer agency services to the Fund pursuant to a services agreement with AGFI. Shareholder servicing and administrative fees of approximately \$11,000 incurred by the Fund were paid to AGFC for the period from February 15, 2016 to September 30, 2016.

## Caution Regarding Forward-looking Statements

This report may contain forward-looking statements about the Fund, including its strategy, expected performance and condition. Forward-looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates" or negative versions thereof and similar expressions.

In addition, any statement that may be made concerning future performance, strategies or prospects, and possible future Fund action, is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to, among other things, risks, uncertainties and assumptions about the Fund and economic factors.

Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements made by the Fund. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, global equity and capital markets, business competition, technological change, changes in government regulations, unexpected judicial or regulatory proceedings, and catastrophic events.

It should be stressed that the above-mentioned list of factors is not exhaustive. You are encouraged to consider these and other factors carefully before making any investment decisions and you are urged to avoid placing undue reliance on forward-looking statements. Further, you

# AGF Diversified Income Class

## (CLASS OF AGF ALL WORLD TAX ADVANTAGE GROUP LIMITED)

SEPTEMBER 30, 2016

should be aware of the fact that the Fund has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise, prior to the release of the next Management Report of Fund Performance.

## Financial Highlights

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the past five years as applicable. The Fund adopted International Financial Reporting Standards ("IFRS") on October 1, 2014. All per share information presented for the period ended September 30, 2014, including opening net assets, reflects retrospective adjustments in accordance with IFRS. Information for the periods prior to October 1, 2013 is derived from financial statements prepared in accordance with Canadian generally accepted accounting principles as defined in Part V of the CPA Handbook ("Canadian GAAP").

### Explanatory Notes

(1) a) This information is derived from the Fund's audited annual financial statements. Prior to October 1, 2014, the net assets per share presented in the financial statements ("Net Assets") was calculated using different valuation techniques for certain investments as required under Canadian GAAP. This had no impact on the Net Assets per share since the series net asset value per unit calculated for fund pricing purposes ("Net Asset Value") of the Underlying Fund held was the most readily and regularly available price as no bid prices were available. This remains unchanged with the adoption of IFRS effective October 1, 2014.

For the purpose of comparability with the period ended September 30, 2016, total Net Asset Value and number of shares outstanding presented for the period ended September 30, 2015 may have been adjusted to include certain transactions, if applicable. These adjustments have no effect on the Net Asset Value per share.

b) The following series of the Fund commenced operations on the following dates, which represents the date upon which securities of a series were first made available for purchase by investors.

Mutual Fund Shares	August 2007
Series F Shares	August 2007
Series O Shares	April 2016
Series Q Shares	December 2012

c) On October 1, 2011, shareholders of each of the outstanding classes of AGF All World Tax Advantage Group Limited formed by articles of amalgamation dated October 1, 2010 and two outstanding classes (Acuity Diversified Income Class and Acuity High Income Class) of Acuity Corporate Class Ltd. (the

"Amalgamating Funds") amalgamated under the Business Corporations Act (Ontario) to form a new amalgamated corporation ("New Tax Advantage Group").

Pursuant to the amalgamation, shareholders of each of the Amalgamating Funds became shareholders of separate classes of New Tax Advantage Group. Shareholders of Acuity Diversified Income Class became shareholders of a new class of New Tax Advantage Group, named AGF Diversified Income Class. The amalgamation was effected by way of merger, with shares of each of the Amalgamating Funds exchanged on a one for one ratio for shares of new classes of New Tax Advantage Group. Each of the new classes of New Tax Advantage Group represents continuation of the predecessor fund.

d) On May 23, 2014, AGF High Income Class of New Tax Advantage Group merged into the Fund. The financial data of the Fund includes the results of operations of AGF High Income Class from the date of the merger.

- Net Assets, dividends and distributions are based on the actual number of shares outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of shares outstanding over the financial period.
- Dividends and distributions were paid in cash/reinvested in additional shares of the Fund, or both.
- This is not a reconciliation of the beginning and ending Net Assets per share.
- The management expense ratio ("MER") of a particular series is calculated in accordance with National Instrument 81-106, based on all the expenses of the Fund (including Harmonized Sales Tax, Goods and Services Tax, income tax and interest, but excluding foreign withholding taxes, commissions and other portfolio transaction costs) attributable to that series, expressed as an annualized percentage of average daily Net Asset Value of that series during the period.

As a result of the Fund's investment in the Underlying Fund, the MER is calculated based on the expenses of the Fund allocated to that series, including expenses indirectly incurred by the Fund attributable to its investment in the Underlying Fund, divided by the average daily Net Asset Value of the series of the Fund during the period.

The Fund does not pay duplicate management fees on the portion of the assets that it invests in the Underlying Fund. Accordingly, AGFI will waive the management fees payable or paid by the Underlying Fund in order to avoid such duplication.

- AGFI waived certain fees or absorbed certain expenses otherwise payable by the Fund. The amount of expenses waived or absorbed is determined annually on a series by series basis at the discretion of AGFI and AGFI can terminate the waiver or absorption at any time.
- The trading expense ratio ("TER") represents total commissions and other portfolio transaction costs expressed as an annualized percentage of average daily Net Asset Value during the period. As a result of the Fund's investment in the Underlying Fund, the TER is calculated based on commissions and other portfolio transaction costs of the Fund, including such costs that are indirectly incurred by the Fund attributable to its investment in the Underlying Fund, divided by the average daily Net Asset Value of the Fund during the period.
- The Fund's portfolio turnover rate ("PTR") indicates how actively the Fund's portfolio advisor manages its portfolio investments. A PTR of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's PTR

\* represents initial Net Assets  
~ annualized

(1), (2), (3), (4), (5), (6), (7) and (8) see Explanatory Notes

# AGF Diversified Income Class

## (CLASS OF AGF ALL WORLD TAX ADVANTAGE GROUP LIMITED)

SEPTEMBER 30, 2016

in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

PTR is calculated based on the lesser of the cumulative cost of purchases or cumulative proceeds of sales divided by the average market value of the portfolio, excluding short-term investments.

### Management Fees

The Fund is managed by AGFI. As a result of providing investment and management services, AGFI receives a monthly management fee, based on the Net Asset Value of the respective series, calculated daily and payable monthly. Management fees in respect of Series O, Series Q and Series W Shares, if applicable, are arranged directly between the Manager and investors and are not expenses of the Fund. AGFI uses these management fees to pay for sales and trailing commissions to registered dealers on the distribution of the Fund's shares, investment advice, as well as for general administrative expenses such as overhead, salaries, rent, legal and accounting fees relating to AGFI's role as manager.

	As a percentage of management fees		
	Annual rates	Dealer compensation	General administration and investment advice
Mutual Fund Shares	2.35%	43.84%	56.16%
Series F Shares	0.90%	–	100.00%

### Past Performance\*

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional securities of the Fund. Note that the performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. How the Fund has performed in the past does not necessarily indicate how it will perform in the future.

Performance information for each of the past 5 periods to September 30, 2011, represents that of Acuity Diversified Income Class.

It is AGFI's policy to report rates of return for series in existence greater than one year. The performance start date for each series represents the date of the first purchase of such series, excluding seed money. Series O Shares commenced operations in April 2016. During the ten year period ended September 30, 2016, certain other funds with similar investment objectives merged into the Fund. Generally, for fund mergers, the continuing fund is considered a new fund for the purpose of calculating rates of return and therefore, the rates of return have not been provided for the period of the merger and previous periods. However, the merger of AGF High Income Class with the Fund (see Explanatory Note (1) d)) did not constitute a material change to the Fund and accordingly did not impact the ability of the Fund to maintain its historical performance.

All rates of return are calculated based on the Net Asset Value.

### Year-By-Year Returns

The following bar charts show the Fund's annual performance for each of the past 10 years to September 30, 2016, as applicable, and illustrate how the Fund's performance has changed from year to year. The charts show, in percentage terms, how much an investment made on the first day of each financial period would have grown or decreased by the last day of each financial period.

Annual performance prior to 2011 represents returns for the twelve month period ended December 31. Performance for 2011 represents returns for the period from January 1, 2011 to September 30, 2011. Annual performance for 2012 and thereafter represents returns for the twelve month period ended September 30.

### Mutual Fund Shares

Performance for 2007 represents returns for the period from August 27, 2007 to December 31, 2007.

### Series F Shares

Performance for 2007 represents returns for the period from August 27, 2007 to December 31, 2007.

### Series Q Shares

Performance for 2013 represents returns for the period from January 23, 2013 to September 30, 2013.

\* The indicated rates of return shown here are the historical annual compounded total returns including changes in security value and reinvestment of all distributions and do not take into account sales, redemption, distribution or other optional charges by any securityholder that would have reduced returns or performance. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated.

## Annual Compound Returns

The following table compares the historical annual compound returns for each series with the indices, for each of the periods ended September 30, 2016.

Percentage Return:	1 Year	3 Years	5 Years	10 Years	Since Inception
Mutual Fund Shares	4.6	5.4	5.6	N/A	0.1
FTSE TMX Canada Universe Bond Index	6.3	6.0	4.4	N/A	5.6
Blended Benchmark	9.9	6.2	6.7	N/A	5.5
Old Blended Benchmark	9.9	6.4	6.5	N/A	5.5
Series F Shares	6.4	6.9	6.9	N/A	1.2
FTSE TMX Canada Universe Bond Index	6.3	6.0	4.4	N/A	5.6
Blended Benchmark	9.9	6.2	6.7	N/A	5.5
Old Blended Benchmark	9.9	6.4	6.5	N/A	5.5
Series Q Shares	7.7	8.5	N/A	N/A	7.3
FTSE TMX Canada Universe Bond Index	6.3	6.0	N/A	N/A	4.4
Blended Benchmark	9.9	6.2	N/A	N/A	5.4
Old Blended Benchmark	9.9	6.4	N/A	N/A	5.5

Effective June 1, 2016, the Fund's Old Blended Benchmark, which comprised 50% FTSE TMX Canada Universe Bond Index/20% Bloomberg Barclays U.S. Corporate High-Yield Bond Index (local\$)/15% S&P/TSX Composite Index/5% FTSE TMX Canada High Yield Bond Index/5% MSCI All Country World Index (local\$)/5% MSCI World REIT Net Index (local\$) was changed to the Blended Benchmark to better reflect the investment opportunity set of the Fund.

The FTSE TMX Canada Universe Bond Index is a market capitalization-weighted index designed to be a broad measure of the Canadian investment grade fixed income market.

The Bloomberg Barclays U.S. Corporate High-Yield Bond Index (local\$) measures the U.S. dollar denominated, high yield, fixed-rate corporate bond market. This variation is denominated in U.S. dollars.

The MSCI All Country World Index (local\$) is a free float-adjusted market capitalization-weighted index that is designed to measure the equity market performance of developed and emerging markets. This variation is denominated in U.S. dollars.

The S&P/TSX Composite Index is a capitalization-weighted index designed to measure market activity of stocks and trusts listed on the Toronto Stock Exchange.

The FTSE TMX Canada High Yield Bond Index is a market capitalization-weighted index designed to be a broad measure of the Canadian non-investment grade fixed income market.

The MSCI World REIT Net Index (local\$) is a free float-adjusted market capitalization index that captures large and mid cap representation across 23 developed markets around the world. This variation is denominated in U.S. dollars.

For a discussion of the relative performance of the Fund as compared to the indices, see Results of Operations in the Management Discussion of Fund Performance.

## Summary of Investment Portfolio

As at September 30, 2016

The major portfolio categories and top holdings (up to 25) of the Underlying Fund at the end of the period are indicated in the following tables. The Summary of Investment Portfolio may change due to ongoing portfolio transactions of the Underlying Fund and the next quarterly update will be in the Quarterly Portfolio Disclosure as at December 31, 2016.

The prospectus and other information about the Underlying Fund is available on the internet at [www.sedar.com](http://www.sedar.com).
