

INTERIM MANAGEMENT REPORT OF FUND PERFORMANCE

AGF American Growth Class

MARCH 31, 2017

Management Discussion of Fund Performance

This management discussion of fund performance represents the portfolio management team's view of the significant factors and developments affecting the fund's performance and outlook.

Results of Operations

For the six months ended March 31, 2017, the Mutual Fund Shares of AGF American Growth Class (the "Fund") returned 11.0% (net of expenses) while the S&P 500 Net Return Index ("S&P 500 Net Index") returned 11.3%. The performance of the other series of the Fund is substantially similar to that of the Mutual Fund Shares, save for differences in expense structure. Refer to "Past Performance" section for performance information of such series.

The Fund slightly under-performed the S&P 500 Net Index over the period under review. The Fund's negative security selection in the industrials, consumer discretionary and health care sectors detracted from relative performance, while partially offset by strong security selection in the information technology, telecommunication services and financials sectors.

In terms of individual holdings, the top contributors to performance were NVIDIA Corporation, T-Mobile US Inc. and Primerica Inc., while the top detractors were Edwards Lifesciences Corporation, Constellation Brands Inc. and American Tower Corporation. As of March 31, 2017, the Fund no longer had any holdings in Constellation Brands Inc. and American Tower Corporation.

Certain series of the Fund, as applicable, make monthly distributions of capital at a rate determined by AGF Investments Inc. ("AGFI") from time to time. The portfolio manager does not believe that the distributions made by the Fund had a meaningful impact on the Fund's ability to implement its investment strategy or to fulfill its investment objectives.

The Fund had net subscriptions of approximately \$5 million for the current period, as compared to net subscriptions of approximately \$112 million in the prior period. The portfolio manager does not believe that subscription activity had a meaningful impact on the Fund's performance or the ability to implement its investment strategy.

Total expenses before foreign withholding taxes, commissions and other portfolio transaction costs vary period over period mainly as a result of changes in average Net Asset Values (see Explanatory Note (1) a)) and investor activity, such as number of investor accounts and transactions. Expenses have increased as compared to the previous period due mainly to an increase in average Net Asset Values. Custodian fees increased due to an increase in market value of investment portfolio. On the contrary, annual and interim reports decreased due to a decrease in investor activity. The increase in audit fees and registration fees and decrease in

interest expense were due to variances between the accrued amounts versus the actual expenses incurred in the previous period. All other expenses remained fairly consistent throughout the periods.

Recent Developments

Global equity markets rallied strongly during the period under review. During the last calendar quarter of 2016, global equities made new highs following the U.S. election in early November. As was the case with the Brexit vote in the UK in June 2016, a wave of populism resulted in an election surprise for investors, with underdog Republican candidate Donald Trump winning the U.S. presidency. After some initial signs of tumult during election night with Dow futures down as much as 800 points, equity markets rebounded with conviction as markets welcomed Trump's plans for tax reform and fiscal stimulus. The surprise election result also triggered substantial shifts in allocations, as bond yields moved higher in quick fashion as investors contemplated the prospect of higher inflation resulting from the expected fiscal stimulus. Financials, oil and gas, and defense stocks were generally among the winners, while renewable energy and interest rate sensitive stocks were among the losers.

In the first calendar quarter of 2017, global equities continued to move higher, continuing the rally that followed the U.S. election in November. However, leadership in the market shifted as the reflation trade that followed the election of Trump to the U.S. presidency in late 2016 waned, with financials and cyclical leadership giving way to secular growth sectors. As such, portfolios with growth investment styles performed relatively better than in late 2016 when growth severely under-performed value.

From a macroeconomic perspective, economic data remained supportive and in some cases, saw acceleration. In the U.S., non-farm payrolls exceeded market expectations for January and February 2017, averaging 231,000 gains per month which was well above consensus and the pace in calendar year 2016. Meanwhile, the Institute for Supply Management's ("ISM") manufacturing purchasing managers' index ("PMI") continued to accelerate well into expansion territory, hitting a high of 57.7 in February 2017 before settling at 57.2 in March 2017. The PMI measures the economic health of the manufacturing sector and is compiled based on new orders, inventory levels, production, supplier deliveries and employment environment. An index reading above 50.0 indicates an overall increase in the sector and below 50.0 indicates an overall decrease. Similarly, the services sector remained robust with the ISM non-manufacturing PMI at 55.2 in March 2017, signalling strong expansion conditions. In response to the strong macroeconomic data, the U.S. Federal Reserve raised the federal funds rate for a third time this cycle in March 2017, while telegraphing more rate hikes to come in calendar year 2017.

Overall, the portfolio manager remains bullish, but with caution as a

This interim management report of fund performance contains financial highlights, but does not contain either the interim or annual financial statements of the investment fund. You can get a copy of the interim or annual financial statements at your request, and at no cost, by calling 1 800 268-8583, by writing to us at AGF Investments Inc. 55 Standish Court, Suite 1050, Mississauga, Ontario, Canada L5R 0G3 attention: Client Services, or by visiting our website at www.agf.com or SEDAR at www.sedar.com.

Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

building of near term risks is seen which may result in short-term volatility. Given the sizable rally that the market has already experienced, the portfolio manager believes a correction will inevitably emerge at some point and may be triggered by factors such as additional rate hikes, delay of implementation of legislative initiatives, policy mishaps including trade protectionism, European election results, or simply the end of the most seasonally favourable time for equities.

However, the portfolio manager's view is to stay long the market and to use corrections as buying opportunities, as there remains more scope for continued economic expansion and an extended bull market rally. The portfolio manager believes much of the current expansion was spent recovering lost ground during one of the worst recessions in history in 2008, and that this cycle's sub-par growth has meant that an environment with investor exuberance and systemic imbalances that have historically signalled the end of a cycle has not yet arrived.

Indeed, investor sentiment for U.S. equities remains fairly tempered, with a combined \$70 billion in redemptions from U.S. domestic equity mutual funds and exchange traded funds in calendar year 2016. This condition is not consistent with market peaks, which generally occur amidst investor euphoria. Thus, the portfolio manager views the current environment of high levels of investor skepticism and a lack of retail participation in the market as a sign that the current cycle has yet to run its course.

The portfolio manager continues to focus on the fundamentals of companies in the portfolio, seeking out dynamic growth opportunities that are believed to be well-positioned to benefit from secular themes, such as cloud, social media and e-commerce. In the portfolio manager's opinion, these companies that are capturing market share and delivering superior growth will out-perform and deliver alpha to shareholders over the long-term. Alpha is the excess return of the portfolio over the benchmark.

Effective January 1, 2017, the conversion of shares between two classes of a mutual fund corporation (including AGF All World Tax Advantage Group Limited) is treated as a disposition of shares at their fair market value as a result of amendments to the Income Tax Act (Canada). Previously, conversions between the Fund and other classes within AGF All World Tax Advantage Group Limited occurred on a tax-deferred basis.

Related Party Transactions

AGFI is the manager ("Manager") of the Fund. Pursuant to the management agreement between the Fund and AGFI, AGFI is responsible for the day-to-day business of the Fund. AGFI also acts as the investment (portfolio) manager, managing the investment portfolio of the Fund. Under the management agreement, the Fund (except for Series I, Series O, Series Q and Series W Shares, if applicable) pays management fees, calculated based on the Net Asset Value of the respective series of the Fund. Management fees of approximately \$9,388,000 were incurred by the Fund during the six month period ended March 31, 2017.

AGF CustomerFirst Inc. ("AGFC") provides transfer agency services to the Fund pursuant to a services agreement with AGFI. Shareholder servicing and administrative fees of approximately \$771,000 were incurred by the Fund during the six month period ended March 31, 2017.

AGFI and AGFC are indirect wholly-owned subsidiaries of AGF Management Limited.

Caution Regarding Forward-looking Statements

This report may contain forward-looking statements about the Fund, including its strategy, expected performance and condition. Forward-looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates" or negative versions thereof and similar expressions.

In addition, any statement that may be made concerning future performance, strategies or prospects, and possible future Fund action, is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to, among other things, risks, uncertainties and assumptions about the Fund and economic factors.

The forward-looking statements are by their nature based on numerous assumptions, which include, amongst other things, that (i) the Fund can attract and maintain investors and has sufficient capital under management to effect its investment strategies, (ii) the investment strategies will produce the results intended by the portfolio manager, and (iii) the markets will react and perform in a manner consistent with the investment strategies. Although the forward-looking statements contained herein are based upon what the portfolio manager believes to be reasonable assumptions, the portfolio manager cannot assure that actual results will be consistent with these forward-looking statements.

Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements made by the Fund. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, global equity and capital markets, business competition, technological change, changes in government regulations, unexpected judicial or regulatory proceedings, and catastrophic events.

It should be stressed that the above-mentioned list of factors is not exhaustive. You are encouraged to consider these and other factors carefully before making any investment decisions and you are urged to avoid placing undue reliance on forward-looking statements. Further, you should be aware of the fact that the Fund has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise, prior to the release of the next Management Report of Fund Performance.

Financial Highlights

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the six months ended March 31, 2017 and the past five years as applicable. The Fund adopted International Financial Reporting Standards ("IFRS") on October 1, 2014. All per share information presented for the period ended September 30, 2014, including opening net assets, reflects retrospective adjustments in accordance with IFRS. Information for the periods prior to October 1, 2013 is derived from financial statements prepared in accordance with Canadian generally accepted accounting principles as defined in Part V of the CPA Handbook ("Canadian GAAP").

(1), (2), (3), (4), (5), (6), (7) and (8) see Explanatory Notes

Explanatory Notes

(1) a) This information is derived from the Fund's audited annual financial statements and unaudited interim financial statements. Prior to October 1, 2014, the net assets per share presented in the financial statements ("Net Assets") differed from the net asset value per share calculated for fund pricing purposes ("Net Asset Value"), due to differences in valuation techniques of certain investments as required under Canadian GAAP. The adoption of IFRS, effective October 1, 2014, has generally eliminated the difference between Net Assets per share and Net Asset Value per share.

Total Net Asset Value and number of shares outstanding presented as at September 30, 2015 may have been adjusted to include certain transactions, if applicable, for the purpose of comparability with subsequent reporting periods. These adjustments have no effect on the Net Asset Value per share.

b) The following series of the Fund commenced operations on the following dates, which represents the date upon which securities of a series were first made available for purchase by investors.

Mutual Fund Shares	April 1957
Series D Shares	April 2003
Series F Shares	January 2000
Series I Shares	October 2016
Series O Shares	November 2003
Series Q Shares	December 2012
Series T Shares	April 2009
Series V Shares	April 2009

c) On October 1, 2011, shareholders of each of the outstanding classes of AGF All World Tax Advantage Group formed by articles of amalgamation dated October 1, 2010 (including the Fund) and two outstanding classes (Acuity Diversified Income Class and Acuity High Income Class) of Acuity Corporate Class Ltd. (the "Amalgamating Funds") amalgamated under the Business Corporations Act (Ontario) to form a new amalgamated corporation ("New Tax Advantage Group").

Pursuant to the amalgamation above, shareholders of each of the Amalgamating Funds became shareholders of separate classes of New Tax Advantage Group. The amalgamation was effected by way of merger, with shares of each of the Amalgamating Funds exchanged on a one for one ratio for shares of new classes of New Tax Advantage Group. Each of the new classes of New Tax Advantage Group represents continuation of the predecessor fund.

(2) Net Assets, dividends and distributions are based on the actual number of shares outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of shares outstanding over the financial period.

(3) Dividends and distributions were paid in cash/reinvested in additional shares of the Fund, or both.

Series T and Series V Shares of the Fund may make monthly distributions of capital so long as there is sufficient capital attributable to those series. The capital per share of the Series T and Series V Shares as applicable, is as follows:

As at	Mar 31, 2017 (\$)	Sept 30, 2016 (\$)	Sept 30, 2015 (\$)	Sept 30, 2014 (\$)	Sept 30, 2013 (\$)	Sept 30, 2012 (\$)
Series T Shares	16.25	13.65	14.55	14.09	13.90	14.25
Series V Shares	19.53	18.75	18.03	17.44	15.02	14.65

(4) This is not a reconciliation of the beginning and ending Net Assets per share.

(5) The management expense ratio ("MER") of a particular series is calculated in accordance with National Instrument 81-106, based on all the expenses of the Fund (including Harmonized Sales Tax, Goods and Services Tax, income tax and interest, but excluding foreign withholding taxes, commissions and other portfolio transaction costs) and the Fund's proportionate share of the MER, if applicable, of the underlying funds and exchange traded funds ("ETFs") in which the Fund has invested, attributable to that series, expressed as an annualized percentage of average daily Net Asset Value of that series during the period.

(6) AGFI waived certain fees or absorbed certain expenses otherwise payable by the Fund. The amount of expenses waived or absorbed is determined annually on a series by series basis at the discretion of AGFI and AGFI can terminate the waiver or absorption at any time.

(7) The trading expense ratio represents total commissions and other portfolio transaction costs, including the Fund's proportionate share of the commissions, if applicable, of the underlying funds and ETFs in which the Fund has invested, expressed as an annualized percentage of average daily Net Asset Value during the period.

(8) The Fund's portfolio turnover rate ("PTR") indicates how actively the Fund's portfolio advisor manages its portfolio investments. A PTR of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's PTR in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

PTR is calculated based on the lesser of the cumulative cost of purchases or cumulative proceeds of sales divided by the average market value of the portfolio, excluding short-term investments.

Management Fees

The Fund is managed by AGFI. As a result of providing investment and management services, AGFI receives a monthly management fee, based on the Net Asset Value of the respective series, calculated daily and payable monthly. Management fees in respect of Series I, Series O, Series Q and Series W Shares, if applicable, are arranged directly between the Manager and investors and are not expenses of the Fund. AGFI uses these management fees to pay for sales and trailing commissions to registered dealers on the distribution of the Fund's shares, investment advice, as well as for general administrative expenses such as overhead, salaries, rent, legal and accounting fees relating to AGFI's role as manager.

	As a percentage of management fees		
	Annual rates	Dealer compensation	General administration and investment advice
Mutual Fund Shares	2.20%	26.97%	73.03%
Series D Shares	2.10%	23.51%	76.49%
Series F Shares	1.00%	–	100.00%
Series T Shares	2.20%	50.75%	49.25%
Series V Shares	2.20%	70.47%	29.53%

Past Performance*

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional securities of the Fund. Note that the performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. How the Fund has performed in the past does not necessarily indicate how it will perform in the future.

It is AGFI's policy to report rates of return for series in existence greater than one year. The performance start date for each series represents the date of the first purchase of such series, excluding seed money. Series I Shares commenced operations in October 2016. During the ten year period ended September 30, 2016, certain other funds with similar investment objectives merged into the Fund. Generally, for fund mergers, the continuing fund is considered a new fund for the purpose of calculating rates of return and therefore, the rates of return have not been provided for the period of the merger and previous periods. However, the merger of the Fund with AGF Special U.S. Class and AGF U.S. Value Class of AGF All World Tax Advantage Group Limited formed by articles of amalgamation dated September 30, 1994 in May 2009 did not constitute a material change to the Fund and accordingly did not impact the ability of the Fund to maintain its historical performance.

All rates of return are calculated based on the Net Asset Value.

Year-By-Year Returns

The following bar charts show the Fund's annual performance for each of the past 10 years to September 30, 2016 (interim performance for the six months ended March 31, 2017) as applicable, and illustrate how the Fund's performance has changed from year to year. The charts show, in percentage terms, how much an investment made on the first day of each financial period would have grown or decreased by the last day of each financial period.

Mutual Fund Shares

Series D Shares

Series F Shares

Series O Shares

Series Q Shares

Performance for 2013 represents returns for the period from February 25, 2013 to September 30, 2013.

* The indicated rates of return shown here are the historical returns including changes in security value and reinvestment of all distributions and do not take into account sales, redemption, distribution or other optional charges by any securityholder that would have reduced returns or performance. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated.
