

INTERIM MANAGEMENT REPORT OF FUND PERFORMANCE

AGF Canadian Large Cap Dividend Class

MARCH 31, 2017

Management Discussion of Fund Performance

This management discussion of fund performance represents the portfolio management team's view of the significant factors and developments affecting the fund's performance and outlook.

Results of Operations

For the six months ended March 31, 2017, the Mutual Fund Shares of AGF Canadian Large Cap Dividend Class (the "Fund") returned 5.7% (net of expenses) while the S&P/TSX Composite Index ("S&P/TSX Index") and the S&P/TSX 60 Index returned 7.1% and 8.2%, respectively. The performance of the other series of the Fund is substantially similar to that of the Mutual Fund Shares, save for differences in expense structure. Refer to "Past Performance" section for performance information of such Series.

The Fund holds Series S Units of AGF Canadian Large Cap Dividend Fund (the "Underlying Fund"), a fund managed by AGF Investments Inc. ("AGFI") and Connor, Clark & Lunn Investment Management Ltd. ("CC&L"). The discussion below references performance figures for Classic Series Units of the Underlying Fund. The performance of Series S Units is substantially similar to the Classic Series Units, save for differences in expense structure.

The Fund under-performed the S&P/TSX Index and the S&P/TSX 60 Index as the Canadian portfolio of the Underlying Fund detracted from relative performance over the period under review.

Connor, Clark & Lunn Investment Management Ltd.

The Canadian portfolio of the Fund, managed CC&L, under-performed the S&P/TSX Index and the S&P/TSX 60 Index due primarily to security selection in the energy sector. To a lesser extent, positioning within the industrials and materials sectors also detracted from relative performance, though this was partially offset by security selection in the telecommunication services and consumer staples sectors. From a sector allocation perspective, underweight allocations to the materials and consumer discretionary sectors within the Canadian portfolio also modestly detracted from the Underlying Fund's performance, while partially offset by an overweight exposure to the information technology sector.

CC&L's investment process within the energy sector is a rigorous bottom-up approach that is designed to differentiate between high and low quality companies within the sector, which CC&L defines as companies that can consistently grow production on a per share basis. A bottom-up investment approach focuses attention on a specific company rather than on the industry in which that company operates or on the economy as a whole. This process has served the Canadian portfolio of the Underlying Fund well over time; however, CC&L recognizes that there are environments where quality does not out-perform. The first calendar quarter of 2017 was one such environment, where a combination of concerns related to the U.S. border adjustment taxes, the market's

expectation of future energy prices and the ongoing recovery of oil prices in recent years led to a significant under-performance of quality companies within the sector. Examples of such companies held in the Canadian portfolio of the Underlying Fund include Seven Generations Energy Limited, Crescent Point Energy Corporation and Raging River Exploration Inc.

AGF Investments Inc.

The foreign portfolio of the Underlying Fund, managed by AGFI, out-performed the S&P/TSX Index due primarily to security selection in the materials, financials and energy sectors. The foreign portfolio of the Underlying Fund also out-performed the S&P/TSX 60 Index due primarily to security selection in the materials, financials and health care sectors.

The Underlying Fund entered into foreign exchange forward contracts during the period under review. As of March 31, 2017, the Underlying Fund was long Canadian dollar and short U.S. dollar in order to hedge its currency exposure.

Certain series of the Fund, as applicable, make monthly distributions of capital at a rate determined by AGFI from time to time. The portfolio management team does not believe that the distributions made by the Fund had a meaningful impact on the Fund's ability to implement its investment strategy or to fulfill its investment objectives.

The Fund had net redemptions of approximately \$2 million for the current period, as compared to net redemptions of approximately \$5 million in the prior period. The portfolio management team does not believe that redemption activity had a meaningful impact on the Fund's performance or the ability to implement its investment strategy.

Total expenses before foreign withholding taxes, commissions and other portfolio transaction costs vary period over period mainly as a result of changes in average Net Asset Values (see Explanatory Note (1) a)) and investor activity, such as number of investor accounts and transactions. Expenses have increased as compared to the previous period due mainly to an increase in average Net Asset Values. Registration fees increased due to an increase in subscription activity. On the contrary, shareholder servicing and administrative fees decreased due to non-recurring expenses incurred in the previous period. Custodian fees decreased due to renegotiated fee terms with third party service provider during the current period and annual and interim reports decreased due to a decrease in investor activity. The increase in audit fees and decrease in interest expense were due to variances between the accrued amounts versus the actual expenses incurred in the previous period. All other expenses remained fairly consistent throughout the periods.

Recent Developments

Connor, Clark & Lunn Investment Management Ltd.

The Canadian equity market continued its ascent over the period under review, surpassing its record high set in September 2014 although ended

This interim management report of fund performance contains financial highlights, but does not contain either the interim or annual financial statements of the investment fund. You can get a copy of the interim or annual financial statements at your request, and at no cost, by calling 1 800 268-8583, by writing to us at AGF Investments Inc. 55 Standish Court, Suite 1050, Mississauga, Ontario, Canada L5R 0G3 attention: Client Services, or by visiting our website at www.agf.com or SEDAR at www.sedar.com.

Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

(CLASS OF AGF ALL WORLD TAX ADVANTAGE GROUP LIMITED)

MARCH 31, 2017

up trailing its developed market peers. The new high represented a return of 110.0% since the bottom of the global financial crisis in March 2009 and a return of 34.0% from the recent low set in January 2016.

In November 2016, Donald Trump was elected to the U.S. presidency, which was a surprise to many investors globally. Markets took an optimistic view towards Trump's victory on the back of his campaign promises to boost infrastructure spending, reduce taxes and relax banking regulations in the U.S. However, towards the end of the reporting period, investors began to question these pro-growth policies as lawmakers faced challenges in passing new legislation.

The U.S. Federal Reserve (the "Fed") raised interest rates on two occasions during the period under review, in December 2016 and subsequently in March 2017. This signaled further confidence in the central bank's view on the U.S. and global economies. The Fed's decision was driven by strong employment figures, stable economic growth and rising inflation indicators.

Financial markets continued to reflect confidence in the prospects for global growth. Economic releases generally offered positive surprises, not only in Canada, but also in the U.S. and Europe. The stronger data reinforced expectations of a more robust economic expansion. In the U.S., business and consumer confidence as well as manufacturing data reached multi-year highs, while inflation moved closer to the Fed's 2.0% target level.

In CC&L's opinion, the economic environment is shifting from one based on fear of secular stagnation and deflation to one of higher growth, inflation and interest rates. Leading economic indicators continue to improve and CC&L believes the global economy is slowly gaining momentum and expects more fiscal stimulus, driven by a shift to populist policies globally, will help support this growth. CC&L also anticipates consumer and business spending to increase, as consumer and small business confidence in the U.S. remain very robust. As a result, CC&L plans to continue increasing exposure to companies that are expected to out-perform in this environment by adding exposure to base metals producers, financials companies and energy producers within the Canadian portfolio of the Underlying Fund.

CC&L expects the continued improvement in economic growth to drive the out-performance of value stocks over growth stocks in calendar year 2017. As the business and market cycle continues to mature, CC&L believes many later-cycle sectors and companies will out-perform their more defensive peers. To capitalize on this trend, CC&L continues to add companies that are attractively valued and have exposure to higher economic growth within the Canadian portfolio of the Underlying Fund. This includes companies such as Manulife Financial Corporation in the insurance sector, Shaw Communications Inc. in the consumer discretionary sector and TransCanada Corporation in the energy sector.

CC&L remains vigilant of the risks associated with a continued economic expansion. This includes ongoing political uncertainty, appreciation of the U.S. dollar, or substantial increases in interest rates. Should signs emerge of these risks materializing, CC&L expects to reduce exposure to more economically sensitive companies in favour of those with more stable earnings profiles that are less sensitive to economic growth, like those in the consumer staples sector.

AGF Investments Inc.

AGFI remains constructive on equities given a supportive economic backdrop and broadly accommodative central bank policies. The acceleration in economic growth has contributed to upward revisions in earnings estimates, which is positive for equities. Also, while the Fed is moving to normalize policy, other major central banks (European Central Bank, Bank of Japan and Bank of England) remain accommodative, providing a supportive backdrop for equities. Finally, fiscal thrust is increasing in most major markets, delivering a momentum for growth. That said, AGFI believes a stronger U.S. dollar, elevated debt levels, political uncertainty, particularly in Europe and any disappointment on fiscal policies that the Trump Administration implements could present obstacles, and AGFI expects returns to be modest.

While valuations appear extended in some regions, AGFI expects relatively attractive opportunities in Continental Europe and Japan. In Europe, AGFI expects a continued acceleration in domestic demand will buoy revenue growth and profitability of European companies. Estimate revisions have also improved for European companies. Japanese equities should benefit from a weaker currency (Bank of Japan has pegged the 10-year yield at zero, which makes Japanese bonds less attractive in turn putting pressure on the Japanese Yen) and also from a recovery in global growth given the cyclical nature of the Japanese market. AGFI's proprietary country allocation framework is also pointing to selective opportunities in emerging markets given positive earnings estimate revisions and relatively attractive valuations. Importantly, AGFI expects profitability of emerging markets companies to improve, buoyed by a pick-up in emerging markets gross domestic product growth. Productivity growth is also outpacing real wage growth for the first time since 2010, which bodes well for profitability. This combined with relatively attractive valuations should drive continued strong out-performance. Notably, emerging markets politics have been moving toward de-regulation and structural reforms that should drive higher growth rates and in turn support earnings growth.

Some of the risks that AGFI continues to monitor include the potential for central bank policy errors, which could contribute to volatility. Further, given the recent rally in equities, AGFI would not be surprised to see some degree of consolidation in markets. AGFI is also watching political developments in Europe, including upcoming elections in Germany and France, although the outcome of the recent Dutch elections suggest radical populist party acceptance could face obstacles. Currencies could also remain volatile, particularly if U.S. dollar strength persists.

In this environment, AGFI believes that it is important to have a well-diversified and well-constructed portfolio. Country allocation will also remain key. In AGFI's opinion, the Underlying Fund is well-positioned to withstand volatility, given the focus on high quality companies through the lens of economic value added ("EVA"). AGFI remains focused on investing in companies that can create positive EVA and that are trading at attractive valuations.

Effective January 1, 2017, the conversion of shares between two classes of a mutual fund corporation (including AGF All World Tax Advantage Group Limited) is treated as a disposition of shares at their fair market value as a result of amendments to the Income Tax Act (Canada).

AGF Canadian Large Cap Dividend Class

(CLASS OF AGF ALL WORLD TAX ADVANTAGE GROUP LIMITED)

MARCH 31, 2017

Previously, conversions between the Fund and other classes within AGF All World Tax Advantage Group Limited occurred on a tax-deferred basis.

Related Party Transactions

AGFI is the manager (“Manager”) of the Fund. Pursuant to the management agreement between the Fund and AGFI, AGFI is responsible for the day-to-day business of the Fund. AGFI also acts as an investment (portfolio) manager itself or hires an external investment manager to manage the investment portfolio of the Fund. Under the management agreement, the Fund (except for Series O, Series Q and Series W Shares, if applicable) pays management fees, calculated based on the Net Asset Value of the respective series of the Fund. Management fees of approximately \$948,000 were incurred by the Fund during the six month period ended March 31, 2017.

AGF CustomerFirst Inc. (“AGFC”) provides transfer agency services to the Fund pursuant to a services agreement with AGFI. Shareholder servicing and administrative fees of approximately \$67,000 were incurred by the Fund during the six month period ended March 31, 2017.

AGFI and AGFC are indirect wholly-owned subsidiaries of AGF Management Limited.

Caution Regarding Forward-looking Statements

This report may contain forward-looking statements about the Fund, including its strategy, expected performance and condition. Forward-looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as “expects”, “anticipates”, “intends”, “plans”, “believes”, “estimates” or negative versions thereof and similar expressions.

In addition, any statement that may be made concerning future performance, strategies or prospects, and possible future Fund action, is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to, among other things, risks, uncertainties and assumptions about the Fund and economic factors.

The forward-looking statements are by their nature based on numerous assumptions, which include, amongst other things, that (i) the Fund can attract and maintain investors and has sufficient capital under management to effect its investment strategies, (ii) the investment strategies will produce the results intended by the portfolio manager, and (iii) the markets will react and perform in a manner consistent with the investment strategies. Although the forward-looking statements contained herein are based upon what the portfolio manager believes to be reasonable assumptions, the portfolio manager cannot assure that actual results will be consistent with these forward-looking statements.

Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements made by the Fund. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and market

factors in North America and internationally, interest and foreign exchange rates, global equity and capital markets, business competition, technological change, changes in government regulations, unexpected judicial or regulatory proceedings, and catastrophic events.

It should be stressed that the above-mentioned list of factors is not exhaustive. You are encouraged to consider these and other factors carefully before making any investment decisions and you are urged to avoid placing undue reliance on forward-looking statements. Further, you should be aware of the fact that the Fund has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise, prior to the release of the next Management Report of Fund Performance.

Financial Highlights

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund’s financial performance for the six months ended March 31, 2017 and the past five years as applicable. The Fund adopted International Financial Reporting Standards (“IFRS”) on October 1, 2014. All per share information presented for the period ended September 30, 2014, including opening net assets, reflects retrospective adjustments in accordance with IFRS. Information for the periods prior to October 1, 2013 is derived from financial statements prepared in accordance with Canadian generally accepted accounting principles as defined in Part V of the CPA Handbook (“Canadian GAAP”).

~ annualized

(1), (2), (3), (4), (5), (6), (7) and (8) see Explanatory Notes

Explanatory Notes

(1) a) This information is derived from the Fund's audited annual financial statements and unaudited interim financial statements. Prior to October 1, 2014, the net assets per share presented in the financial statements ("Net Assets") was calculated using different valuation techniques for certain investments as required under Canadian GAAP. This had no impact on the Net Assets per share since the series net asset value per unit calculated for fund pricing purposes ("Net Asset Value") of the Underlying Fund held was the most readily and regularly available price as no bid prices were available. This remains unchanged with the adoption of IFRS effective October 1, 2014.

Total Net Asset Value and number of shares outstanding presented as at September 30, 2015 may have been adjusted to include certain transactions, if applicable, for the purpose of comparability with subsequent reporting periods. These adjustments have no effect on the Net Asset Value per share.

b) The following series of the Fund commenced operations on the following dates, which represents the date upon which securities of a series were first made available for purchase by investors.

Mutual Fund Shares	April 2008
Series F Shares	April 2008
Series Q Shares	April 2015
Series T Shares	April 2009
Series V Shares	April 2009

c) On October 1, 2011, shareholders of each of the outstanding classes of AGF All World Tax Advantage Group Limited formed by articles of amalgamation dated October 1, 2010 (including the Fund) and two outstanding classes (Acuity Diversified Income Class and Acuity High Income Class) of Acuity Corporate Class Ltd. (the "Amalgamating Funds") amalgamated under the Business Corporations Act (Ontario) to form a new amalgamated corporation ("New Tax Advantage Group").

Pursuant to the amalgamation above, shareholders of each of the Amalgamating Funds became shareholders of separate classes of New Tax Advantage Group. The amalgamation was effected by way of merger, with shares of each of the Amalgamating Funds exchanged on a one for one ratio for shares of new classes of New Tax Advantage Group. Each of the new classes of New Tax Advantage Group represents continuation of the predecessor fund.

(2) Net Assets, dividends and distributions are based on the actual number of shares outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of shares outstanding over the financial period.

(3) Dividends and distributions were paid in cash/reinvested in additional shares of the Fund, or both.

Series T and Series V Shares of the Fund may make monthly distributions of capital so long as there is sufficient capital attributable to those series. The capital per share of the Series T and Series V Shares as applicable, is as follows:

As at	Mar 31, 2017 (\$)	Sept 30, 2016 (\$)	Sept 30, 2015 (\$)	Sept 30, 2014 (\$)	Sept 30, 2013 (\$)	Sept 30, 2012 (\$)
Series T Shares	10.73	10.85	11.62	12.12	12.89	13.88
Series V Shares	14.99	14.70	14.66	14.62	14.78	15.34

(4) This is not a reconciliation of the beginning and ending Net Assets per share.

(5) The management expense ratio ("MER") of a particular series is calculated in accordance with National Instrument 81-106, based on all the expenses of the Fund (including Harmonized Sales Tax, Goods

and Services Tax, income tax and interest, but excluding foreign withholding taxes, commissions and other portfolio transaction costs) attributable to that series, expressed as an annualized percentage of average daily Net Asset Value of that series during the period.

As a result of the Fund's investment in the Underlying Fund, the MER is calculated based on the expenses of the Fund allocated to that series, including expenses indirectly incurred by the Fund attributable to its investment in the Underlying Fund, divided by the average daily Net Asset Value of the series of the Fund during the period.

The Fund does not pay duplicate management fees on the portion of the assets that it invests in the Underlying Fund. Accordingly, AGFI will waive the management fees payable or paid by the Underlying Fund in order to avoid such duplication.

(6) AGFI waived certain fees or absorbed certain expenses otherwise payable by the Fund. The amount of expenses waived or absorbed is determined annually on a series by series basis at the discretion of AGFI and AGFI can terminate the waiver or absorption at any time.

(7) The trading expense ratio ("TER") represents total commissions and other portfolio transaction costs expressed as an annualized percentage of average daily Net Asset Value during the period.

As a result of the Fund's investment in the Underlying Fund, the TER is calculated based on commissions and other portfolio transaction costs of the Fund, including such costs that are indirectly incurred by the Fund attributable to its investment in the Underlying Fund, divided by the average daily Net Asset Value of the Fund during the period.

(8) The Fund's portfolio turnover rate ("PTR") indicates how actively the Fund's portfolio advisor manages its portfolio investments. A PTR of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's PTR in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

PTR is calculated based on the lesser of the cumulative cost of purchases or cumulative proceeds of sales divided by the average market value of the portfolio, excluding short-term investments.

Management Fees

The Fund is managed by AGFI. As a result of providing investment and management services, AGFI receives a monthly management fee, based on the Net Asset Value of the respective series, calculated daily and payable monthly. Management fees in respect of Series O, Series Q and Series W Shares, if applicable, are arranged directly between the Manager and investors and are not expenses of the Fund. AGFI uses these management fees to pay for sales and trailing commissions to registered dealers on the distribution of the Fund's shares, investment advice, as well as for general administrative expenses such as overhead, salaries, rent, legal and accounting fees relating to AGFI's role as manager.

	As a percentage of management fees		
	Annual rates	Dealer compensation	General administration and investment advice
Mutual Fund Shares	1.85%	58.94%	41.06%
Series F Shares	1.00%	–	100.00%
Series T Shares	1.85%	66.60%	33.40%
Series V Shares	1.85%	43.53%	56.47%

Past Performance*

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional securities of the Fund. Note that the performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. How the Fund has performed in the past does not necessarily indicate how it will perform in the future.

It is AGFI's policy to report rates of return for series in existence greater than one year. The performance start date for each series represents the date of the first purchase of such series, excluding seed money.

All rates of return are calculated based on the Net Asset Value.

Year-By-Year Returns

The following bar charts show the Fund's annual performance for each of the past 10 years to September 30, 2016 (interim performance for the six months ended March 31, 2017) as applicable, and illustrate how the Fund's performance has changed from year to year. The charts show, in percentage terms, how much an investment made on the first day of each financial period would have grown or decreased by the last day of each financial period.

Mutual Fund Shares

Performance for 2008 represents returns for the period from April 28, 2008 to September 30, 2008.

Series F Shares

Performance for 2008 represents returns for the period from May 15, 2008 to September 30, 2008.

Series Q Shares

Performance for 2015 represents returns for the period from May 7, 2015 to September 30, 2015.

Series T Shares

Performance for 2009 represents returns for the period from May 20, 2009 to September 30, 2009.

Series V Shares

Performance for 2009 represents returns for the period from May 20, 2009 to September 30, 2009.

* The indicated rates of return shown here are the historical returns including changes in security value and reinvestment of all distributions and do not take into account sales, redemption, distribution or other optional charges by any securityholder that would have reduced returns or performance. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated.
