

Investment Philosophy

The team employs a differentiated, thematic approach to target companies that offer a product or service that is a solution to a sustainable issue.

The team invests globally in companies that have positive outcome, focusing on four broad macro themes: Energy Transition, Circular Economy & Pollution Abatement, Water Services & Climate Adaptation, and Food & Health.

Investment Process Overview

Investment Process

Our investment process combines thematic analysis with fundamental stock selection. We map 1,000 companies to four sustainable themes (energy transition, circular economy & pollution abatement, water services & climate adaptation and food & health). We then identify accelerating sub-themes by examining societal trends, demand, cyclicalities, growth, margin potential, regulatory drivers, pricing power, competition, and barriers to entry. We further examine sub-themes across GICS sectors to identify which segments of the Value Chain (materials, suppliers, producers) contain the most attractive investment opportunities.

Our fundamental analysis seeks to identify companies with revenues accelerating in line with our sub-themes. Our Stage Appropriate Analysis allows us to consider stocks across the maturity spectrum and assesses fundamentals such as revenue and earnings growth, margins, management, free cash flow, valuation, and sustainability of competitive position. ESG analysis examines risks and opportunities related to climate, diversity, and human capital, and our active ownership stance governs our proxy voting and corporate engagements.

Our objective is to outperform broad global equity markets by constructing a differentiated portfolio of 25 to 40 holdings from all capitalization ranges, each providing solutions to key sustainability challenges.

^A AGF Global Sustainable Equity ADR Strategy; ⁰Portfolio (net of max. institutional fee); ^{*} MSCI World Net Index; ¹SPSD is Since Performance Start Date of the composite for the AGF Global Sustainable Equity ADR strategy, December 31, 2018. Performance and risk is based on AGF Global Sustainable Equity ADR composite. Strategy characteristics are based on the AGF Global Sustainable Equity ADR (non-fee paying) representative account. ² Does not include cash position of 8.86%. Top 10 Holdings represent approximately 37.4% of total assets of the AGF Global Sustainable Equity ADR (non-fee paying) representative account as at April 30, 2025 which is subject to change. This information is additional to the GIPS compliant presentation found at the end of the document. Past performance is not indicative of future results.
Source: AGF Investments, as at April 30, 2025. This report is not complete without disclaimer.

Disclaimer

All information is in U.S. dollars. Strategy performance is based on the GIPS AGF Global Sustainable Equity ADR Composite. The performance presented is gross and net of fees; rates of return for greater than one year have been annualized. AGF Investments uses Canadian dollar gross of fees returns and converts them on a monthly basis using spot rates sourced from Bloomberg. Net-of-fees returns are calculated by deducting the maximum institutional fee charged from the gross-of-fee return. Actual fees may vary depending upon the fee schedule and portfolio size. Past performance is not indicative of future results. The AGF Global Sustainable Equity ADR Strategy portfolio characteristics in this presentation are based on a single (non-fee paying) representative account for the strategy within the composite.

The gross performance presented by AGFA is before deducting investment advisory fees but is net of transaction costs. Client returns will be reduced by advisory fees and other expenses. The client is referred to Part II of AGFA's Form ADV for a full disclosure of the fee schedule. As fees are deducted quarterly, the compounding effect will be to increase the impact of the fee by an amount directly related to the gross account performance. For example, on an account with a 0.5% fee, and gross performance of 20% over one year, the compounding effect of the fee will result in performance of approximately 19.4%. A \$10,000 initial investment would grow to approximately \$14,256 gross of fees, versus \$14,000 net of fees, over a two year period.

The value of investments and the income from them can fall as well as rise. Investments denominated in foreign currencies are subject to fluctuations in exchange rates, which may have an adverse effect on the value of the investments, sale proceeds, and on dividend or interest income. Investors may not necessarily recoup the full value of their original investment. Investors should be aware that forward looking statements and forecasts may not be realized.

Effective October 31, 2016, the calculation methodology for holdings-based portfolio characteristics with the exception of weighted average market cap and active share has changed to a weighted ranking methodology, considered by AGF Investments as a better reflection of the relevant attributes. The new methodology, applied prospectively, applies a ranking to each security, uses the percentage market value weight of the security in the portfolio/benchmark and determines a median of extracted securities to arrive at the portfolio/benchmark characteristic (by summing the weight of securities which have a rank to calculate a rank for the portfolio/benchmark and extracting securities with the same portfolio rank).

The AGF Global Sustainable Equity ADR Strategy is available to institutional clients via various channels. Clients accessing the strategy through a Separately Managed Account (SMA) platform will experience performance results that differ from results produced by AGF Investments America Inc.'s discretionary management of the strategy based on a number of factors, including but not limited to fees charged, implementation of the strategy by the SMA provider and investment restrictions applicable to each client's account. AGF Investments America Inc. does not have investment authority over client accounts accessing the strategy through a SMA platform.

There are a variety of approaches to sustainable investing, the term may have different meanings at different organizations, AGF Investments suggest reading the investment objective carefully. In addition, industry standards and terminology related to sustainable investments will differ and are evolving.

An Investment in the AGF Global Sustainable Equity ADR Strategy is subject to risks including but not limited to- **Market Risk:** Investments in sustainable themes are subject to market risks similar to other investments. Market conditions, economic factors, and political events may impact performance. **Data Reliability:** The quality and availability of Environmental, Social, and Governance (ESG) data can vary. Inconsistent or incomplete data can affect the managers ability to assess a company's sustainability practices and performance. **Regulatory Risk:** Changes in regulations related to sustainability and ESG criteria can impact the value and performance of sustainable investments. Compliance with new regulations may also increase costs for companies. **Sector Concentration:** Sustainable strategies are subject to concentration risk, investments may be limited to certain sectors, which can increase volatility and risk. **Geopolitical Risks:** Changes in political leaders, and/or political instability, changes in government policies, and geopolitical tensions can significantly impact global investments and may create greater volatility.

It should not be assumed that an investment in the strategy will be profitable or that the strategy will be able to meet its investment objective.

Firm Description

Founded in 1957, AGF Management Limited (AGF) is an independent and globally diverse asset management firm. Our companies deliver excellence in investing in the public and private markets through three business lines: AGF Investments, AGF Capital Partners and AGF Private Wealth.

AGF brings a disciplined approach, focused on incorporating sound, responsible and sustainable corporate practices. The firm's collective investment expertise, driven by its fundamental, quantitative and private investing capabilities, extends globally to a wide range of clients, from financial advisors and their clients to high-net worth and institutional investors including pension plans, corporate plans, sovereign wealth funds, endowments and foundations.

Headquartered in Toronto, Canada, AGF has investment operations and client servicing teams on the ground in North America and Europe. AGF serves more than 800,000 investors. AGF trades on the Toronto Stock Exchange under the symbol AGF.B.

*AGF Investments represents AGF's group of companies who manage and advise on a variety of investment solutions managed by its fundamental and quantitative investing teams. AGF Investments Inc. is a wholly-owned subsidiary of AGF Management Limited and conducts the management and advisory of mutual funds in Canada.

Benchmark Description

The benchmark is the MSCI World Net Index.

Composite Description

The Global Sustainable Growth Equity ADR Composite's mandate is to provide capital growth potential by investing in a diversified portfolio of companies around the world, via securities listed on North American exchanges, that fit the composite's concept of sustainable development. The mandate focuses on four major themes: energy and energy efficiency, water/waste water solutions, waste management and pollution control and environment and health and safety, while also performing thorough due diligence on company fundamentals.

Composite Creation Date and Inception Date

The Composite was created on December 31, 2018. The composite's inception was in December 2018.

Currency

Valuations and returns are computed and stated in U.S. Dollars.

Minimum Portfolio Size

There is no minimum portfolio size required for inclusion into the composite.

Calculation Methodology

Results reflect the reinvestment of dividends, income and other earnings.

Gross-of-fees returns are presented before management expenses and custodial fees, but after all trading expenses and withholding taxes.

Net of fees returns are calculated by deducting the maximum institutional fee charged from the gross of fee return.

Composite returns are calculated using asset-weighted returns by weighing the individual account returns using beginning-of-period values.

Internal Dispersion Measure

Internal dispersion is calculated using the asset-weighted standard deviation of all accounts included in the composite for the entire year; it is not presented for periods less than one year or when there were five or fewer portfolios in the composite for the entire year as this is not considered meaningful.

Three-Year Annualized Ex-Post Standard Deviation

The three-year annualized standard deviation measures the variability of the composite and the benchmark returns over the preceding 36-month period. The standard deviation is presented once the composite has three full calendar years of performance. Gross returns are used to calculate risk measures.

Fee Schedule

The maximum management fee for the strategy is 0.70% per annum.

Additional Information

The portfolios in this composite are valued at systematic adjusted fair value. Policies for fair value and systematic adjusted fair value portfolios, calculating performance, preparing compliant presentations, and a complete list and description of firm composites are available upon request at GIPS@AGF.com.

As at December 31, 2023, 100% of this composite was represented by non-fee paying portfolios.

Past performance does not guarantee future results.
