¹Returns are net of fees.

Past performance does not guarantee future results. The performance data quoted represents past performance and current returns may be lower or higher. The investment return and principal value will fluctuate so that an investor's shares, when redeemed may be worth more or less than the original cost. Current performance may be lower or higher than the performance data quoted. To obtain performance data current to the most recent month-end and other information, please call 1-833-AGF-FUND (833-243-3863).

Returns include the reinvestment of dividends and income. Returns greater than one year are annualized and returns less than one year are aggregated. The performance above reflects any fee waivers that have been in effect during the applicable periods as well as any expense reimbursements that have periodically been made. Absent such waivers and reimbursements, returns would have been lower. Currently, contractual fee waivers are in effect from November 1, 2018 through November 1, 2021.

Investing involves risk including loss of principal. Equity securities are volatile and can decline significantly in response to broad market and economic conditions. Investments in global equity may be significantly affected by political or economic conditions and regulatory requirements in a particular country. International markets can involve risks of currency fluctuation, political and economic instability, different accounting standards and foreign taxation. Emerging or frontier markets involve exposure to economic structures that are generally less diverse and mature. The less developed the market, the riskier the security. Such securities may be less liquid and more volatile.

The universe of sustainable investments may be smaller than that of other funds that do not focus on sustainable development issuers. The Fund may forgo opportunities to gain exposure to certain attractive companies in certain industries and sectors, such as fossil fuel producers, and may have a reduced weighting in others, due to their lack of positive exposure to sustainability themes. Because of these themes, the Fund may underperform the market as a whole if such investments underperform the market.
