¹Returns are net of fees.

Past performance does not guarantee future results. The performance data quoted represents past performance and current returns may be lower or higher. The investment return and principal value will fluctuate so that an investor's shares, when redeemed may be worth more or less than the original cost. Current performance may be lower or higher than the performance data quoted. To obtain performance data current to the most recent month-end and other information, please call 1-833-AGF-FUND (833-243-3863).

Returns include the reinvestment of dividends and income. Returns greater than one year are annualized and returns less than one year are aggregated. The performance above reflects any fee waivers that have been in effect during the applicable periods as well as any expense reimbursements that have periodically been made. Absent such waivers and reimbursements, returns would have been lower. Currently, contractual fee waivers are in effect until November 1, 2024.

Note: numbers may not add up to 100% because of rounding.

*Reflects the expense ratio as reported in the prospectus dated November 1, 2021. AGF Investments America Inc. ("AGFA") has contractually agreed to waive fees and/or reimburse expenses so that Total Annual Fund Operating Expenses (excluding taxes, interest, litigation, extraordinary expenses, brokerage and other transaction expenses relating to the purchase or sale of portfolio investments, and acquired (underlying) fund fees and expenses) for Class I shares and Class R6 shares do not exceed 0.95% of each share class's average daily net assets. AGFA is entitled to reimbursement by the Fund of fees waived or expenses reimbursed during any of the previous 36 months beginning on the date of the expense limitation agreement, provided that the Total Annual Fund Operating Expenses do not exceed the then-applicable expense cap or the expense cap in place at the time of the original fee waiver or reimbursement. This agreement will remain in effect until November 1, 2024, and shall renew automatically for one-year terms unless AGFA provides written notice of termination prior to the start of the next term or upon approval of the Board of Trustees of the Fund.

**The MSCI Emerging Markets Index is a market capitalization weighted index that is designed to measure the equity performance of emerging markets. One cannot invest directly in an index.

† Cash is not included.

Investors should consider the investment objectives, risks, charges and expenses carefully before investing. For a prospectus or summary prospectus with this and other information about the Fund, please call 1-833-AGF-FUND (833-243-3863) or visit our website at www.AGF.com. Read the prospectus or summary prospectus carefully before investing.

Distributor: Foreside Fund Services, LLC. Foreside is not affiliated with the Adviser.

RISKS: Investing involves risk including loss of principal. Equity securities are volatile and can decline significantly in response to broad market and economic conditions. Investments in **foreign securities** involve risks that differ from investments in securities of U.S. issuers because of unique political, economic and market conditions. **Foreign markets**, especially those in less developed economies, are generally more illiquid than U.S. markets. **China Risk and Hong Kong Risk**, investing in securities of issuers located in or economically tied to China or Hong Kong involves certain risks and considerations, including, more frequent trading suspensions (by the government or the issuer itself), government interventions, nationalization of assets, currency exchange rate fluctuations or blockages, limits on the use of brokers and on foreign ownership, different financial reporting standards, higher dependence on exports and international trade, potential for increased trade tariffs, embargoes and other trade limitations, and custody risks. **Liquidity risk** exists when investments are difficult to purchase or sell. This can reduce the Fund's return because the Fund or an entity in which it invests may be unable to transact at advantageous times or prices. The less developed the market, the riskier the security. Such securities may be less liquid and more volatile.

Additional risks of the Fund include but are not limited to: Portfolio Management Risk, Foreign Currency Risk, Frontier Market Risk, Equity-Linked Investment Risk, Depository Receipts Risk, Exchange-Traded Funds and Other Investment Companies Risk, Repurchase and Reverse Repurchase Agreements Risk, Credit Risk, U.S. Gov Securities Risk, Large Shareholder Risk, Small Fund Risk, Non-Diversification Risk.

Term Definitions

Active Share

Active Share tracks the disparity between a portfolio manager's holdings and that of its benchmark index. A low Active Share score indicates that a portfolio manager is closely replicating the target index, while a high Active Share score indicates that a fund's holdings diverge significantly from the target index.

Forward Earnings Growth

Forward Earnings are an estimate of a company's earnings for an upcoming period; their growth rate is calculated based on forecasted earnings.

Forward Price/Earnings (Forward P/E)

A Forward P/E is calculated based on forecasted earnings per share; a stock's current price divided by next year's expected earnings.

Forward Sales Growth

Forward Sales are an estimate of a company's revenues for an upcoming period; their growth rate is calculated based on forecasted revenue.

Price/Earnings

(P/E ratio or P/E) The ratio of share price to earnings per share.

Price to Earning Growth

A stock's price/earnings ratio divided by the company's projected EPS growth. The price/earnings ratio used in the numerator of this ratio is calculated by taking the current share price and dividing by the mean EPS estimate for the current fiscal year. EPS growth can be calculated as 1, 3 or 5 year growth so the measurement can vary based on the calculation method used.

Return on Equity

A profitability ratio calculated as net income divided by average shareholders' equity.

Turnover (Ratio)

The portfolio Turnover Ratio is the rate at which assets in a fund are bought and sold by the portfolio managers. It is calculated as the minimum of securities bought or sold divided by the average assets over the period.
