

AGF Global Sustainable Growth Equity Fund

AGF SUSTAINABLE

Investing in sustainable, high-growth thematic opportunities.

Why This Fund

1 Seek Returns & Support the Sustainable Transition

With a focus on companies that offer solutions to global sustainability issues, the strategy can help investors participate in and profit from the transition to a sustainable economy.

2 An Effective Portfolio Diversifier

The strategy's thematic approach results in a portfolio which typically differs from Canadian and global equity indexes in terms of both sector and country allocations.

3 Investing Sustainably for Over 30 Years

Launched in 1991, the Fund was one of the first sustainable investing funds in the world, providing exposure to companies developing solutions to key sustainability challenges.

AGF Global Sustainable Growth Equity Fund

A US\$1M investment in the Fund results in the equivalent to:

Source: AGF Investments Inc. and S&P Trucost Limited, as of December 31, 2023. Trucost is an external data service provider that AGF Investments Inc. enlists to measure the carbon intensity and environmental footprint of the portfolio and the benchmark. None of the Trucost information is intended to constitute or be construed as investment advice nor considered as recommendations to make (or refrain from making) any kind of investment decision and may not be relied on as such. Any historical data and analysis referenced herein should not be taken as an indication or guarantee of future performance analysis, forecast or prediction. Effective April 17, 2015, AGF Investments Inc. replaced Acuity Investment Management Inc. as the Portfolio Manager of the Fund.

Assumptions: Source: Environmental Protection Agency, last updated in December 2021 (latest report available). Trucost, as of December 31, 2023. The impact on the environment is compared using the Tonnes of Carbon Dioxide Equivalent (tCO2-e) measurement. As of December 31, 2023, the Fund had a tCO2-e of 67 as compared to the MSCI World Index which was 133. According to the U.S. Environmental Protection Agency (EPA) 2020 data, 1 passenger vehicle emits 4.64 tCO2-e per year, 1 acre of forest sequesters 0.82 tCO2 per year, 1 metric tonne of coal burnt emits 1.99 tCO2 per year, and 1 barrel of oil consumed emits 0.43 tCO2 per year. A \$1 million investment in the Fund would have resulted in a 52 tCO2-e lower carbon footprint than an investment of US\$1 million in the MSCI World Index (Source: Trucost).

On March 1, 2014, the Fund's benchmark changed from the FTSE Environmental Technology 50 Index to the MSCI World Net Index. The benchmark change was applied from that date forward.
