¹The target distribution is a percentage of the Net Asset Value of the fund paid out over a period. The distribution is not guaranteed, may be adjusted from time to time at the discretion of the fund manager and may vary from payment to payment. The payment of distributions should not be confused with a fund's performance, rate of return or yield. If distributions paid by the fund are greater than the performance of the fund, the original investment will shrink. Distributions paid as a result of capital gains realized by a fund, and income and dividends earned by a fund, are taxable to the investor in the year they are paid. The adjusted cost base will be reduced by the amount of any returns of capital. If the adjusted cost base falls below zero, the investor will have to pay capital gains tax on the amount below zero.
