

AGF Global Corporate Bond Fund

Series MF

Fundamental - High Yield Fixed Income

As of March 31, 2025

Key Reasons to Invest

- Appeals to investors looking for a yield-oriented fund with a heightened focus on attractive risk-to-return profiles for each credit while aiming to generate full-cycle total returns.
- The Fund offers targeted exposure to a range of corporate fixed income securities including high yield bonds, investment grade bonds and floating rate loans.

Investment Objective

The Fund's objective is to generate a high level of income and maximize return by investing primarily in fixed-income securities issued or guaranteed by corporations around the world and rated BB+ equivalent or lower.

Investment Strategy

The portfolio manager seeks to maximize the total return of the portfolio through a bottom-up approach to corporate bond selection and a top-down approach to category allocation and duration management. The portfolio manager looks for bond issues that provide an attractive return relative to the risk of each credit.

The Fund will primarily invest in below investment grade debt, i.e., a credit rating below BBB from Standard & Poor's (or an equivalent rating from another rating agency).

Morningstar Quartile Rankings are calculated as of March 31, 2025 and subject to change monthly. They are calculated based on the Fund's total return percentile rank compared to other funds in the Morningstar High Yield Fixed Income category. Percentile ranks are then mapped into quartiles with (1) representing 1-25, (2) representing 26-50, (3) representing 51-75 and (4) representing 76-100 percentile ranks.

Investment Management Team

The AGF Investments Fixed Income team is a multi-disciplinary team that manages assets on behalf of retail and institutional clients. We seek added value in fixed income by leveraging our long-tenured expertise in our core competencies. We focus on strategically allocating across fixed-income categories and currencies. We believe our strengths lie in the use of global fixed-income specialists to capture potential investment opportunities and that our disciplined methodology, using models and fundamental research, enables us to identify inefficiencies across global fixed-income markets.

About AGF Management Limited

Founded in 1957, AGF Management Limited (AGF) is an independent and globally diverse asset management firm. Our companies deliver excellence in investing in the public and private markets through three business lines: AGF Investments, AGF Capital Partners and AGF Private Wealth.

AGF brings a disciplined approach, focused on incorporating sound, responsible and sustainable corporate practices. The firm's collective investment expertise, driven by its fundamental, quantitative and private investing capabilities, extends globally to a wide range of clients, from financial advisors and their clients to high-net worth and institutional investors including pension plans, corporate plans, sovereign wealth funds, endowments and foundations.

Headquartered in Toronto, Canada, AGF has investment operations and client servicing teams on the ground in North America and Europe. AGF serves more than 815,000 investors. AGF trades on the Toronto Stock Exchange under the symbol AGF.B.

About AGF Investments

AGF Investments represents AGF's group of companies who manage and advise on a variety of investment solutions managed by its fundamental and quantitative investing teams. AGF Investments Inc. is a wholly-owned subsidiary of AGF Management Limited and conducts the management and advisory of mutual funds in Canada.

Disclosures

All information is provided by AGF Investments in Canadian dollars as of March 31, 2025, unless otherwise indicated. The performance presented is net of fees. Rates of return for periods greater than one year have been annualized.

Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the prospectus before investing. The indicated rates of return are the historical annual compounded total returns including changes in share or unit value and reinvestment of all dividends or distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any securityholder that would have reduced returns. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated.

This material is for informational and educational purposes only. It is not a recommendation of any specific investment product, strategy, or decision, and is not intended to suggest taking or refraining from any course of action. It is not intended to address the needs, circumstances, and objectives of any specific investor. This information is not meant as tax or legal advice. Investors should consult a financial advisor and/or tax professional before making investment, financial and/or tax-related decisions.

For a summary of the risks of an investment in a particular AGF Fund, please see the specific risks set out in the fund's prospectus. Market conditions may change, impacting the composition of a portfolio. AGF Investments assumes no responsibility for any investment decisions made based on the information provided herein.

Holdings are subject to change and do not represent all of the securities purchased, sold or recommended for the portfolio. It should not be assumed that investments in the securities identified were or will be profitable and should not be considered an endorsement or recommendation by AGF Investments.

The payment of distributions should not be confused with a fund's performance, rate of return or yield. If distributions paid by the fund are greater than the performance of the fund, the original investment will shrink. Distributions paid as a result of capital gains realized by a fund, and income and dividends earned by a fund, are taxable to the investor in the year they are paid. The adjusted cost base will be reduced by the amount of any returns of capital. If the adjusted cost base falls below zero, the investor will have to pay capital gains tax on the amount below zero.

"Bloomberg®" and Bloomberg U.S. Corporate High-Yield Bond Index (CAD-hedged and unhedged in CAD) are service marks of Bloomberg Finance L.P. and its affiliates, including Bloomberg Index Services Limited ("BISL"), the administrator of the index (collectively, "Bloomberg") and have been licensed for use for certain purposes by AGF Management Limited and its subsidiaries. Bloomberg is not affiliated with AGF Management Limited or its subsidiaries, and Bloomberg does not approve, endorse, review or recommend AGF Global Corporate Bond Fund. Bloomberg does not guarantee the timeliness, accurateness, or completeness, of any data or information relating to AGF Global Corporate Bond Fund.

On April 1, 2018, the benchmark changed to a blended index of 85% Bloomberg U.S. Corporate High-Yield Bond Index (CAD-hedged) / 15% Bloomberg U.S. Corporate High-Yield Bond Index (unhedged in CAD). Then on January 1, 2024, AGF Global Corporate Bond Fund benchmark changed from 85% Bloomberg U.S. Corporate High-Yield Bond Index (CAD-hedged) / 15% Bloomberg U.S. Corporate High-Yield Bond Index (unhedged in CAD) to 80% Bloomberg U.S. Corporate High Yield Bond Index (CAD-hedged) / 20% Bloomberg U.S. Corporate Bond Index (CAD-hedged). In all cases, the benchmark changes were applied from that date forward.

Disclosures

In order to invest in and maintain participation in the AGF Preferred Pricing Program, a Household (which may consist of a single investor) must meet the minimum investment requirements of: (i) at least \$100,000 in one eligible mutual fund; or (ii) at least \$250,000 in Household assets across multiple eligible funds, based on the higher of book value or market value. All Preferred Pricing management fee reductions are at AGF's discretion and depend on a number of factors, including the size of the investment, nature of the investment and the fees charged by the applicable series/fund. Eligible series and funds are determined by AGF and may change from time to time at AGF's discretion. Tier level discounts apply only to the dollar amount(s) grouped in each particular tier.

Term Definitions

Average Credit Quality

A weighted average of credit ratings on all fixed income securities in a portfolio.

Average Term to Maturity

Average remaining time of each security or instrument in a portfolio to reach its maturity.

Beta

A measure of a fund's sensitivity to market movements (as represented by a benchmark index). The benchmark index has a Beta of 1.0. A Beta of more (less) than 1.0 indicates that a fund's historical returns have fluctuated more (less) than the benchmark index. For example, a Beta of 1.10 shows that the fund performed 10% better than its benchmark index in up markets and 10% worse in down markets, assuming all other factors remain constant.

Current Yield

The annual income (interest or dividend) of a security divided by its price. The current yield of a portfolio is the weighted average of the current yield of the applicable holdings in a portfolio.

Downside Capture (Ratio)

The Downside Capture Ratio is calculated by taking the portfolio's return and dividing it by the benchmark's return in periods when the benchmark return was negative. A Downside Capture Ratio of less than 100% is considered desirable.

Management Expense Ratio (MER)

The Management Expense Ratio, commonly referred to as MER, is a measure of the total expenses (fees and other costs) borne by the mutual fund or ETF, expressed as a percentage of the fund's net asset value. The ratio is calculated by dividing the total annual expenses by the average net asset value of the fund for the given year.

Modified Duration

A measure of the sensitivity of a bond's price to changes in interest rates. The modified duration of a portfolio is the weighted average of the modified duration of the applicable holdings in a portfolio.

Risk Profile

The Risk Profile is based on the historical volatility of a fund, as measured by the 10-year annualized standard deviation of the 10-year average returns of the fund. The investment risk level is required to be determined in accordance with the Canadian Securities Administrators' standardized risk classification methodology.

Sharpe Ratio

Sharpe Ratio characterizes how well the return of a fund compensates the investor for each unit of absolute risk they assume, as measured by the Standard Deviation of the fund. The greater a fund's Sharpe Ratio, the better its risk-adjusted performance has been.

Standard Deviation

A statistical measure of the range/dispersion of a fund's performance. The more variable the returns, the larger the Standard Deviation. When a fund has a high Standard Deviation, it means that its range of performance was wide for the given period, i.e. greater historical volatility. Standard Deviation does not predict the future volatility of a fund.

Tracking Error

The Tracking Error represents a fund manager's added value variability. It reports the difference between the return received and that of the benchmark being compared to. It is reported as a Standard Deviation percentage difference.

Trading Expense Ratio (TER)

The total gross expenses divided by the fund's average net assets.

Term Definitions

Turnover (Ratio)

The portfolio Turnover Ratio is the rate at which assets in a fund are bought and sold by the portfolio managers. It is calculated as the minimum of securities bought or sold divided by the average assets over the period.

Upside Capture (Ratio)

The Upside Capture Ratio is calculated by taking the portfolio's return and dividing it by the benchmark's return in periods when the benchmark return was positive. An Upside Capture Ratio of greater than 100% is considered desirable.

Yield to Maturity

The annual rate of return anticipated on a bond if it is held until the maturity date. The yield to maturity of a portfolio is the weighted average of the yield to maturity of the applicable holdings in a portfolio.

Yield to Put

The total return anticipated on a bond if it is held to its earliest possible put date (i.e., the date that the bondholder has the option to sell the bond back to the issuer).
