### AGF Asset Allocation Committee

The AGF Asset Allocation Committee consists of senior investment professionals who provide insight and perspective on global bond and equity markets. The Committee formally meets on a quarterly basis to discuss, analyze and assess the macroeconomic environment and capital markets in order to determine optimal asset allocations. The payment of distributions should not be confused with a fund's performance, rate of return or yield. If distributions paid by the fund are greater than the performance of the fund, your original investment will shrink. Distributions paid as a result of capital gains realized by a fund, and income and dividends earned by a fund, are taxable in your hands in the year they are paid. Your adjusted cost base will be reduced by the amount of any returns of capital. If your adjusted cost base falls below zero, you will have to pay capital gains tax on the amount below zero.

The targeted annual distribution is based on the Fund's or Portfolio's previous year-end net asset value and is subject to change. Monthly distributions on Series T and Series V shares may generally be a return of capital so long as there is sufficient capital attributable to the relevant series.
