HOW RISKY IS IT?

The value of the fund can go down as well as up. You could lose money.

One way to gauge risk is to look at how much a fund's returns change over time. This is called "volatility".

In general, funds with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. Funds with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

Risk rating

AGF Investments Inc. has rated the volatility of this fund as **low**.

This rating is based on how much the fund's returns have changed from year to year. It doesn't tell you how volatile the fund will be in the future. The rating can change over time. A fund with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the fund's returns, see "What are the risks of investing in the Fund?" and "Specific risks of the Funds" sections of the fund's simplified prospectus.

No guarantees

Like most mutual funds, this fund doesn't have any guarantees. You may not get back the amount of money you invest.

HOW HAS THE FUND PERFORMED?

This section tells you how Series F shares of the fund have performed over the past 2 years. Returns are after expenses have been deducted. These expenses reduce the fund's returns.

Year-by-year returns

This chart shows how Series F shares of the fund have performed in each of the past 2 years. The fund dropped in value in 0 of the last 2 years. The range of returns and change from year to year can help you assess how risky the fund has been in the past. It does not tell you how the fund will perform in the future.

Best and worst 3-month returns

This table shows the best and worst returns for Series F shares of the fund in a 3-month period over the past 2 calendar years. The best and worst 3-month returns could be higher or lower in the future. Consider how much of a loss you could afford to take in a short period of time.

	Return	3 months ending	If you invested \$1,000 at the beginning of the period
Best return	4.5%	April 30, 2017	Your investment would rise to \$1,045
Worst return	-1.6%	August 31, 2017	Your investment would drop to \$984

Average Return

The annual compounded return of Series F shares of the fund was 3.4% since inception. If you had invested \$1,000 in the fund since inception, your investment would now be worth \$1,098.

WHO IS THIS FUND FOR?

- you're investing for the medium to longer term
- you tolerate low risk
- you are investing in a non-registered account and want to invest in a fund within a corporate class structure that has significant loss carryforwards that will enable tax-deferred growth

A WORD ABOUT TAX

In general, you'll have to pay income tax on any money you make on a fund. How much you pay depends on the tax laws where you live and whether or not you hold the fund in a registered plan, such as a Registered Retirement Savings Plan or a Tax-Free Savings Account.

Keep in mind that if you hold your fund in a non-registered account, generally, fund distributions are included in your taxable income, whether you get them in cash or have them reinvested.

HOW MUCH DOES IT COST?

The following tables show the fees and expenses you could pay to buy, own and sell Series F shares of the fund. The fees and expenses - including any commissions - can vary among series of a fund and among funds. Higher commissions can influence representatives to recommend one investment over another. Ask about other funds and investments that may be suitable for you at a lower cost.

1. Sales charges

No sales charges are applicable for this series of the fund. You can buy Series F shares only through representatives who have received prior approval from AGF Investments Inc.
