

AGFiQ US Market Neutral Anti-Beta CAD-Hedged ETF

QBTL

This document contains key information you should know about AGFiQ US Market Neutral Anti-Beta CAD-Hedged ETF. You can find more details about this exchange-traded fund (ETF) in its prospectus. Ask your representative for a copy, contact AGF Investments Inc. at 1-800-387-2563 or AGFiQ@agf.com, or visit www.AGF.com.

Before you invest, you should consider how the ETF would work with your other investments and your tolerance for risk.

This ETF is an alternative mutual fund. It has the ability to invest in asset classes or use investment strategies that are not permitted for conventional mutual funds. The specific strategies that differentiate this ETF from conventional mutual funds include: increased use of derivatives for hedging and non-hedging purposes; increased ability to sell securities short; and the ability to borrow cash for investment purposes. Leverage amplifies gains and losses. While these strategies will be used in accordance with the ETF's investment objectives and strategies, during certain market conditions they may accelerate the pace at which your investment decreases in value.

Effective as of January 1, 2020, the Portfolio Manager of the fund will change from Highstreet Asset Management Inc. to its affiliate, AGF Investments Inc.

WHAT DOES THE ETF INVEST IN?

The ETF seeks performance results that correspond to the price and yield performance, before fees and expenses, of the Dow Jones U.S. Thematic Market Neutral Anti-Beta Index (CAD-Hedged). The ETF will use leverage, which may be created through the use of cash borrowing, short sales and/or specified derivatives. At least initially, the ETF uses derivatives, such as options, futures and swaps, to get exposure to the index without investing directly in the securities that make up the index. The ETF's maximum aggregate exposure to these sources of leverage will not exceed 300% of the ETF's net asset value.

The charts below give you a snapshot of the ETF's investments on October 31, 2019. The ETF's investments will change.

Cash & Cash Equivalents	102.7%	-

HOW RISKY IS IT?

The value of the ETF can go down as well as up. You could lose money.

One way to gauge risk is to look at how much an ETF's returns change over time. This is called "volatility".

In general, ETFs with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. ETFs with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

Risk rating

AGF Investments Inc. has rated the volatility of this ETF as **medium**.

Because this is a new ETF, the risk rating is only an estimate by AGF Investments Inc. Generally, the rating is based on how much the ETF's returns have changed from year to year. It doesn't tell you how volatile the ETF will be in the future. The rating can change over time. An ETF with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the ETF's returns, see the Risk Factors section of the ETF's prospectus.

No guarantees

ETFs do not have any guarantees. You may not get back the amount of money you invest.

HOW HAS THE ETF PERFORMED?

This section tells you how units of the ETF have performed. Returns¹ are after expenses have been deducted. These expenses reduce the ETF's returns.

¹Returns are calculated using the ETF's net asset value (NAV).

Year-by-year returns

This section tells you how units of the ETF have performed in past calendar years. However, this information is not available because the ETF has not yet completed a calendar year.

Best and worst 3-month returns

This section shows the best and worst returns for the units of the ETF in a 3-month period. However, this information is not available because the ETF has not yet completed a calendar year.

Average return

This section shows the value and annual compounded rate of return of a hypothetical \$1,000 investment in the units of the ETF. However, this information is not available because the ETF has not yet completed 12 consecutive months.

TRADING ETFS

ETFs hold a basket of investments, like mutual funds, but trade on exchanges like stocks. Here are a few things to keep in mind when trading ETFs:

Pricing

ETFs have two sets of prices: market price and net asset value (NAV).

Market price

- ETFs are bought and sold on exchanges at the market price. The market price can change throughout the trading day. Factors like supply, demand, and changes in the value of an ETF's investments can affect the market price.
- You can get price quotes any time during the trading day. Quotes have two parts: **bid** and **ask**.
- The bid is the highest price a buyer is willing to pay if you want to sell your ETF units. The ask is the lowest price a seller is willing to accept if you want to buy ETF units. The difference between the two is called the "**bid-ask spread**".
- In general, a smaller bid-ask spread means the ETF is more liquid. That means you are more likely to get the price you expect.

Net asset value (NAV)

- Like mutual funds, ETFs have a NAV. It is calculated after the close of each trading day and reflects the value of an ETF's investments at that point in time.
- NAV is used to calculate financial information for reporting purposes-like the returns shown in this document.

Orders

There are two main options for placing trades: market orders and limit orders. A market order lets you buy or sell units at the current market price. A limit order lets you set the price at which you are willing to buy or sell units.

Timing

In general, market prices of ETFs can be more volatile around the start and end of the trading day. Consider using a limit order or placing a trade at another time during the trading day.

WHO IS THIS ETF FOR?

- you are seeking to limit the effect of general market movements on your investment portfolio
 - you are investing for the medium to long-term
 - you tolerate medium risk
- !** Don't buy this ETF if you need a steady source of income from your investment

A WORD ABOUT TAX

In general, you'll have to pay income tax on any money you make on an ETF. How much you pay depends on the tax laws where you live and whether or not you hold the ETF in a registered plan, such as a Registered Retirement Savings Plan or a Tax-Free Savings Account.

Keep in mind that if you hold your ETF in a non-registered account, distributions from the ETF are included in your taxable income, whether you get them in cash or have them reinvested.

HOW MUCH DOES IT COST?

This section shows the fees and expenses you could pay to buy, own and sell units of the ETF. Fees and expenses - including any trailing commissions - can vary among ETFs. Higher commissions can influence representatives to recommend one investment over another. Ask about other ETFs and investments that may be suitable for you at a lower cost.

1. Brokerage commissions

You may have to pay a commission every time you buy and sell units of the ETF. Commissions may vary by brokerage firm. Some brokerage firms may offer commission-free ETFs or require a minimum purchase amount.

2. ETF expenses

You don't pay these expenses directly. They affect you because they reduce the ETF's returns.

The ETF's expenses are made up of management fees, operating expenses, and trading costs. The ETF's annual management fee, inclusive of applicable taxes, is 0.55% of the ETF's value. As this ETF is new, its operating expenses and trading costs are not yet available.

Trailing commission

The trailing commission is an ongoing commission. It is paid for as long as you own the ETF. It is for the services and/or advice that your representative and their firm provide to you.

This ETF does not have a trailing commission.

WHAT IF I CHANGE MY MIND?

Under securities law in some provinces and territories, you have the right to cancel your purchase within 48 hours after you receive confirmation of the purchase.

In some provinces and territories, you also have the right to cancel a purchase, or in some jurisdictions, claim damages, if the prospectus, ETF Facts or financial statements contain a misrepresentation. You must act within the time limit set by the securities law in your province or territory.

For more information, see the securities law of your province or territory or ask a lawyer.
