

ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE

Harmony Money Market Pool

SEPTEMBER 30, 2017

Management Discussion of Fund Performance

This management discussion of fund performance represents the portfolio management team's view of the significant factors and developments affecting the pool's performance and outlook.

Investment Objective and Strategies

Pursuant to the Declaration of Trust, the investment objective of Harmony Money Market Pool (the "Pool") is to provide maximum income, while preserving capital and liquidity, by investing primarily in Canadian money market instruments, such as Canadian treasury bills and other high quality short-term money market instruments. AGF Investments Inc. ("AGFI"), as portfolio manager, invests in high quality, short-term money market instruments ensuring that the Pool's investments maintain a weighted average term to maturity of 90 calendar days or less.

Risk

The risks of investing in the Pool remain as disclosed in the current prospectus. The Pool continues to be suitable for investors seeking to invest in money market instruments and have low tolerance for risk.

Results of Operations

For the year ended September 30, 2017, the Wrap and Embedded Series Units of the Pool returned nil (net of expenses) while the FTSE TMX Canada 91 Day T-Bill Index ("FTSE TMX 91 Day Index") returned 0.5%.

On an expense adjusted basis, the Pool out-performed the FTSE TMX 91 Day Index. The Pool maintained exposure to money market instruments backed by Canadian financial institutions during the reporting period, which yielded more than the FTSE TMX 91 Day Index and contributed to performance. During the reporting period, the Pool also maintained a higher average yield relative to the FTSE TMX 91 Day Index, which also contributed to performance.

The Pool maintained a shorter maturity profile relative to the benchmark over the reporting period. The positioning contributed to performance as most money market yields climbed over all maturities.

The Pool had net redemptions of approximately \$0.4 million for the current period, as compared to net redemptions of approximately \$1 million in the prior period. The portfolio manager does not believe that redemption activity had a meaningful impact on the Pool's performance or the ability to implement its investment strategy.

Total expenses before foreign withholding taxes, commissions and other portfolio transaction costs vary period over period mainly as a result of changes in average Net Asset Values (see Explanatory Note (1) a)) and investor activity, such as number of investor accounts and transactions. The decrease in unitholder servicing and administrative fees accounted

for most of the decrease in expenses during the period when compared to the previous period due to non-recurring expenses incurred in the previous period. Investment management fees decreased due to a decrease in average Net Asset Values. All other expenses remained fairly consistent throughout the periods.

Recent Developments

In Canada, the strong pace of economic growth exhibited during the first half of the calendar year will likely slow down following the unsustainable pace of the first half of the calendar year. In the portfolio manager's opinion, the Bank of Canada will raise interest rates again in the last calendar quarter of 2017. Governor Poloz of the Bank of Canada recently stressed the need for caution while normalizing interest rates and the monitoring of how the economy, particularly the highly-levered household sector, responds to the two prior rate increases and the stronger Canadian dollar.

Global growth continues to accelerate, supported by both developed and emerging economies. However, higher yields and the recent appreciation of the U.S. dollar may tighten financial conditions, which along with slowing money growth could constrain economic growth in the near term. The U.S. Federal Reserve (the "Fed") remains committed to tightening as financial conditions remain healthy. The portfolio manager expects the Fed to continue on its path of balance sheet reduction and gradual policy rate increases. In the near term, the portfolio manager believes the Trump administration should announce the next Fed chair following Janet Yellen's term, which ends in February 2018. While there are several candidates in the running, the portfolio manager expects that the Trump administration will support a future chair that favours more accommodative monetary policies and less onerous financial regulations. On the fiscal front, the lack of progress on health care and tax reform has contributed to economic and market uncertainty, though increasing expectations over some form of Republican Party tax relief towards the end of the last calendar quarter provided support for riskier asset classes and the U.S. dollar.

In Europe, the portfolio manager anticipates that the European Central Bank will announce a reduction in asset purchases in October 2017. Encouragingly, Europe remains in the early stage of the business cycle and is experiencing an improvement in credit conditions and economic growth, driven by strong household consumption, fixed investment and exports.

The portfolio manager anticipates that bond yields will move higher if global growth continues to improve. Inflation in the developed economies remains below target, and developments on this front will be a key element influencing the path of bond yields and monetary policy.

In this environment, the portfolio manager expects that the Pool will continue to take advantage of out-of-benchmark exposure in bankers' acceptance paper as they provide higher yields than government-

This annual management report of fund performance contains financial highlights, but does not contain the complete annual financial statements of the investment fund. You can get a copy of the annual financial statements at your request, and at no cost, by calling 1 800 387-2563, by writing to us at AGF Investments Inc. 55 Standish Court, Suite 1050, Mississauga, Ontario, Canada L5R 0G3 attention: Harmony Client Services, or by visiting our website at www.agf.com or SEDAR at www.sedar.com.

Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

guaranteed and provincial treasury bills of a similar maturity. The portfolio manager will continue to actively manage the maturity profile of the Pool and may extend the profile in anticipation of rising interest rates, should the premium for holding longer term securities becomes more rewarding.

Related Party Transactions

AGFI is the manager (“Manager”) and trustee of the Pool. Unitholders of the Embedded Series Units and Wrap Series Units do not pay management fees.

AGFI is also the investment (portfolio) manager of the Pool. The Pool pays investment management fees to AGFI to manage the assets of the Pool, based upon the Net Asset Value of the Pool. Investment management fees of approximately \$4,000 were incurred by the Pool during the period ended September 30, 2017.

AGF CustomerFirst Inc. (“AGFC”) provides transfer agency services to the Pool pursuant to a services agreement with AGFI. Unitholder servicing and administrative fees of approximately \$4,000 incurred by the Pool were paid to AGFC during the period ended September 30, 2017.

AGFI and AGFC are indirect wholly-owned subsidiaries of AGF Management Limited.

Caution Regarding Forward-looking Statements

This report may contain forward-looking statements about the Pool, including its strategy, expected performance and condition. Forward-looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as “expects”, “anticipates”, “intends”, “plans”, “believes”, “estimates” or negative versions thereof and similar expressions.

In addition, any statement that may be made concerning future performance, strategies or prospects, and possible future Pool action, is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to, among other things, risks, uncertainties and assumptions about the Pool and economic factors.

The forward-looking statements are by their nature based on numerous assumptions, which include, amongst other things, that (i) the Pool can attract and maintain investors and has sufficient capital under management to effect its investment strategies, (ii) the investment strategies will produce the results intended by the portfolio manager, and (iii) the markets will react and perform in a manner consistent with the investment strategies. Although the forward-looking statements contained herein are based upon what the portfolio manager believes to be reasonable assumptions, the portfolio manager cannot assure that actual results will be consistent with these forward-looking statements.

Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements made by the Pool. Any number of important factors could contribute to these digressions,

including, but not limited to, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, global equity and capital markets, business competition, technological change, changes in government regulations, unexpected judicial or regulatory proceedings, and catastrophic events.

It should be stressed that the above-mentioned list of factors is not exhaustive. You are encouraged to consider these and other factors carefully before making any investment decisions and you are urged to avoid placing undue reliance on forward-looking statements. Further, you should be aware of the fact that the Pool has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise, prior to the release of the next Management Report of Fund Performance.

Financial Highlights

The following tables show selected key financial information about the Pool and are intended to help you understand the Pool’s financial performance for the past five years as applicable. The Pool adopted International Financial Reporting Standards (“IFRS”) on October 1, 2014. All per unit information presented for the period ended September 30, 2014, including opening net assets, reflects retrospective adjustments in accordance with IFRS. Information for the periods prior to October 1, 2013 is derived from financial statements prepared in accordance with Canadian generally accepted accounting principles as defined in Part V of the CPA Handbook (“Canadian GAAP”).

Explanatory Notes

(1) a) This information is derived from the Pool's audited annual financial statements. Prior to October 1, 2014, the net assets per unit presented in the financial statements ("Net Assets") differed from the net asset value per unit calculated for fund pricing purposes ("Net Asset Value"), due to differences in valuation techniques of certain investments as required under Canadian GAAP. The adoption of IFRS, effective October 1, 2014, has generally eliminated the difference between Net Assets per unit and Net Asset Value per unit.

Total Net Asset Value and number of units outstanding presented as at September 30, 2015 may have been adjusted to include certain transactions, if applicable, for the purpose of comparability with subsequent reporting periods. These adjustments have no effect on the Net Asset Value per unit.

b) The following series of the Pool commenced operations on the following dates, which represents the date upon which securities of a series were first made available for purchase by investors.

Wrap Series Units	January 2000
Embedded Series Units	December 2002

(2) Net Assets and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the financial period.

(3) Distributions were paid in cash/reinvested in additional units of the Pool, or both.

(1), (2), (3), (4), (5), (6), (7) and (8) see Explanatory Notes

* The indicated rates of return shown here are the historical annual compounded total returns including changes in security value and reinvestment of all distributions and do not take into account sales, redemption, distribution or other optional charges by any securityholder that would have reduced returns or performance. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated.

(4) This is not a reconciliation of the beginning and ending Net Assets per unit.

(5) The management expense ratio of a particular series is calculated in accordance with National Instrument 81-106, based on all the expenses of the Pool (including Harmonized Sales Tax, Goods and Services Tax and interest, but excluding foreign withholding taxes, commissions and other portfolio transaction costs) allocated to that series, expressed as an annualized percentage of average daily Net Asset Value of that series during the period.

(6) AGFI waived certain fees or absorbed certain expenses otherwise payable by the Pool. The amount of expenses waived or absorbed is determined annually on a series by series basis at the discretion of AGFI and AGFI can terminate the waiver or absorption at any time.

(7) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of average daily Net Asset Value during the period.

(8) The Pool's portfolio turnover rate ("PTR") indicates how actively the Pool's portfolio advisor manages its portfolio investments. A PTR of 100% is equivalent to the Pool buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's PTR in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

PTR is calculated based on the lesser of the cumulative cost of purchases or cumulative proceeds of sales divided by the average market value of the portfolio, excluding short-term investments.

Management Fees

Wrap Series Units and Embedded Series Units of the Pool do not pay management fees.

Past Performance*

The performance information shown assumes that all distributions made by the Pool in the periods shown were reinvested in additional securities of the Pool. Note that the performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. How the Pool has performed in the past does not necessarily indicate how it will perform in the future.

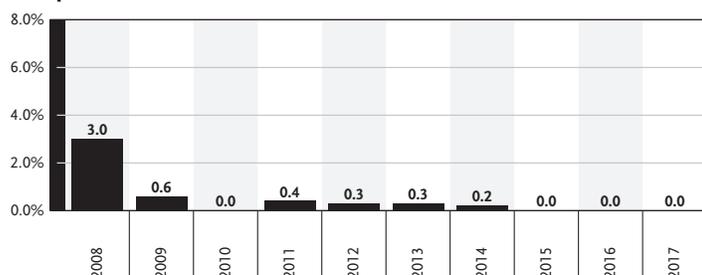

It is AGFI's policy to report rates of return for series in existence greater than one year. The performance start date for each series represents the date of the first purchase of such series, excluding seed money.

All rates of return are calculated based on the Net Asset Value.

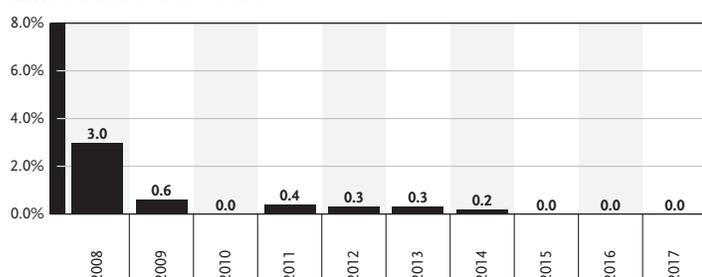

Year-By-Year Returns

The following bar charts show the Pool's annual performance for each of the past 10 years to September 30, 2017 as applicable, and illustrate how the Pool's performance has changed from year to year. The charts show, in percentage terms, how much an investment made on the first day of each financial period would have grown or decreased by the last day of each financial period.

Wrap Series Units

Embedded Series Units

Top Holdings	Percentage of Net Asset Value (%)

Summary of Investment Portfolio

As at September 30, 2017

The major portfolio categories and top holdings (up to 25) of the Pool at the end of the period are indicated in the following tables. The Summary of Investment Portfolio may change due to ongoing portfolio transactions of the Pool and the next quarterly update will be in the Quarterly Portfolio Disclosure as at December 31, 2017.

Portfolio by Sector	Percentage of Net Asset Value (%)
Bankers' Acceptances	43.3
Treasury Bills	40.8
Promissory Notes	14.7
Short-Term Deposits	2.9

Portfolio by Asset Mix	Percentage of Net Asset Value (%)
Short-Term Investments	101.7

Portfolio by Credit Rating††	Percentage of Net Asset Value (%)
AAA	24.5
AA	25.7
A	51.5

†† References made to credit ratings are obtained from Standard & Poor's, Moody's, Dominion Bond Rating Service and/or Fitch Ratings. Where one or more rating is obtained for a security, the lowest rating has been used.
