

Annual Management Report of Fund Performance

# AGF Elements Global Portfolio Class

September 30, 2018

## Management Discussion of Fund Performance

This management discussion of fund performance represents the portfolio management team's view of the significant factors and developments affecting the portfolio's performance and outlook.

### Investment Objective and Strategies

As described in the Simplified Prospectus, the investment objective of AGF Elements Global Portfolio Class (the "Portfolio") is to provide superior long-term returns by investing primarily in equity mutual funds from around the globe. To achieve this objective, AGF Investments Inc. ("AGFI"), as portfolio manager, allocates the Portfolio's assets among underlying mutual funds (the "Underlying Funds") and exchange traded funds ("ETFs"), all of which are managed by AGFI or an AGFI affiliate. AGFI has set, and reviews quarterly, target dynamic allocations between equity funds for the Portfolio, consistent with the Portfolio's investment objective. In periods of unusual market conditions, a significant portion of the Portfolio's assets may be held in cash, money market securities or money market funds.

### Risk

The risks of investing in the Portfolio remain as disclosed in the current prospectus. The Portfolio continues to be suitable for investors investing for the longer term, seeking a globally diversified mix of equity funds in a single portfolio and who have medium tolerance for risk.

### Results of Operations

For the year ended September 30, 2018, the Mutual Fund Shares of the Portfolio returned 8.4% (net of expenses) while the MSCI All Country World Index and the S&P/TSX Composite Index ("S&P/TSX Index") returned 14.2% and 5.9%, respectively. The performance of the other series of the Portfolio is substantially similar to that of the Mutual Fund Shares, save for differences in expense structure. Refer to "Past Performance" section for performance information of such series.

The Portfolio holds Series I or Series S Units of the Underlying Funds. The discussion below references performance figures for Mutual Fund Units of the Underlying Funds. The performance of Series I or Series S Units is substantially similar to that of the Mutual Fund Units, save for differences in expense structure.

The Portfolio is constructed based on an asset allocation framework that allocates to a diverse array of mutual funds and ETFs representing distinct global asset class opportunities, each with unique risk and return expectations.

The Portfolio under-performed the MSCI All Country World Index due to performance of the Underlying Funds, most of which lagged their respective benchmarks during the reporting period. Within the Portfolio's Underlying Funds, stock and sector selection amongst global equities also detracted. The Underlying Funds' preference for higher dividend-yielding sectors such as consumer staples and telecommunication services weighed negatively given their under-performance due to rising bond yields. This was partly offset with out-performance of the Underlying Funds investing in U.S. equities.

The Portfolio out-performed the S&P/TSX Index due to inclusion of global equities, which account for the large majority of the Portfolio's geographic allocation. The global equities out-performed Canadian equities by a wide margin during the reporting period.

The Portfolio held approximately 85.3% of its holdings in foreign equity funds and 13.9% in a balanced fund as at September 30, 2018. During the reporting period, Portfolio's exposure to Canadian equities was eliminated, while exposure to U.S. and global equities was increased. Within Canadian equity, exposure to AGF Canadian Small Cap Fund, AGF Canadian Growth Equity Fund and AGFiQ Enhanced Core Canadian Equity ETF was removed, as trade risks weighed negatively on export-reliant sectors and overall sentiment towards the Canadian market. This was partially offset by an increased exposure to AGF American Growth Fund and AGFiQ Enhanced Core US Equity ETF, while exposure to AGF U.S. Risk Managed Fund was removed. Within global equity, exposure to AGF Global Sustainable Growth Equity Fund, AGFiQ Enhanced Global ESG Factors ETF and AGFiQ Enhanced Global Infrastructure ETF was added, exposure to AGF Global Dividend Fund and AGF Global Equity was reduced, while exposure to AGF EAFE Equity Fund was removed. Within the balanced fund category, the Portfolio's exposure to AGF Tactical Fund was reduced.

During the reporting period, the Portfolio's overweight exposure to global equities and lack of exposure to Canadian equities contributed to performance. Under-performance of the Portfolio's global equity holdings relative to their benchmarks detracted, though strong security selection within U.S. equities offered some relief. The Portfolio's U.S. equity exposure contributed to performance as AGF American Growth Fund (Series S Units) returned 28.9%, out-performing the S&P 500 Net Index. Within global equity, AGF Asian Growth Fund (Series S Units), AGF Global Dividend Fund, AGF Global Equity Fund, AGF Global Sustainable Growth Equity and AGFiQ Enhanced Core International Equity ETF returned 2.9%, 7.8%, 3.7%, 10.4% and 5.4%, respectively, all under-performing their respective

This annual management report of fund performance contains financial highlights, but does not contain the complete annual financial statements of the investment fund. You can get a copy of the annual financial statements at your request, and at no cost, by calling 1 800 268-8583, by writing to us at AGF Investments Inc., 55 Standish Court, Suite 1050, Mississauga, Ontario, Canada L5R 0G3 attention: Client Services, or by visiting our website at [www.agf.com](http://www.agf.com) or SEDAR at [www.sedar.com](http://www.sedar.com).

Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

## (CLASS OF AGF ALL WORLD TAX ADVANTAGE GROUP LIMITED)

SEPTEMBER 30, 2018

benchmarks. On the contrary, AGF Emerging Markets Fund and AGFiQ Enhanced Core Emerging Markets Equity ETF, returned 3.7% and 6.9%, respectively, which out-performed the MSCI Emerging Markets Index. The Portfolio's balanced fund category contributed to performance with 10.2% return posted by AGF Tactical Fund (Series S Units), out-performing the FTSE TMX Canada 91 Day T-Bill Index largely due to strong performance of equities during the reporting period.

The Portfolio entered into foreign exchange forward contracts during the period under review. As of September 30, 2018, the Portfolio was long Canadian dollar and short U.S. dollar in order to hedge its indirect currency exposure via the Underlying Funds.

The Portfolio had net subscriptions of approximately \$3 million for the current period, as compared to net subscriptions of approximately \$1 million in the prior period. The portfolio manager does not believe that subscription activity had a meaningful impact on the Portfolio's performance or the ability to implement its investment strategy.

Total expenses before commissions and other portfolio transaction costs vary period over period mainly as a result of changes in average Net Asset Values (see Explanatory Note (1) a)) and investor activity, such as number of investor accounts and transactions. Expenses have increased as compared to the previous period due mainly to an increase in average Net Asset Values and investor activity. Custodian fees increased due to an increase in market value of ETF portfolio. All other expenses remained fairly consistent throughout the periods.

### Recent Developments

AGFI, as portfolio manager, monitors and reviews the Portfolio and the strategic asset allocation on a quarterly basis. Rebalancing of the allocation of funds within the Portfolio occurs quarterly, or as deemed appropriate.

The portfolio manager remains constructive towards global growth over the medium term, though expects periods of unsettled markets along the way. Within equities, prospects for emerging markets have improved on the back of structural reform and a resilient Chinese economy, though higher oil prices and further strengthening of the U.S. dollar could temper returns. Within developed markets, the portfolio manager continues to view U.S. equities favourably as the effects of tax reform and global economic growth should support company earnings. Japanese equities are also favoured, as accommodative policy should support economic fundamentals and Prime Minister Shinzo Abe's election victory affirms political stability and the likelihood of further pro-growth reforms. Generally positive economic conditions and accommodative monetary policy in Europe are overshadowed by stagnant Brexit negotiations in the UK and political uncertainty in Italy, leading to a negative outlook for the region. The backdrop for Canadian equities has improved upon trade resolution with the U.S. and sustained higher energy prices, yet remains out-of-favour due to domestic

political disruption and record-high household debt levels. Asia Pacific markets (excluding Japan) offer attractive valuations, though in light of potential risk of escalating tariffs, the portfolio manager prefers other developed markets in the near term.

Effective October 1, 2018, certain operating expenses relating to registrar and transfer agency services are paid directly by AGFI and in exchange, a fixed rate administration fee was introduced for the Mutual Fund Series, Series D, Series F, Series I, Series J, Series T and Series V Shares, as applicable, of the Portfolio. The administration fee was approved by the shareholders of the Portfolio on June 14, 2018. The administration fee for each applicable series is calculated daily and payable monthly, based on the average Net Asset Value of the respective series of the Portfolio at a fixed annual rate, as disclosed in the current prospectus. The Portfolio continues to pay for all other operating expenses.

### Related Party Transactions

AGFI is the manager ("Manager") of the Portfolio. Pursuant to the management agreement between the Portfolio and AGFI, AGFI is responsible for the day-to-day business of the Portfolio. AGFI also acts as the investment (portfolio) manager of the Portfolio, providing analysis and making decisions as to which Underlying Funds and ETFs the Portfolio invests in and the target weighting of the Portfolio's assets. Under the management agreement, the Portfolio (except for Series O, Series Q and Series W Shares, if applicable) pays management fees calculated based on the Net Asset Value of the respective series of the Portfolio. Management fees of approximately \$269,000 were incurred by the Portfolio during the period ended September 30, 2018.

AGF CustomerFirst Inc. ("AGFC") provides transfer agency services to the Portfolio pursuant to a services agreement with AGFI. Shareholder servicing and administrative fees of approximately \$8,000 incurred by the Portfolio were paid to AGFC during the period ended September 30, 2018.

AGFI and AGFC are indirect wholly-owned subsidiaries of AGF Management Limited.

### Caution Regarding Forward-looking Statements

This report may contain forward-looking statements about the Portfolio, including its strategy, expected performance and condition. Forward looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates" or negative versions thereof and similar expressions.

In addition, any statement that may be made concerning future performance, strategies or prospects, and possible future Portfolio action, is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to, among other things, risks, uncertainties and assumptions about the Portfolio and economic factors.

# AGF Elements Global Portfolio Class

## (CLASS OF AGF ALL WORLD TAX ADVANTAGE GROUP LIMITED)

SEPTEMBER 30, 2018

The forward-looking statements are by their nature based on numerous assumptions, which include, amongst other things, that (i) the Portfolio can attract and maintain investors and has sufficient capital under management to effect its investment strategies, (ii) the investment strategies will produce the results intended by the portfolio manager, and (iii) the markets will react and perform in a manner consistent with the investment strategies. Although the forward-looking statements contained herein are based upon what the portfolio manager believes to be reasonable assumptions, the portfolio manager cannot assure that actual results will be consistent with these forward-looking statements.

Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements made by the Portfolio. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, global equity and capital markets, business competition, technological change, changes in government regulations, unexpected judicial or regulatory proceedings, and catastrophic events.

It should be stressed that the above-mentioned list of factors is not exhaustive. You are encouraged to consider these and other factors carefully before making any investment decisions and you are urged to avoid placing undue reliance on forward-looking statements. Further, you should be aware of the fact that the Portfolio has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise, prior to the release of the next Management Report of Fund Performance.

## Financial Highlights

The following tables show selected key financial information about the Portfolio and are intended to help you understand the Portfolio's financial performance for the past five years as applicable. The Portfolio adopted International Financial Reporting Standards ("IFRS") on October 1, 2014. All per share information presented for the period ended September 30, 2014, including opening net assets, reflects retrospective adjustments in accordance with IFRS. Previously, financial statements were prepared in accordance with Canadian generally accepted accounting principles ("Canadian GAAP").

### Explanatory Notes

(1) a) This information is derived from the Portfolio's audited annual financial statements. Under IFRS, investments that are traded in an active market are generally valued at closing price, which is determined to be within the bid-ask spread and most representative of fair value. As a result, there is no difference between the net assets per share presented in the financial statements ("Net Assets") and the net asset value per share calculated for fund pricing purposes ("Net Asset Value").

Total Net Asset Value and number of shares outstanding presented as at September 30, 2015 may have been adjusted to include certain transactions, if applicable, for the purpose of comparability with subsequent reporting periods. These adjustments have no effect on the Net Asset Value per share.

b) The following series of the Portfolio commenced operations on the following dates, which represents the date upon which securities of a series were first made available for purchase by investors.

Mutual Fund Shares	January 2009
Series F Shares	January 2009
Series Q Shares	April 2015
Series W Shares	April 2016

(2) Net Assets, dividends and distributions are based on the actual number of shares outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of shares outstanding over the financial period.

(3) Dividends and distributions were paid in cash/reinvested in additional shares of the Portfolio, or both.

(4) This is not a reconciliation of the beginning and ending Net Assets per share.

(5) The management expense ratio ("MER") of a particular series is calculated in accordance with National Instrument 81-106, based on all the expenses of the Portfolio (including Harmonized Sales Tax, Goods and Services Tax, income tax and interest, but excluding commissions and other portfolio transaction costs) and the Portfolio's proportionate share of the MER, if applicable, of the Underlying Funds and ETFs in which the Portfolio has invested, attributable to that series, expressed as an annualized percentage of average daily Net Asset Value of that series during the period.

The Portfolio does not pay duplicate management and advisory fees, as applicable, on the portion of the assets that it invests in the Underlying Funds. Accordingly, AGFI will waive the management and advisory fees payable or paid by the Underlying Funds in order to avoid such duplication.

(6) AGFI waived certain fees or absorbed certain expenses otherwise payable by the Portfolio. The amount of expenses waived or absorbed is determined annually on a series by series basis at the discretion of AGFI and AGFI can terminate the waiver or absorption at any time.

(7) The trading expense ratio represents total commissions and other portfolio transaction costs, including the Portfolio's

\* represents initial Net Assets

- annualized

(1), (2), (3), (4), (5), (6), (7) and (8) see Explanatory Notes

proportionate share of the commissions, if applicable, of the Underlying Funds and ETFs in which the Portfolio has invested, expressed as an annualized percentage of average daily Net Asset Value during the period.

- (8) The Portfolio's portfolio turnover rate ("PTR") indicates how actively the Portfolio's portfolio advisor manages its portfolio investments. A PTR of 100% is equivalent to the Portfolio buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's PTR in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

PTR is calculated based on the lesser of the cumulative cost of purchases or cumulative proceeds of sales divided by the average market value of the portfolio, excluding short-term investments.

### Management Fees

The Portfolio is managed by AGFI. As a result of providing investment and management services, AGFI receives a monthly management fee, based on the Net Asset Value of the respective series, calculated daily and payable monthly. Management fees in respect of Series O, Series Q and Series W Shares, if applicable, are arranged directly between the Manager and investors and are not expenses of the Portfolio. AGFI uses these management fees to pay for sales and trailing commissions to registered dealers on the distribution of the Portfolio's shares, investment advice, as well as for general administrative expenses such as overhead, salaries, rent, legal and accounting fees relating to AGFI's role as manager.

	As a percentage of management fees		
	Annual rates	Dealer compensation	General administration and investment advice
Mutual Fund Shares	2.10%	59.68%	40.32%
Series F Shares	0.90%	-	100.00%

### Past Performance\*

The performance information shown assumes that all distributions made by the Portfolio in the periods shown were reinvested in additional securities of the Portfolio. Note that the performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. How the Portfolio has performed in the past does not necessarily indicate how it will perform in the future.

It is AGFI's policy to report rates of return for series in existence greater than one year. The performance start date for each series represents the date of the first purchase of such series, excluding seed money.

\* The indicated rates of return shown here are the historical annual compounded total returns including changes in security value and reinvestment of all distributions and do not take into account sales, redemption, distribution or other optional charges by any securityholder that would have reduced returns or performance. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated.

All rates of return are calculated based on the Net Asset Value.

### Year-By-Year Returns

The following bar charts show the Portfolio's annual performance for each of the past 10 years to September 30, 2018 as applicable, and illustrate how the Portfolio's performance has changed from year to year. The charts show, in percentage terms, how much an investment made on the first day of each financial period would have grown or decreased by the last day of each financial period.

#### Mutual Fund Shares

Performance for 2009 represents returns for the period from January 28, 2009 to September 30, 2009.

#### Series F Shares

Performance for 2010 represents returns for the period from November 5, 2009 to September 30, 2010.

#### Series Q Shares

Performance for 2015 represents returns for the period from May 14, 2015 to September 30, 2015.
