

Annual Management Report of Fund Performance

# AGF Asian Growth Fund

September 30, 2018

## Management Discussion of Fund Performance

This management discussion of fund performance represents the portfolio management team's view of the significant factors and developments affecting the fund's performance and outlook.

### Investment Objective and Strategies

Pursuant to the Declaration of Trust, the investment objective of AGF Asian Growth Fund (the "Fund") is to provide long-term capital growth by investing primarily in shares of companies that are located or active mainly in Asia or the Pacific Rim Region and are principally traded on Asian stock exchanges. AGF Investments Inc. ("AGFI"), as portfolio manager, uses primarily a bottom-up stock selection process favouring companies that are reasonably priced relative to their growth potential. In bottom-up investing, the portfolio manager focuses attention on a specific company rather than on the industry in which that company operates or on the economy as a whole. Country allocation is used as an overlay to focus the stock research effort rather than to determine specific country targets. Company visits and interviews form a key part of the research process. Securities are selected based on proven management, strong ability to execute and scalable business models. Companies that are over-owned and have persistent negative free cash flow or volatile and unpredictable earnings are generally avoided. A disciplined approach to investing also ensures broad diversification across countries and sectors. In periods of unusual market conditions, a significant portion of the Fund's assets may be held in cash or fixed income securities.

### Risk

The risks of investing in the Fund remain as disclosed in the current prospectus. The Fund continues to be suitable for investors investing for the longer term, seeking the growth potential of equity securities of Asian companies and who have a medium to high tolerance for risk.

### Results of Operations

For the year ended September 30, 2018, the Series S Units of the Fund returned 2.9% (net of expenses) while the MSCI Pacific Free ex-Japan Index ("MSCI Pacific ex-Japan Index") and the MSCI All Country Far East ex-Japan Index ("MSCI Far East ex-Japan Index") returned 8.1% and 5.4%, respectively.

The Fund under-performed the MSCI Pacific ex-Japan Index due to its holdings in emerging markets, which are not constituents of the benchmark. In particular, emerging equity markets such as China, South Korea, the Philippines and Indonesia under-performed the developed markets of Australia, New Zealand, Singapore and Hong Kong, which are constituents of the MSCI Pacific ex-Japan Index.

The Fund also under-performed the MSCI Far East ex-Japan Index due to its relative underweight exposure to Taiwan, which out-performed during the reporting period. The Fund's security selection also detracted from relative performance.

From a country allocation perspective, the Fund's aggregate exposure to Hong Kong/China decreased from 52.9% to 49.4% over the reporting period. This was primarily due to a decrease in its exposure to China, selling real estate developer, Longfor Properties Company Limited, and cement manufacturer, West China Cement Limited. In addition, the Fund took profits on shipping logistics firm, SITC International Holdings Company Limited. Gaming, and internet technology company, NetEase Inc., was also sold to help fund the purchase of leading Chinese video surveillance product and solution provider, Hangzhou Hikvision Digital Technology Company Limited. Amongst the telecommunication operators, the Fund reallocated its position from China Telecom Corporation Limited to the leader, China Mobile Limited. A switch was also made within the education providers, as the Fund sold Wisdom Education International Holdings Company Limited and added China Education Group Holdings Limited, an operator of higher education schools in China. Partially offsetting these was a significant increase in the Fund's exposure to the energy sector. The Fund also initiated a position in quick-service restaurant operator, Yum China Holdings Inc.

The Fund's exposure to South Korea decreased from 18.9% to 18.0% over the reporting period as it took profits on steelmaker, POSCO. Within the South Korean consumer space, the Fund switched its holdings in LG Household & Health Care Limited to Amorepacific Corporation and also added duty-free operator, Hotel Shilla Company Limited. The Fund also exited its position in the internet company, NAVER, and realized profit on its holdings in Samsung Electronics Company Limited through a sale of the preferred shares. On the other hand, the Fund added game developer, NCSOFT Corporation, as well as mobile and electric vehicle battery manufacturer, Samsung SDI Company Limited, to its portfolio.

The Fund's exposure to Taiwan remained unchanged at 12.2% over the reporting period. It sold its holdings in iPhone assembler, Hon Hai Precision Industry Company Limited, due to a weak outlook for iPhone sales and also exited its position in pneumatic tool maker, Basso Industry Corporation. In exchange, the Fund added Airtac International Group, a supplier of industrial automation components, after a sharp correction in its share price. Sales for the company should improve as it ramps up manufacturing for a new product.

In South East Asia, the Fund raised its weighting in Singapore from 4.0% to 8.8% over the reporting period as new positions in banks, a defense-and-engineering conglomerate, an electronics manufacturer and a property

This annual management report of fund performance contains financial highlights, but does not contain the complete annual financial statements of the investment fund. You can get a copy of the annual financial statements at your request, and at no cost, by calling 1 800 268-8583, by writing to us at AGF Investments Inc., 55 Standish Court, Suite 1050, Mississauga, Ontario, Canada L5R 0G3 attention: Client Services, or by visiting our website at [www.agf.com](http://www.agf.com) or SEDAR at [www.sedar.com](http://www.sedar.com).

Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

developer were added. This was partly funded from the sale of Oversea-Chinese Banking Corporation Limited following a strong rally in its share price. The Fund also exited its position in Sembcorp Industries Limited. The Fund's exposure to Malaysia increased from nil to 3.0%, as a new position in a large bank was initiated. It also took profit on Genting Berhad and switched into Genting Malaysia Berhad as the latter could exhibit stronger growth with the opening of its theme park in 2019. In contrary, the Fund reduced its exposure to Indonesia and the Philippines on currency weakness concerns.

From a sector perspective, the Fund's exposure to consumer discretionary decreased from 9.8% to 9.3% over the reporting period as it realized profits in a leading global luggage producer listed in Hong Kong. On the other hand, the Fund increased its exposure to the consumer staples sector from 4.2% to 6.2%, as a leading South Korean convenience store operator, BGF Retail Company Limited, was added.

The Fund's exposure to the energy and financials sectors were increased over the reporting period. Its weighting in the energy sector rose from 2.0% to 4.6% as it added Chinese national oil company, CNOOC Limited, and also initiated a position in offshore oilfield service provider, China Oilfield Services Limited, which is set to benefit from rising capital expenditures of upstream oil majors given the recovery of oil prices. The Fund's weighting in the financials sector rose from 22.5% to 26.5% due to increased exposure to banks in Hong Kong, Singapore and Malaysia. Its weighting in the health care sector was maintained at 1.4%, as it sold integrated health care solution provider, Universal Medical Financial & Technical Advisory Services Company Limited, and added the Chinese pharmaceutical drug manufacturer, 3SBio Inc.

The Fund's exposure to the information technology, materials, utilities and other sectors were reduced over the reporting period. The Fund's weighting in the information technology sector fell from 37.1% to 35.5%, due in part to market movements and also its reduced exposure to the iPhone supply chain. Allocation to the materials sector fell from 3.9% to 1.9%, on the sale of West China Cement Limited and POSCO. Exposure to the utilities sector fell from 3.6% to 1.2% as the Fund exited its position in South Korean electric utility company, Korea Electric Power Corporation, on continued regulatory uncertainties. The Fund also sold its holdings in Chinese state-owned wastewater treatment company, Beijing Enterprises Water Group Limited. The Fund's weighting in the telecommunication services sector fell from 5.4% to 4.1%. The Fund sold its holdings in wireless operators in Indonesia and the Philippines, but later initiated a position in PT XL Axiata Tbk, Indonesia's second largest mobile telecommunication operator, as it is well-positioned to benefit from rising mobile tariffs and network expansion outside Java.

The Fund had net subscriptions of approximately \$3 million for the current period, as compared to net subscriptions of approximately \$2 million in the prior period. Rebalancing by an institutional program resulted in net subscriptions of approximately \$2 million in the Fund. The portfolio manager

does not believe that subscription activity had a meaningful impact on the Fund's performance or the ability to implement its investment strategy.

Total expenses before foreign withholding taxes, commissions and other portfolio transaction costs vary period over period mainly as a result of changes in average Net Asset Values (see Explanatory Note (1) a)) and investor activity, such as number of investor accounts and transactions. Expenses have increased as compared to the previous period due mainly to an increase in average Net Asset Values. The increase in custodian fees was due to increase in market value of investment portfolio. The increase in audit fees was due to variance between the accrued amounts versus the actual expenses incurred in the previous period. All other expenses remained fairly consistent throughout the periods.

### Recent Developments

Economic growth in China was fairly resilient during the first half of the reporting period, but started to show signs of weakness due to the Chinese government's deleveraging initiatives and measures to curb banks' off-balance sheet lending. Weakness in the economy worsened with the escalating trade conflicts between the U.S. and China. Fixed asset investment growth decelerated to 5.3% in August 2018, a new low over the past 20 years. Affected by the significant economic uncertainties, consumption also slowed with retail sales growth coming in below 10.0% for five consecutive months beginning in April 2018, the slowest pace since early 2004. Still, other parts of the economy were resilient and in far better condition as compared to the last economic slowdown in 2015. In particular, the property market appears stable, with excess housing inventory having been largely depleted over the last two years. The Chinese Yuan has seen some decline over the last few months, but there has been no sign of massive capital outflow, with the total foreign exchange reserves in China remaining very stable at slightly over US\$3 trillion during the period under review.

Looking forward, obstacles may continue for the Chinese economy, particularly on the export front with the new round of tariffs covering a broad base of items including consumer goods. While the Chinese government is likely to continue with its medium to long-term deleveraging policy, it has taken some measures recently to boost the economy to prevent it from falling into a downward spiral. It has allowed the issuance of special local government bonds totaling approximately US\$200 billion in July and August 2018 to boost infrastructure spending, as well as some modest tax cuts for businesses and individuals. On the monetary policy front, there is further scope for the central bank to cut reserve requirement ratios, if necessary.

Trade tensions between the U.S. and China do not appear to have materially affected South Korea and Taiwan's exports thus far, but remain a major external downside risk. In South Korea, risks may be further tilted to the downside, with performance of the domestic economy continuing to be lackluster amidst a weakening labor market. The central bank adjusted its 2018 growth projection for the economy to 2.9%, from 3.0% in July 2018, and appears to have limited room to maneuver in regards to monetary policy given a

widening interest rate gap with the U.S. Taiwan, on the other hand, raised its 2018 economic growth forecast to 2.69% from 2.60% in August. Local elections will be held in Taiwan in November, with the vote to serve as a litmus test for the next presidential election scheduled for 2020.

Within South East Asia, the economies for Singapore, Malaysia and Thailand are generally healthy, supported by the external environment and well-controlled inflation. In Singapore, the recent increase in stamp duties on property purchases is expected to dampen property transaction and mortgage activity. The Indonesia and Philippines markets have sold off heavily over the past several quarters amid concerns over emerging markets contagion and currency weakness. Equity valuations now appear to be attractive and the portfolio manager believes the situation is unlikely to spiral into a full-blown crisis. Indonesia and the Philippines have sufficient reserves and have hiked their benchmark rates aggressively, by 1.25% and 1.50% respectively, since the beginning of calendar year 2018 to stem currency outflows. Indonesia has also implemented a slew of measures (such as expanded use of bio-diesels, import tariffs and deferment of infrastructure projects) to contain its current account deficit.

Effective March 8, 2018, the risk rating of the Fund was changed from "high" to "medium to high". The change reflects compliance with the new Canadian Securities Administrators' Mutual Fund Risk Classification Methodology. No material changes have been made to the investment objective, strategies or management of the Fund.

#### **Related Party Transactions**

AGFI is the manager ("Manager") and trustee of the Fund. Pursuant to the management agreement between the Fund and AGFI, AGFI is responsible for the day-to-day business of the Fund. AGFI also acts as the investment (portfolio) manager, managing the investment portfolio of the Fund. The Fund was also party to an investment advisory agreement with AGFI and AGF Asset Management Asia Ltd. ("AGF Asia"). AGF Asia acts as an investment advisor and provides investment advisory services to the Fund. Under the management and investment advisory agreements, the Fund pays management and advisory fees, calculated based on the Net Asset Value of Series S Units of the Fund. Management and advisory fees of approximately \$32,000 were incurred by the Fund during the period ended September 30, 2018.

AGF CustomerFirst Inc. ("AGFC") provides transfer agency services to the Fund pursuant to a services agreement with AGFI. Unitholder servicing and administrative fees of approximately \$3,000 incurred by the Fund were paid to AGFC during the period ended September 30, 2018.

AGFI, AGF Asia and AGFC are direct or indirect wholly-owned subsidiaries of AGF Management Limited.

#### **Caution Regarding Forward-looking Statements**

This report may contain forward-looking statements about the Fund, including its strategy, expected performance and condition. Forward looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as

"expects", "anticipates", "intends", "plans", "believes", "estimates" or negative versions thereof and similar expressions.

In addition, any statement that may be made concerning future performance, strategies or prospects, and possible future Fund action, is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to, among other things, risks, uncertainties and assumptions about the Fund and economic factors.

The forward-looking statements are by their nature based on numerous assumptions, which include, amongst other things, that (i) the Fund can attract and maintain investors and has sufficient capital under management to effect its investment strategies, (ii) the investment strategies will produce the results intended by the portfolio manager, and (iii) the markets will react and perform in a manner consistent with the investment strategies. Although the forward-looking statements contained herein are based upon what the portfolio manager believes to be reasonable assumptions, the portfolio manager cannot assure that actual results will be consistent with these forward-looking statements.

Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements made by the Fund. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, global equity and capital markets, business competition, technological change, changes in government regulations, unexpected judicial or regulatory proceedings, and catastrophic events.

It should be stressed that the above-mentioned list of factors is not exhaustive. You are encouraged to consider these and other factors carefully before making any investment decisions and you are urged to avoid placing undue reliance on forward-looking statements. Further, you should be aware of the fact that the Fund has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise, prior to the release of the next Management Report of Fund Performance.

## **Financial Highlights**

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the past five years as applicable. The Fund adopted International Financial Reporting Standards ("IFRS") on October 1, 2014. All per unit information presented for the period ended September 30, 2014, including opening net assets, reflects retrospective adjustments in accordance with IFRS. Previously, financial statements were prepared in accordance with Canadian generally accepted accounting principles ("Canadian GAAP").

Net Asset Value per unit	15.32	15.02	13.04	12.13	11.15

## Explanatory Notes

(1) a) This information is derived from the Fund's audited annual financial statements. Under IFRS, investments that are traded in an active market are generally valued at closing price, which is determined to be within the bid-ask spread and most representative of fair value. As a result, there is no difference between the net assets per unit presented in the financial statements ("Net Assets") and the net asset value per unit calculated for fund pricing purposes ("Net Asset Value").

Total Net Asset Value and number of units outstanding presented as at September 30, 2015 may have been adjusted to include certain transactions, if applicable, for the purpose of comparability with subsequent reporting periods. These adjustments have no effect on the Net Asset Value per unit.

b) Series S Units of the Fund commenced operations in January 2009, which represents the date upon which securities were first made available for purchase by investors.

(2) Net Assets and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the financial period.

(3) Distributions were paid in cash/reinvested in additional units of the Fund, or both. The computation of the distributions per unit does not take into account the management fee distributions (see note 5 below). The characterization of the distributions is based on management's estimate of the actual income for the year.

(1), (2), (3), (4), (5), (6), (7) and (8) see Explanatory Notes

(4) This is not a reconciliation of the beginning and ending Net Assets per unit.

(5) The management expense ratio ("MER") of a particular series is calculated in accordance with National Instrument 81-106, based on all the expenses of the Fund (including Harmonized Sales Tax, Goods and Services Tax and interest, but excluding foreign withholding taxes, commissions and other portfolio transaction costs) and the Fund's proportionate share of the MER, if applicable, of the underlying funds and exchange traded funds ("ETFs") in which the Fund has invested, allocated to that series, expressed as an annualized percentage of average daily Net Asset Value of that series during the period.

AGFI may reduce the effective management fee payable by some unitholders by reducing the management fee it charges to the Fund and directing the Fund to make management fee distributions to these unitholders in amounts equal to the amounts of the management fee reduction. The MER does not take into account the reduction in management fees due to management fee distributions to unitholders.

(6) AGFI waived certain fees or absorbed certain expenses otherwise payable by the Fund. The amount of expenses waived or absorbed is determined annually on a series by series basis at the discretion of AGFI and AGFI can terminate the waiver or absorption at any time.

(7) The trading expense ratio represents total commissions and other portfolio transaction costs, including the Fund's proportionate share of the commissions, if applicable, of the underlying funds and ETFs in which the Fund has invested, expressed as an annualized percentage of average daily Net Asset Value during the period.

(8) The Fund's portfolio turnover rate ("PTR") indicates how actively the Fund's portfolio advisor manages its portfolio investments. A PTR of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's PTR in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

PTR is calculated based on the lesser of the cumulative cost of purchases or cumulative proceeds of sales divided by the average market value of the portfolio, excluding short-term investments.

## Management Fees

The Fund is managed by AGFI. As a result of providing investment advisory and management services, AGFI receives a monthly management and advisory fee, based on the Net Asset Value of Series S Units. AGFI uses these management and advisory fees to pay for sales and trailing commissions to registered dealers on the distribution of the

Fund's units, investment advice, as well as for general administrative expenses such as overhead, salaries, rent, legal and accounting fees relating to AGFI's role as manager.

	As a percentage of management and advisory fees		
	Annual rate	Dealer compensation	General administration and investment advice
Series S Units	1.00%	-	100.00%

## Past Performance\*

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional securities of the Fund. Note that the performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. How the Fund has performed in the past does not necessarily indicate how it will perform in the future.

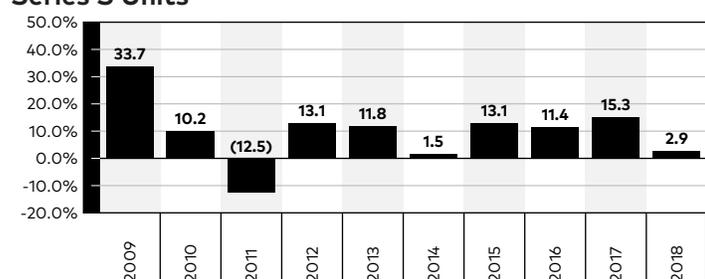

It is AGFI's policy to report rates of return for series in existence greater than one year. The performance start date for each series represents the date of the first purchase of such series, excluding seed money.

All rates of return are calculated based on the Net Asset Value.

### Year-By-Year Returns

The following bar chart shows the Fund's annual performance for each of the past 10 years to September 30, 2018 as applicable, and illustrates how the Fund's performance has changed from year to year. The chart shows, in percentage terms, how much an investment made on the first day of each financial period would have grown or decreased by the last day of each financial period.

### Series S Units

Performance for 2009 represents returns for the period from January 26, 2009 to September 30, 2009.

## Annual Compound Returns

The following table compares the historical annual compound returns for each series with the indices, for each of the periods ended September 30, 2018.

Percentage Return:	1 Year	3 Years	5 Years	10 Years	Since Inception
Series S Units	2.9	9.8	8.7	N/A	9.8
MSCI Pacific Free ex-Japan Index	8.1	11.7	8.8	N/A	13.5
MSCI All Country Far East ex-Japan Index	5.4	13.3	11.7	N/A	13.2

The MSCI Pacific Free ex-Japan Index is a free float-adjusted market capitalization-weighted index that is designed to measure the equity market performance of the developed markets in the Pacific region, excluding Japan.

The MSCI All Country Far East ex-Japan Index is a free float-adjusted market capitalization-weighted index that is designed to measure the equity market performance of the Far East, excluding Japan.

For a discussion of the relative performance of the Fund as compared to the indices, see Results of Operations in the Management Discussion of Fund Performance.

## Summary of Investment Portfolio

As at September 30, 2018

The major portfolio categories and top holdings (up to 25) of the Fund at the end of the period are indicated in the following tables. The Summary of Investment Portfolio may change due to ongoing portfolio transactions of the Fund and the next quarterly update will be in the Quarterly Portfolio Disclosure as at December 31, 2018.

Portfolio by Country	Percentage of Net Asset Value (%)
China	38.6
South Korea	18.0
Taiwan	12.2
Hong Kong	10.8
Singapore	8.8
Malaysia	3.0
India	2.7
Thailand	2.6
Cash & Cash Equivalents	1.6
Indonesia	1.0
The Philippines	0.9

\* The indicated rates of return shown here are the historical annual compounded total returns including changes in security value and reinvestment of all distributions and do not take into account sales, redemption, distribution or other optional charges by any securityholder that would have reduced returns or performance. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated.

Portfolio by Sector	Percentage of Net Asset Value (%)
Information Technology	35.5
Financials	26.5
Consumer Discretionary	9.3
Consumer Staples	6.2
Energy	4.6
