

Annual Management Report of Fund Performance

# AGF Global Dividend Class

September 30, 2018

## **Management Discussion of Fund Performance**

This management discussion of fund performance represents the portfolio management team's view of the significant factors and developments affecting the fund's performance and outlook.

### **Investment Objective and Strategies**

As described in the Simplified Prospectus, the investment objective of AGF Global Dividend Class (the "Fund") is to seek long-term total returns through investing primarily in a diversified portfolio of dividend-paying equity securities of issuers located around the world. To achieve this objective, the Fund currently invests in units of AGF Global Dividend Fund (the "Underlying Fund") and may also directly invest in securities similar to those held by the Underlying Fund. AGF Investments Inc. ("AGFI"), as portfolio manager, uses a quantitative model to assist in determining which countries to invest in and the amount to allocate to each country. A bottom-up conservative growth investment philosophy is then used to uncover stocks that are believed to be reasonably priced relative to their growth potential. In bottom-up investing, the portfolio manager focuses attention on a specific company rather than on the industry in which that company operates or on the economy as a whole. In periods of unusual market conditions, a significant portion of the Fund's assets may be held in cash or fixed income securities.

### **Risk**

The risks of investing in the Fund remain as disclosed in the current prospectus. The Fund continues to be suitable for investors investing for the longer term, seeking the income and growth potential of equity securities of foreign companies and who have low to medium tolerance for risk.

### **Results of Operations**

For the year ended September 30, 2018, the Mutual Fund Shares of the Fund returned 7.6% (net of expenses) while the MSCI World Index and the MSCI All Country World Index returned 15.8% and 14.2%, respectively. The performance of the other series of the Fund is substantially similar to that of the Mutual Fund Shares, save for differences in expense structure. Refer to "Past Performance" section for performance information of such series.

The Fund holds Series I Units of the Underlying Fund, a fund managed by AGFI. The discussion below references performance figures for Mutual Fund Units of the Underlying Fund. The performance of Series I Units is substantially similar to that of the Mutual Fund Units, save for differences in expense structure.

The Fund under-performed the MSCI World Index due to the Underlying Fund's country allocation and security selection. The Fund under-performed the MSCI All Country World Index primarily due to the Underlying Fund's security selection. During the period under review, the Underlying Fund maintained a broad diversification at the country and sector level to take advantage of potential return opportunities and to reduce risk.

Relative to the benchmarks, the Underlying Fund's exposure to the U.S., Belgium and South Korea detracted, while exposure to China/Hong Kong, Germany and Japan contributed positively. The Underlying Fund's average exposure to cash and cash equivalents of approximately 5.5% also detracted due to the strength of equity markets over the reporting period.

Certain series of the Fund, as applicable, make monthly distributions of capital at a rate determined by AGFI from time to time. The portfolio manager does not believe that the distributions made by the Fund had a meaningful impact on the Fund's ability to implement its investment strategy or to fulfill its investment objectives.

The Fund had net subscriptions of approximately \$27 million for the current period, as compared to net subscriptions of approximately \$19 million in the prior period. The portfolio manager does not believe that subscription activity had a meaningful impact on the Fund's performance or the ability to implement its investment strategy.

Total expenses before foreign withholding taxes, commissions and other portfolio transaction costs vary period over period mainly as a result of changes in average Net Asset Values (see Explanatory Note (1) a)) and investor activity, such as number of investor accounts and transactions. Expenses have increased as compared to the previous period due mainly to an increase in average Net Asset Values and investor activity. The decrease in annual and interim reports was due to variance between the accrued amounts versus the actual expenses incurred in the previous period. All other expenses remained fairly consistent throughout the periods.

### **Recent Developments**

Global growth remains relatively solid across the developed and emerging markets, though momentum has slowed or is expected to slow across several regions. Global manufacturing growth remains historically robust, though has moderated during 2018. Several risks continue to strain the near term outlook, including ongoing trade uncertainty, which has continued to weigh on equity market performance. Apart from higher input costs and consumer prices, sentiment around investments and spending decisions as well as equity risk premiums could also be further impacted.

This annual management report of fund performance contains financial highlights, but does not contain the complete annual financial statements of the investment fund. You can get a copy of the annual financial statements at your request, and at no cost, by calling 1 800 268-8583, by writing to us at AGF Investments Inc., 55 Standish Court, Suite 1050, Mississauga, Ontario, Canada L5R 0G3 attention: Client Services, or by visiting our website at [www.agf.com](http://www.agf.com) or SEDAR at [www.sedar.com](http://www.sedar.com).

Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

# AGF Global Dividend Class

## (CLASS OF AGF ALL WORLD TAX ADVANTAGE GROUP LIMITED)

SEPTEMBER 30, 2018

Recent trade deal among the U.S., Mexico and Canada reduces some market risk, but puts further pressure on China, as its manufacturing sector is weakening. The portfolio manager anticipates a negotiated trade settlement between the U.S. and China over the next several months, though it is more likely that this issue and associated uncertainty will extend into 2019.

In the U.S., the benefits of earlier tax reform and increased fiscal spending has supported strong economic growth and contributed to solid earnings growth during the period under review. However, these should moderate heading into next reporting period, particularly as financial conditions in the U.S. continue to tighten, including a stronger U.S. dollar and rising U.S. treasury yields. U.S. unemployment rate remains at historical low, though inflation has been rising with core personal consumption expenditures price index reaching the U.S. Federal Reserve's ("Fed") target with further risks to the upside. However, in the portfolio manager's view, inflation and wage growth will remain contained in the U.S. If the current trade tariffs remain in place and if larger tariffs are imposed, profit margins will suffer when companies are unable to pass through rising input costs. As such, the portfolio manager expects volatility to continue within equity markets, which will continue to pose risks but at the same time present attractive investment opportunities. While the U.S. dollar has strengthened during 2018, the portfolio manager believes that the strength will not sustain over the long-term, based on the expectation that economic growth will begin to moderate and as the increasing fiscal and trade deficits begin to weigh on the U.S. dollar. The portfolio manager also anticipates that the dramatic out-performance of U.S. equities may start to reverse in the coming months.

In Europe, the European Central Bank continues to approach its intended wind-down of its bond-buying program by end of 2018 and the first policy rate hike could come in the second half of 2019. While the European economy has slowed, it continues to show modest growth, supported by rising inflation and lower unemployment, which could support a further upside in earnings growth and positive estimated earnings revisions. The outlook for Eurozone remains favourable, however, the portfolio manager remains selective as political uncertainty remains elevated, particularly in Italy and the UK, where potential downside risks are still high. For the European economy, the portfolio manager believes that structural reform implementation remains essential for long-term growth, inflation and monetary policy.

The portfolio manager continues to favour Japan despite ongoing trade friction and the moderation in economic growth relative to the strong expansion registered during 2017. Japan's earnings growth forecasts remain solid and its economy is still showing signs of positive momentum, which is expected to continue into next year. The Bank of Japan ("BoJ") remains highly accommodative and is likely to remain so until inflation, which has recently started to edge higher but remains well below the BoJ's objective, moves higher. Additionally, valuations in Japan remain relatively attractive, which in conjunction with the BoJ's highly accommodative

monetary policy, positive earnings revisions and a stable to weaker Japanese Yen, should help to support Japanese equities. In addition, potential buying from foreigner investors, Japanese corporations and the BoJ could also support Japanese equity markets.

Emerging markets equities have significantly underperformed developed markets equities during the reporting period, driven by emerging markets currency weakness and the Fed's tightening monetary policy. Encouragingly, many emerging markets central banks, particularly those with currencies that have weakened sharply, have responded with policy rate hikes and administrative measures, which should help stabilize emerging markets currencies and restore broader market confidence. While elevated trade war uncertainty continues to weigh on emerging markets, China is now proactively managing its currency following the significant depreciation this year. Historically, in instances where China introduced counter-cyclical measures it marked the bottom of the depreciation cycle. Emerging markets equities remain attractively valued, trading at a deep discount to developed markets equities, while earnings per share growth is still expected to rise double-digits in 2018 following a very strong rise in 2017. Importantly, return on equity ratio in emerging markets has continued to improve from the lows of 2016, driven by margin expansion and asset turns. In the portfolio manager's opinion, emerging markets recovery has further room for improvement.

In this environment, the portfolio manager continues to believe that it is important to have a portfolio that is well-diversified and well-constructed. Country allocation will also remain key. In the portfolio manager's opinion, the Underlying Fund is well-positioned to withstand volatility, which is expected to increase from current levels, given its focus on high quality companies through the lens of economic value added ("EVA"). The portfolio manager remains focused on investing in companies that can create positive EVA and that are trading at attractive valuations.

Effective March 8, 2018, the risk rating of the Fund was changed from "medium" to "low to medium". The change reflects compliance with the new Canadian Securities Administrators' Mutual Fund Risk Classification Methodology. No material changes have been made to the investment objective, strategies or management of the Fund.

Effective October 1, 2018, certain operating expenses relating to registrar and transfer agency services are paid directly by AGFI and in exchange, a fixed rate administration fee was introduced for the Mutual Fund Series, Series D, Series F, Series I, Series J, Series T and Series V Shares, as applicable, of the Fund. The administration fee was approved by the shareholders of the Fund on June 14, 2018. The administration fee for each applicable series is calculated daily and payable monthly, based on the average Net Asset Value of the respective series of the Fund at a fixed annual rate, as disclosed in the current prospectus. The Fund continues to pay for all other operating expenses.

### Related Party Transactions

AGFI is the manager ("Manager") of the Fund. Pursuant to the management agreement between the Fund and AGFI, AGFI is responsible for the day-to-day business of the Fund. AGFI also acts as the investment (portfolio) manager, managing the investment portfolio of the Fund. Under the management agreement, the Fund (except for Series I, Series O, Series Q and Series W Shares, if applicable) pays management fees, calculated based on the Net Asset Value of the respective series of the Fund. Management fees of approximately \$654,000 were incurred by the Fund during the period ended September 30, 2018.

AGF CustomerFirst Inc. ("AGFC") provides transfer agency services to the Fund pursuant to a services agreement with AGFI. Shareholder servicing and administrative fees of approximately \$32,000 incurred by the Fund were paid to AGFC during the period ended September 30, 2018.

AGFI and AGFC are indirect wholly-owned subsidiaries of AGF Management Limited.

### Caution Regarding Forward-looking Statements

This report may contain forward-looking statements about the Fund, including its strategy, expected performance and condition. Forward looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates" or negative versions thereof and similar expressions.

In addition, any statement that may be made concerning future performance, strategies or prospects, and possible future Fund action, is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to, among other things, risks, uncertainties and assumptions about the Fund and economic factors.

The forward-looking statements are by their nature based on numerous assumptions, which include, amongst other things, that (i) the Fund can attract and maintain investors and has sufficient capital under management to effect its investment strategies, (ii) the investment strategies will produce the results intended by the portfolio manager, and (iii) the markets will react and perform in a manner consistent with the investment strategies. Although the forward-looking statements contained herein are based upon what the portfolio manager believes to be reasonable assumptions, the portfolio manager cannot assure that actual results will be consistent with these forward-looking statements.

Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements made by the Fund. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and

market factors in North America and internationally, interest and foreign exchange rates, global equity and capital markets, business competition, technological change, changes in government regulations, unexpected judicial or regulatory proceedings, and catastrophic events.

It should be stressed that the above-mentioned list of factors is not exhaustive. You are encouraged to consider these and other factors carefully before making any investment decisions and you are urged to avoid placing undue reliance on forward-looking statements. Further, you should be aware of the fact that the Fund has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise, prior to the release of the next Management Report of Fund Performance.

SEPTEMBER 30, 2018

### Explanatory Notes

(1) a) This information is derived from the Fund's audited annual financial statements. Under International Financial Reporting Standards ("IFRS"), investments that are traded in an active market are generally valued at closing price, which is determined to be within the bid-ask spread and most representative of fair value. As a result, there is no difference between the net assets per share presented in the financial statements ("Net Assets") and the net asset value per share calculated for fund pricing purposes ("Net Asset Value").

b) The following series of the Fund commenced operations on the following dates, which represents the date upon which securities of a series were first made available for purchase by investors.

Mutual Fund Shares	April 2016
Series F Shares	April 2016
Series Q Shares	April 2016
Series V Shares	April 2016
Series W Shares	April 2016

(2) Net Assets, dividends and distributions are based on the actual number of shares outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of shares outstanding over the financial period.

(3) Dividends and distributions were paid in cash/reinvested in additional shares of the Fund, or both.

Series V Shares of the Fund may make monthly distributions of capital so long as there is sufficient capital attributable to the series. The capital per share of the Series V Shares as applicable, is as follows:

As at	Sept 30, 2018 (\$)	Sept 30, 2017 (\$)	Sept 30, 2016 (\$)	Sept 30, 2015 (\$)	Sept 30, 2014 (\$)
Series V Shares	9.86	9.93	10.36	-	-

(4) This is not a reconciliation of the beginning and ending Net Assets per share.

(5) The management expense ratio ("MER") of a particular series is calculated in accordance with National Instrument 81-106, based on all the expenses of the Fund (including Harmonized Sales Tax, Goods and Services Tax, income tax and interest, but excluding foreign withholding taxes, commissions and other portfolio transaction costs) attributable to that series, expressed as an annualized percentage of average daily Net Asset Value of that series during the period.

As a result of the Fund's investment in the Underlying Fund, the MER is calculated based on the expenses of the Fund allocated to that series, including expenses indirectly incurred by the Fund attributable to its investment in the Underlying Fund, divided by the average daily Net Asset Value of that series of the Fund during the period.

The Fund does not pay duplicate management fees on the portion of the assets that it invests in the Underlying Fund. Accordingly, AGFI will waive the management fees payable or paid by the Underlying Fund in order to avoid such duplication.

(6) AGFI waived certain fees or absorbed certain expenses otherwise payable by the Fund. The amount of expenses waived or absorbed is determined annually on a series by series basis at the discretion of AGFI and AGFI can terminate the waiver or absorption at any time.

(7) The trading expense ratio ("TER") represents total commissions and other portfolio transaction costs expressed as an annualized percentage of average daily Net Asset Value during the period.

As a result of the Fund's investment in the Underlying Fund, the TER is calculated based on commissions and other portfolio transaction costs of the Fund, including such costs that are indirectly incurred by the Fund attributable to its investment in the Underlying Fund, divided by the average daily Net Asset Value of the Fund during the period.

(8) The Fund's portfolio turnover rate ("PTR") indicates how actively the Fund's portfolio advisor manages its portfolio investments. A PTR of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's PTR in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

PTR is calculated based on the lesser of the cumulative cost of purchases or cumulative proceeds of sales divided by the average market value of the portfolio, excluding short-term investments.

### Management Fees

The Fund is managed by AGFI. As a result of providing investment and management services, AGFI receives a monthly management fee, based on the Net Asset Value of the respective series, calculated daily and payable monthly. Management fees in respect of Series I, Series O, Series Q and Series W Shares, if applicable, are arranged directly between the Manager and investors and are not expenses of the Fund. AGFI uses these management fees to pay for sales and trailing commissions to registered dealers on the distribution of the Fund's shares, investment advice, as well as for general administrative expenses such as overhead, salaries, rent, legal and accounting fees relating to AGFI's role as manager.

	As a percentage of management fees		
	Annual rates	Dealer compensation <sup>†</sup>	General administration and investment advice
Mutual Fund Shares	2.00%	128.74%	(28.74)%
Series F Shares	1.00%	-	100.00%
Series V Shares	2.00%	59.26%	40.74%

<sup>†</sup> Dealer compensation represents cash commissions paid by AGFI to registered dealers during the period and includes upfront deferred sales charge and trailing commissions. This amount may, in certain circumstances, exceed 100% of the fees earned by AGFI during the period.

## Past Performance\*

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional securities of the Fund. Note that the performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. How the Fund has performed in the past does not necessarily indicate how it will perform in the future.

It is AGFI's policy to report rates of return for series in existence greater than one year. The performance start date for each series represents the date of the first purchase of such series, excluding seed money.

All rates of return are calculated based on the Net Asset Value.

### Year-By-Year Returns

The following bar charts show the Fund's annual performance for each of the past 10 years to September 30, 2018 as applicable, and illustrate how the Fund's performance has changed from year to year. The charts show, in percentage terms, how much an investment made on the first day of each financial period would have grown or decreased by the last day of each financial period.

### Mutual Fund Shares

Performance for 2016 represents returns for the period from April 27, 2016 to September 30, 2016.

### Series F Shares

Performance for 2016 represents returns for the period from May 13, 2016 to September 30, 2016.

### Series Q Shares

Performance for 2016 represents returns for the period from April 27, 2016 to September 30, 2016.

### Series V Shares

Performance for 2016 represents returns for the period from May 10, 2016 to September 30, 2016.

### Series W Shares

Performance for 2016 represents returns for the period from June 7, 2016 to September 30, 2016.

### Annual Compound Returns

The following table compares the historical annual compound returns for each series with the indices, for each of the periods ended September 30, 2018.

Percentage Return:	1 Year	3 Years	5 Years	10 Years	Since Inception
Mutual Fund Shares	7.6	N/A	N/A	N/A	7.9
MSCI World Index	15.8	N/A	N/A	N/A	15.3
MSCI All Country World Index	14.2	N/A	N/A	N/A	15.1
Series F Shares	8.9	N/A	N/A	N/A	8.7
MSCI World Index	15.8	N/A	N/A	N/A	15.6
MSCI All Country World Index	14.2	N/A	N/A	N/A	15.6

\* The indicated rates of return shown here are the historical annual compounded total returns including changes in security value and reinvestment of all distributions and do not take into account sales, redemption, distribution or other optional charges by any securityholder that would have reduced returns or performance. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated.
