

Annual Management Report of Fund Performance

AGF Global Dividend Class

September 30, 2021

Management Discussion of Fund Performance

This management discussion of fund performance represents the portfolio management team's view of the significant factors and developments affecting the fund's performance and outlook.

Investment Objective and Strategies

As described in the Simplified Prospectus, the investment objective of AGF Global Dividend Class (the "Fund") is to seek long-term total returns through investing primarily in a diversified portfolio of dividend-paying equity securities of issuers located around the world. To achieve this objective, the Fund currently invests in units of AGF Global Dividend Fund (the "Underlying Fund") and may also directly invest in securities similar to those held by the Underlying Fund. AGF Investments Inc. ("AGFI"), as portfolio manager, uses a quantitative model to assist in determining which countries to invest in and the amount to allocate to each country. A bottom-up conservative growth investment philosophy is then used to uncover stocks that are reasonably priced relative to their growth potential. In bottom-up investing, the portfolio manager focuses attention on a specific company rather than on the industry in which that company operates or on the economy as a whole. During periods of market downturn or for other reasons, a significant portion of the Fund's assets may be held in cash, cash equivalents or fixed income securities.

Risk

The risks of investing in the Fund remain as disclosed in the current prospectus. Any changes to the Fund over the period have not affected the overall level of risk of the Fund.

The international spread of COVID-19 has heightened certain risks associated with investing in the Fund, including liquidity risk. There are many factors that affect liquidity as well as the value of an investment. Those factors generally affect securities markets, including but not limited to general economic and political conditions, fluctuations in interest rates and factors unique to each issuer of the securities held by an investment fund, such as changes in management, strategic direction, achievement of strategic goals, mergers, acquisitions and divestitures, changes in distribution and dividend policies and other events. While the precise impact of the COVID-19 outbreak remains unknown, it has introduced uncertainty and volatility in global markets and economies. The duration of the COVID-19 outbreak and its impact cannot be determined with certainty, but it may adversely affect the performance of the Fund. The portfolio manager, however, does not believe any changes to the Fund over the period has affected the overall risk of the Fund.

The Fund continues to be suitable for investors investing for the longer term, seeking the income and growth potential of equity securities of foreign companies and who have low to medium tolerance for risk. The suitability of the Fund has not changed from what has been disclosed in the prospectus.

Results of Operations

For the year ended September 30, 2021, the Mutual Fund Shares of the Fund returned 16.4% (net of expenses) while the MSCI World Index and the MSCI All Country World Index returned 23.1% and 21.7%, respectively. The performance of the other series of the Fund is substantially similar to that of the Mutual Fund Shares, save for differences in expense structure. Refer to "Past Performance" section for performance information of such series.

The Fund holds Series I Units of the Underlying Fund, a fund managed by AGFI. The discussion below references performance figures for Mutual Fund Units of the Underlying Fund. The performance of Series I Units is substantially similar to that of Mutual Fund Units, save for differences in expense structure. The Underlying Fund may be subject to valuation adjustments as outlined in the Underlying Fund's valuation policies as it relates to non-North American equities held by the Underlying Fund. A fair value adjustment can either positively or negatively impact the Underlying Fund's rate of return.

The Fund under-performed the MSCI World Index and the MSCI All Country World Index due mainly to the Underlying Fund's country allocation, while security selection also detracted from performance. During the period under review, the Underlying Fund maintained a broad diversification at the country and sector level to take advantage of potential return opportunities and to reduce risk.

Relative to the MSCI World Index, the Underlying Fund's exposure to Switzerland, China/Hong Kong and South Korea detracted from performance, while its exposure to Austria, the Czech Republic and Japan contributed positively. The Underlying Fund's security selection in the U.S., Germany and Switzerland detracted from performance, while its security selection in Japan, the UK and the Netherlands contributed positively.

Relative to the MSCI All Country World Index, the Underlying Fund's exposure to Switzerland, South Korea and the Netherlands detracted from performance, while its exposure to China/Hong Kong, Austria and the Czech Republic contributed positively. The Underlying Fund's security selection in the U.S., Austria and Germany detracted from performance, while its security selection in Japan, the UK and the Netherlands contributed positively.

This annual management report of fund performance contains financial highlights, but does not contain the complete annual financial statements of the investment fund. You can get a copy of the annual financial statements at your request, and at no cost, by calling 1 800 268-8583, by writing to us at AGF Investments Inc., 55 Standish Court, Suite 1050, Mississauga, Ontario, Canada L5R 0G3 attention: Client Services, or by visiting our website at www.agf.com or SEDAR at www.sedar.com.

Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

AGF Global Dividend Class

(CLASS OF AGF ALL WORLD TAX ADVANTAGE GROUP LIMITED)

SEPTEMBER 30, 2021

Certain series of the Fund, as applicable, make monthly distributions of capital at a rate determined by AGFI from time to time. The portfolio manager does not believe that the distributions made by the Fund had a meaningful impact on the Fund's ability to implement its investment strategy or to fulfill its investment objectives.

The Fund had net subscriptions of approximately \$18 million for the current period, as compared to net subscriptions of approximately \$10 million in the prior period. The portfolio manager does not believe that subscription activity had a meaningful impact on the Fund's performance or the ability to implement its investment strategy.

Total expenses before foreign withholding taxes, commissions and other portfolio transaction costs vary period over period mainly as a result of changes in average Net Asset Values (see Explanatory Note (1) a)) and investor activity, such as number of investor accounts and transactions. The increase in management fees accounted for most of the increase in expenses during the period when compared to the previous period due to an increase in average Net Asset Values. Shareholder servicing and administrative fees also increased during the period as a result of the increased average Net Asset Values. The increase in annual and interim reports was due to an increase in investor activity. The increase in legal fees was due to variances between the accrued amounts versus the actual expenses incurred in the previous period. All other expenses remained fairly consistent throughout the periods.

Recent Developments

The portfolio manager has a positive outlook for global economic growth and equities. Despite relatively slow progress in some jurisdictions, the portfolio manager is encouraged by the continued progression of the vaccine rollouts globally. Positively, governments and central banks remain focused on economic recovery and are committed to ongoing stimulus. The unprecedented level of stimulus will likely result in further improvement of global economic activity, earnings growth and the potential for higher bond yields, which should continue to support global equities, particularly cyclical and value stocks. As the global economy continues to recover, the risks of much higher bond yields or inflation could result in central banks withdrawing stimulus, leading to a sell-off in equity and bond markets.

In the U.S., President Biden's infrastructure bill will provide additional support for the economy through funding for roads, bridges, the power grid, public transportation and the internet over his presidential term. Higher corporate taxes to fund this plan remains a potential risk, though the portfolio manager expects this to be pushed out further in support of the economic recovery and the possible increase to the tax rate to be more tempered given significant opposition. While encouraged by the pace of vaccinations, with approximately 57.0% of the U.S. population fully vaccinated, the portfolio manager continues to monitor the vaccine effectiveness against new variants of COVID-19. The portfolio manager expects the U.S. Federal Reserve to remain dovish, despite inflation moving higher. U.S. corporate credit spreads are

well behaved, though the portfolio manager continues to monitor spreads as they could move wider again if the economy slows more than anticipated.

In Europe, the portfolio manager is encouraged by the pace of vaccinations, paving the way for more restrictions on mobility and travel to be relaxed. The Eurozone has provided significant stimulus, which combined with the accelerating vaccination campaign and reopening of economies, should continue to support economic recovery and equity markets in the region. The Eurozone has also taken a material step in support of fiscal integration with the €750.0 billion recovery fund, endorsing the principle of the mutualization of debt in the region. Additionally, the European Central Bank's continued expansion of its balance sheet also remains supportive.

In Japan, the portfolio manager is monitoring the rise in COVID-19 cases and emergence of new variants, despite the accelerated pace of vaccinations. While the announced appointment of Fumio Kishida as leader of Japan's ruling conservative Liberal Democratic Party ("LDP") removes some uncertainty, Prime Minister Kishida will now lead the LDP into the general election taking place in November 2021.

The portfolio manager expects that geopolitical risk will remain elevated, contributing to higher levels of economic uncertainty and market volatility. Tensions between U.S. and China remain high, though bilateral relations could show modest improvement over time under the President Biden administration. While the portfolio manager continues to closely monitor the Evergrande Group situation, the portfolio manager does not believe this is China's Lehman Brothers moment, due in part to the People's Bank of China's efforts thus far to manage liquidity conditions and avoid systemic risk. In addition, while the portfolio manager believes that trade tensions between U.S. and China will persist, there is growing potential for tariff relief between the two countries.

Due to the significant amount of global stimulus in the global economy and supply shortages, inflation could continue to move higher. The reopening of economies, rebound in economic activity and rising commodity prices have fueled higher inflation in some countries. The portfolio manager continues to monitor U.S. inflation expectations, which remain at elevated levels after moderating from their highest levels in almost a decade. However, given the current backdrop, the portfolio manager does not believe that there will be a sustained bout of inflation in the medium term, given the global economy's significant spare capacity. Still, once the crisis abates, there is a risk that slow output growth combined with rising inflation could lead to stagflation, which would challenge economic policy. Over the long-term, the prospects of higher sustained inflation could rise if, after years of dealing with disinflation and deflationary concerns, policymakers become complacent and let inflation run too high.

The portfolio manager continues to focus on attractively valued quality companies with strong balance sheets for existing holdings and new opportunities. The portfolio manager's focus on quality will also be supportive as

investors start to focus more on fundamentals, which is typical at this stage in the economic recovery. The portfolio manager is comfortable with the Underlying Fund's overweight allocation to the Asian region given their attractive valuations, and in Japan, which should benefit in the coming months as vaccination rates increase and earnings recover. The portfolio manager is also cognizant that a continued economic rebound could provide further upside potential for more cyclical sectors of the economy, such as financials and industrials.

Related Party Transactions

AGFI is the manager ("Manager") of the Fund. Pursuant to the management agreement between the Fund and AGFI, AGFI is responsible for the day-to-day business of the Fund. AGFI also acts as the investment (portfolio) manager, managing the investment portfolio of the Fund. Under the management agreement, the Fund (except for Series I, Series O, Series Q and Series W Shares, if applicable) pays management fees, calculated based on the Net Asset Value of the respective series of the Fund. Management fees of approximately \$1,754,000 were incurred by the Fund during the period ended September 30, 2021.

Certain operating expenses relating to registrar and transfer agency services are paid directly by AGFI and in exchange, a fixed rate administration fee is payable by the Mutual Fund Series, Series F, Series FV, Series I, Series T and Series V Shares, as applicable, of the Fund. The administration fee is calculated based on the Net Asset Value of the respective series of the Fund at a fixed annual rate, as disclosed in the current prospectus. Administration fees of approximately \$70,000 were incurred by the Fund during the period ended September 30, 2021.

AGFI is an indirect wholly-owned subsidiary of AGF Management Limited.

Caution Regarding Forward-looking Statements

This report may contain forward-looking statements about the Fund, including its strategy, expected performance and condition. Forward looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates" or negative versions thereof and similar expressions.

In addition, any statement that may be made concerning future performance, strategies or prospects, and possible future Fund action, is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to, among other things, risks, uncertainties and assumptions about the Fund and economic factors.

The forward-looking statements are by their nature based on numerous assumptions, which include, amongst other things, that (i) the Fund can attract and maintain investors and has sufficient capital under management to effect its investment strategies, (ii) the investment strategies will produce the results intended by the portfolio manager, and (iii) the markets will react and perform in a manner consistent with the investment strategies. Although the forward-looking statements contained herein are based upon what the portfolio manager believes to be reasonable assumptions, the portfolio manager cannot assure that actual results will be consistent with these forward-looking statements.

Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements made by the Fund. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, global equity and capital markets, business competition, taxation, changes in government regulations, unexpected judicial or regulatory proceedings, technological changes, cybersecurity, the possible effects of war or terrorist activities, outbreaks of disease or illness that affect local, national or international economies (such as COVID-19), natural disasters and disruptions to public infrastructure, such as transportation, communications, power or water supply or other catastrophic events.

It should be stressed that the above-mentioned list of factors is not exhaustive. You are encouraged to consider these and other factors carefully before making any investment decisions and you are urged to avoid placing undue reliance on forward-looking statements. Further, you should be aware of the fact that the Fund has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise, prior to the release of the next Management Report of Fund Performance.

Financial Highlights

Portfolio turnover rate ⁽⁸⁾	7.71%	8.71%	4.88%	4.16%	9.06%
Net Asset Value per share	16.20	13.59	13.65	12.75	11.58

Explanatory Notes

(1) a) This information is derived from the Fund's audited annual financial statements. Under International Financial Reporting Standards ("IFRS"), investments that are traded in an active market are generally valued at closing price, which is determined to be within the bid-ask spread and most representative of fair value. As a result, there is no difference between the net assets per share presented in the financial statements ("Net Assets") and the net asset value per share calculated for fund pricing purposes ("Net Asset Value").

b) The following series of the Fund commenced operations on the following dates, which represents the date upon which securities of a series were first made available for purchase by investors.

Mutual Fund Shares	April 2016
Series F Shares	April 2016
Series FV Shares	November 2018
Series Q Shares	April 2016
Series V Shares	April 2016
Series W Shares	April 2016

(2) Net Assets, dividends and distributions are based on the actual number of shares outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of shares outstanding over the financial period.

(3) Dividends and distributions were paid in cash/reinvested in additional shares of the Fund, or both.

Series FV and Series V Shares of the Fund may make monthly distributions of capital so long as there is sufficient capital attributable to the series. The capital per share of the Series FV and Series V Shares as applicable, is as follows:

As at	Sept 30, 2021 (\$)	Sept 30, 2020 (\$)	Sept 30, 2019 (\$)	Sept 30, 2018 (\$)	Sept 30, 2017 (\$)
Series FV Shares	10.85	10.98	12.16	-	-
Series V Shares	9.18	9.30	9.56	9.86	9.93

(4) This is not a reconciliation of the beginning and ending Net Assets per share.

(5) The management expense ratio ("MER") of a particular series is calculated in accordance with National Instrument 81-106, based on all the expenses of the Fund (including Harmonized Sales Tax, Goods and Services Tax, income tax and interest, but excluding foreign withholding taxes, commissions and other portfolio transaction costs) attributable to that series, expressed as an annualized percentage of average daily Net Asset Value of that series during the period. For new series launched, the MER is annualized from the date of the first external purchase.

(1), (2), (3), (4), (5), (6), (7) and (8) see Explanatory Notes

AGF Global Dividend Class

(CLASS OF AGF ALL WORLD TAX ADVANTAGE GROUP LIMITED)

SEPTEMBER 30, 2021

As a result of the Fund's investment in the Underlying Fund, the MER is calculated based on the expenses of the Fund allocated to that series, including expenses indirectly incurred by the Fund attributable to its investment in the Underlying Fund, divided by the average daily Net Asset Value of that series of the Fund during the period.

The Fund does not pay duplicate management fees on the portion of the assets that it invests in the Underlying Fund. Accordingly, AGFI will waive the management fees payable or paid by the Underlying Fund in order to avoid such duplication.

- (6) AGFI waived certain fees or absorbed certain expenses otherwise payable by the Fund. The amount of expenses waived or absorbed is determined annually on a series by series basis at the discretion of AGFI and AGFI can terminate the waiver or absorption at any time.
- (7) The trading expense ratio ("TER") represents total commissions and other portfolio transaction costs expressed as an annualized percentage of average daily Net Asset Value during the period.

As a result of the Fund's investment in the Underlying Fund, the TER is calculated based on commissions and other portfolio transaction costs of the Fund, including such costs that are indirectly incurred by the Fund attributable to its investment in the Underlying Fund, divided by the average daily Net Asset Value of the Fund during the period.

- (8) The Fund's portfolio turnover rate ("PTR") indicates how actively the Fund's portfolio advisor manages its portfolio investments. A PTR of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's PTR in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

PTR is calculated based on the lesser of the cumulative cost of purchases or cumulative proceeds of sales divided by the average market value of the portfolio, excluding short-term investments.

Management Fees

The Fund is managed by AGFI. As a result of providing investment and management services, AGFI receives a monthly management fee, based on the Net Asset Value of the respective series, calculated daily and payable monthly. Management fees in respect of Series I, Series O, Series Q and Series W Shares, if applicable, are arranged directly between the Manager and investors and are not expenses of the Fund. AGFI uses these management fees to pay for sales and trailing commissions to registered dealers on the distribution of the Fund's shares, investment advice, as well

as for general administrative expenses such as overhead, salaries, rent, legal and accounting fees relating to AGFI's role as manager.

	As a percentage of management fees		
	Annual rates	Dealer compensation	General administration and investment advice
Mutual Fund Shares	2.00%	85.06%	14.94%
Series F Shares	1.00%	-	100.00%
Series FV Shares	1.00%	-	100.00%
Series V Shares	2.00%	67.79%	32.21%

Past Performance*

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional securities of the Fund. Note that the performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. How the Fund has performed in the past does not necessarily indicate how it will perform in the future.

It is AGFI's policy to report rates of return for series in existence greater than one year. The performance start date for each series represents the date of the first purchase of such series, excluding seed money.

All rates of return are calculated based on the Net Asset Value.

Year-By-Year Returns

The following bar charts show the Fund's annual performance for each of the past 10 years to September 30, 2021 as applicable, and illustrate how the Fund's performance has changed from year to year. The charts show, in percentage terms, how much an investment made on the first day of each financial period would have grown or decreased by the last day of each financial period.

Mutual Fund Shares

Performance for 2016 represents returns for the period from April 27, 2016 to September 30, 2016.

* The indicated rates of return shown here are the historical annual compounded total returns including changes in security value and reinvestment of all distributions and do not take into account sales, redemption, distribution or other optional charges by any securityholder that would have reduced returns or performance. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated.
