

Annual Management Report of Fund Performance

QuantShares MultiAsset Allocation ETF

September 30, 2017

Management Discussion of Fund Performance

This management discussion of fund performance represents the portfolio management team's view of the significant factors and developments affecting the fund's performance and outlook.

Investment Objective and Strategies

Pursuant to the Declaration of Trust, the investment objective of QuantShares MultiAsset Allocation ETF (the "Fund") is to provide long-term capital appreciation with reduced volatility by investing, directly or indirectly, including through exchange traded funds ("ETFs"), in global equity and fixed income securities including securities related to non-traditional asset classes. Highstreet Asset Management Inc. ("Highstreet"), as portfolio manager, and FFCM LLC ("FFCM"), as investment sub-advisor, aim for superior performance by investing primarily in ETFs domiciled in Canada and the U.S. that provide diversified exposure to global equity and fixed income securities including securities related to non-traditional asset classes such as infrastructure (including securities of infrastructure companies and issuers that hold or are exposed to infrastructure companies), commodities (including gold and silver, natural resource companies and income or royalty based commodities issuers) and real estate (including securities of issuers that hold, or are exposed to, real property). The Fund may also invest directly in gold bullion in accordance with National Instrument 81-102 and silver bullion in accordance with relief obtained from applicable securities legislation. The strategy will tactically reweight ETFs to reduce risk and to help reduce drawdowns over time. The portfolio asset allocation is reconstituted and rebalanced on a monthly basis but has the latitude to rebalance on an ad hoc basis should market conditions dictate.

Risk

The risks of investing in the Fund remain as disclosed in the current prospectus. The Fund continues to be suitable for investors with a low to medium tolerance for risk.

Results of Operations

The Fund commenced operations in January 2017.

Since the inception, the Fund's asset class mix has been mostly neutral with approximately 60.0% allocation to global equities and 40.0% allocation to bonds. Dominated by macroeconomic factors in April and May 2017, the Fund increased its allocation to equities to 70.0% and decreased allocation to bonds to 30.0% to participate in the upside of risky assets to benefit from the strong global economic growth.

The Fund hedged the currency exposures of fixed income ETFs, while keeping the equities unhedged. Driven by Bank of Canada's interest rate hike in July 2017, Canadian currency rapidly appreciated, which had a negative impact on global equities when translated into Canadian currency. This was dampened, however, by currency hedging which

absorbed the losses from the appreciation in the Canadian dollar. To better control the currency risk, the Fund reverted its allocation of equities back to 60.0% in June and July, when the currency moves were most adverse.

From a factor perspective, macroeconomic factors showed the best efficacies. Within fixed income, the Fund favoured U.S. high yield and emerging markets bonds, while being underweight in international and U.S. bonds.

The Fund entered into foreign exchange forward contracts during the period under review. As of September 30, 2017, the Fund was long Canadian dollar and short U.S. dollar in order to hedge its currency exposure.

Recent Developments

At the end of the reporting period, the Fund maintained a 60.0% allocation to equities and 40.0% allocation to bonds. In the portfolio manager's opinion, economic sentiment around the world remains strong despite slightly underwhelming economic data. Central banks worldwide have taken note and have indicated a less dovish path for monetary policy, but stress the reliance on robust economic data. Going forward, the portfolio manager expects the investment backdrop to remain accommodative and the overall pace of interest rate hikes in the U.S. and rest of the world should be measured. The Fund remains focused on providing long-term capital appreciation with reduced volatility by investing in global equity and fixed income securities (including securities related to non-traditional asset classes), primarily through ETFs, using a proprietary, multi-factor quantitative investment process to create opportunities for better risk-adjusted returns.

Related Party Transactions

AGF Investments Inc. ("AGFI") is the manager ("Manager"), trustee and promoter of the Fund and is responsible for the day-to-day business of the Fund. The Fund entered into an investment management agreement with AGFI and Highstreet, indirect wholly-owned subsidiaries of AGF Management Limited ("AGF"), pursuant to which Highstreet is responsible for managing the investment portfolio of the Fund. AGFI and Highstreet also entered into an investment sub-advisory agreement with FFCM, an indirect subsidiary of AGF. FFCM acts as a sub-advisor and provides investment sub-advisory services to the Fund. Under the Declaration of Trust, the Fund pays management fees (including fees for sub-advisory services), calculated based on the Net Asset Value of the Fund. Management fees of approximately \$5,000 were incurred by the Fund during the period from commencement of operations to September 30, 2017.

Caution Regarding Forward-looking Statements

This report may contain forward-looking statements about the Fund, including its strategy, expected performance and condition. Forward-looking statements include statements that are predictive in nature, that

This annual management report of fund performance contains financial highlights, but does not contain the complete annual financial statements of the investment fund. You can get a copy of the annual financial statements at your request, and at no cost, by calling 1 800 387-2563, by writing to us at AGF Investments Inc., Toronto-Dominion Bank Tower, 66 Wellington Street West, 31st Floor, Toronto, Ontario, Canada M5K 1E9, or by visiting our website at AGFIQ.com or SEDAR at www.sedar.com.

Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

depend upon or refer to future events or conditions, or that include words such as “expects”, “anticipates”, “intends”, “plans”, “believes”, “estimates” or negative versions thereof and similar expressions.

In addition, any statement that may be made concerning future performance, strategies or prospects, and possible future Fund action, is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to, among other things, risks, uncertainties and assumptions about the Fund and economic factors.

The forward-looking statements are by their nature based on numerous assumptions, which include, amongst other things, that (i) the Fund can attract and maintain investors and has sufficient capital under management to effect its investment strategies, (ii) the investment strategies will produce the results intended by the portfolio manager, and (iii) the markets will react and perform in a manner consistent with the investment strategies. Although the forward-looking statements contained herein are based upon what the portfolio manager believes to be reasonable assumptions, the portfolio manager cannot assure that actual results will be consistent with these forward-looking statements.

Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements made by the Fund. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, global equity and capital markets, business competition, technological change, changes in government regulations, unexpected judicial or regulatory proceedings, and catastrophic events.

It should be stressed that the above-mentioned list of factors is not exhaustive. You are encouraged to consider these and other factors carefully before making any investment decisions and you are urged to avoid placing undue reliance on forward-looking statements. Further, you should be aware of the fact that the Fund has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise, prior to the release of the next Management Report of Fund Performance.

Financial Highlights

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund’s financial performance for the past five years as applicable.

Net Assets per Unit⁽¹⁾

For the periods ended	Sept 30, 2017 (\$)	Sept 30, 2016 (\$)	Sept 30, 2015 (\$)	Sept 30, 2014 (\$)	Sept 30, 2013 (\$)

Explanatory Notes

- (1) a) This information is derived from the Fund’s audited annual financial statements. Under International Financial Reporting Standards (“IFRS”), investments that are traded in an active market are generally valued at closing price, which is determined to be within the bid-ask spread and most representative of fair value. As a result, there is no difference between the net assets per unit presented in the financial statements (“Net Assets”) and the net asset value per unit calculated for fund pricing purposes (“Net Asset Value”).
- b) The Fund commenced operations in January 2017, which represents the date upon which securities were first made available for purchase by investors.
- (2) Net Assets and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the financial period.
- (3) Distributions were paid in cash/reinvested in additional units of the Fund, or both. The characterization of the distributions is based on management’s estimate of the actual income for the year.
- (4) This is not a reconciliation of the beginning and ending Net Assets per unit.
- (5) The management expense ratio (“MER”) is calculated in accordance with National Instrument 81-106, based on all the expenses of the Fund (including Harmonized Sales Tax, Goods and Services Tax and interest, but excluding foreign withholding taxes, commissions and other portfolio transaction costs) and the Fund’s proportionate share of the MER, if applicable, of the underlying funds and ETFs in

* represents initial Net Assets

~ annualized

(1), (2), (3), (4), (5), (6), (7), (8) and (9) see Explanatory Notes

which the Fund has invested, expressed as an annualized percentage of average daily Net Asset Value during the period.

- (6) AGFI waived certain fees or absorbed certain expenses otherwise payable by the Fund. The amount of expenses waived or absorbed is determined annually at the discretion of AGFI and AGFI can terminate the waiver or absorption at any time.
- (7) The trading expense ratio represents total commissions and other portfolio transaction costs, including the Fund's proportionate share of the commissions, if applicable, of the underlying funds and ETFs in which the Fund has invested, expressed as an annualized percentage of average daily Net Asset Value during the period.
- (8) The Fund's portfolio turnover rate ("PTR") indicates how actively the Fund's portfolio advisor manages its portfolio investments. A PTR of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's PTR in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

PTR is calculated based on the lesser of the cumulative cost of purchases or cumulative proceeds of sales divided by the average market value of the portfolio, excluding short-term investments.
- (9) Closing market price on the last trading day of the period, as applicable, as reported on the TSX. Mid price is disclosed if no transaction took place on the last business day of the period.

Management Fees

The Fund is managed by AGFI. AGFI is responsible for the day-to-day operations of the Fund, which include providing investment and management services as well as other administrative services required by the Fund. As compensation for such services, AGFI receives a monthly management fee at the annual rate of 0.55%, which includes applicable taxes, based on the Net Asset Value of the Fund, calculated daily and payable monthly. AGFI bears all operating expenses of the Fund except for management fees, brokerage expenses and commissions, costs associated with the use of derivatives (if applicable), income and withholding taxes as well as all other applicable taxes, costs of complying with any new governmental or regulatory requirement introduced after the Fund was established, costs associated with the establishment and on-going operation of the Independent Review Committee, and extraordinary expenses.

Past Performance

It is AGFI's policy to report rates of return for a fund in existence greater than one year. The Fund commenced operations in January 2017.

Summary of Investment Portfolio

September 30, 2017

The major portfolio categories and top holdings (up to 25) of the Fund at the end of the period are indicated in the following tables. The Summary of Investment Portfolio may change due to ongoing portfolio transactions of the Fund and the next quarterly update will be in the Quarterly Portfolio Disclosure as at December 31, 2017.

The prospectus and other information about the ETFs are available on the internet at www.sedar.com and/or www.sec.gov/edgar.shtml, as applicable.
