

INTERIM MANAGEMENT REPORT OF FUND PERFORMANCE

Harmony Canadian Fixed Income Pool

MARCH 31, 2018

Management Discussion of Fund Performance

This management discussion of fund performance represents the portfolio management team's view of the significant factors and developments affecting the pool's performance and outlook.

Results of Operations

For the six months ended March 31, 2018 the Wrap Series Units of Harmony Canadian Fixed Income Pool (the "Pool") returned 2.1% (net of expenses) while the FTSE TMX Canada Universe Bond Index ("FTSE TMX Universe Bond Index") returned 2.1%. The performance of the other series of the Pool is substantially similar to that of the Wrap Series Units, save for differences in expense structure. Refer to "Past Performance" section for performance information of such series.

The Pool performed in-line with the FTSE TMX Universe Bond Index. Within the Pool, Baker Gilmore & Associates Inc. out-performed relative to the index. Conversely, AGF Investments Inc. ("AGFI") under-performed the index. The Pool's underweight modest duration stance was a mild detractor as long-dated bonds drove much of the benchmark return. Duration exposure is the sensitivity of the portfolio due to changes in interest rates. The Pool's overweight exposure to investment grade corporate bonds and out-of-benchmark exposure to high yield bonds contributed positively due to tightening spreads and an improved economic climate. The Pool's modest exposure to U.S. fixed income detracted due to appreciation of the Canadian dollar as well as rising U.S. interest rates. The exchange traded fund ("ETF") portion of the Pool, managed by AGFI, detracted returning 1.7%. The Pool remained unchanged in its exposure to domestic and U.S. fixed income ETFs during the reporting period.

The Pool entered into foreign exchange forward contracts during the period under review. As of March 31, 2018, the Pool was long Canadian dollar and short Euro and U.S. dollar in order to hedge its currency exposure.

The Pool had net redemptions of approximately \$26 million for the current period, as compared to net redemptions of approximately \$10 million in the prior period. Rebalancing by an institutional program resulted in net redemptions of approximately \$4 million in the Pool. The portfolio manager does not believe that redemption activity had a meaningful impact on the Pool's performance or the ability to implement its investment strategy.

Total expenses before foreign withholding taxes, commissions and other portfolio transaction costs vary period over period mainly as a result of changes in average Net Asset Values (see Explanatory Note (1) a)) and investor activity, such as number of investor accounts and transactions. The decrease in investment management and management fees accounted for most of the decrease in expenses during the period when

compared to the previous period due to a decrease in average Net Asset Values. Custodian fees decreased due to a decrease in market value of investment portfolio and registration fees decreased due to a decrease in subscription activity. On the contrary, interest expense increased due to an increase in overdraft positions throughout the period. The increase in annual and interim reports and decrease in audit fees were due to variances between the accrued amounts versus the actual expenses incurred in the previous period. All other expenses remained fairly consistent throughout the periods.

Recent Developments

In the portfolio management team's opinion, moving into the first calendar quarter of 2018, equities have continued to move higher on the heels of strong positive sentiment despite rich valuations. In this environment, the portfolio management team believes that maintaining a neutral stance regarding equity risk is prudent. The portfolio management team is maintaining an underweight exposure in non-U.S. versus U.S. fixed income, due to the relatively more attractive fixed income yields available within the U.S. when compared to the Eurozone and Japan.

The Canadian equity market, as measured by the S&P/TSX Composite Index, returned -4.5% in the first calendar quarter of 2018. Canada's gross domestic product ("GDP") increased 1.7% year-over-year in the fourth calendar quarter of 2017. The Canadian dollar depreciated 2.5% relative to the U.S. dollar during the first calendar quarter of 2018.

The U.S. equity market was positive in the first calendar quarter of 2018, with the S&P 500 Index returning 2.1%. Real GDP rose during the first calendar quarter of 2018, expanding 2.9% on an annualized basis. The 10-year U.S. Treasury yield increased, starting the first calendar quarter at 2.4% and ending March 2018 at 2.7%.

Developed foreign markets posted positive performance for the first calendar quarter of 2018, with the MSCI EAFE Index rising 1.3% and the MSCI Emerging Markets Index returning 4.4%.

Fixed income returns were positive in the first calendar quarter of 2018, with the FTSE TMX Universe Bond Index returning 0.1% and the Citi World Government Bond Index returning 5.5%.

There have been no material changes in regards to the strategic position of the Pool. Additionally, there were no known material trends, commitments, events or uncertainties, to the portfolio management team's knowledge, that might reasonably be expected to affect the Pool.

Related Party Transactions

AGFI is the manager ("Manager") and trustee of the Pool. Unitholders of the Embedded Series Units agree to pay management fees, calculated based on the Net Asset Value of such series of the Pool. Unitholders of the Wrap Series Units pay service fees directly to their dealers and do not pay management fees. A portion of such service fee is retained by AGFI.

This interim management report of fund performance contains financial highlights, but does not contain either the interim or annual financial statements of the investment fund. You can get a copy of the interim or annual financial statements at your request, and at no cost, by calling 1 800 387-2563, by writing to us at AGF Investments Inc. 55 Standish Court, Suite 1050, Mississauga, Ontario, Canada L5R 0G3 attention: Harmony Client Services, or by visiting our website at www.agf.com or SEDAR at www.sedar.com.

Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

AGFI is also one of the investment (portfolio) managers of the Pool. The Pool pays investment management fees to AGFI to manage the assets of the Pool, based upon the Net Asset Value of the Pool. Management and investment management fees of approximately \$231,000 and \$142,000, respectively, were paid to AGFI during the six month period ended March 31, 2018.

AGF CustomerFirst Inc. ("AGFC") provides transfer agency services to the Pool pursuant to a services agreement with AGFI. Unitholder servicing and administrative fees of approximately \$27,000 incurred by the Pool were paid to AGFC during the six month period ended March 31, 2018.

AGFI and AGFC are indirect wholly-owned subsidiaries of AGF Management Limited.

Caution Regarding Forward-looking Statements

This report may contain forward-looking statements about the Pool, including its strategy, expected performance and condition. Forward-looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates" or negative versions thereof and similar expressions.

In addition, any statement that may be made concerning future performance, strategies or prospects, and possible future Pool action, is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to, among other things, risks, uncertainties and assumptions about the Pool and economic factors.

The forward-looking statements are by their nature based on numerous assumptions, which include, amongst other things, that (i) the Pool can attract and maintain investors and has sufficient capital under management to effect its investment strategies, (ii) the investment strategies will produce the results intended by the portfolio manager, and (iii) the markets will react and perform in a manner consistent with the investment strategies. Although the forward-looking statements contained herein are based upon what the portfolio manager believes to be reasonable assumptions, the portfolio manager cannot assure that actual results will be consistent with these forward-looking statements.

Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements made by the Pool. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, global equity and capital markets, business competition, technological change, changes in government regulations, unexpected judicial or regulatory proceedings, and catastrophic events.

It should be stressed that the above-mentioned list of factors is not exhaustive. You are encouraged to consider these and other factors carefully before making any investment decisions and you are urged to avoid placing undue reliance on forward-looking statements. Further, you should be aware of the fact that the Pool has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise, prior to the release of the next Management Report of Fund Performance.

Financial Highlights

The following tables show selected key financial information about the Pool and are intended to help you understand the Pool's financial performance for the six months ended March 31, 2018 and the past five years as applicable. The Pool adopted International Financial Reporting Standards ("IFRS") on October 1, 2014. All per unit information presented for the period ended September 30, 2014, including opening net assets, reflects retrospective adjustments in accordance with IFRS. Information for the periods prior to October 1, 2013 is derived from financial statements prepared in accordance with Canadian generally accepted accounting principles ("Canadian GAAP").

Explanatory Notes

(1) a) This information is derived from the Pool's audited annual financial statements and unaudited interim financial statements. Prior to October 1, 2014, the net assets per unit presented in the financial statements ("Net Assets") differed from the net asset value per unit calculated for fund pricing purposes ("Net Asset Value"), due to differences in valuation techniques of certain investments as required under Canadian GAAP. The adoption of IFRS, effective October 1, 2014, has generally eliminated the difference between Net Assets per unit and Net Asset Value per unit.

Total Net Asset Value and number of units outstanding presented as at September 30, 2015 may have been adjusted to include certain transactions, if applicable, for the purpose of comparability with subsequent reporting periods. These adjustments have no effect on the Net Asset Value per unit.

b) The following series of the Pool commenced operations on the following dates, which represents the date upon which securities of a series were first made available for purchase by investors.

Wrap Series Units	January 1997
Embedded Series Units	December 2002

(2) Net Assets and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the financial period.

(3) Distributions were paid in cash/reinvested in additional units of the Pool, or both. The characterization of the distributions is based on management's estimate of the actual income for the year.

(4) This is not a reconciliation of the beginning and ending Net Assets per unit.

(5) The management expense ratio ("MER") of a particular series is calculated in accordance with National Instrument 81-106, based on all the expenses of the Pool (including Harmonized Sales Tax, Goods and Services Tax and interest, but excluding foreign withholding taxes, commissions and other portfolio transaction costs) and the Pool's proportionate share of the MER, if applicable, of the underlying funds and ETFs in which the Pool has invested, allocated to that series divided by the average daily Net Asset Value of that series during the period.

(6) AGFI waived certain fees or absorbed certain expenses otherwise payable by the Pool. The amount of expenses waived or absorbed is determined annually on a series by series basis at the discretion of AGFI and AGFI can terminate the waiver or absorption at any time.

(7) The trading expense ratio represents total commissions and other portfolio transaction costs, including the Pool's proportionate share of the commissions, if applicable, of the underlying funds and ETFs in which the Pool has invested, expressed as an annualized percentage of average daily Net Asset Value during the period.

(8) The Pool's portfolio turnover rate ("PTR") indicates how actively the Pool's portfolio advisor manages its portfolio investments. A PTR of 100% is equivalent to the Pool buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's PTR in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

PTR is calculated based on the lesser of the cumulative cost of purchases or cumulative proceeds of sales divided by the average market value of the portfolio, excluding short-term investments.

Management Fees

The Pool is managed by AGFI. As a result of providing management services, AGFI receives a monthly management fee, based on the Net Asset Value of the Embedded Series Units, calculated daily and payable monthly. Unitholders of Wrap Series Units pay service fees directly to their dealers and do not pay management fees. These service fees are not expenses of the Pool. All series of the Pool bear indirectly the management fees (which includes investment management fees) borne by the ETFs that the Pool invested in, after giving effect to rebates or waivers, as applicable. AGFI uses these management fees to pay for sales and trailing commissions to registered dealers on the distribution of the Pool's units, investment advice, as well as for general administrative expenses such as overhead, salaries, rent, legal and accounting fees relating to AGFI's role as manager.

	As a percentage of management fees		
	Annual rates	Dealer compensation	General administration and investment advice
Embedded Series Units	1.85%	73.97%	26.03%

~ annualized

(1), (2), (3), (4), (5), (6), (7) and (8) see Explanatory Notes

Past Performance*

The performance information shown assumes that all distributions made by the Pool in the periods shown were reinvested in additional securities of the Pool. Note that the performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. How the Pool has performed in the past does not necessarily indicate how it will perform in the future.

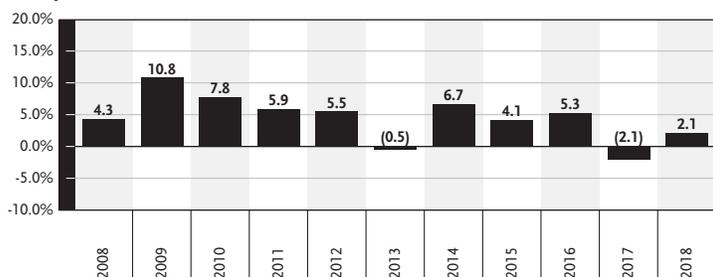

It is AGFI's policy to report rates of return for series in existence greater than one year. The performance start date for each series represents the date of the first purchase of such series, excluding seed money.

All rates of return are calculated based on the Net Asset Value.

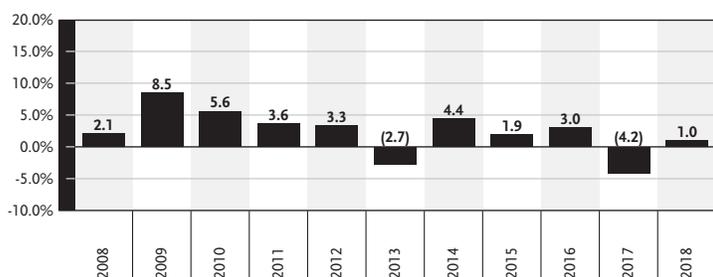

Year-By-Year Returns

The following bar charts show the Pool's annual performance for each of the past 10 years to September 30, 2017 (interim performance for the six months ended March 31, 2018) as applicable, and illustrate how the Pool's performance has changed from year to year. The charts show, in percentage terms, how much an investment made on the first day of each financial period would have grown or decreased by the last day of each financial period.
