

Interim Management Report of Fund Performance

AGF American Growth Class

March 31, 2022

Management Discussion of Fund Performance

This management discussion of fund performance represents the portfolio management team's view of the significant factors and developments affecting the fund's performance and outlook.

Results of Operations

For the six months ended March 31, 2022, the Mutual Fund Shares of AGF American Growth Class (the "Fund") returned 5.2% (net of expenses) while the S&P 500 Net Return Index ("S&P 500 Net Index") returned 4.3%. The performance of the other series of the Fund is substantially similar to that of the Mutual Fund Shares, save for differences in expense structure. Refer to "Past Performance" section for performance information of such series.

The Fund out-performed the S&P 500 Net Index due to its sector allocation and security selection. The Fund's average overweight allocation to the energy sector (10.8% versus 3.2%) and its average underweight allocation to the communication services sector (1.2% versus 10.2%) contributed to performance. The Fund's strong security selection in the industrials, health care and information technology sectors also contributed to performance. These contributing factors were partially offset by the Fund's negative security selection in the financials and consumer staples sectors.

In terms of individual holdings, the top contributors to performance during the reporting period were Cheniere Energy Inc., Marathon Petroleum Corporation and Valero Energy Corporation ("Valero"), while the top detractors were Roku Inc., Morgan Stanley and Primerica Inc. As of March 31, 2022, the Fund no longer held Valero and Morgan Stanley in its portfolio.

Certain series of the Fund, as applicable, make monthly distributions of capital at a rate determined by AGF Investments Inc. ("AGFI") from time to time. The portfolio manager does not believe that the distributions made by the Fund had a meaningful impact on the Fund's ability to implement its investment strategy or to fulfill its investment objectives.

The Fund had net subscriptions of approximately \$134 million for the current period, as compared to net subscriptions of approximately \$213 million in the prior period. The portfolio manager does not believe that subscription activity had a meaningful impact on the Fund's performance or the ability to implement its investment strategy.

Total expenses before foreign withholding taxes, commissions and other portfolio transaction costs vary period over period mainly as a result of changes in average Net Asset Values (see Explanatory Note (1) a)) and investor activity, such as number of investor accounts and transactions. The increase in management fees accounted for most of the increase in expenses during the period when compared to the previous period due to an increase in average Net Asset Values. Shareholder servicing and administrative fees also increased during the period as a result of the increased average Net Asset Values. The increase in registration fees was due to variances between the accrued amounts versus the actual expenses incurred in the previous period. All other expenses remained fairly consistent throughout the periods.

Recent Developments

Global equity markets saw significant volatility to begin calendar year 2022. While concerns around the omicron variant began to fade, other market-related concerns began to take precedence as the dominant issue for investors. In January 2022, equity markets sold off as inflation continued to rise, with the U.S. consumer price index reading surpassing 7.0% for the first time in many years. With inflation on the rise, investors began pricing in a more aggressive path for interest rate increases by central banks. As a result, equity markets sold off, particularly in the high growth, high valuation and long duration stocks in the market. Duration exposure is the sensitivity of the portfolio due to changes in interest rates.

In February 2022, geopolitical concerns began to rise, as Russia continued to amass a significant number of armed troops at its border with Ukraine. This culminated with the invasion of Ukraine by Russian troops in late February 2022, which resulted in another decline in the equity markets. Western governments around the world including the U.S., the European Union ("EU"), the UK, Canada and others reacted with swift and harsh sanctions on Russia, economically decoupling the country from the rest of the world.

With Russia being a large global exporter of oil and gas, fertilizers, wheat and base metals, the uncertainty around Russian supplies in the global marketplace exacerbated concerns around already-hot inflation, with the price of oil reaching a peak of close to US\$130 per barrel before settling down to approximately US\$100 per barrel by the end of the reporting period.

Overall, equities ended the first calendar quarter of 2022 down, despite a rally off the bottom in March 2022. The S&P 500 Index declined by 5.0% during the first calendar quarter, while the MSCI World Index finished with similar returns,

This interim management report of fund performance contains financial highlights, but does not contain either the interim or annual financial statements of the investment fund. You can get a copy of the interim or annual financial statements at your request, and at no cost, by calling 1 800 268-8583, by writing to us at AGF Investments Inc., 55 Standish Court, Suite 1050, Mississauga, Ontario, Canada L5R 0G3 attention: Client Services, or by visiting our website at www.agf.com or SEDAR at www.sedar.com.

Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

MARCH 31, 2022

declining 5.7%. Value factor significantly out-performed the growth factor, with the MSCI World Value Index out-performing the MSCI World Growth Index by more than 9.0% during the first calendar quarter of 2022. Small capitalization stocks also under-performed large capitalization stocks by approximately 2.0%.

Looking ahead, the portfolio manager believes there are plenty of reasons for investors to be cautious – interest rates have begun moving higher, there are persistent inflationary pressures and geopolitical risk has increased substantially with the Russian invasion of Ukraine. However, despite the myriad of worries facing investors, the portfolio manager believes that the bull market which began in March 2020 remains intact, with further upside ahead for the patient investor. From an economic perspective, the portfolio manager believes the U.S. and global economy should still avoid a recession and continue to expand as it continues to recover from the COVID-19 pandemic.

Historically, major geopolitical events such as wars have resulted in a period of short-term volatility, but long-term returns have remained strong, unless these events have been accompanied by a recession. And despite worries around a recession with the recent inversion of the 2 to 10-year yield curve, historically a reliable predictor of recessions, it is still not the Fund's base case. In the portfolio manager's opinion, the 3-month/10-year yield curve, historically with the most predictive power, has not inverted and is instead steepening. Furthermore, the U.S. Federal Reserve (the "Fed") researchers wrote in a recent research paper that the predictive power of the 2/10 year yield relationship was "probably spurious" and that at best it was a case of "reverse causality". Instead, the Fed researchers wrote that the near term forward spreads (3-month/10-year) offer "a much more precise view of market expectations". The portfolio manager agrees with this view and is therefore watching the 3-month/10-year yield curve very closely.

Overall, the portfolio manager remains bullish on equity markets and believes that any near term volatility should be viewed as buying opportunities. The portfolio manager remains focused on identifying and participating in companies demonstrating innovation and market leadership throughout this investment cycle.

In late February 2022, Russian military forces invaded Ukraine, significantly amplifying already existing geopolitical tensions among Russia, Ukraine, Europe, NATO and the West. Following Russia's actions, various countries, including the U.S., Canada, the UK and the EU, issued broad-ranging economic sanctions against Russia and certain Russian individuals, banking entities and corporations. Russia's invasion, the imposed sanctions and the threat of further sanctions, and the potential for wider conflict has and may continue to increase financial market volatility and negatively impact regional and global economic markets. The extent and duration of the military conflict, corresponding sanctions and resulting market disruptions are impossible to predict, and the longer term impact to geopolitical norms, supply chains and investment valuations is uncertain. These and any

related events could negatively affect fund performance, liquidity of Russian securities and the value of an investment in a fund beyond any direct exposure to Russian issuers or those of adjoining geographic regions. AGFI continues to monitor the situation and the impact on the Fund. As of March 31, 2022, the Fund had no direct exposure to Russian securities.

The ongoing impact of COVID-19, including the potential for further variants, as well as other epidemics and pandemics that may arise in the future, could negatively affect the worldwide economy, as well as the economies of individual countries, individual companies and the market in general in significant and unforeseen ways. The effects of these or similar unexpected disruptive events on the economies and securities markets of countries cannot be predicted. These events could, directly or indirectly, affect a fund and its investments, which may cause a fund to decrease in value, experience significant redemptions or encounter operational difficulties.

Related Party Transactions

AGFI is the manager ("Manager") of the Fund. Pursuant to the management agreement between the Fund and AGFI, AGFI is responsible for the day-to-day business of the Fund. AGFI also acts as the investment (portfolio) manager, managing the investment portfolio of the Fund. Under the management agreement, the Fund (except for Series I, Series O, Series Q and Series W Shares, if applicable) pays management fees, calculated based on the Net Asset Value of the respective series of the Fund. Management fees of approximately \$16,427,000 were incurred by the Fund during the six months ended March 31, 2022.

Certain operating expenses relating to registrar and transfer agency services are paid directly by AGFI and in exchange, a fixed rate administration fee is payable by the Mutual Fund Series, Series F, Series FV, Series I, Series T and Series V Shares, as applicable, of the Fund. The administration fee is calculated based on the Net Asset Value of the respective series of the Fund at a fixed annual rate, as disclosed in the current prospectus. Administration fees of approximately \$1,171,000 were incurred by the Fund during the six months ended March 31, 2022.

AGFI is an indirect wholly-owned subsidiary of AGF Management Limited.

Caution Regarding Forward-looking Statements

This report may contain forward-looking statements about the Fund, including its strategy, expected performance and condition. Forward looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates" or negative versions thereof and similar expressions.

In addition, any statement that may be made concerning future performance, strategies or prospects, and possible future Fund action, is also a forward-looking statement. Forward-looking statements are based on current

AGF American Growth Class

(CLASS OF AGF ALL WORLD TAX ADVANTAGE GROUP LIMITED)

MARCH 31, 2022

expectations and projections about future events and are inherently subject to, among other things, risks, uncertainties and assumptions about the Fund and economic factors.

The forward-looking statements are by their nature based on numerous assumptions, which include, amongst other things, that (i) the Fund can attract and maintain investors and has sufficient capital under management to effect its investment strategies, (ii) the investment strategies will produce the results intended by the portfolio manager, and (iii) the markets will react and perform in a manner consistent with the investment strategies. Although the forward-looking statements contained herein are based upon what the portfolio manager believes to be reasonable assumptions, the portfolio manager cannot assure that actual results will be consistent with these forward-looking statements.

Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements made by the Fund. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, global equity and capital markets, business competition, taxation, changes in government regulations, unexpected judicial or regulatory proceedings, technological changes, cybersecurity, the possible effects of war or terrorist activities, outbreaks of disease or illness that affect local, national or international economies (such as COVID-19), natural disasters and disruptions to public infrastructure, such as transportation, communications, power or water supply or other catastrophic events.

It should be stressed that the above-mentioned list of factors is not exhaustive. You are encouraged to consider these and other factors carefully before making any investment decisions and you are urged to avoid placing undue reliance on forward-looking statements. Further, you should be aware of the fact that the Fund has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise, prior to the release of the next Management Report of Fund Performance.

Financial Highlights

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the six months ended March 31, 2022 and the past five years as applicable.

Explanatory Notes

(1) a) This information is derived from the Fund's audited annual financial statements and unaudited interim financial statements. Under International Financial Reporting Standards ("IFRS"), investments that are traded in an active market are generally valued at closing price, which is determined to be within the bid-ask spread and most representative of fair value. As a result, there is no difference between the net assets per share presented in the financial statements ("Net Assets") and the net asset value per share calculated for fund pricing purposes ("Net Asset Value").

b) The following series of the Fund commenced operations on the following dates, which represents the date upon which securities of a series were first made available for purchase by investors.

Mutual Fund Shares	April 1957
Series F Shares	January 2000
Series FV Shares	November 2018
Series O Shares	November 2003
Series Q Shares	December 2012
Series T Shares	April 2009
Series V Shares	April 2009
Series W Shares	April 2017

(2) Net Assets, dividends and distributions are based on the actual number of shares outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of shares outstanding over the financial period.

(3) Dividends and distributions were paid in cash/reinvested in additional shares of the Fund, or both.

Series FV, Series T and Series V Shares of the Fund may make monthly distributions of capital so long as there is sufficient capital attributable to the series. The capital per share of the Series FV, Series T and Series V Shares as applicable, is as follows:

As at	Mar 31, 2022 (\$)	Sept 30, 2021 (\$)	Sept 30, 2020 (\$)	Sept 30, 2019 (\$)	Sept 30, 2018 (\$)	Sept 30, 2017 (\$)
Series FV Shares	73.86	71.67	69.70	56.71	-	-
Series T Shares	21.04	20.17	17.34	17.68	18.52	16.08
Series V Shares	31.50	29.28	26.52	25.37	24.75	21.39

(4) This is not a reconciliation of the beginning and ending Net Assets per share.

(5) The management expense ratio ("MER") of a particular series is calculated in accordance with National Instrument 81-106, based on all the expenses of the Fund (including Harmonized Sales Tax, Goods and Services Tax, income tax and interest, but excluding foreign withholding taxes, commissions and other portfolio transaction costs) and the Fund's proportionate share of the MER, if applicable, of the underlying funds and exchange traded funds ("ETFs") in which the Fund has invested, attributable to that series, expressed as an annualized percentage of average daily Net

AGF American Growth Class

(CLASS OF AGF ALL WORLD TAX ADVANTAGE GROUP LIMITED)

MARCH 31, 2022

Asset Value of that series during the period. For new series launched, the MER is annualized from the date of the first external purchase.

- (6) AGFI waived certain fees or absorbed certain expenses otherwise payable by the Fund. The amount of expenses waived or absorbed is determined annually on a series by series basis at the discretion of AGFI and AGFI can terminate the waiver or absorption at any time.
- (7) The trading expense ratio represents total commissions and other portfolio transaction costs, including the Fund's proportionate share of the commissions, if applicable, of the underlying funds and ETFs in which the Fund has invested, expressed as an annualized percentage of average daily Net Asset Value during the period.
- (8) The Fund's portfolio turnover rate ("PTR") indicates how actively the Fund's portfolio advisor manages its portfolio investments. A PTR of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's PTR in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

PTR is calculated based on the lesser of the cumulative cost of purchases or cumulative proceeds of sales divided by the average market value of the portfolio, excluding short-term investments.

Management Fees

The Fund is managed by AGFI. As a result of providing investment and management services, AGFI receives a monthly management fee, based on the Net Asset Value of the respective series, calculated daily and payable monthly. Management fees in respect of Series I, Series O, Series Q and Series W Shares, if applicable, are arranged directly between the Manager and investors and are not expenses of the Fund. AGFI uses these management fees to pay for sales and trailing commissions to registered dealers on the distribution of the Fund's shares, investment advice, as well as for general administrative expenses such as overhead, salaries, rent, legal and accounting fees relating to AGFI's role as manager.

	As a percentage of management fees		
	Annual rates	Dealer compensation	General administration and investment advice
Mutual Fund Shares	2.20%	65.54%	34.46%
Series F Shares	1.00%	-	100.00%
Series FV Shares	1.00%	-	100.00%
Series T Shares	2.20%	71.38%	28.62%
Series V Shares	2.20%	72.35%	27.65%

Past Performance*

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional securities of the Fund. Note that the performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. How the Fund has performed in the past does not necessarily indicate how it will perform in the future.

It is AGFI's policy to report rates of return for series in existence greater than one year. The performance start date for each series represents the date of the first purchase of such series, excluding seed money.

All rates of return are calculated based on the Net Asset Value.

Year-By-Year Returns

The following bar charts show the Fund's annual performance for each of the past 10 years to September 30, 2021 (interim performance for the six months ended March 31, 2022) as applicable, and illustrate how the Fund's performance has changed from year to year. The charts show, in percentage terms, how much an investment made on the first day of each financial period would have grown or decreased by the last day of each financial period.

Mutual Fund Shares

Series F Shares

* The indicated rates of return shown here are the historical returns including changes in security value and reinvestment of all distributions and do not take into account sales, redemption, distribution or other optional charges by any securityholder that would have reduced returns or performance. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated.
