

Interim Management Report of Fund Performance

AGF Strategic Income Fund

March 31, 2022

Management Discussion of Fund Performance

This management discussion of fund performance represents the portfolio management team's view of the significant factors and developments affecting the fund's performance and outlook.

Results of Operations

For the six months ended March 31, 2022, the Mutual Fund Units of AGF Strategic Income Fund (the "Fund") returned 4.6% (net of expenses) while the S&P/TSX Composite Index ("S&P/TSX Index"), the Bloomberg Canada Aggregate Index and the Blended Benchmark returned 10.5%, -5.5% and 3.9%, respectively. The Blended Benchmark is composed of 60% S&P/TSX Index/40% Bloomberg Canada Aggregate Index. The performance of the other series of the Fund is substantially similar to that of the Mutual Fund Units, save for differences in expense structure. Refer to "Past Performance" section for performance information of such series.

The Fund under-performed the S&P/TSX Index due to its inclusion of fixed income assets, particularly rate-sensitive government bonds. Most bond yields rose significantly over the reporting period, especially in the second half, primarily driven by elevated inflation and central bank tightening. Despite being defensively positioned from a duration perspective, the fixed income portion of the Fund did pull down performance overall relative to the S&P/TSX Index. Duration exposure is the sensitivity of the portfolio due to changes in interest rates.

The Fund out-performed the Bloomberg Canada Aggregate Index due to its inclusion of Canadian and global equities, which did relatively better than fixed income over the reporting period. Within the fixed income portion, the Fund also benefited from being more defensively positioned from a duration perspective.

The Fund out-performed the Blended Benchmark due primarily to its overweight allocation to the equity component which did well over the reporting period. The fixed income component, which was more defensively positioned from a duration perspective, also did relatively better. The global economy continued to push forward despite a resurgence in COVID-19 cases over the turn of the year. In the second half of the reporting period, the war in Ukraine together with central bank tightening pushed volatility higher and resulted in more market uncertainty.

Certain series of the Fund, as applicable, make monthly distributions at a rate determined by AGF Investments Inc. ("AGFI") from time to time. If the aggregate amount of the monthly distributions made to a series in a year exceeds the

portion of the net income and net realized capital gains allocated to such series, the excess will constitute a return of capital. The portfolio manager does not believe that the distributions made by the Fund had a meaningful impact on the Fund's ability to implement its investment strategy or to fulfill its investment objectives.

The Fund entered into foreign exchange forward contracts during the period under review. As of March 31, 2022, the Fund was long Canadian dollar and short U.S. dollar in order to hedge its currency exposure.

The Fund had net subscriptions of approximately \$1 million for the current period, as compared to net redemptions of approximately \$35 million in the prior period. The portfolio manager does not believe that subscription/redemption activity had a meaningful impact on the Fund's performance or the ability to implement its investment strategy.

Total expenses before foreign withholding taxes, commissions and other portfolio transaction costs vary period over period mainly as a result of changes in average Net Asset Values (see Explanatory Note (1) a)) and investor activity, such as number of investor accounts and transactions. Expenses have decreased as compared to the previous period due mainly to a decrease in average Net Asset Values. Custodian fees decreased due to a decrease in market value of investment portfolio and interest expense decreased due to a decrease in overdraft positions throughout the period. The decrease in annual and interim reports was due to variances between the accrued amounts versus the actual expenses incurred in the previous period. All other expenses remained fairly consistent throughout the periods.

Recent Developments

During the reporting period, the lingering effects of the COVID-19 pandemic continued to weigh on market sentiment, especially as Omicron case counts soared to new heights in many countries around the world. Inflationary pressures continued to build during the first half of the reporting period as strong labour markets coupled with supply chain bottlenecks caused prices to rise. Russia's invasion of Ukraine added a further shock to supply chains and inflation, causing an upheaval in energy markets, food grains and key materials exported from both countries. Inflation reached a four decade high as the underlying drivers of inflation broadened. As inflation, the pandemic and the war in Ukraine continue to weigh on the global economy, the risk of stagflation has increased, particularly in Europe, which is more at risk due to its energy dependency on Russia. In response to persistent inflationary pressures, the U.S. Federal Reserve (the "Fed") raised its key policy rate by

This interim management report of fund performance contains financial highlights, but does not contain either the interim or annual financial statements of the investment fund. You can get a copy of the interim or annual financial statements at your request, and at no cost, by calling 1 800 268-8583, by writing to us at AGF Investments Inc., 55 Standish Court, Suite 1050, Mississauga, Ontario, Canada L5R 0G3 attention: Client Services, or by visiting our website at www.agf.com or SEDAR at www.sedar.com.

Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

0.25% in March 2022, the first time in over three years. The Fed indicated an aggressive rate hike path, which is likely front-end loaded with additional hikes in the near term.

Financial conditions continue to tighten off a low base as the Fed raises policy rates, addresses its balance sheet and the U.S. dollar continues to strengthen. Consequently, the Fed will need to strike a careful balance between withdrawing enough policy measures to engineer a soft landing of the economy without causing a recession. The portfolio manager continues to watch the economic data for signs of economic weakness and monitor the U.S. yield curve as it has at times been a good predictor of U.S. recessions. The yield curve is currently showing mixed signals as bond volatility remains high and the curve shape continues to fluctuate. In either case, the portfolio manager believes that a U.S. recession is not imminent. The Bank of Canada already commenced scaling back its bond purchases and is expected to continue to raise policy rates alongside the Fed. The European Central Bank is also expected to raise policy rates to some degree, while the Bank of Japan is likely to remain on hold.

While the bond bear market has been challenging for investors, yields have risen quickly in a short period of time. While there is still potential for yields to move higher, the portfolio manager expects majority of the bond weakness to be over. Government bond yields should conceptually trend higher during periods of less accommodative policy, but historically tapering has actually resulted in lower bond yields.

Equities had a very weak quarter historically in the first calendar quarter of 2022 and those that fared better tended to be the commodity or more defensive names. With inflation still high and the growth picture more uncertain, the equity focus will largely centre on high quality companies that either have high dividend payouts or are more commodity based. Having exposure to both should act as a hedge in terms of what is to come. Other areas of focus are companies with pricing power and those that are more geared towards the economic re-opening.

Corporate credit spreads widened during the first calendar quarter of 2022 as higher inflationary pressures, rising bond yields and the war in Ukraine weighed on economic growth prospects, raising concerns over slower economic growth and rising corporate defaults. However, credit spreads tightened meaningfully from mid-March, as risk aversion partially subsided, until the end of the reporting period.

The emerging markets asset class has been under pressure with elevated volatility and an extreme dispersion of returns between countries. Several emerging markets central banks started hiking policy rates during calendar year 2021 in response to high inflation and strong growth as their economies re-opened. These inflationary pressures could persist and continue to push central banks to tighten, particularly in those countries where food and energy constitute a higher share of their inflation baskets. Mounting fiscal pressures have resulted in an elevated probability of default for some of the weaker emerging markets countries. Overall, emerging markets bond yields have been rising,

reflecting the elevated risks they face. This has made the asset class more attractive from a value standpoint, provided the obstacles start to dissipate. Looking ahead, returns will be greatly influenced by country-specific issues such as political and social dynamics. At the macro level, geopolitical risks and the ongoing war in Ukraine together with the pace of developed markets central bank tightening are likely to dominate sentiment.

In late February 2022, Russian military forces invaded Ukraine, significantly amplifying already existing geopolitical tensions among Russia, Ukraine, Europe, NATO and the West. Following Russia's actions, various countries, including the U.S., Canada, the UK and the European Union, issued broad-ranging economic sanctions against Russia and certain Russian individuals, banking entities and corporations. Russia's invasion, the imposed sanctions and the threat of further sanctions, and the potential for wider conflict has and may continue to increase financial market volatility and negatively impact regional and global economic markets. The extent and duration of the military conflict, corresponding sanctions and resulting market disruptions are impossible to predict, and the longer term impact to geopolitical norms, supply chains and investment valuations is uncertain. These and any related events could negatively affect fund performance, liquidity of Russian securities and the value of an investment in a fund beyond any direct exposure to Russian issuers or those of adjoining geographic regions. AGFI continues to monitor the situation and the impact on the Fund. As of March 31, 2022, the Fund had no direct exposure to Russian securities.

The ongoing impact of COVID-19, including the potential for further variants, as well as other epidemics and pandemics that may arise in the future, could negatively affect the worldwide economy, as well as the economies of individual countries, individual companies and the market in general in significant and unforeseen ways. The effects of these or similar unexpected disruptive events on the economies and securities markets of countries cannot be predicted. These events could, directly or indirectly, affect a fund and its investments, which may cause a fund to decrease in value, experience significant redemptions or encounter operational difficulties.

Related Party Transactions

AGFI is the manager ("Manager") and trustee of the Fund. Pursuant to the management agreement between the Fund and AGFI, AGFI is responsible for the day-to-day business of the Fund. AGFI also acts as the investment (portfolio) manager, managing the investment portfolio of the Fund. Under the management agreement, the Fund (except for Series I, Series O, Series Q and Series W Units, if applicable) pays management fees, calculated based on the Net Asset Value of the respective series of the Fund. Management fees of approximately \$5,645,000 were incurred by the Fund during the six months ended March 31, 2022.

Certain operating expenses relating to registrar and transfer agency services are paid directly by AGFI and in exchange, a fixed rate administration fee is payable by the Mutual Fund Series, Series F, Series FV, Series I, Series T and Series V Units, as applicable, of the Fund. The administration fee is calculated based on the Net Asset Value of the respective series of the Fund at a fixed annual rate, as disclosed in the current prospectus. Administration fees of approximately \$426,000 were incurred by the Fund during the six months ended March 31, 2022.

AGFI is an indirect wholly-owned subsidiary of AGF Management Limited.

Caution Regarding Forward-looking Statements

This report may contain forward-looking statements about the Fund, including its strategy, expected performance and condition. Forward looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates" or negative versions thereof and similar expressions.

In addition, any statement that may be made concerning future performance, strategies or prospects, and possible future Fund action, is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to, among other things, risks, uncertainties and assumptions about the Fund and economic factors.

The forward-looking statements are by their nature based on numerous assumptions, which include, amongst other things, that (i) the Fund can attract and maintain investors and has sufficient capital under management to effect its investment strategies, (ii) the investment strategies will produce the results intended by the portfolio manager, and (iii) the markets will react and perform in a manner consistent with the investment strategies. Although the forward-looking statements contained herein are based upon what the portfolio manager believes to be reasonable assumptions, the portfolio manager cannot assure that actual results will be consistent with these forward-looking statements.

Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements made by the Fund. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, global equity and capital markets, business competition, taxation, changes in government regulations, unexpected judicial or regulatory proceedings, technological changes, cybersecurity, the possible effects of war or terrorist activities, outbreaks of disease or illness that affect local, national or international

economies (such as COVID-19), natural disasters and disruptions to public infrastructure, such as transportation, communications, power or water supply or other catastrophic events.

It should be stressed that the above-mentioned list of factors is not exhaustive. You are encouraged to consider these and other factors carefully before making any investment decisions and you are urged to avoid placing undue reliance on forward-looking statements. Further, you should be aware of the fact that the Fund has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise, prior to the release of the next Management Report of Fund Performance.

Financial Highlights

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the six months ended March 31, 2022 and the past five years as applicable.

Explanatory Notes

(1) a) This information is derived from the Fund's audited annual financial statements and unaudited interim financial statements. Under International Financial Reporting Standards ("IFRS"), investments that are traded in an active market are generally valued at closing price, which is determined to be within the bid-ask spread and most representative of fair value. As a result, there is no difference between the net assets per unit presented in the financial statements ("Net Assets") and the net asset value per unit calculated for fund pricing purposes ("Net Asset Value").

b) The following series of the Fund commenced operations on the following dates, which represents the date upon which securities of a series were first made available for purchase by investors.

Mutual Fund Units	July 1931
Series F Units	January 2000
Series O Units	June 2005
Series Q Units	May 2018
Series T Units	December 2006
Series V Units	August 2007
Series W Units	May 2018

c) On May 15, 2020, AGF Tactical Income Fund merged into the Fund. The financial data of the Fund includes the results of operations of AGF Tactical Income Fund from the date of the merger.

d) On August 3, 2018, AGF Traditional Income Fund merged into the Fund. The financial data of the Fund includes the results of operations of AGF Traditional Income Fund from the date of the merger.

(2) Net Assets and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the financial period.

(3) Distributions were paid in cash/reinvested in additional units of the Fund, or both. The computation of the distributions per unit does not take into account the management fee distributions (see note 5 below). The characterization of the distributions is based on management's estimate of the actual income for the year.

(4) This is not a reconciliation of the beginning and ending Net Assets per unit.

(5) The management expense ratio ("MER") of a particular series is calculated in accordance with National Instrument 81-106, based on all the expenses of the Fund (including Harmonized Sales Tax, Goods and Services Tax and interest, but excluding foreign withholding taxes, commissions and other portfolio transaction costs) and the Fund's proportionate share of the MER, if applicable, of the underlying funds and exchange traded funds ("ETFs") in which the Fund has invested, allocated to that series, expressed as an annualized percentage of average daily Net

Asset Value of that series during the period. For new series launched, the MER is annualized from the date of the first external purchase.

AGFI may reduce the effective management fee payable by some unitholders by reducing the management fee it charges to the Fund and directing the Fund to make management fee distributions to these unitholders in amounts equal to the amounts of the management fee reduction. The MER does not take into account the reduction in management fees due to management fee distributions to unitholders.

- (6) AGFI waived certain fees or absorbed certain expenses otherwise payable by the Fund. The amount of expenses waived or absorbed is determined annually on a series by series basis at the discretion of AGFI and AGFI can terminate the waiver or absorption at any time.
- (7) The trading expense ratio represents total commissions and other portfolio transaction costs, including the Fund's proportionate share of the commissions, if applicable, of the underlying funds and ETFs in which the Fund has invested, expressed as an annualized percentage of average daily Net Asset Value during the period.
- (8) The Fund's portfolio turnover rate ("PTR") indicates how actively the Fund's portfolio advisor manages its portfolio investments. A PTR of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's PTR in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

PTR is calculated based on the lesser of the cumulative cost of purchases or cumulative proceeds of sales divided by the average market value of the portfolio, excluding short-term investments.

Management Fees

The Fund is managed by AGFI. As a result of providing investment and management services, AGFI receives a monthly management fee, based on the Net Asset Value of the respective series, calculated daily and payable monthly. Management fees in respect of Series I, Series O, Series Q and Series W Units, if applicable, are arranged directly between the Manager and investors and are not expenses of the Fund. AGFI uses these management fees to pay for sales and trailing commissions to registered dealers on the distribution of the Fund's units, investment advice, as well as for general administrative expenses such as overhead, salaries, rent, legal and accounting fees relating to AGFI's role as manager.

	As a percentage of management fees		
	Annual rates	Dealer compensation	General administration and investment advice
Mutual Fund Units	2.25%	48.12%	51.88%
Series F Units	0.90%	-	100.00%
Series T Units	2.25%	52.67%	47.33%
Series V Units	2.25%	50.59%	49.41%

Past Performance*

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional securities of the Fund. Note that the performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. How the Fund has performed in the past does not necessarily indicate how it will perform in the future.

It is AGFI's policy to report rates of return for series in existence greater than one year. The performance start date for each series represents the date of the first purchase of such series, excluding seed money. During the ten year period ended September 30, 2021, certain other funds with similar investment objectives merged into the Fund. Generally, for fund mergers, the continuing fund is considered a new fund for the purpose of calculating rates of return and therefore, the rates of return have not been provided for the period of the merger and previous periods. However, the mergers of AGF Tactical Income Fund and AGF Traditional Income Fund with the Fund (see Explanatory Notes (1) c) and d)) and the merger of AGF Conservative Asset Allocation Fund with the Fund in May 2014 did not constitute material changes to the Fund and accordingly did not impact the ability of the Fund to maintain its historical performance.

All rates of return are calculated based on the Net Asset Value.

Year-By-Year Returns

The following bar charts show the Fund's annual performance for each of the past 10 years to September 30, 2021 (interim performance for the six months ended March 31, 2022) as applicable, and illustrate how the Fund's performance has changed from year to year. The charts show, in percentage terms, how much an investment made on the first day of each financial period would have grown or decreased by the last day of each financial period.

* The indicated rates of return shown here are the historical returns including changes in security value and reinvestment of all distributions and do not take into account sales, redemption, distribution or other optional charges by any securityholder that would have reduced returns or performance. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated.
