

Interim Management Report of Fund Performance

AGF Global Equity Fund

March 31, 2023

Management Discussion of Fund Performance

This management discussion of fund performance represents the portfolio management team's view of the significant factors and developments affecting the fund's performance and outlook.

Results of Operations

For the six months ended March 31, 2023, the Mutual Fund Units of AGF Global Equity Fund (the "Fund") returned 13.7% (net of expenses) while the MSCI All Country World Index returned 15.5%. Unlike the benchmark, the Fund may be subject to valuation adjustments as outlined in the Fund's valuation policies as it relates to non-North American equities held by the Fund. A fair value adjustment can either positively or negatively impact the Fund's rate of return. The performance of the other series of the Fund is substantially similar to that of the Mutual Fund Units, save for differences in expense structure. Refer to "Past Performance" section for performance information of such series.

The Fund under-performed the MSCI All Country World Index due to security selection, while country allocation decisions partially offset the adverse results. From a country perspective, security selection in Switzerland and the U.S. were the biggest detractors from performance, while security selection in China/Hong Kong and Austria contributed positively.

The Fund had net subscriptions of approximately \$11 million for the current period, as compared to net redemptions of approximately \$24 million in the prior period. Rebalancing by institutional programs resulted in net redemptions of approximately \$3 million in the Fund. The portfolio manager does not believe that subscription/redemption activity had a meaningful impact on the Fund's performance or the ability to implement its investment strategy.

Total expenses before foreign withholding taxes, commissions and other portfolio transaction costs vary period over period mainly as a result of changes in average Net Asset Values (see Explanatory Note (1) a)) and investor activity, such as number of investor accounts and transactions. The decrease in management fees accounted for most of the decrease in expenses during the period as compared to the previous period due to a decrease in average Net Asset Values. Unitholder servicing and administrative fees also decreased during the period as a result of decreased average Net Asset Values. The decrease in custodian fees was due to changes in the rates charged by the custodian during the period. The increase in audit fees and decrease in independent review committee fees were

due to variances between the accrued amounts versus the actual expenses incurred in the previous period. All other expenses remained fairly consistent throughout the periods.

Recent Developments

Equities rallied strongly during the last calendar quarter of 2022 as major announcements around the globe spurred a move higher in equity markets. Despite the strong fourth quarter performance, 2022 was still the worst calendar year for equities since the Global Financial Crisis. As Russia's invasion of Ukraine passed the one-year mark, NATO member nations pledged their unwavering support to Ukraine to continue the fight against the Kremlin. The monetary tightening cycle by the U.S. Federal Reserve (the "Fed") and the European Central Bank ("ECB") continued through the period, albeit at a slower pace, in an effort to balance growth with persistent inflation.

The U.S. economy had a solid start to the final calendar quarter of 2022. The economy grew at an annualized 2.6% quarter over quarter, in continuation with the strong rebound in economic activity during the third calendar quarter. New additions to the labour market continued to largely beat expectations through the period. However, this became a concern for the Fed as it signalled that inflationary pressures could continue despite their aggressive tightening measures to date. Encouragingly, U.S. inflation including headline, core and the Fed's preferred measure, the U.S. Personal Consumption Expenditure Core Price Index, fell to their lowest levels since 2021. To quell inflationary pressures, the Fed raised interest rates four times throughout the reporting period to end the period at a target range of 4.75% to 5.00%. In March 2023, alongside a 0.25% interest rate hike, the Fed also confirmed that it would continue to allow up to US\$60 billion in treasury securities and US\$35 billion in agency mortgage-backed securities to mature and roll off its more than US\$8.5 trillion balance sheet every month.

U.S. equities rallied during the last calendar quarter of 2022 and the better part of the first calendar quarter of 2023. Investor sentiment grew stronger as industrial activity improved and jobless claims fell to their lowest point since April 2022. However, markets sold off in February 2023 due to better-than-expected U.S. data, which caused investors to price in higher Fed policy rates, pushing the 2-year U.S. treasury yield to the highest level since 2007. The collapse of Silicon Valley Bank, Signature Bank and Credit Suisse in March 2023 caused panic and significant volatility in financial markets as contagion risk soared. Encouragingly, policymakers, the biggest U.S. banks and UBS were swift to rescue the failed banks and backstop the financial system. Short-term yields fell significantly as the financial shock caused investors to reassess their expectations of how aggressive the Fed would be in hiking rates.

This interim management report of fund performance contains financial highlights, but does not contain either the interim or annual financial statements of the investment fund. You can get a copy of the interim or annual financial statements at your request, and at no cost, by calling 1 800 268-8583, by writing to us at AGF Investments Inc., CIBC SQUARE, Tower One, 81 Bay Street, Suite 4000, Toronto, Ontario, Canada M5J 0G1 attention: Client Services, or by visiting our website at www.agf.com or SEDAR at www.sedar.com.

Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

European equities rallied strongly during the reporting period as the rate of inflation started to recede. Performance was supported by stronger-than-expected economic data, lower gas prices and a greater bias to China where sentiment improved dramatically, as policymakers eased its zero-COVID policy earlier than the market had expected. Earlier in the year and particularly in the third calendar quarter of 2022, the market became concerned about the prospects of a deep recession in the region as a result of the energy crisis. Milder weather, government subsidies and a stronger euro, vis-à-vis a weaker U.S. dollar, helped reduce price pressures in Europe, particularly commodity prices which are priced in U.S. dollars.

Emerging markets equities modestly under-performed developed markets equities in the last calendar quarter of 2022, despite the strongest quarter for emerging markets equities in two years. Several emerging markets central banks hiked rates, including India, Taiwan, Mexico, Indonesia, the Philippines, Malaysia, Thailand, Peru, Colombia, Chile, South Africa, Saudi Arabia and Egypt. While performance in Asia was initially weighed down by weak performance in China in October 2022 following the conclusion of the 20th Communist Party Congress, China's performance in November was the strongest in two decades following the country's dramatic shift on easing its zero-COVID restrictions earlier than the market had expected. South Korea performed strongly during the fourth calendar quarter of 2022, along with other Asian economies on the back of optimism about China's reopening. Countries in the Middle East, which had out-performed in the first three calendar quarters of 2022, under-performed during the reporting period due to falling energy prices. The Latin American region also under-performed during the reporting period, weighed down by Brazil.

The portfolio manager maintains a positive view for equities and anticipates uncertainty to remain elevated. The portfolio manager expects that core inflation will remain more persistent, leading to higher bond yields for a longer period than markets expect.

While the end of the U.S. rate hiking cycle may be close, the portfolio manager anticipates a U.S. recession towards the end of 2023 or early 2024, owing to the delayed impact of higher policy rates and tightening credit conditions on households and businesses.

Importantly, as long as central banks maintain a tightening monetary stance and the yield curve remains inverted, companies will continue to face headwinds akin to historical tightening cycles.

Positively, the Eurozone still has room for further industrial production growth, which could imply the potential for a continued surprise in manufacturing strength. The ECB will continue to monitor signs of inflationary pressures and tighten policy as necessary as inflation could remain sticky. The sanctions placed on Russia remain a material risk for the outlook, particularly for Europe, due to the potential for higher energy prices, ongoing energy shortages and tighter monetary policy.

While the U.S. and Europe already went through a recovery phase, rising inflation, monetary tightening and a subsequent growth slowdown, Japan, like China, is just at the beginning of that phase. While Japan has nearly fully reopened its economy, the government announced it would downgrade its classification of COVID-19 under the Infectious Diseases Law from Class 2 to Class 5 effective May 8. This should provide a boost to economic growth, particularly in services demand. Inbound consumption may also recover sharply as restrictions on the entry of foreigners are likely to be eased around the same time.

The portfolio manager believes that Asia's economies and financial markets will continue to benefit from China's reopening and further stimulus measures despite the potential for geopolitical tensions with the U.S. The replacement of expectations of higher Fed rate hikes with expectations of lower U.S. growth is relatively more advantageous for non-U.S. economies and equity markets, particularly those in Asia. This reinforces the portfolio manager's positive outlook for equity markets in the region.

The portfolio manager continues to focus on quality companies with solid balance sheets and strong management teams with a track record of navigating through challenging environments, often making investments and taking market share during times of weakness. Importantly, the Fund remains well-diversified across and within countries and sectors, which the portfolio manager believes is essential during times of heightened uncertainty and increased volatility.

Related Party Transactions

AGF Investments Inc. ("AGFI") is the manager ("Manager") and trustee of the Fund. Pursuant to the management agreement between the Fund and AGFI, AGFI is responsible for the day-to-day business of the Fund. AGFI also acts as the investment (portfolio) manager, managing the investment portfolio of the Fund. Under the management agreement, the Fund (except for Series I, Series O, Series Q and Series W Units, if applicable) pays management fees, calculated based on the Net Asset Value of the respective series of the Fund. Management fees of approximately \$2,842,000 were incurred by the Fund during the six months ended March 31, 2023.

Certain operating expenses relating to registrar and transfer agency services are paid directly by AGFI and in exchange, a fixed rate administration fee is payable by the Mutual Fund Series, Series F, Series FV, Series I, Series T and Series V Units, as applicable, of the Fund. The administration fee is calculated based on the Net Asset Value of the respective series of the Fund at a fixed annual rate, as disclosed in the current prospectus. Administration fees of approximately \$397,000 were incurred by the Fund during the six months ended March 31, 2023.

AGFI is an indirect wholly-owned subsidiary of AGF Management Limited.

Caution Regarding Forward-looking Statements

This report may contain forward-looking statements about the Fund, including its strategy, expected performance and condition. Forward looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates" or negative versions thereof and similar expressions.

In addition, any statement that may be made concerning future performance, strategies or prospects, and possible future Fund action, is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to, among other things, risks, uncertainties and assumptions about the Fund and economic factors.

The forward-looking statements are by their nature based on numerous assumptions, which include, amongst other things, that (i) the Fund can attract and maintain investors and has sufficient capital under management to effect its investment strategies, (ii) the investment strategies will produce the results intended by the portfolio manager, and (iii) the markets will react and perform in a manner consistent with the investment strategies. Although the forward-looking statements contained herein are based upon what the portfolio manager believes to be reasonable assumptions, the portfolio manager cannot assure that actual results will be consistent with these forward-looking statements.

Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements made by the Fund. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, global equity and capital markets, business competition, taxation, changes in government regulations, unexpected judicial or regulatory proceedings, technological changes, cybersecurity, the possible effects of war or terrorist activities, outbreaks of disease or illness that affect local, national or international economies (such as COVID-19), natural disasters and disruptions to public infrastructure, such as transportation, communications, power or water supply or other catastrophic events.

It should be stressed that the above-mentioned list of factors is not exhaustive. You are encouraged to consider these and other factors carefully before making any investment decisions and you are urged to avoid placing undue reliance on forward-looking statements. Further, you should be aware of the fact that the Fund has no specific intention of updating any forward-looking statements

whether as a result of new information, future events or otherwise, prior to the release of the next Management Report of Fund Performance.

Financial Highlights

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the six months ended March 31, 2023 and the past five years as applicable.

Series W Units - Ratios/Supplemental Data⁽¹⁾

For the periods ended	Mar 31, 2023	Sept 30, 2022	Sept 30, 2021	Sept 30, 2020	Sept 30, 2019	Sept 30, 2018
Total Net Asset Value (\$000's)	1,762	1,655	2,016	1,649	1,690	2,220
Number of units outstanding (000's)	114	121	133	135	132	174
Management expense ratio ⁽⁵⁾	0.00%	0.01%	0.03%	0.03%	0.03%	0.04%
Management expense ratio before waivers or absorptions ⁽⁶⁾	0.21%	0.21%	0.24%	0.26%	0.24%	0.22%
Trading expense ratio ⁽⁷⁾	0.02%	0.03%	0.05%	0.04%	0.06%	0.05%
Portfolio turnover rate ⁽⁸⁾	4.07%	10.16%	20.70%	11.70%	23.28%	26.85%
Net Asset Value per unit	15.41	13.64	15.20	12.26	12.79	12.74

Explanatory Notes

- (1) a) This information is derived from the Fund's audited annual financial statements and unaudited interim financial statements. Under International Financial Reporting Standards ("IFRS"), investments that are traded in an active market are generally valued at closing price, which is determined to be within the bid-ask spread and most representative of fair value. As a result, there is no difference between the net assets per unit presented in the financial statements ("Net Assets") and the net asset value per unit calculated for fund pricing purposes ("Net Asset Value").
- b) The following series of the Fund commenced operations on the following dates, which represents the date upon which securities of a series were first made available for purchase by investors.
- | | |
|-------------------|---------------|
| Mutual Fund Units | November 1994 |
| Series F Units | July 2001 |
| Series I Units | October 2016 |
| Series O Units | April 2011 |
| Series Q Units | April 2015 |
| Series W Units | April 2015 |
- c) On June 28, 2019, Harmony Overseas Equity Pool merged into the Fund. The financial data of the Fund includes the results of operations of Harmony Overseas Equity Pool from the date of the merger.
- (2) Net Assets and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the financial period.
- (3) Distributions were paid in cash/reinvested in additional units of the Fund, or both. The computation of the distributions per unit does not take into account the management fee distributions (see note 5 below). The characterization of the distributions is based on management's estimate of the actual income for the year.
- (4) This is not a reconciliation of the beginning and ending Net Assets per unit.
- (5) The management expense ratio ("MER") of a particular series is calculated in accordance with National Instrument 81-106, based on all the expenses of the Fund (including Harmonized Sales Tax, Goods and Services Tax and interest,

but excluding foreign withholding taxes, commissions and other portfolio transaction costs) and the Fund's proportionate share of the MER, if applicable, of the underlying funds and exchange traded funds ("ETFs") in which the Fund has invested, allocated to that series, expressed as an annualized percentage of average daily Net Asset Value of that series during the period. For new series launched, the MER is annualized from the date of the first external purchase.

AGFI may reduce the effective management fee payable by some unitholders by reducing the management fee it charges to the Fund and directing the Fund to make management fee distributions to these unitholders in amounts equal to the amounts of the management fee reduction. The MER does not take into account the reduction in management fees due to management fee distributions to unitholders.

- (6) AGFI waived certain fees or absorbed certain expenses otherwise payable by the Fund. The amount of expenses waived or absorbed is determined annually on a series by series basis at the discretion of AGFI and AGFI can terminate the waiver or absorption at any time.
- (7) The trading expense ratio represents total commissions and other portfolio transaction costs, including the Fund's proportionate share of the commissions, if applicable, of the underlying funds and ETFs in which the Fund has invested, expressed as an annualized percentage of average daily Net Asset Value during the period.
- (8) The Fund's portfolio turnover rate ("PTR") indicates how actively the Fund's portfolio advisor manages its portfolio investments. A PTR of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's PTR in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

PTR is calculated based on the lesser of the cumulative cost of purchases or cumulative proceeds of sales divided by the average market value of the portfolio, excluding short-term investments.

Management Fees

The Fund is managed by AGFI. As a result of providing investment and management services, AGFI receives a monthly management fee, based on the Net Asset Value of the respective series, calculated daily and payable monthly. Management fees in respect of Series I, Series O, Series Q and Series W Units, if applicable, are arranged directly between the Manager and investors and are not expenses of the Fund. AGFI uses these management fees to pay for sales and trailing commissions to registered dealers on the distribution of the Fund's units, investment advice, as well as

(1), (2), (3), (4), (5), (6), (7) and (8) see Explanatory Notes

for general administrative expenses such as overhead, salaries, rent, legal and accounting fees relating to AGFI's role as manager.

	As a percentage of management fees		
	Annual rates	Dealer compensation	General administration and investment advice
Mutual Fund Units	2.00%	42.14%	57.86%
Series F Units	0.90%	-	100.00%

Past Performance*

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional securities of the Fund. Note that the performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. How the Fund has performed in the past does not necessarily indicate how it will perform in the future.

It is AGFI's policy to report rates of return for series in existence greater than one year. The performance start date for each series represents the date of the first purchase of such series, excluding seed money. During the ten year period ended September 30, 2022, certain other funds with similar investment objectives merged into the Fund. Generally, for fund mergers, the continuing fund is considered a new fund for the purpose of calculating rates of return and therefore, the rates of return have not been provided for the period of the merger and previous periods. However, the merger of Harmony Overseas Equity Pool with the Fund (see Explanatory Note (1) c)) and the mergers of AGF Global Value Fund and AGF Social Values Equity Fund with the Fund in May 2016 and May 2014, respectively, did not constitute material changes to the Fund and accordingly did not impact the ability of the Fund to maintain its historical performance.

All rates of return are calculated based on the Net Asset Value.

Year-By-Year Returns

The following bar charts show the Fund's annual performance for each of the past 10 years to September 30, 2022 (interim performance for the six months ended March 31, 2023) as applicable, and illustrate how the Fund's performance has changed from year to year. The charts show, in percentage terms, how much an investment made on the first day of each financial period would have grown or decreased by the last day of each financial period.

Mutual Fund Units

Series F Units

Series I Units

Performance for 2018 represents returns for the period from January 10, 2018 to September 30, 2018.

Series O Units

* The indicated rates of return shown here are the historical returns including changes in security value and reinvestment of all distributions and do not take into account sales, redemption, distribution or other optional charges by any securityholder that would have reduced returns or performance. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated.

Series Q Units

Performance for 2015 represents returns for the period from September 14, 2015 to September 30, 2015.

Series W Units

Performance for 2016 represents returns for the period from June 3, 2016 to September 30, 2016.

Summary of Investment Portfolio

As at March 31, 2023

The major portfolio categories and top holdings (up to 25) of the Fund at the end of the period are indicated in the following tables. The Summary of Investment Portfolio may change due to ongoing portfolio transactions of the Fund and the next quarterly update will be in the Quarterly Portfolio Disclosure as at June 30, 2023.

Portfolio by Country	Percentage of Net Asset Value (%)
United States	59.7
Japan	12.0
United Kingdom	4.7
