

Interim Management Report of Fund Performance

AGF Global Real Assets Fund

March 31, 2024

Management Discussion of Fund Performance

This management discussion of fund performance represents the portfolio management team's view of the significant factors and developments affecting the fund's performance and outlook.

Results of Operations

For the six months ended March 31, 2024, the Mutual Fund Units of AGF Global Real Assets Fund (the "Fund") returned 7.6% (net of expenses) while the Blended Benchmark returned 12.4%. The Blended Benchmark is composed of 25% S&P Global Infrastructure Net Index/20% MSCI World Materials Net Index/20% MSCI World Real Estate Net Index/15% MSCI World Energy Net Index/10% ICE BofA US Inflation Linked Treasury Index/10% S&P/TSX Global Gold Index. Unlike the benchmark, the Fund may be subject to valuation adjustments as outlined in the Fund's valuation policies as it relates to non-North American equities held by the Fund. A fair value adjustment can either positively or negatively impact the Fund's rate of return. The performance of the other series of the Fund is substantially similar to that of the Mutual Fund Units, save for differences in expense structure. Refer to "Past Performance" section for performance information of such series.

The Fund under-performed the Blended Benchmark due to sectoral allocation decisions. The Materials sector was the biggest detractor from performance due to negative security selection and the Industrials sector also detracted due to an unfavourable overweight allocation to the sector. On the other hand, the Financials sector was the biggest contributor to performance due to positive stock selection. Positive security selection in the Energy sector also contributed, which was partially offset by an unfavorable overweight allocation to the sector.

The Fund had net subscriptions of approximately \$9 million for the current period, as compared to net subscriptions of approximately \$11 million in the prior period. Rebalancing by fund on fund programs resulted in net subscriptions of approximately \$1 million in the Fund. The portfolio manager does not believe that subscription activity had a meaningful impact on the Fund's performance or the ability to implement its investment strategy.

Total expenses before foreign withholding taxes, commissions and other portfolio transaction costs vary period over period mainly as a result of changes in average Net Asset Values (see Explanatory Note (1) a)) and investor activity, such as number of investor accounts and transactions. Expenses have decreased as compared to the previous period due mainly to a decrease in average Net

Asset Values of the Mutual Fund Series and Series F Units. On the contrary, the increase in custodian fees was due to an increase in market value of investment portfolio. All other expenses remained fairly consistent throughout the periods.

Recent Developments

Global equities rallied strongly during the reporting period. The major central banks in the developed markets stopped hiking rates as global inflation levels began slowly coming down from record highs. As the impact of higher interest rates was felt in the U.S. and Europe, the expectation of possible rate cuts and a soft landing in 2024 became a real possibility. Throughout calendar year 2023, the excitement around the advances in artificial intelligence took the world by storm and gave impetus to the stellar performance of some of the biggest technology companies in the world, narrowing market leadership quite noticeably. However, towards the end of 2023, market leadership had widened as a surge in energy prices due to production cuts brought energy companies back into the spotlight. During the last calendar quarter of 2023, a renewed conflict in the Middle East added concerns about a new disruption to global activity and return of sustained volatility in the market. Fortunately, the fallout did not have too much of an impact on global markets. China's economic revival continued to falter as the country's property sector dragged performance and stimulus packages from the government did little to improve the situation.

In the U.S., despite expectations of a potential recession for a better part of 2023, the U.S. economy ended the calendar year strongly, with a gross domestic product ("GDP") growth figure of 3.4% during the final calendar quarter. As inflation continued to decline steadily through the reporting period, the U.S. Federal Reserve has been careful not to cut rates too fast. Unemployment in the country largely remained low throughout the reporting period, spiking suddenly in February 2024. Non-farm payrolls also added 200,000 jobs on average every month till February. The equity market continued to perform strongly through the reporting period, buoyed by expectations that interest rate cuts may be approaching.

The Eurozone economy went through a difficult period after the bloc's GDP expanded by a mere 0.1% in the last calendar quarter of 2023. Even though the manufacturing purchasing managers' index ("PMI") was on the rise at the start of calendar year 2023, production stagnated after Germany, the region's biggest economy, entered a technical recession towards the end of 2023. The PMI measures the economic health of the manufacturing sector and is compiled based on new orders, inventory levels, production, supplier deliveries and employment environment. The inflation in the region fell to 2.6% in February 2024, the lowest in three months, and

This interim management report of fund performance contains financial highlights, but does not contain either the interim or annual financial statements of the investment fund. You can get a copy of the interim or annual financial statements at your request, and at no cost, by calling 1 800 268-8583, by writing to us at AGF Investments Inc., CIBC SQUARE, Tower One, 81 Bay Street, Suite 4000, Toronto, Ontario, Canada M5J 0G1 attention: Client Services, or by visiting our website at www.agf.com or SEDAR+ at www.sedarplus.ca.

Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

the interest rate was kept unchanged at 4.5% during the European Central Bank's latest meeting in March 2024. However, the anticipation of interest rate cuts by the Bank of England helped to keep the market sentiment positive.

The S&P GSCI Index rose slightly through the reporting period, after a rough start to the final calendar quarter of 2023. The price gains for precious metals and industrial metals failed to offset weaker prices for agriculture, energy and livestock. Energy also had sharp decline during the last months of 2023, with sharply lower prices for natural gas, crude oil and gas oil. At the turn of the year, strong price gains for livestock and energy offset weaker prices in agriculture, industrial metals and precious metals. Energy rebounded in January 2024 as the oil prices surged. As the conflict in the Middle East continued and the disruption of shipping in the Suez Canal continued into February, crude oil, Brent crude and unleaded gasoline all gained, while the price of natural gas fell sharply.

As the bull market continued during the first calendar quarter of 2024, the portfolio manager maintains a constructive view on equities. The portfolio manager remains encouraged by the resilience of the U.S. economy, which has been underpinned by a resilient consumer sentiment with healthy household balance sheets and a tight labour market. While economic growth is expected to slow as the lagged impact of rate increases continues to take effect, the portfolio manager continues to believe that there is a strong likelihood of the U.S. economy being able to avoid a recession.

While global listed infrastructure under-performed in calendar year 2023 due to the high interest rate environment and a shift away from defensive assets, the portfolio manager believes relative valuations are now at compelling levels. Infrastructure assets are expected to see earnings growth in 2024 and beyond, aided by structural growth drivers, especially utilities which are benefiting from energy transition. Infrastructure capital expenditure should accelerate in 2024, despite a higher cost of capital.

Demand is currently strong across multiple real estate property types, including residential. Headwinds continue to apply pressure. While valuations of public real estate investment trusts remain below private market valuations, the portfolio manager is closely monitoring macro risks and will grow more constructive on real estate when those risks begin to fade.

With the equity market, the portfolio manager believes 2024 is likely to be another positive year and global equities may also benefit from the return of earnings growth. As the S&P 500 Index continues to march up, the 2024 target levels for the equity index have been revised upward by many major banks and intermediaries.

Finally, the pronounced market narrowness witnessed during 2023 had somewhat eased towards the end of the calendar year, as broader market participation took hold as yields

declined in the final calendar quarter. The portfolio manager believes the broadening out of leadership will be a trend that continues into 2024.

Related Party Transactions

AGF Investments Inc. ("AGFI") is the manager ("Manager") and trustee of the Fund. Pursuant to the management agreement between the Fund and AGFI, AGFI is responsible for the day-to-day business of the Fund. AGFI also acts as the investment (portfolio) manager, managing the investment portfolio of the Fund. Under the management agreement, the Fund (except for Series I, Series O, Series Q and Series W Units, if applicable) pays management fees, calculated based on the Net Asset Value of the respective series of the Fund. Management fees of approximately \$523,000 were incurred by the Fund during the six months ended March 31, 2024.

Certain operating expenses relating to registrar and transfer agency services are paid directly by AGFI and in exchange, a fixed rate administration fee is payable by the Mutual Fund Series, Series F, Series FV, Series I, Series T and Series V Units, as applicable, of the Fund. The administration fee is calculated based on the Net Asset Value of the respective series of the Fund at a fixed annual rate, as disclosed in the current prospectus. Administration fees of approximately \$67,000 were incurred by the Fund for registrar and transfer agency services during the six months ended March 31, 2024.

All of the operating expenses relating to the operation of the ETF Series Units (except for certain costs as disclosed in the current prospectus) are paid directly by AGFI and in exchange, a fixed rate administration fee is payable by the series. The administration fee is calculated based on the Net Asset Value of the ETF Series Units at a fixed annual rate, as disclosed in the current prospectus. Administration fees of approximately \$200 were incurred by the ETF Series Units during the period from commencement of operations to March 31, 2024.

AGFI is an indirect wholly-owned subsidiary of AGF Management Limited.

Caution Regarding Forward-looking Statements

This report may contain forward-looking statements about the Fund, including its strategy, expected performance and condition. Forward looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates" or negative versions thereof and similar expressions.

In addition, any statement that may be made concerning future performance, strategies or prospects, and possible future Fund action, is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to, among other things, risks, uncertainties and assumptions about the Fund and economic factors.

The forward-looking statements are by their nature based on numerous assumptions, which include, amongst other things, that (i) the Fund can attract and maintain investors and has sufficient capital under management to effect its investment strategies, (ii) the investment strategies will produce the results intended by the portfolio manager, and (iii) the markets will react and perform in a manner consistent with the investment strategies. Although the forward-looking statements contained herein are based upon what the portfolio manager believes to be reasonable assumptions, the portfolio manager cannot assure that actual results will be consistent with these forward-looking statements.

Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements made by the Fund. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, global equity and capital markets, business competition, taxation, changes in government regulations, unexpected judicial or regulatory proceedings, technological changes, cybersecurity, the possible effects of war or terrorist activities, outbreaks of disease or illness that affect local, national or international economies (such as COVID-19), natural disasters and disruptions to public infrastructure, such as transportation, communications, power or water supply or other catastrophic events.

It should be stressed that the above-mentioned list of factors is not exhaustive. You are encouraged to consider these and other factors carefully before making any investment decisions and you are urged to avoid placing undue reliance on forward-looking statements. Further, you should be aware of the fact that the Fund has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise, prior to the release of the next Management Report of Fund Performance.

Financial Highlights

Explanatory Notes

(1) a) This information is derived from the Fund's audited annual financial statements and unaudited interim financial statements. Under International Financial Reporting Standards ("IFRS"), investments that are traded in an active market are generally valued at closing price, which is determined to be within the bid-ask spread and most representative of fair value. As a result, there is no difference between the net assets per unit presented in the financial statements ("Net Assets") and the net asset value per unit calculated for fund pricing purposes ("Net Asset Value").

b) The following series of the Fund commenced operations on the following dates, which represents the date upon which securities of a series were first made available for purchase by investors.

Mutual Fund Units	September 1993
ETF Series Units	February 2024
Series F Units	July 2001
Series I Units	October 2016
Series O Units	October 2020

(2) Net Assets and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the financial period.

(3) Distributions were paid in cash/reinvested in additional units of the Fund, or both. The computation of the distributions

* represents initial Net Assets

(1), (2), (3), (4), (5), (6), (7), (8) and (9) see Explanatory Notes

per unit does not take into account the management fee distributions, if applicable (see note 5 below). The characterization of the distributions is based on management's estimate of the actual income for the year.

- (4) This is not a reconciliation of the beginning and ending Net Assets per unit.
- (5) The management expense ratio ("MER") of a particular series is calculated in accordance with National Instrument 81-106, based on all the expenses of the Fund (including Harmonized Sales Tax, Goods and Services Tax and interest, but excluding foreign withholding taxes, commissions and other portfolio transaction costs) and the Fund's proportionate share of the MER, if applicable, of the underlying funds and exchange traded funds ("ETFs") in which the Fund has invested, allocated to that series, expressed as an annualized percentage of average daily Net Asset Value of that series during the period. For new series launched during the period, the MER is annualized from the date of the first external purchase.

AGFI may reduce the effective management fee payable by some unitholders by reducing the management fee it charges to the Fund and directing the Fund to make management fee distributions to these unitholders in amounts equal to the amounts of the management fee reduction. The MER does not take into account the reduction in management fees due to management fee distributions to unitholders.

- (6) AGFI waived certain fees or absorbed certain expenses otherwise payable by the Fund. The amount of expenses waived or absorbed is determined annually on a series by series basis at the discretion of AGFI and AGFI can terminate the waiver or absorption at any time.
- (7) The trading expense ratio represents total commissions and other portfolio transaction costs, including the Fund's proportionate share of the commissions, if applicable, of the underlying funds and ETFs in which the Fund has invested, expressed as an annualized percentage of average daily Net Asset Value during the period.
- (8) The Fund's portfolio turnover rate ("PTR") indicates how actively the Fund's portfolio advisor manages its portfolio investments. A PTR of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's PTR in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

PTR is calculated based on the lesser of the cumulative cost of purchases or cumulative proceeds of sales divided by the average market value of the portfolio, excluding short-term investments.

- (9) Closing market price on the last trading day of the period, as applicable, as reported on Cboe Canada. Mid price is disclosed if no transaction took place on the last business day of the period.

Management Fees

The Fund is managed by AGFI. As a result of providing investment and management services, AGFI receives a monthly management fee, based on the Net Asset Value of the respective series, calculated daily and payable monthly. Management fees in respect of Series I, Series O, Series Q and Series W Units, if applicable, are arranged directly between the Manager and investors and are not expenses of the Fund. AGFI uses these management fees to pay for sales and trailing commissions to registered dealers on the distribution of the Fund's units, investment advice, as well as for general administrative expenses such as overhead, salaries, rent, legal and accounting fees relating to AGFI's role as manager.

	As a percentage of management fees		
	Annual rates	Dealer compensation	General administration and investment advice
Mutual Fund Units	2.25%	43.03%	56.97%
ETF Series Units	0.60%	-	100.00%
Series F Units	0.60%	-	100.00%

Past Performance*

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional securities of the Fund. Note that the performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. How the Fund has performed in the past does not necessarily indicate how it will perform in the future.

It is AGFI's policy to report rates of return for series in existence greater than one year. The performance start date for each series represents the date of the first purchase of such series, excluding seed money. ETF Series Units commenced operations in February 2024.

All rates of return are calculated based on the Net Asset Value.

Year-By-Year Returns

The following bar charts show the Fund's annual performance for each of the past 10 years to September 30, 2023 (interim performance for the six months ended March 31, 2024) as applicable, and illustrate how the Fund's performance has changed from year to year. The charts show, in percentage terms, how much an investment made on the first day of each financial period would have grown or decreased by the last day of each financial period.

* The indicated rates of return shown here are the historical returns including changes in security value and reinvestment of all distributions and do not take into account sales, redemption, distribution or other optional charges by any securityholder that would have reduced returns or performance. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated.

Mutual Fund Units

Series F Units

Series I Units

Performance for 2019 represents returns for the period from April 15, 2019 to September 30, 2019.

Series O Units

Performance for 2021 represents returns for the period from April 12, 2021 to September 30, 2021.

Summary of Investment Portfolio

As at March 31, 2024

The major portfolio categories and top holdings (up to 25) of the Fund at the end of the period are indicated in the following tables. The Summary of Investment Portfolio may change due to ongoing portfolio transactions of the Fund and the next quarterly update will be in the Quarterly Portfolio Disclosure as at June 30, 2024.

The prospectus and other information about the ETFs are available on the internet at www.sedarplus.ca and/or www.sec.gov/edgar.shtml, as applicable.
