

Interim Management Report of Fund Performance

AGF Elements Conservative Portfolio Class

March 31, 2023

Management Discussion of Fund Performance

This management discussion of fund performance represents the portfolio management team's view of the significant factors and developments affecting the portfolio's performance and outlook.

Results of Operations

For the six months ended March 31, 2023, the Mutual Fund Shares of AGF Elements Conservative Portfolio Class (the "Portfolio") returned 6.6% (net of expenses) while the Bloomberg Canada Aggregate Index, the MSCI All Country World Index and the Blended Benchmark returned 3.3%, 15.5% and 8.5%, respectively. The Blended Benchmark is composed of 36% Bloomberg Global Aggregate Index/30% MSCI All Country World Index/24% Bloomberg Canada Aggregate Index/10% S&P/TSX Composite Index. The performance of the other series of the Portfolio is substantially similar to that of the Mutual Fund Shares, save for differences in expense structure. Refer to "Past Performance" section for performance information of such series.

The Portfolio holds Series I or Series S Units of the mutual funds managed by AGF Investments Inc. ("AGFI") (the "Underlying Funds"). The discussion below references performance figures for Mutual Fund Units or Series S Units of the Underlying Funds. The performance of Series I Units is substantially similar to that of Mutual Fund Units, save for differences in expense structure. The Underlying Funds may be subject to valuation adjustments as outlined in the Underlying Funds' valuation policies as it relates to non-North American equities held by the Underlying Funds. A fair value adjustment can either positively or negatively impact the Underlying Funds' rate of return.

The Portfolio is constructed based on an asset allocation framework that allocates to a diverse array of mutual funds and exchange traded funds ("ETFs") representing distinct global asset class opportunities, each with unique risk and return expectations.

The Portfolio out-performed the Bloomberg Canada Aggregate Index as equities out-performed bonds during the reporting period. Allocation was a positive contributor to relative performance while selection detracted. The Portfolio's selection decisions within fixed income detracted from relative results, led by AGF Total Return Bond Fund. The Portfolio's allocation to AGF Global Equity Fund, AGF European Equity Fund and AGF Global Dividend Fund contributed the most to relative returns.

The Portfolio under-performed the MSCI All Country World Index as equities significantly out-performed bonds over the reporting period. Furthermore, as global equities out-performed almost all other asset classes, allocations other

than to global and European equities detracted from relative returns. The Portfolio's selection decisions within fixed income detracted from relative results, led by AGF Total Return Bond Fund. On the other hand, the Portfolio's allocation to AGF European Equity Fund contributed to relative returns.

The Portfolio under-performed the Blended Benchmark due to selection decisions, currency hedging and fees, while allocation decisions assisted relative returns. An overweight allocation to alternatives (AGF US Market Neutral Anti-Beta CAD-Hedged ETF, formerly AGFiQ US Market Neutral Anti-Beta CAD-Hedged ETF) and equities as well as selection within fixed income contributed to relative performance. From a holdings perspective, AGF Total Return Bond Fund and AGF Fixed Income Plus Fund were the primary detractors from the Portfolio's relative performance. AGF Global Equity Fund, AGF European Equity Fund and AGF Global Dividend Fund contributed to relative results.

During the reporting period, apart from investing in Underlying Funds and ETFs that are managed by AGFI or its affiliates, the Portfolio also invested in U.S. treasury and ETFs that are not managed by AGFI ("external investments"). The Portfolio held approximately 50.0% of its holdings in fixed income funds, 33.0% in foreign equity funds, 9.0% in Canadian equity funds, 7.0% in external investments and 1.0% in cash and cash equivalents as at March 31, 2023. During the reporting period, the Portfolio's exposure to fixed income and foreign equity increased, while exposure to Canadian equity and external investments was reduced. Within global fixed income, exposure to AGF Total Return Bond Fund increased. Within Canadian fixed income, exposure to AGF Fixed Income Plus Fund increased. Within global equity, exposure to AGF Systematic International Equity ETF (formerly, AGFiQ International Equity ETF) was removed. Within Canadian equity, exposure to AGF Canadian Dividend Income Fund (formerly, AGFiQ Canadian Dividend Income Fund) was reduced.

The Portfolio entered into foreign exchange forward contracts during the period under review. As of March 31, 2023, the Portfolio was long Canadian dollar and short U.S. dollar in order to hedge its indirect currency exposure via the Underlying Funds and ETFs.

Certain series of the Portfolio, as applicable, make monthly distributions of capital at a rate determined by AGFI from time to time. The portfolio manager does not believe that the distributions made by the Portfolio had a meaningful impact on the Portfolio's ability to implement its investment strategy or to fulfill its investment objectives.

The Portfolio had net redemptions of approximately \$7 million for the current period, as compared to net subscriptions of approximately \$5 million in the prior period. The portfolio manager does not believe that redemption/

This interim management report of fund performance contains financial highlights, but does not contain either the interim or annual financial statements of the investment fund. You can get a copy of the interim or annual financial statements at your request, and at no cost, by calling 1 800 268-8583, by writing to us at AGF Investments Inc., CIBC SQUARE, Tower One, 81 Bay Street, Suite 4000, Toronto, Ontario, Canada M5J 0G1 attention: Client Services, or by visiting our website at www.agf.com or SEDAR at www.sedar.com.

MARCH 31, 2023

subscription activity had a meaningful impact on the Portfolio's performance or the ability to implement its investment strategy.

Total expenses before commissions and other portfolio transaction costs vary period over period mainly as a result of changes in average Net Asset Values (see Explanatory Note (1) a)) and investor activity, such as number of investor accounts and transactions. Expenses have decreased as compared to the previous period due mainly to a decrease in average Net Asset Values. The decrease in custodian fees was due to changes in the rates charged by the custodian during the period. The decrease in independent review committee fees was due to variances between the accrued amounts versus the actual expenses incurred in the previous period. All other expenses remained fairly consistent throughout the periods.

Recent Developments

AGFI, as portfolio manager, monitors and reviews the Portfolio and the strategic asset allocation on a quarterly basis. Rebalancing of the allocation of funds within the Portfolio occurs quarterly, or as deemed appropriate.

A bear market which began in January 2022 saw equity markets hit a low in October 2022, before staging a rally in the last several months of the calendar year and into the first calendar quarter of 2023. From a sector perspective, the worst performing sectors in 2022 became the best performing sectors in the first calendar quarter of 2023. For the six months period, the best performing sectors were Information Technology, Industrials and Materials, while the worst performing sectors were Consumer Discretionary, Utilities and Real Estate. However, despite these late gains, 2022 was the worst calendar year for equities since the Global Financial Crisis. Bond markets remained volatile over the reporting period, driven by variable economic data, the banking system turmoil that arose in March 2023, central bank policies and the markets' reaction to them. Inflation levels broadly moderated but remained elevated versus target levels, and resilient economic activity also supported further central bank rate hikes, albeit at a more moderate pace. China's long-awaited economic rebound helped the global economic outlook somewhat after the country abandoned its much-debated zero-COVID policy. As Russia's invasion of Ukraine passed the one-year mark, NATO member nations pledged their unwavering support to Ukraine to continue the fight against the Kremlin. The monetary tightening cycle by the U.S. Federal Reserve (the "Fed") and the European Central Bank continued through the reporting period, albeit at a slower pace, in an effort to balance growth with persistent inflation, as Fed Chairman Jerome Powell cautioned that taming inflation might take longer than previously thought.

The U.S. economy had a good start to the last calendar quarter of 2022. The U.S. economy grew 2.6% in the last calendar quarter of 2022, fueled by an increase in inventory investment and consumer spending, partly offset by a decline in housing investment. New job numbers continued to largely beat expectations through the reporting period. However, a tight labour market fueled wage inflation, particularly on the services, keeping overall consumer price index ("CPI") relatively high, though U.S. CPI fell to 6.0% year on year in

February 2023, the lowest since September 2021. The Fed raised the federal funds rate by 0.25% to a range of 4.75% to 5.00% in March 2023, pushing borrowing costs to the highest since 2007. Previously, the Fed hiked rates by 0.75%, 0.50% and 0.25% in November 2022, December 2022 and February 2023, respectively. The Fed also confirmed that it would continue to allow up to US\$60 billion in treasury securities and US\$35 billion in agency mortgage-backed securities to mature and roll off its more than US\$8.5 trillion balance sheet every month.

In March 2023, Silicon Valley Bank, a regional bank in the U.S., failed after a bank run, leading to a crisis in confidence in parts of the banking sector. The talks of a recession due to tighter lending standards gathered pace and took a toll on sentiment. In a positive development, U.S. authorities took measures such as guaranteeing certain bank deposits and setting up a new lending facility for banks to borrow against collateral at par for up to a year.

European equities rallied strongly during the reporting period after hitting a low in late September 2022. The European economy was stronger-than-expected as lower gas prices driven by a warmer-than-expected winter eased energy cost pressures. Emerging markets equities modestly underperformed developed markets equities in the last calendar quarter of 2022, despite the strongest quarter for emerging markets equities in two years. While performance in Asia was initially weighed down by weak performance in China in October 2022, China's performance in November was the strongest in two decades following the country's dramatic shift on easing its zero-COVID restrictions earlier than the market had expected.

Bond prices were lower in February 2023 due to strong global economic data prompting comments from the Fed pushing back on market expectations of cuts later in the year. These moves reversed most of the previous gains made over the reporting period. However, the bond market rally resumed in March 2023 as news of regional bank failures hit the headlines and reintroduced the narrative of this tightening cycle nearing an end.

The portfolio manager continues to maintain a constructive view on equities, particularly in the U.S. – though the next several months may see continued volatility. While all the uncertainty related to inflation rates, Fed interest rate policy, economic growth prospects and geopolitical developments may lead to continued volatility, investors would be well served to remember that the stock market is a leading indicator. Although there is a chance of a recession in 2023, the portfolio manager believes that equity markets can still do well with that backdrop. However, given the likely prospects of slower economic growth going forward, the portfolio manager continues to remain defensive from a credit perspective, while adding duration. Duration exposure is the sensitivity of the portfolio due to changes in interest rates.

Related Party Transactions

AGFI is the manager ("Manager") of the Portfolio. Pursuant to the management agreement between the Portfolio and AGFI, AGFI is responsible for the day-to-day business of the Portfolio. AGFI also acts as the investment (portfolio) manager of the Portfolio, providing analysis and

AGF Elements Conservative Portfolio Class

(CLASS OF AGF ALL WORLD TAX ADVANTAGE GROUP LIMITED)

MARCH 31, 2023

making decisions as to which Underlying Funds and ETFs the Portfolio invests in and the target weighting of the Portfolio's assets. Under the management agreement, the Portfolio (except for Series O, Series Q and Series W Shares, if applicable) pays management fees calculated based on the Net Asset Value of the respective series of the Portfolio. Management fees of approximately \$845,000 were incurred by the Portfolio during the six months ended March 31, 2023.

Certain operating expenses relating to registrar and transfer agency services are paid directly by AGFI and in exchange, a fixed rate administration fee is payable by the Mutual Fund Series, Series F, Series FV, Series T and Series V Shares, as applicable, of the Portfolio. The administration fee is calculated based on the Net Asset Value of the respective series of the Portfolio at a fixed annual rate, as disclosed in the current prospectus. Administration fees of approximately \$16,000 were incurred by the Portfolio during the six months ended March 31, 2023.

AGFI is an indirect wholly-owned subsidiary of AGF Management Limited.

Caution Regarding Forward-looking Statements

This report may contain forward-looking statements about the Portfolio, including its strategy, expected performance and condition. Forward looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates" or negative versions thereof and similar expressions.

In addition, any statement that may be made concerning future performance, strategies or prospects, and possible future Portfolio action, is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to, among other things, risks, uncertainties and assumptions about the Portfolio and economic factors.

The forward-looking statements are by their nature based on numerous assumptions, which include, amongst other things, that (i) the Portfolio can attract and maintain investors and has sufficient capital under management to effect its investment strategies, (ii) the investment strategies will produce the results intended by the portfolio manager, and (iii) the markets will react and perform in a manner consistent with the investment strategies. Although the forward-looking statements contained herein are based upon what the portfolio manager believes to be reasonable assumptions, the portfolio manager cannot assure that actual results will be consistent with these forward-looking statements.

Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements made by the Portfolio. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and

market factors in North America and internationally, interest and foreign exchange rates, global equity and capital markets, business competition, taxation, changes in government regulations, unexpected judicial or regulatory proceedings, technological changes, cybersecurity, the possible effects of war or terrorist activities, outbreaks of disease or illness that affect local, national or international economies (such as COVID-19), natural disasters and disruptions to public infrastructure, such as transportation, communications, power or water supply or other catastrophic events.

It should be stressed that the above-mentioned list of factors is not exhaustive. You are encouraged to consider these and other factors carefully before making any investment decisions and you are urged to avoid placing undue reliance on forward-looking statements. Further, you should be aware of the fact that the Portfolio has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise, prior to the release of the next Management Report of Fund Performance.

Explanatory Notes

(1) a) This information is derived from the Portfolio's audited annual financial statements and unaudited interim financial statements. Under International Financial Reporting Standards ("IFRS"), investments that are traded in an active market are generally valued at closing price, which is determined to be within the bid-ask spread and most representative of fair value. As a result, there is no difference between the net assets per share presented in the financial statements ("Net Assets") and the net asset value per share calculated for fund pricing purposes ("Net Asset Value").

b) The following series of the Portfolio commenced operations on the following dates, which represents the date upon which securities of a series were first made available for purchase by investors.

Mutual Fund Shares	January 2009
Series F Shares	January 2009
Series FV Shares	November 2018
Series Q Shares	April 2015
Series V Shares	June 2017
Series W Shares	April 2016

(2) Net Assets, dividends and distributions are based on the actual number of shares outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of shares outstanding over the financial period.

(3) Dividends and distributions were paid in cash/reinvested in additional shares of the Portfolio, or both.

Series FV and Series V Shares of the Portfolio may make monthly distributions of capital so long as there is sufficient capital attributable to the series. The capital per share of the Series FV and Series V Shares as applicable, is as follows:

As at	Mar 31, 2023 (\$)	Sept 30, 2022 (\$)	Sept 30, 2021 (\$)	Sept 30, 2020 (\$)	Sept 30, 2019 (\$)	Sept 30, 2018 (\$)
Series FV Shares	23.72	25.25	24.95	25.89	26.04	-
Series V Shares	7.75	7.95	8.32	8.48	8.85	9.22

(4) This is not a reconciliation of the beginning and ending Net Assets per share.

(5) The management expense ratio ("MER") of a particular series is calculated in accordance with National Instrument 81-106, based on all the expenses of the Portfolio (including Harmonized Sales Tax, Goods and Services Tax, income tax and interest, but excluding commissions and other portfolio transaction costs) and the Portfolio's proportionate share of the MER, if applicable, of the Underlying Funds and ETFs in which the Portfolio has invested, attributable to that series, expressed as an annualized percentage of average daily Net Asset Value of that series during the period. For new series launched, the MER is annualized from the date of the first external purchase.

The Portfolio does not pay duplicate management and advisory fees, as applicable, on the portion of the assets that it invests in the Underlying Funds. Accordingly, AGFI will waive the management and advisory fees payable or paid by the Underlying Funds in order to avoid such duplication.

(6) AGFI waived certain fees or absorbed certain expenses otherwise payable by the Portfolio. The amount of expenses waived or absorbed is determined annually on a series by series basis at the discretion of AGFI and AGFI can terminate the waiver or absorption at any time.

(7) The trading expense ratio represents total commissions and other portfolio transaction costs, including the Portfolio's proportionate share of the commissions, if applicable, of the Underlying Funds and ETFs in which the Portfolio has invested, expressed as an annualized percentage of average daily Net Asset Value during the period.

(8) The Portfolio's portfolio turnover rate ("PTR") indicates how actively the Portfolio's portfolio advisor manages its portfolio investments. A PTR of 100% is equivalent to the Portfolio buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's PTR in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

PTR is calculated based on the lesser of the cumulative cost of purchases or cumulative proceeds of sales divided by the average market value of the portfolio, excluding short-term investments.

(1), (2), (3), (4), (5), (6), (7) and (8) see Explanatory Notes

Management Fees

The Portfolio is managed by AGFI. As a result of providing investment and management services, AGFI receives a monthly management fee, based on the Net Asset Value of the respective series, calculated daily and payable monthly. Management fees in respect of Series O, Series Q and Series W Shares, if applicable, are arranged directly between the Manager and investors and are not expenses of the Portfolio. AGFI uses these management fees to pay for sales and trailing commissions to registered dealers on the distribution of the Portfolio's shares, investment advice, as well as for general administrative expenses such as overhead, salaries, rent, legal and accounting fees relating to AGFI's role as manager.

	As a percentage of management fees		
	Annual rates	Dealer compensation	General administration and investment advice
Mutual Fund Shares	2.00%	59.66%	40.34%
Series F Shares	0.80%	-	100.00%
Series FV Shares	0.80%	-	100.00%
Series V Shares	2.00%	61.05%	38.95%

Past Performance*

The performance information shown assumes that all distributions made by the Portfolio in the periods shown were reinvested in additional securities of the Portfolio. Note that the performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. How the Portfolio has performed in the past does not necessarily indicate how it will perform in the future.

It is AGFI's policy to report rates of return for series in existence greater than one year. The performance start date for each series represents the date of the first purchase of such series, excluding seed money.

All rates of return are calculated based on the Net Asset Value.

Year-By-Year Returns

The following bar charts show the Portfolio's annual performance for each of the past 10 years to September 30, 2022 (interim performance for the six months ended March 31, 2023) as applicable, and illustrate how the Portfolio's performance has changed from year to year. The charts show, in percentage terms, how much an investment made on the first day of each financial period would have grown or decreased by the last day of each financial period.

Mutual Fund Shares

Series F Shares

Series FV Shares

Performance for 2020 represents returns for the period from November 19, 2019 to September 30, 2020.

Series Q Shares

Performance for 2015 represents returns for the period from June 1, 2015 to September 30, 2015.

* The indicated rates of return shown here are the historical returns including changes in security value and reinvestment of all distributions and do not take into account sales, redemption, distribution or other optional charges by any securityholder that would have reduced returns or performance. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated.
