

Interim Management Report of Fund Performance

AGF Equity Income Fund

March 31, 2022

Management Discussion of Fund Performance

This management discussion of fund performance represents the portfolio management team's view of the significant factors and developments affecting the fund's performance and outlook.

Results of Operations

For the six months ended March 31, 2022, the Mutual Fund Units of AGF Equity Income Fund (the "Fund") returned 0.5% (net of expenses) while the S&P/TSX Composite Index ("S&P/TSX Index"), the Bloomberg Canada Aggregate Index and the Blended Benchmark returned 10.5%, -5.5% and -0.8%, respectively. The Blended Benchmark is composed of 25% Bloomberg Canada Aggregate Index/25% Bloomberg Global High-Yield Index/25% MSCI All Country World Index/25% S&P/TSX Index. The performance of the other series of the Fund is substantially similar to that of the Mutual Fund Units, save for differences in expense structure. Refer to "Past Performance" section for performance information of such series.

The Fund holds Series I Units of mutual funds managed by AGF Investments Inc. ("AGFI") (the "Underlying Funds"). The discussion below references performance figures for Mutual Fund Units of the Underlying Funds. The performance of Series I Units is substantially similar to that of Mutual Fund Units, save for differences in expense structure. The Underlying Funds may be subject to valuation adjustments as outlined in the Underlying Funds' valuation policies as it relates to non-North American equities held by the Underlying Funds. A fair value adjustment can either positively or negatively impact the Underlying Funds' rate of return.

The Fund under-performed the S&P/TSX Index due to the inclusion of fixed income securities, particularly rate-sensitive government bonds. Bond yields rose significantly over the reporting period largely due to elevated inflationary concerns. Inflation has been driven higher by rebounding global growth, supply chain disruptions and the war in Ukraine, all of which caused a jump in energy and commodity prices. The S&P/TSX Index performed very well over the reporting period given its significant exposure to the energy and commodity complex.

The Fund out-performed the Bloomberg Canada Aggregate Index mainly due to the inclusion of equities, which out-performed fixed income over the reporting period. Bonds were under pressure from high inflation and the subsequent response by central banks to tighten monetary policy. The fixed income portion of the Fund performed modestly well relative to the Bloomberg Canada Aggregate Index, but equities fared much better. Canadian equities, in particular, benefited from the rebound in global growth as well as higher commodity prices.

The Fund modestly out-performed the Blended Benchmark due to performance of the Underlying Funds. Within the Fund's fixed income component, AGF Total Return Bond Fund out-performed its respective benchmark given its shorter duration and relative underweight exposure to high yield and emerging markets bonds. Duration exposure is the sensitivity of the portfolio due to changes in interest rates. Within the equity component, the Fund benefited from its holdings in AGF Global Dividend Fund, which out-performed its respective benchmark.

At the end of the reporting period, the Fund held approximately 59.0%, 40.0% and 1.0% in equities, fixed income and cash and cash equivalents, respectively, via its holdings in the Underlying Funds and exchange traded funds ("ETFs").

Certain series of the Fund, as applicable, make monthly distributions at a rate determined by AGFI from time to time. If the aggregate amount of the monthly distributions made to a series in a year exceeds the portion of the net income and net realized capital gains allocated to such series, the excess will constitute a return of capital. The portfolio manager does not believe that the distributions made by the Fund had a meaningful impact on the Fund's ability to implement its investment strategy or to fulfill its investment objectives.

The Fund had net subscriptions of approximately \$22 million for the current period, as compared to net redemptions of approximately \$4 million in the prior period. The portfolio manager does not believe that subscription/redemption activity had a meaningful impact on the Fund's performance or the ability to implement its investment strategy.

Total expenses before foreign withholding taxes, commissions and other portfolio transaction costs vary period over period mainly as a result of changes in average Net Asset Values (see Explanatory Note (1) a)) and investor activity, such as number of investor accounts and transactions. Expenses have increased as compared to the previous period due mainly to an increase in average Net Asset Values. The increase in custodian fees was due to an increase in market value of investments subject to custody fees throughout the period. The decrease in annual and interim reports was due to variances between the accrued amounts versus the actual expenses incurred in the previous period. All other expenses remained fairly consistent throughout the periods.

Recent Developments

The portfolio manager favours equities over fixed income as the economic cycle continues to grind ahead despite near term hurdles, including elevated inflation, tighter monetary policy, early signs of moderating growth and geopolitical uncertainty. This overweight to equities is slightly reduced, however, with assets directed to fixed income slightly

This interim management report of fund performance contains financial highlights, but does not contain either the interim or annual financial statements of the investment fund. You can get a copy of the interim or annual financial statements at your request, and at no cost, by calling 1 800 268-8583, by writing to us at AGF Investments Inc., 55 Standish Court, Suite 1050, Mississauga, Ontario, Canada L5R 0G3 attention: Client Services, or by visiting our website at www.agf.com or SEDAR at www.sedar.com.

Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

increased. The underweight to fixed income is still in place overall as the asset class is impacted by central bank tightening. The portfolio manager believes the impact of the rate hiking cycle may cause heightened volatility and slower growth relative to prior quarters as higher rates pass through the economy. The Fund's small allocation to cash is utilized to soften the impact of this volatility and provides funds as opportunities arise.

The portfolio manager prefers developed markets over emerging markets with the prospects towards emerging markets reduced but still somewhat constructive. Within developed markets, U.S. and Japanese equities are the most favoured. Improvements in supply chain issues and COVID-19 concerns could help support equity growth in general. U.S. markets are adjusting for policy measures, but corporate earnings and resilient consumer spending continue to be supportive. Japan, which has historically excelled during rising rate environment, could fair better as valuations are relatively attractive though government policies and rising fuel costs could weigh on performance. Continued shipping bottlenecks and a slowing China will continue to impact Asia Pacific markets (ex-Japan) in the near term. The outlook for Europe has declined somewhat but is still well-positioned with its value-tilted markets, recent under-performance and relatively accommodative central bank. However, geopolitical uncertainty, high inflation readings and falling confidence should begin to impact growth expectations. Canadian equities should continue to be supported by higher commodity prices given their robust energy and material exposure.

The portfolio manager's unfavourable view towards fixed income remains in place for the upcoming quarter despite the category weight being increased slightly. Central bank activity will continue to impact rate sensitive bonds as stimulus measures are unwound; however, a significant amount of tightening was priced into the market during the first calendar quarter of 2022. Markets will continue to watch inflation very closely to see if the rollout of high base effects from last year signal that inflation may have peaked. If it remains elevated, bond yields could continue to push higher. Investment grade corporate bonds tend to be more sensitive to rising yields and high yield corporate bonds tend to be more sensitive to economic growth. Given the current economic backdrop, the environment remains supportive for 'coupon clipping' in high yield bonds. Emerging markets bonds were under significant pressure in the first calendar quarter of 2022 and offer much higher yields now, but there are many idiosyncratic risks and the category is overall more susceptible to a global growth slowdown and persistent high inflation.

In late February 2022, Russian military forces invaded Ukraine, significantly amplifying already existing geopolitical tensions among Russia, Ukraine, Europe, NATO and the West. Following Russia's actions, various countries, including the U.S., Canada, the UK and the European Union, issued broad-ranging economic sanctions against Russia and certain Russian individuals, banking entities and corporations. Russia's invasion, the imposed sanctions and the threat of further sanctions, and the potential for wider conflict has and may continue to increase financial market

volatility and negatively impact regional and global economic markets. The extent and duration of the military conflict, corresponding sanctions and resulting market disruptions are impossible to predict, and the longer term impact to geopolitical norms, supply chains and investment valuations is uncertain. These and any related events could negatively affect fund performance, liquidity of Russian securities and the value of an investment in a fund beyond any direct exposure to Russian issuers or those of adjoining geographic regions. AGFI continues to monitor the situation and the impact on the Underlying Funds.

The ongoing impact of COVID-19, including the potential for further variants, as well as other epidemics and pandemics that may arise in the future, could negatively affect the worldwide economy, as well as the economies of individual countries, individual companies and the market in general in significant and unforeseen ways. The effects of these or similar unexpected disruptive events on the economies and securities markets of countries cannot be predicted. These events could, directly or indirectly, affect a fund and its investments, which may cause a fund to decrease in value, experience significant redemptions or encounter operational difficulties.

Related Party Transactions

AGFI is the manager ("Manager") and trustee of the Fund. Pursuant to the management agreement between the Fund and AGFI, AGFI is responsible for the day-to-day business of the Fund. AGFI also acts as the investment (portfolio) manager, managing the investment portfolio of the Fund. Under the management agreement, the Fund (except for Series I, Series O, Series Q and Series W Units, if applicable) pays management fees, calculated based on the Net Asset Value of the respective series of the Fund. Management fees of approximately \$4,962,000 were incurred by the Fund during the six months ended March 31, 2022.

Certain operating expenses relating to registrar and transfer agency services are paid directly by AGFI and in exchange, a fixed rate administration fee is payable by the Mutual Fund Series, Series F, Series FV, Series I, Series T and Series V Units, as applicable, of the Fund. The administration fee is calculated based on the Net Asset Value of the respective series of the Fund at a fixed annual rate, as disclosed in the current prospectus. Administration fees of approximately \$307,000 were incurred by the Fund during the six months ended March 31, 2022.

AGFI is an indirect wholly-owned subsidiary of AGF Management Limited.

Caution Regarding Forward-looking Statements

This report may contain forward-looking statements about the Fund, including its strategy, expected performance and condition. Forward looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates" or negative versions thereof and similar expressions.

In addition, any statement that may be made concerning future performance, strategies or prospects, and possible future Fund action, is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to, among other things, risks, uncertainties and assumptions about the Fund and economic factors.

The forward-looking statements are by their nature based on numerous assumptions, which include, amongst other things, that (i) the Fund can attract and maintain investors and has sufficient capital under management to effect its investment strategies, (ii) the investment strategies will produce the results intended by the portfolio manager, and (iii) the markets will react and perform in a manner consistent with the investment strategies. Although the forward-looking statements contained herein are based upon what the portfolio manager believes to be reasonable assumptions, the portfolio manager cannot assure that actual results will be consistent with these forward-looking statements.

Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements made by the Fund. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, global equity and capital markets, business competition, taxation, changes in government regulations, unexpected judicial or regulatory proceedings, technological changes, cybersecurity, the possible effects of war or terrorist activities, outbreaks of disease or illness that affect local, national or international economies (such as COVID-19), natural disasters and disruptions to public infrastructure, such as transportation, communications, power or water supply or other catastrophic events.

It should be stressed that the above-mentioned list of factors is not exhaustive. You are encouraged to consider these and other factors carefully before making any investment decisions and you are urged to avoid placing undue reliance on forward-looking statements. Further, you should be aware of the fact that the Fund has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise, prior to the release of the next Management Report of Fund Performance.

Financial Highlights

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the six months ended March 31, 2022 and the past five years as applicable.

Explanatory Notes

(1) a) This information is derived from the Fund's audited annual financial statements and unaudited interim financial statements. Under International Financial Reporting Standards ("IFRS"), investments that are traded in an active market are generally valued at closing price, which is determined to be within the bid-ask spread and most representative of fair value. As a result, there is no difference between the net assets per unit presented in the financial statements ("Net Assets") and the net asset value per unit calculated for fund pricing purposes ("Net Asset Value").

b) The following series of the Fund commenced operations on the following dates, which represents the date upon which securities of a series were first made available for purchase by investors.

Mutual Fund Units	May 2012
Series F Units	May 2012
Series O Units	September 2014
Series Q Units	April 2015
Series T Units	May 2012
Series V Units	November 2018
Series W Units	April 2017

(2) Net Assets and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the financial period.

(3) Distributions were paid in cash/reinvested in additional units of the Fund, or both. The computation of the distributions

per unit does not take into account the management fee distributions (see note 5 below). The characterization of the distributions is based on management's estimate of the actual income for the year.

(4) This is not a reconciliation of the beginning and ending Net Assets per unit.

(5) The management expense ratio ("MER") of a particular series is calculated in accordance with National Instrument 81-106, based on all the expenses of the Fund (including Harmonized Sales Tax, Goods and Services Tax and interest, but excluding foreign withholding taxes, commissions and other portfolio transaction costs) and the Fund's proportionate share of the MER, if applicable, of the Underlying Funds and ETFs in which the Fund has invested, allocated to that series, expressed as an annualized percentage of average daily Net Asset Value of that series during the period. For new series launched, the MER is annualized from the date of the first external purchase.

The Fund does not pay duplicate management and advisory fees, as applicable, on the portion of the assets that it invests in the Underlying Funds. Accordingly, AGFI will waive the management and advisory fees payable or paid by the Underlying Funds in order to avoid such duplication.

AGFI may reduce the effective management fee payable by some unitholders by reducing the management fee it charges to the Fund and directing the Fund to make management fee distributions to these unitholders in amounts equal to the amounts of the management fee reduction. The MER does not take into account the reduction in management fees due to management fee distributions to unitholders.

(6) AGFI waived certain fees or absorbed certain expenses otherwise payable by the Fund. The amount of expenses waived or absorbed is determined annually on a series by series basis at the discretion of AGFI and AGFI can terminate the waiver or absorption at any time.

(7) The trading expense ratio represents total commissions and other portfolio transaction costs, including the Fund's proportionate share of the commissions, if applicable, of the Underlying Funds and ETFs in which the Fund has invested, expressed as an annualized percentage of average daily Net Asset Value during the period.

(8) The Fund's portfolio turnover rate ("PTR") indicates how actively the Fund's portfolio advisor manages its portfolio investments. A PTR of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's PTR in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

PTR is calculated based on the lesser of the cumulative cost of purchases or cumulative proceeds of sales divided by the average market value of the portfolio, excluding short-term investments.

* represents initial Net Assets

(1), (2), (3), (4), (5), (6), (7) and (8) see Explanatory Notes

Management Fees

The Fund is managed by AGFI. As a result of providing investment and management services, AGFI receives a monthly management fee, based on the Net Asset Value of the respective series, calculated daily and payable monthly. Management fees in respect of Series I, Series O, Series Q and Series W Units, if applicable, are arranged directly between the Manager and investors and are not expenses of the Fund. AGFI uses these management fees to pay for sales and trailing commissions to registered dealers on the distribution of the Fund's units, investment advice, as well as for general administrative expenses such as overhead, salaries, rent, legal and accounting fees relating to AGFI's role as manager.

	As a percentage of management fees		
	Annual rates	Dealer compensation *	General administration and investment advice
Mutual Fund Units	1.85%	65.56%	34.44%
Series F Units	0.85%	-	100.00%
Series T Units	1.85%	68.11%	31.89%
Series V Units	1.85%	168.74%	(68.74)%

* Dealer compensation represents cash commissions paid by AGFI to registered dealers during the period and includes upfront deferred sales charge and trailing commissions. This amount may, in certain circumstances, exceed 100% of the fees earned by AGFI during the period.

Past Performance*

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional securities of the Fund. Note that the performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. How the Fund has performed in the past does not necessarily indicate how it will perform in the future.

It is AGFI's policy to report rates of return for series in existence greater than one year. The performance start date for each series represents the date of the first purchase of such series, excluding seed money.

All rates of return are calculated based on the Net Asset Value.

Year-By-Year Returns

The following bar charts show the Fund's annual performance for each of the past 10 years to September 30, 2021 (interim performance for the six months ended March 31, 2022) as applicable, and illustrate how the Fund's performance has changed from year to year. The charts show, in percentage terms, how much an investment made on the first day of each financial period would have grown or decreased by the last day of each financial period.

Mutual Fund Units

Performance for 2012 represents returns for the period from May 8, 2012 to September 30, 2012.

Series F Units

Performance for 2012 represents returns for the period from June 27, 2012 to September 30, 2012.

Series O Units

Performance for 2015 represents returns for the period from October 2, 2014 to September 30, 2015.

Series Q Units

Performance for 2015 represents returns for the period from May 6, 2015 to September 30, 2015.

* The indicated rates of return shown here are the historical returns including changes in security value and reinvestment of all distributions and do not take into account sales, redemption, distribution or other optional charges by any securityholder that would have reduced returns or performance. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated.

Series T Units

Performance for 2012 represents returns for the period from August 22, 2012 to September 30, 2012.

Series V Units

Performance for 2019 represents returns for the period from September 6, 2019 to September 30, 2019.

Series W Units

Performance for 2018 represents returns for the period from April 23, 2018 to September 30, 2018.

Summary of Investment Portfolio

As at March 31, 2022

The major portfolio categories and top holdings (up to 25) of the Fund at the end of the period are indicated in the following tables. The Summary of Investment Portfolio may change due to ongoing portfolio transactions of the Fund and the next quarterly update will be in the Quarterly Portfolio Disclosure as at June 30, 2022.

The prospectus and other information about the underlying investment funds and ETFs are available on the internet at www.sedar.com.

Portfolio by Sector	Percentage of Net Asset Value (%)
Equity Funds	57.7
Fixed Income Funds	34.5
