

Interim Management Report of Fund Performance

# AGF Global Dividend Class

March 31, 2021

## Management Discussion of Fund Performance

This management discussion of fund performance represents the portfolio management team's view of the significant factors and developments affecting the fund's performance and outlook.

### Results of Operations

For the six months ended March 31, 2021, the Mutual Fund Shares of AGF Global Dividend Class (the "Fund") returned 11.0% (net of expenses) while the MSCI World Index and the MSCI All Country World Index returned 13.1% and 13.4%, respectively. The performance of the other series of the Fund is substantially similar to that of the Mutual Fund Shares, save for differences in expense structure. Refer to "Past Performance" section for performance information of such series.

The Fund holds Series I Units of AGF Global Dividend Fund (the "Underlying Fund"), a fund managed by AGF Investments Inc. ("AGFI"). The discussion below references performance figures for Mutual Fund Units of the Underlying Fund. The performance of Series I Units is substantially similar to that of Mutual Fund Units, save for differences in expense structure. The Underlying Fund may be subject to valuation adjustments as outlined in the Underlying Fund's valuation policies as it relates to non-North American equities held by the Underlying Fund. A fair value adjustment can either positively or negatively impact the Underlying Fund's rate of return.

The Fund under-performed the MSCI World Index and the MSCI All Country World Index due to the Underlying Fund's country allocation, while security selection contributed positively to performance. During the period under review, the Underlying Fund maintained broad diversification at the country and sector level to take advantage of potential return opportunities and to reduce risk.

Relative to the MSCI World Index, the Underlying Fund's country allocation to Switzerland, Germany and China/Hong Kong detracted from performance, while its allocation to the U.S., the UK and South Korea contributed positively.

Relative to the MSCI All Country World Index, the Underlying Fund's country allocation to Switzerland, Germany and Taiwan detracted from performance, while its allocation to the U.S., the UK and South Korea contributed positively.

Certain series of the Fund, as applicable, make monthly distributions of capital at a rate determined by AGFI from time to time. The portfolio manager does not believe that the

distributions made by the Fund had a meaningful impact on the Fund's ability to implement its investment strategy or to fulfill its investment objectives.

The Fund had net subscriptions of approximately \$5 million for the current period, as compared to net subscriptions of approximately \$9 million in the prior period. The portfolio manager does not believe that subscription activity had a meaningful impact on the Fund's performance or the ability to implement its investment strategy.

Total expenses before foreign withholding taxes, commissions and other portfolio transaction costs vary period over period mainly as a result of changes in average Net Asset Values (see Explanatory Note (1) a)) and investor activity, such as number of investor accounts and transactions. Expenses have increased as compared to the previous period due mainly to an increase in average Net Asset Values. The increase in annual and interim reports was due to an increase in investor activity. The increase in independent review committee fees was due to variances between the accrued amounts versus the actual expenses incurred in the previous period. All other expenses remained fairly consistent throughout the periods.

### Recent Developments

The portfolio manager has a positive outlook for the global economic growth and equities. While COVID-19 cases and hospitalizations declined globally, the emergence of new and more infectious mutations and the risk that existing vaccines may be less effective against some strains remains a humanitarian concern and an ongoing risk for equity markets. However, as vaccines continue to be rolled out globally and testing becomes more effective and quicker, market sentiment should be well supported alongside ample fiscal and monetary stimulus, barring any complications in vaccine effectiveness or distribution. Despite the delays in Europe, the portfolio manager is encouraged by the progression of the vaccine rollouts, particularly in the U.S. and the UK. Positively, governments and central banks will remain focused on economic recovery and the deflationary impact of further lockdowns, a green light for additional stimulus. The unprecedented level of stimulus will likely result in further improvement in global economic activity, which should continue to support global equities, particularly cyclical and value stocks, which have out-performed towards the end of calendar year 2020 and into 2021. This rotation was further propelled by rising inflation expectations and bond yields, with the U.S. 10-year treasury yield reaching its highest level since January 2020. While rising bond yields had always been anticipated as the global economy recovered, the pace and magnitude of this year's increase has taken the market by surprise and has resulted in elevated market volatility. As the global economy continues to recover, the

MARCH 31, 2021

risks of higher bond yields could result in central banks withdrawing stimulus, leading to a further selloff in equity and bond markets.

In the U.S., the passage of the Biden administration's US\$1.9 trillion economic relief package provides additional support for the economy, including direct payments to struggling citizens, businesses and state and local governments. President Biden also introduced a US\$2.0 trillion plan to upgrade infrastructure, tackle climate change and address social inequalities. Higher corporate taxes to fund this plan remain a potential risk, though the portfolio manager expects this will be pushed out further in support of the economic recovery. While the recent pace of vaccinations is encouraging, with approximately 30.0% of the population having received at least their first shot, the portfolio manager continues to monitor the vaccine effectiveness against new mutations of the virus. The portfolio manager expects the U.S. Federal Reserve to remain dovish, despite inflation and bond yields moving higher. U.S. corporate credit spreads are well behaved, though the portfolio manager continues to monitor spreads as they could move wider again if the economy slows more than anticipated.

In Europe, the portfolio manager continues to monitor developments related to the pandemic, including vaccine rollout and additional lockdowns in the region. The latest lockdown extensions and slow vaccine rollout increase the potential for a double-dip recession; however, the Eurozone has provided significant stimulus, which should continue to support an economic recovery and equity markets in the region. The Eurozone has also taken a material step in support of fiscal integration with the EUR €750.0 billion recovery fund, endorsing the principle of the mutualization of debt in the region. Additionally, the European Central Bank's continued expansion of its balance sheet also remains supportive.

In Japan, the portfolio manager is monitoring the vaccine rollout and emergence of new variants. Japan's parliament approved the record JPY ¥106.0 trillion budget for 2021, including funding for the pandemic response, digital transformation, carbon neutrality and infertility treatment. This should help support the continued economic recovery and Japanese equities. Encouragingly, Prime Minister Suga announced plans in September 2020 to digitalize the bureaucracy, including local governments, by 2025.

The portfolio manager expects that geopolitical risk will remain elevated, contributing to higher levels of economic uncertainty and market volatility. Encouragingly, the U.S. dollar remains relatively weak despite a recent uptick, which should remain supportive for non-U.S. equity markets, particularly the emerging markets.

Due to the significant amount of global stimulus in the global economy, there is potential for higher inflation. The portfolio manager continues to monitor U.S. inflation expectations, which recently reached their highest levels in a decade. However, given the current backdrop, the portfolio manager does not believe that there will be a sustained bout of inflation in the medium term given the global economy's

significant spare capacity. Still, once the crisis abates, there is a risk that slow output growth combined with rising inflation could lead to stagflation, which could challenge economic policy. Over the long-term, the prospects of higher sustained inflation could rise if, after years of dealing with disinflation and deflationary concerns, policymakers become complacent and let inflation run too high.

The portfolio manager of the Underlying Fund continues to focus on attractively valued quality companies with strong balance sheets for existing holdings and new opportunities. The portfolio manager is comfortable with the Underlying Fund's overweight exposure to the Asian region given their attractive valuations, and in Japan, where many companies maintain net positive cash positions. Having said that, while the portfolio manager continues to maintain a quality bias, quality stocks remain relatively expensive. The portfolio manager is also cognizant that a continued economic rebound could provide further upside potential for more cyclical sectors of the economy, such as financials, energy, materials and consumer discretionary.

The recent international spread of COVID-19 has heightened certain risks associated with investing in the Fund, including liquidity risk. There are many factors that affect liquidity as well as the value of an investment. Those factors generally affect securities markets, including but not limited to general economic and political conditions, fluctuations in interest rates and factors unique to each issuer of the securities held by an investment fund, such as changes in management, strategic direction, achievement of strategic goals, mergers, acquisitions and divestitures, changes in distribution and dividend policies and other events. While the precise impact of the recent COVID-19 outbreak remains unknown, it has introduced uncertainty and volatility in global markets and economies. The duration of the COVID-19 outbreak and its impact cannot be determined with certainty, but it may adversely affect the performance of the Fund. The portfolio manager, however, does not believe any changes to the Fund over the period has affected the overall risk of the Fund.

### Related Party Transactions

AGFI is the manager ("Manager") of the Fund. Pursuant to the management agreement between the Fund and AGFI, AGFI is responsible for the day-to-day business of the Fund. AGFI also acts as the investment (portfolio) manager, managing the investment portfolio of the Fund. Under the management agreement, the Fund (except for Series I, Series O, Series Q and Series W Shares, if applicable) pays management fees, calculated based on the Net Asset Value of the respective series of the Fund. Management fees of approximately \$785,000 were incurred by the Fund during the six month period ended March 31, 2021.

Certain operating expenses relating to registrar and transfer agency services are paid directly by AGFI and in exchange, a fixed rate administration fee is payable by the Mutual Fund Series, Series F, Series FV, Series I, Series T and Series V Shares, as applicable, of the Fund. The administration fee is calculated based on the Net Asset Value of the respective series of the Fund at a fixed annual rate, as disclosed in the

current prospectus. Administration fees of approximately \$33,000 were incurred by the Fund during the six month period ended March 31, 2021.

AGFI is an indirect wholly-owned subsidiary of AGF Management Limited.

### Caution Regarding Forward-looking Statements

This report may contain forward-looking statements about the Fund, including its strategy, expected performance and condition. Forward looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates" or negative versions thereof and similar expressions.

In addition, any statement that may be made concerning future performance, strategies or prospects, and possible future Fund action, is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to, among other things, risks, uncertainties and assumptions about the Fund and economic factors.

The forward-looking statements are by their nature based on numerous assumptions, which include, amongst other things, that (i) the Fund can attract and maintain investors and has sufficient capital under management to effect its investment strategies, (ii) the investment strategies will produce the results intended by the portfolio manager, and (iii) the markets will react and perform in a manner consistent with the investment strategies. Although the forward-looking statements contained herein are based upon what the portfolio manager believes to be reasonable assumptions, the portfolio manager cannot assure that actual results will be consistent with these forward-looking statements.

Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements made by the Fund. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, global equity and capital markets, business competition, taxation, changes in government regulations, unexpected judicial or regulatory proceedings, technological changes, cybersecurity, the possible effects of war or terrorist activities, outbreaks of disease or illness that affect local, national or international economies (such as COVID-19), natural disasters and disruptions to public infrastructure, such as transportation, communications, power or water supply or other catastrophic events.

It should be stressed that the above-mentioned list of factors is not exhaustive. You are encouraged to consider these and other factors carefully before making any

investment decisions and you are urged to avoid placing undue reliance on forward-looking statements. Further, you should be aware of the fact that the Fund has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise, prior to the release of the next Management Report of Fund Performance.

## Financial Highlights

### Explanatory Notes

(1) a) This information is derived from the Fund's audited annual financial statements and unaudited interim financial statements. Under International Financial Reporting Standards ("IFRS"), investments that are traded in an active market are generally valued at closing price, which is determined to be within the bid-ask spread and most representative of fair value. As a result, there is no difference between the net assets per share presented in the financial statements ("Net Assets") and the net asset value per share calculated for fund pricing purposes ("Net Asset Value").

b) The following series of the Fund commenced operations on the following dates, which represents the date upon which securities of a series were first made available for purchase by investors.

Mutual Fund Shares	April 2016
Series F Shares	April 2016
Series FV Shares	November 2018
Series Q Shares	April 2016
Series V Shares	April 2016
Series W Shares	April 2016

(2) Net Assets, dividends and distributions are based on the actual number of shares outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of shares outstanding over the financial period.

(3) Dividends and distributions were paid in cash/reinvested in additional shares of the Fund, or both.

Series FV and Series V Shares of the Fund may make monthly distributions of capital so long as there is sufficient capital attributable to the series. The capital per share of the Series FV and Series V Shares as applicable, is as follows:

As at	Mar 31, 2021 (\$)	Sept 30, 2020 (\$)	Sept 30, 2019 (\$)	Sept 30, 2018 (\$)	Sept 30, 2017 (\$)	Sept 30, 2016 (\$)
Series FV Shares	10.70	10.98	12.16	-	-	-
Series V Shares	9.26	9.30	9.56	9.86	9.93	10.36

(4) This is not a reconciliation of the beginning and ending Net Assets per share.

(5) The management expense ratio ("MER") of a particular series is calculated in accordance with National Instrument 81-106, based on all the expenses of the Fund (including Harmonized Sales Tax, Goods and Services Tax, income tax and interest, but excluding foreign withholding taxes, commissions and other portfolio transaction costs) attributable to that series, expressed as an annualized percentage of average daily Net Asset Value of that series during the period. For new series launched, the MER is annualized from the date of the first external purchase.

As a result of the Fund's investment in the Underlying Fund, the MER is calculated based on the expenses of the Fund allocated to that series, including expenses indirectly incurred by the Fund attributable to its investment in the Underlying Fund, divided by the average daily Net Asset Value of that series of the Fund during the period.

The Fund does not pay duplicate management fees on the portion of the assets that it invests in the Underlying Fund. Accordingly, AGFI will waive the management fees payable or paid by the Underlying Fund in order to avoid such duplication.

(6) AGFI waived certain fees or absorbed certain expenses otherwise payable by the Fund. The amount of expenses waived or absorbed is determined annually on a series by series basis at the discretion of AGFI and AGFI can terminate the waiver or absorption at any time.

(7) The trading expense ratio ("TER") represents total commissions and other portfolio transaction costs expressed as an annualized percentage of average daily Net Asset Value during the period.

As a result of the Fund's investment in the Underlying Fund, the TER is calculated based on commissions and other portfolio transaction costs of the Fund, including such costs that are indirectly incurred by the Fund attributable to its investment in the Underlying Fund, divided by the average daily Net Asset Value of the Fund during the period.

(8) The Fund's portfolio turnover rate ("PTR") indicates how actively the Fund's portfolio advisor manages its portfolio investments. A PTR of 100% is equivalent to the Fund buying

\* represents initial Net Assets

# AGF Global Dividend Class

## (CLASS OF AGF ALL WORLD TAX ADVANTAGE GROUP LIMITED)

MARCH 31, 2021

and selling all of the securities in its portfolio once in the course of the year. The higher a fund's PTR in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

PTR is calculated based on the lesser of the cumulative cost of purchases or cumulative proceeds of sales divided by the average market value of the portfolio, excluding short-term investments.

## Management Fees

The Fund is managed by AGFI. As a result of providing investment and management services, AGFI receives a monthly management fee, based on the Net Asset Value of the respective series, calculated daily and payable monthly. Management fees in respect of Series I, Series O, Series Q and Series W Shares, if applicable, are arranged directly between the Manager and investors and are not expenses of the Fund. AGFI uses these management fees to pay for sales and trailing commissions to registered dealers on the distribution of the Fund's shares, investment advice, as well as for general administrative expenses such as overhead, salaries, rent, legal and accounting fees relating to AGFI's role as manager.

	As a percentage of management fees		
	Annual rates	Dealer compensation	General administration and investment advice
Mutual Fund Shares	2.00%	78.12%	21.88%
Series F Shares	1.00%	-	100.00%
Series FV Shares	1.00%	-	100.00%
Series V Shares	2.00%	93.46%	6.54%

## Past Performance\*

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional securities of the Fund. Note that the performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. How the Fund has performed in the past does not necessarily indicate how it will perform in the future.

It is AGFI's policy to report rates of return for series in existence greater than one year. The performance start date for each series represents the date of the first purchase of such series, excluding seed money.

All rates of return are calculated based on the Net Asset Value.

## Year-By-Year Returns

The following bar charts show the Fund's annual performance for each of the past 10 years to September 30, 2020 (interim performance for the six months ended March 31, 2021) as applicable, and illustrate how the Fund's performance has changed from year to year. The charts show, in percentage terms, how much an investment made on the first day of each financial period would have grown or decreased by the last day of each financial period.

### Mutual Fund Shares

Performance for 2016 represents returns for the period from April 27, 2016 to September 30, 2016.

### Series F Shares

Performance for 2016 represents returns for the period from May 13, 2016 to September 30, 2016.

### Series FV Shares

Performance for 2019 represents returns for the period from March 13, 2019 to September 30, 2019.

\* The indicated rates of return shown here are the historical returns including changes in security value and reinvestment of all distributions and do not take into account sales, redemption, distribution or other optional charges by any securityholder that would have reduced returns or performance. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated.
