Interim Management Report of Fund Performance

# AGF American Growth Fund

March 31, 2025

# Management Discussion of Fund Performance

This management discussion of fund performance represents the portfolio management team's view of the significant factors and developments affecting the fund's performance and outlook.

## **Results of Operations**

For the six months ended March 31, 2025, the Mutual Fund Units of AGF American Growth Fund (the "Fund") returned 2.6% (net of expenses) while the S&P 500 Net Return Index ("S&P 500 Net Index") returned 4.1%. The performance of the other series of the Fund is substantially similar to that of the Mutual Fund Units, save for differences in expense structure. Refer to "Past Performance" section for performance information of such series.

The Fund under-performed the S&P 500 Net Index due to sector allocation decisions, which were partially offset by security selection decisions. Security selection and an underweight allocation to the Communication Services sector detracted the most from performance. Security selection in the Financials sector as well as an overweight allocation and security selection in the Consumer Discretionary sector also detracted. This was partially offset by security selection and an overweight allocation to the Energy sector which contributed the most to performance. An underweight allocation to the Information Technology sector also contributed, as did security selection in the Health Care sector. The Fund's cash position, which averaged 6.4% during the reporting period, also contributed to performance.

In terms of individual holdings, the top detractors from performance during the reporting period were Alphabet Inc., DraftKings Inc. and Iron Mountain Inc., while the top contributors were Howmet Aerospace Inc., Boston Scientific Corporation and Raymond James Financial Inc. As of March 31, 2025, the Fund no longer held Iron Mountain Inc. in its portfolio.

Certain series of the Fund, as applicable, make monthly distributions at a rate determined by AGF Investment Inc. ("AGFI") from time to time. If the aggregate amount of the monthly distributions made to a series in a year exceeds the portion of the net income and net realized capital gains allocated to such series, the excess will constitute a return of capital. The portfolio manager does not believe that the distributions made by the Fund had a meaningful impact on the Fund's ability to implement its investment strategy or to fulfill its investment objectives.

The Fund had net subscriptions of approximately \$27 million for the current period, as compared to net subscriptions of approximately \$98 million in the prior period. Rebalancing by fund on fund programs resulted in net redemptions of approximately \$46 million in the Fund. The portfolio manager does not believe that subscription/redemption activity had a meaningful impact on the Fund's performance or the ability to implement its investment strategy.

## **Recent Developments**

Global equity markets demonstrated varied performance during the reporting period, as numerous macroeconomic and geopolitical developments exerted pressure on market outcomes. Market sentiment was broadly constructive in the first half of the period driven by the resilience in U.S. economic growth and expectations of pro-business policies from the new Trump administration. However, early in 2025, proposed tariffs on some of the country's biggest trading partners, led to fears of a global growth slowdown. In 2025, many central banks adopted a more cautious approach to monetary policy due to economic uncertainty, following a period in the latter half of 2024 when most had begun cutting rates. The continued conflict in Ukraine and the Middle East added volatility to numerous commodity markets, most notably in the Energy sector.

The U.S. economy remained resilient with a gross domestic product growth rate of 2.4% in the last calendar guarter of 2024. Annual inflation rose from 2.6% in October 2024 to 2.8% in February 2025. In response to rising unemployment and slowing inflation, the U.S. Federal Reserve (the "Fed") reduced key lending rates by 0.25% during its meetings in November and December 2024. However, at the beginning of 2025, the Fed halted its rate-cutting cycle, anticipating that inflation would rise due to the proposed trade policies of the Trump administration. The U.S. government imposed 20.0% tariffs on imports from China and 25.0% duties on goods from Canada and Mexico. Tariffs on steel and aluminum imports also affected the European Union ("EU"). In retaliation, China and Canada announced tariffs on a wide range of U.S. goods, while the EU announced similar tariffs on U.S. alcohol, boats, agricultural products, etc. which were to take effect in April 2025. Fed Chair Jerome Powell has suggested that the inflationary effects of a tariff war would be transitory. However, the Fed has lowered its economic growth forecast and increased its inflation prediction for the U.S. economy based on the extensive import tariffs being imposed by the U.S. and other countries.

U.S. equity markets were volatile over the reporting period, with the S&P 500 Index recording a growth of over 4.0% in Canadian dollar terms. The Financials, Energy and Communication Services sectors were the top contributors to performance, while Materials and Information Technology were the weakest sectors registering losses over the period. Expectations of lower taxes and pro-business regulations, following the November U.S. elections, drove up the financial

This interim management report of fund performance contains financial highlights, but does not contain either the interim or annual financial statements of the investment fund. You can get a copy of the interim or annual financial statements at your request, and at no cost, by calling 1 800 268-8583, by writing to us at AGF Investments Inc., CIBC SQUARE, Tower One, 81 Bay Street, Suite 4000, Toronto, Ontario, Canada M5J 0G1 attention: Client Services, or by visiting our website at www.agf.com or SEDAR+ at www.sedarplus.ca.

Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

markets. However, the Fed's hawkish stance and profittaking by investors led to a sell-off in December 2024. Nevertheless, U.S. equities delivered strong returns in the last calendar quarter of 2024, driven by the performance of large capitalization stocks. In the first quarter of 2025, mixed economic data and tariff uncertainty triggered a risk-off sentiment. The yield curve inversion raised alarm about a potential economic slowdown, signaling that the market was pricing in greater risks of a recession in the near term. Trading volumes registered consistent growth throughout the first quarter of 2025, even amid fluctuating equity market performance.

Despite recent challenges, including the sell-off in U.S. election beneficiaries, the portfolio manager remains optimistic about the long-term outlook. The portfolio manager believes the Fund is well-positioned to capitalize on future opportunities, while staying mindful of potential near term volatility driven by tariff concerns and upcoming earnings results.

The portfolio manager expects the second calendar quarter of 2025 to bring greater clarity to U.S. policies, potentially sparking a global market rally as certainty tends to drive positive momentum. Despite concerns over tariffs, the U.S. economy is expected to continue expanding, supported by consumer resilience, strong corporate cash flows and wellcapitalized balance sheets. A reset in U.S. earnings expectations is anticipated in the second calendar quarter of 2025, which could set the stage for broader global growth.

The portfolio manager continues to focus on identifying emerging market leaders and capturing volatility-driven opportunities in sectors poised for growth. The portfolio manager remains agile, responding to market pullbacks and using them to capture leadership positions in future growth trends.

Effective October 1, 2024, AGFI pays for all the operating expenses of the Fund (except for certain costs as disclosed in the current prospectus) in exchange for an annual fixed rate administration fee payable by the applicable series of the Fund, and in return, the administration fee relating to registrar and transfer agency services was eliminated. The adoption of the fixed rate administration fee was approved by the securityholders of the Fund at the special securityholder meeting held on June 12, 2024.

#### Related Party Transactions

AGFI is the manager ("Manager") and trustee of the Fund. Pursuant to the management agreement between the Fund and AGFI, AGFI is responsible for the day-to-day business of the Fund. AGFI also acts as the investment (portfolio) manager, managing the investment portfolio of the Fund. Under the management agreement, the Fund (except for Series I, Series O, Series Q and Series W Units, if applicable) pays management fees, calculated based on the Net Asset Value of the respective series of the Fund. Management fees of approximately \$4,211,000 were incurred by the Fund during the six months ended March 31, 2025. All of the operating expenses relating to the operation of the Fund (except for certain costs as disclosed in the current prospectus) are paid directly by AGFI and in exchange, a fixed rate administration fee is payable by the Mutual Fund Series, Series F, Series FV, Series I, Series T and Series V Units, as applicable, calculated based on the Net Asset Value of the respective series. Administration fees of approximately \$403,000 were incurred by the Fund during the six months ended March 31, 2025.

AGFI is an indirect wholly-owned subsidiary of AGF Management Limited.

#### Caution Regarding Forward-looking Statements

This report may contain forward-looking statements about the Fund, including its strategy, expected performance and condition. Forward looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates" or negative versions thereof and similar expressions.

In addition, any statement that may be made concerning future performance, strategies or prospects, and possible future Fund action, is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to, among other things, risks, uncertainties and assumptions about the Fund and economic factors.

The forward-looking statements are by their nature based on numerous assumptions, which include, amongst other things, that (i) the Fund can attract and maintain investors and has sufficient capital under management to effect its investment strategies, (ii) the investment strategies will produce the results intended by the portfolio manager, and (iii) the markets will react and perform in a manner consistent with the investment strategies. Although the forward-looking statements contained herein are based upon what the portfolio manager believes to be reasonable assumptions, the portfolio manager cannot assure that actual results will be consistent with these forward-looking statements.

Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forwardlooking statements made by the Fund. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, global equity and capital markets, business competition, taxation, changes in government regulations, unexpected judicial or regulatory proceedings, technological changes, cybersecurity, the possible effects of war or terrorist activities, outbreaks of disease or illness that affect local, national or international economies (such as COVID-19), natural disasters and disruptions to public infrastructure, such as transportation, communications, power or water supply or other catastrophic events.

It should be stressed that the above-mentioned list of factors is not exhaustive. You are encouraged to consider these and other factors carefully before making any investment decisions and you are urged to avoid placing undue reliance on forward-looking statements. Further, you should be aware of the fact that the Fund has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise, prior to the release of the next Management Report of Fund Performance.

# **Financial Highlights**

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the six months ended March 31, 2025 and the past five years as applicable.

#### Explanatory Notes

- (1) a) This information is derived from the Fund's audited annual financial statements and unaudited interim financial statements. Under International Financial Reporting Standards ("IFRS"), investments that are traded in an active market are generally valued at closing price, which is determined to be within the bidask spread and most representative of fair value. As a result, there is no difference between the net assets per unit presented in the financial statements ("Net Assets") and the net asset value per unit calculated for fund pricing purposes ("Net Asset Value").
  - b) The following series of the Fund commenced operations on the following dates, which represents the date upon which securities of a series were first made available for purchase by investors.

Mutual Fund Units	June 2019
Series F Units	June 2019
Series FV Units	June 2019
Series I Units	February 2019
Series O Units	May 2022
Series Q Units	June 2019
Series T Units	June 2019
Series W Units	June 2019

(2) Net Assets and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the financial period.

- (3) Distributions were paid in cash/reinvested in additional units of the Fund, or both. The computation of the distributions per unit does not take into account the management fee distributions, if applicable (see note 5 below). The characterization of the distributions is based on management's estimate of the actual income for the year.
- (4) This is not a reconciliation of the beginning and ending Net Assets per unit.
- (5) The management expense ratio ("MER") of a particular series is calculated in accordance with National Instrument 81-106, based on all the expenses of the Fund (including Harmonized Sales Tax, Goods and Services Tax and interest, but excluding foreign withholding taxes, commissions and other portfolio transaction costs) and the Fund's proportionate share of the MER, if applicable, of the underlying funds and exchange traded funds ("ETFs") in which the Fund has invested, allocated to that series, expressed as an annualized percentage of average daily Net Asset Value of that series during the period.
- (6) AGFI waived certain fees or absorbed certain expenses otherwise payable by the Fund. The amount of expenses waived or absorbed is determined annually on a series by series basis at the discretion of AGFI and AGFI can terminate the waiver or absorption at any time.
- (7) The trading expense ratio represents total commissions and other portfolio transaction costs, including the Fund's proportionate share of the commissions, if applicable, of the underlying funds and ETFs in which the Fund has invested, expressed as an annualized percentage of average daily Net Asset Value during the period.
- (8) The Fund's portfolio turnover rate ("PTR") indicates how actively the Fund's portfolio advisor manages its portfolio investments. A PTR of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's PTR in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

PTR is calculated based on the lesser of the cumulative cost of purchases or cumulative proceeds of sales divided by the average market value of the portfolio, excluding shortterm investments.

## **Management Fees**

The Fund is managed by AGFI. As a result of providing investment and management services, AGFI receives a monthly management fee, based on the Net Asset Value of the respective series, calculated daily and payable monthly. Management fees in respect of Series I, Series O, Series Q and Series W Units, if applicable, are arranged directly between the Manager and investors and are not expenses of the Fund. AGFI uses these management fees to pay for sales and trailing commissions to registered dealers on the distribution of the Fund's units, investment advice, as well as for general administrative expenses such as overhead, salaries, rent, legal and accounting fees relating to AGFI's role as manager.

		As a percent	age of management fees
	Annual rates		General administration and investment advice
Mutual Fund Units	2.10%	16.75%	83.25%
Series F Units Series FV Units	0.90% 0.90%	-	100.00% 100.00%
Series T Units	2.10%	43.36%	56.64%

# **Administration Fees**

AGFI bears all operating expenses relating to the operation of the Fund, except for certain costs as disclosed in the Fund's prospectus. In exchange, a monthly administration fee is payable by the Mutual Fund Series, Series F, Series FV, Series I, Series T and Series V Units, as applicable, based on the Net Asset Value of the respective series at the annual rates as follows:

	Annual rates
Mutual Fund Units	0.13%
Series F Units	0.16%
Series FV Units	0.25%
Series I Units	0.04%
Series T Units	0.25%

# **Past Performance\***

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional securities of the Fund. Note that the performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. How the Fund has performed in the past does not necessarily indicate how it will perform in the future.

It is AGFI's policy to report rates of return for series in existence greater than one year. The performance start date for each series represents the date of the first purchase of such series, excluding seed money. During the ten year period ended September 30, 2024, certain other funds with similar investment objectives merged into the Fund. Generally, for fund mergers, the continuing fund is considered a new fund for the purpose of calculating rates of return and therefore, the rates of return have not been provided for the period of the merger and previous periods. However, the merger of Harmony U.S. Equity Pool with the Fund in June 2019 did not constitute a material change to the Fund and accordingly did not impact the ability of the Fund to maintain its historical performance. All rates of return are calculated based on the Net Asset Value.

#### Year-By-Year Returns

The following bar charts show the Fund's annual performance for each of the past 10 years to September 30, 2024 (interim performance for the six months ended March 31, 2025) as applicable, and illustrate how the Fund's performance has changed from year to year. The charts show, in percentage terms, how much an investment made on the first day of each financial period would have grown or decreased by the last day of each financial period.

## **Mutual Fund Units**

Performance for 2019 represents returns for the period from June 28, 2019 to September 30, 2019.

## Series F Units

Performance for 2019 represents returns for the period from August 2, 2019 to September 30, 2019.

#### Series FV Units

Performance for 2021 represents returns for the period from June 14, 2021 to September 30, 2021.

\* The indicated rates of return shown here are the historical returns including changes in security value and reinvestment of all distributions and do not take into account sales, redemption, distribution or other optional charges by any securityholder that would have reduced returns or performance. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated.

## Series I Units

Performance for 2019 represents returns for the period from February 22, 2019 to September 30, 2019.

## Series O Units

May 25, 2022 to September 30, 2022.

## Series Q Units

Performance for 2019 represents returns for the period from June 28, 2019 to September 30, 2019.

## Series T Units

Performance for 2021 represents returns for the period from November 6, 2020 to September 30, 2021.

## Series W Units

Performance for 2021 represents returns for the period from August 6, 2021 to September 30, 2021.

# Summary of Investment Portfolio

As at March 31, 2025

The major portfolio categories and top holdings (up to 25) of the Fund at the end of the period are indicated in the following tables. The Summary of Investment Portfolio may change due to ongoing portfolio transactions of the Fund and the next quarterly update will be in the Quarterly Portfolio Disclosure as at June 30, 2025.

Portfolio by Country	Percentage of Net Asset Value (%)
United States	92.4
