

Interim Management Report of Fund Performance

AGF Diversified Income Class

March 31, 2021

Management Discussion of Fund Performance

This management discussion of fund performance represents the portfolio management team's view of the significant factors and developments affecting the fund's performance and outlook.

Results of Operations

For the six months ended March 31, 2021, the Mutual Fund Shares of AGF Diversified Income Class (the "Fund") returned 4.9% (net of expenses) while the Bloomberg Barclays Canada Aggregate Index and the Blended Benchmark returned -4.5% and 4.0%, respectively. The Blended Benchmark is composed of 50% Bloomberg Barclays Canada Aggregate Index/25% Bloomberg Barclays U.S. Corporate High-Yield Bond Index (local\$)/15% MSCI All Country World Index (local\$)/10% S&P/TSX Composite Index. The performance of the other series of the Fund is substantially similar to that of Mutual Fund Shares, save for differences in expense structure. Refer to "Past Performance" section for the performance information of such series.

The Fund holds Series I Units of AGF Diversified Income Fund (the "Underlying Fund"), a fund managed by AGF Investments Inc. ("AGFI"). The discussion below references performance figures for Mutual Fund Units of the Underlying Fund. The performance of Series I Units is substantially similar to that of Mutual Fund Units, save for differences in expense structure. The Underlying Fund may be subject to valuation adjustments as outlined in the Underlying Fund's valuation policies as it relates to non-North American equities held by the Underlying Fund. A fair value adjustment can either positively or negatively impact the Underlying Fund's rate of return.

The Fund out-performed the Bloomberg Barclays Canada Aggregate Index due to the inclusion of equities in the Underlying Fund. Rate-sensitive bonds were meaningfully impaired by rising yields throughout the reporting period and particularly during a sharp move higher in February and March 2021. The Underlying Fund's exposure to high yield bonds and convertible bonds was additive. These market-sensitive categories were supported by the partially reopened U.S. economy and improving data globally.

The Fund out-performed the Blended Benchmark due to the Underlying Fund's category positioning and security selection. During the period of rapidly rising rates, as discussed above, the Underlying Fund reduced its fixed income exposure and reallocated to cash. The Underlying Fund also held a modest allocation to out-of-benchmark categories including preferred shares and convertible bonds.

These market-sensitive securities are better equipped to withstand rising rate environments as compared to traditional bonds, which contributed to out-performance.

The Underlying Fund entered into foreign exchange forward contracts during the period under review. As of March 31, 2021, the Underlying Fund was long Canadian dollar and short Australian dollar, Euro, Japanese Yen and U.S. dollar in order to hedge its currency exposure.

The Fund had net subscriptions of approximately \$0.5 million for the current period, as compared to net redemptions of approximately \$1 million in the prior period. The portfolio manager does not believe that subscription/redemption activity had a meaningful impact on the Fund's performance or the ability to implement its investment strategy.

Total expenses before foreign withholding taxes, commissions and other portfolio transaction costs vary period over period mainly as a result of changes in average Net Asset Values (see Explanatory Note (1) a)) and investor activity, such as number of investor accounts and transactions. Expenses have increased as compared to the previous period due mainly to an increase in average Net Asset Values. The decrease in directors' fees and expenses and increase in independent review committee fees were due to variances between the accrued amounts versus the actual expenses incurred in the previous period. All other expenses remained fairly consistent throughout the periods.

Recent Developments

The bond bull market enjoyed over the past four decades appears to have come to an end as yields have turned higher on the back of economic recovery, ongoing stimulus and related inflation concerns. The question now becomes whether this cyclical bond bear market experienced in recent months extends into a longer term secular bond bear market. The portfolio manager believes the groundwork is gradually being laid for a secular environment with rates unable to fall much further from current levels. While the arguments in favour of sub-zero rates are acknowledged, from a theoretical perspective, the portfolio manager believes paying investors to borrow money is not a sustainable long-term solution and case studies in economies where this strategy has been or is employed show little efficacy. Central bank policy is also a critical factor and today's posturing differs from past regimes. The U.S. Federal Reserve (the "Fed") has turned more tolerant of inflation risk while prioritizing output and employment. This could have ramifications for the future and, if the Fed succeeds, it could be a major contributing factor to a new secular bond bear era.

This interim management report of fund performance contains financial highlights, but does not contain either the interim or annual financial statements of the investment fund. You can get a copy of the interim or annual financial statements at your request, and at no cost, by calling 1 800 268-8583, by writing to us at AGF Investments Inc., 55 Standish Court, Suite 1050, Mississauga, Ontario, Canada L5R 0G3 attention: Client Services, or by visiting our website at www.agf.com or SEDAR at www.sedar.com.

Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

AGF Diversified Income Class

(CLASS OF AGF ALL WORLD TAX ADVANTAGE GROUP LIMITED)

MARCH 31, 2021

This is not to suggest that a shift to a secular bear market is imminent, as historically the transition to sustained higher rates takes place over months, if not years. The portfolio manager believes such a measured shift would make sense in this cycle as well. Debt levels are at a point where the global economy simply cannot accommodate a fast reset to much higher rates, and a low rate environment is likely to remain relative to history for some time. Other factors, such as demographics and tech-related disinflation, may also continue to keep a lid on yields.

The portfolio manager expects the trajectory of yields will be more contained in the second calendar quarter of 2021 relative to the first quarter, which may offer rate-sensitive bonds some reprieve. Still, the portfolio manager of the Underlying Fund continues to favour alternative categories including high yield bonds, convertible bonds and preferred shares, which are believed to be better suited to withstand the challenges of a secular bond bear market.

The recent international spread of COVID-19 has heightened certain risks associated with investing in the Fund, including liquidity risk. There are many factors that affect liquidity as well as the value of an investment. Those factors generally affect securities markets, including but not limited to general economic and political conditions, fluctuations in interest rates and factors unique to each issuer of the securities held by an investment fund, such as changes in management, strategic direction, achievement of strategic goals, mergers, acquisitions and divestitures, changes in distribution and dividend policies and other events. While the precise impact of the recent COVID-19 outbreak remains unknown, it has introduced uncertainty and volatility in global markets and economies. The duration of the COVID-19 outbreak and its impact cannot be determined with certainty, but it may adversely affect the performance of the Fund. The portfolio manager, however, does not believe any changes to the Fund over the period has affected the overall risk of the Fund.

Related Party Transactions

AGFI is the manager ("Manager") of the Fund. Pursuant to the management agreement between the Fund and AGFI, AGFI is responsible for the day-to-day business of the Fund. AGFI also acts as the investment (portfolio) manager, managing the investment portfolio of the Fund. Under the management agreement, the Fund (except for Series I, Series O, Series Q and Series W Shares, if applicable) pays management fees, calculated based on the Net Asset Value of the respective series of the Fund. Management fees of approximately \$201,000 were incurred by the Fund during the six month period ended March 31, 2021.

Certain operating expenses relating to registrar and transfer agency services are paid directly by AGFI and in exchange, a fixed rate administration fee is payable by the Mutual Fund Series, Series F, Series FV, Series I, Series T and Series V Shares, as applicable, of the Fund. The administration fee is calculated based on the Net Asset Value of the respective series of the Fund at a fixed annual rate, as disclosed in the

current prospectus. Administration fees of approximately \$8,000 were incurred by the Fund during the six month period ended March 31, 2021.

AGFI is an indirect wholly-owned subsidiary of AGF Management Limited.

Caution Regarding Forward-looking Statements

This report may contain forward-looking statements about the Fund, including its strategy, expected performance and condition. Forward looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates" or negative versions thereof and similar expressions.

In addition, any statement that may be made concerning future performance, strategies or prospects, and possible future Fund action, is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to, among other things, risks, uncertainties and assumptions about the Fund and economic factors.

The forward-looking statements are by their nature based on numerous assumptions, which include, amongst other things, that (i) the Fund can attract and maintain investors and has sufficient capital under management to effect its investment strategies, (ii) the investment strategies will produce the results intended by the portfolio manager, and (iii) the markets will react and perform in a manner consistent with the investment strategies. Although the forward-looking statements contained herein are based upon what the portfolio manager believes to be reasonable assumptions, the portfolio manager cannot assure that actual results will be consistent with these forward-looking statements.

Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements made by the Fund. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, global equity and capital markets, business competition, taxation, changes in government regulations, unexpected judicial or regulatory proceedings, technological changes, cybersecurity, the possible effects of war or terrorist activities, outbreaks of disease or illness that affect local, national or international economies (such as COVID-19), natural disasters and disruptions to public infrastructure, such as transportation, communications, power or water supply or other catastrophic events.

It should be stressed that the above-mentioned list of factors is not exhaustive. You are encouraged to consider these and other factors carefully before making any investment decisions and you are urged to avoid placing undue reliance on forward-looking statements. Further, you should be aware of the fact that the Fund has no specific

AGF Diversified Income Class (CLASS OF AGF ALL WORLD TAX ADVANTAGE GROUP LIMITED)

MARCH 31, 2021

intention of updating any forward-looking statements whether as a result of new information, future events or otherwise, prior to the release of the next Management Report of Fund Performance.

Financial Highlights

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the six months ended March 31, 2021 and the past five years as applicable.

Mutual Fund Shares - Net Assets per Share⁽¹⁾

For the periods ended	Mar 31, 2021 (\$)	Sept 30, 2020 (\$)	Sept 30, 2019 (\$)	Sept 30, 2018 (\$)	Sept 30, 2017 (\$)	Sept 30, 2016 (\$)

Explanatory Notes

(1) a) This information is derived from the Fund's audited annual financial statements and unaudited interim financial statements. Under International Financial Reporting Standards ("IFRS"), investments that are traded in an active market are generally valued at closing price, which is determined to be within the bid-ask spread and most representative of fair value. As a result, there is no difference between the net assets per share presented in the financial statements ("Net Assets") and the net asset value per share calculated for fund pricing purposes ("Net Asset Value").

b) The following series of the Fund commenced operations on the following dates, which represents the date upon which securities of a series were first made available for purchase by investors.

Mutual Fund Shares	August 2007
Series F Shares	August 2007
Series Q Shares	December 2012
Series W Shares	May 2018

(2) Net Assets, dividends and distributions are based on the actual number of shares outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of shares outstanding over the financial period.

(3) Dividends and distributions were paid in cash/reinvested in additional shares of the Fund, or both.

(4) This is not a reconciliation of the beginning and ending Net Assets per share.

(5) The management expense ratio ("MER") of a particular series is calculated in accordance with National Instrument 81-106, based on all the expenses of the Fund (including Harmonized Sales Tax, Goods and Services Tax, income tax and interest, but excluding foreign withholding taxes, commissions and other portfolio transaction costs) attributable to that series, expressed as an annualized percentage of average daily Net Asset Value of that series during the period. For new series launched, the MER is annualized from the date of the first external purchase.

As a result of the Fund's investment in the Underlying Fund, the MER is calculated based on the expenses of the Fund allocated to that series, including expenses indirectly

incurred by the Fund attributable to its investment in the Underlying Fund, divided by the average daily Net Asset Value of that series of the Fund during the period.

The Fund does not pay duplicate management fees on the portion of the assets that it invests in the Underlying Fund. Accordingly, AGFI will waive the management fees payable or paid by the Underlying Fund in order to avoid such duplication.

(6) AGFI waived certain fees or absorbed certain expenses otherwise payable by the Fund. The amount of expenses waived or absorbed is determined annually on a series by series basis at the discretion of AGFI and AGFI can terminate the waiver or absorption at any time.

(7) The trading expense ratio ("TER") represents total commissions and other portfolio transaction costs expressed as an annualized percentage of average daily Net Asset Value during the period.

As a result of the Fund's investment in the Underlying Fund, the TER is calculated based on commissions and other portfolio transaction costs of the Fund, including such costs that are indirectly incurred by the Fund attributable to its investment in the Underlying Fund, divided by the average daily Net Asset Value of the Fund during the period.

(8) The Fund's portfolio turnover rate ("PTR") indicates how actively the Fund's portfolio advisor manages its portfolio investments. A PTR of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's PTR in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

PTR is calculated based on the lesser of the cumulative cost of purchases or cumulative proceeds of sales divided by the average market value of the portfolio, excluding short-term investments.

Management Fees

The Fund is managed by AGFI. As a result of providing investment and management services, AGFI receives a monthly management fee, based on the Net Asset Value of the respective series, calculated daily and payable monthly. Management fees in respect of Series I, Series O, Series Q and Series W Shares, if applicable, are arranged directly between the Manager and investors and are not expenses of the Fund. AGFI uses these management fees to pay for sales and trailing commissions to registered dealers on the distribution of the Fund's shares, investment advice, as well as for general administrative expenses such as overhead, salaries, rent, legal and accounting fees relating to AGFI's role as manager.

(1), (2), (3), (4), (5), (6), (7) and (8) see Explanatory Notes

AGF Diversified Income Class

Series F Shares	0.90%	-	100.00%

Past Performance*

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional securities of the Fund. Note that the performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. How the Fund has performed in the past does not necessarily indicate how it will perform in the future.

It is AGFI's policy to report rates of return for series in existence greater than one year. The performance start date for each series represents the date of the first purchase of such series, excluding seed money. Series W Shares commenced operations in May 2018 with no external purchase to date. During the ten year period ended September 30, 2020, certain other funds with similar investment objectives merged into the Fund. Generally, for fund mergers, the continuing fund is considered a new fund for the purpose of calculating rates of return and therefore, the rates of return have not been provided for the period of the merger and previous periods. However, the merger of AGF High Income Class of AGF All World Tax Advantage Group Limited with the Fund in May 2014 did not constitute a material change to the Fund and accordingly did not impact the ability of the Fund to maintain its historical performance.

All rates of return are calculated based on the Net Asset Value.

Performance information for the year ended September 30, 2011 represents that of Acuity Diversified Income Class.

Year-By-Year Returns

The following bar charts show the Fund's annual performance for each of the past 10 years to September 30, 2020 (interim performance for the six months ended March 31, 2021) as applicable, and illustrate how the Fund's performance has changed from year to year. The charts show, in percentage terms, how much an investment made on the first day of each financial period would have grown or decreased by the last day of each financial period.

Performance for 2011 represents returns for the period from January 1, 2011 to September 30, 2011. Annual performance for 2012 and thereafter represents returns for the twelve month period ended September 30.

Mutual Fund Shares

Series F Shares

Series Q Shares

Performance for 2013 represents returns for the period from January 23, 2013 to September 30, 2013.

Summary of Investment Portfolio

As at March 31, 2021

The Underlying Fund's major portfolio categories and top holdings (up to 25), as a percentage of the Underlying Fund's Net Asset Value, at the end of the period are indicated in the following tables. The Summary of Investment Portfolio may change due to ongoing portfolio transactions of the Underlying Fund and the next quarterly update will be in the Quarterly Portfolio Disclosure as at June 30, 2021.

The prospectus and other information about the Underlying Fund are available on the internet at www.sedar.com.

* The indicated rates of return shown here are the historical returns including changes in security value and reinvestment of all distributions and do not take into account sales, redemption, distribution or other optional charges by any securityholder that would have reduced returns or performance. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated.

The total Net Asset Value of the Fund as at March 31, 2021 was approximately \$42,792,000.

Other Material Information

Effective April 30, 2021, the Fund was renamed AGF Global Sustainable Balanced Class as its investment objective was changed to provide long-term growth of capital by investing primarily in units of AGF Global Sustainable Balanced Fund (formerly, AGF Diversified Income Fund). In addition, the Fund's risk rating was changed from "low" to "low to medium" upon adoption of the new investment objective.

Effective May 1, 2021, the management fee rate for Mutual Fund Series Shares was reduced from 2.35% to 1.90%.

** Debt Instruments
