FOR ADVISOR USE WITH INVESTORS.

In order to invest in and maintain participation in the AGF Preferred Pricing Program, a Household (which may consist of a single investor) must meet the minimum investment requirements of: (i) at least \$100,000 in one eligible mutual fund; or (ii) at least \$250,000 in Household assets across multiple eligible funds, based on the higher of book value or market value. All Preferred Pricing management fee reductions are at AGF's discretion and depend on a number of factors, including the size of the investment, nature of the investment and the fees charged by the applicable series/fund. Eligible series and funds are determined by AGF and may change from time to time at AGF's discretion. Tier level discounts apply only to the dollar amount(s) grouped in each particular tier.

The targeted annual distribution is based on the Fund's or Portfolio's previous year-end net asset value and is subject to change. Monthly distributions on Series T and Series V shares may generally be a return of capital so long as there is sufficient capital attributable to the relevant series. The payment of distributions should not be confused with a fund's performance, rate of return or yield. If distributions paid by the fund are greater than the performance of the fund, your original investment will shrink. Distributions paid as a result of capital gains realized by a fund, and income and dividends earned by a fund, are taxable in your hands in the year they are paid. Your adjusted cost base will be reduced by the amount of any returns of capital. If your adjusted cost base falls below zero, you will have to pay capital gains tax on the amount below zero.
