

Investment Philosophy

The team employs a differentiated, thematic approach to target companies that offer a product or service that is a solution to a sustainable issue.

The team invests globally in companies that have positive outcome, focusing on four broad macro themes: Energy Transition, Circular Economy & Pollution Abatement, Water Services & Climate Adaptation, and Food & Health.

Investment Process Overview

Investment Process

Our investment process combines thematic analysis with fundamental stock selection. We map 1,000 companies to four sustainable themes (energy transition, circular economy & pollution abatement, water services & climate adaptation and food & health). We then identify accelerating sub-themes by examining societal trends, demand, cyclicalities, growth, margin potential, regulatory drivers, pricing power, competition, and barriers to entry. We further examine sub-themes across GICS sectors to identify which segments of the Value Chain (materials, suppliers, producers) contain the most attractive investment opportunities.

Our fundamental analysis seeks to identify companies with revenues accelerating in line with our sub-themes. Our Stage Appropriate Analysis allows us to consider stocks across the maturity spectrum and assesses fundamentals such as revenue and earnings growth, margins, management, free cash flow, valuation, and sustainability of competitive position. ESG analysis examines risks and opportunities related to climate, diversity, and human capital, and our active ownership stance governs our proxy voting and corporate engagements.

Our objective is to outperform broad global equity markets by constructing a differentiated portfolio of 25 to 40 holdings from all capitalization ranges, each providing solutions to key sustainability challenges.

^A AGF Global Sustainable Equity ADR Model; ⁹Portfolio (net of max. institutional fee); ^{*} MSCI World Net Index; ¹SPSD is Since Performance Start Date of the composite for the AGF Global Sustainable Equity ADR Mandate strategy, December 31, 2018. Performance and risk is based on AGF Global Sustainable Equity ADR composite. Strategy characteristics are based on the AGF Global Sustainable Equity ADR model (non-fee paying) representative account which is not included in the composite. ² Does not include cash position of 8.73%. Top 10 Holdings represent approximately 36.3% of total assets of the AGF Global Sustainable Equity ADR model (non-fee paying) representative account as at January 31, 2024 which is subject to change. This information is additional to the GIPS compliant presentation found at the end of the document. Past performance is not indicative of future results. Source: AGF Investments, as at January 31, 2024. This report is not complete without disclaimer.

Disclaimer

All information is in U.S. dollars. Strategy performance is based on the GIPS AGF Global Sustainable Equity ADR Composite. The performance presented is gross and net of fees; rates of return for greater than one year have been annualized. AGF Investments uses Canadian dollar gross of fees returns and converts them on a monthly basis using spot rates sourced from Bloomberg. Net-of-fees returns are calculated by deducting the maximum institutional fee charged from the gross-of-fee return. Actual fees may vary depending upon the fee schedule and portfolio size. Past performance is not indicative of future results. The AGF Global Sustainable Equity ADR Strategy portfolio characteristics in this presentation are based on a single (non-fee paying) representative account for the strategy within the composite.

The gross performance presented by AGFA is before deducting investment advisory fees but is net of transaction costs. Client returns will be reduced by advisory fees and other expenses. The client is referred to Part II of AGFA's Form ADV for a full disclosure of the fee schedule. As fees are deducted quarterly, the compounding effect will be to increase the impact of the fee by an amount directly related to the gross account performance. For example, on an account with a 0.5% fee, and gross performance of 20% over one year, the compounding effect of the fee will result in performance of approximately 19.4%. A \$10,000 initial investment would grow to approximately \$14,256 gross of fees, versus \$14,000 net of fees, over a two year period.

The value of investments and the income from them can fall as well as rise. Investments denominated in foreign currencies are subject to fluctuations in exchange rates, which may have an adverse effect on the value of the investments, sale proceeds, and on dividend or interest income. Investors may not necessarily recoup the full value of their original investment. Investors should be aware that forward looking statements and forecasts may not be realized.

Effective October 31, 2016, the calculation methodology for holdings-based portfolio characteristics with the exception of weighted average market cap and active share has changed to a weighted ranking methodology, considered by AGF Investments as a better reflection of the relevant attributes. The new methodology, applied prospectively, applies a ranking to each security, uses the percentage market value weight of the security in the portfolio/benchmark and determines a median of extracted securities to arrive at the portfolio/benchmark characteristic (by summing the weight of securities which have a rank to calculate a rank for the portfolio/benchmark and extracting securities with the same portfolio rank).

Firm Description

Founded in 1957, AGF Management Limited (AGF) is an independent and globally diverse asset management firm delivering excellence in investing in the public and private markets through its three distinct business lines: AGF Private Capital, AGF Private Wealth and AGF Investments.

*AGF Investments is AGF's group of companies who manage and advise on a variety of investment solutions managed by its fundamental and quantitative investing teams.

AGF brings a disciplined approach focused on providing an exceptional client experience and incorporating sound responsible and sustainable practices. The firm's investment solutions, driven by its fundamental, quantitative and private investing capabilities, extends globally to a wide range of clients, from financial advisors and their clients to high-net worth and institutional investors including pension plans, corporate plans, sovereign wealth funds, endowments and foundations.

Headquartered in Toronto, Canada, AGF has investment operations and client servicing teams on the ground in North America and Europe. AGF serves more than 800,000 investors. AGF trades on the Toronto Stock Exchange under the symbol AGF.B.

*AGF Investments is a group of wholly owned subsidiaries of AGF Management Limited, a Canadian reporting issuer. The subsidiaries included in AGF Investments are AGF Investments Inc. (AGFI), AGF Investments America Inc. (AGFA), AGF Investments LLC (AGFUS) and AGF International Advisors Company Limited (AGFIA).

Benchmark Description

The benchmark is the MSCI World Net Index.

Composite Description

The Global Sustainable Growth Equity ADR Composite's mandate is to provide capital growth potential by investing in a diversified portfolio of companies around the world, via securities listed on North American exchanges, that fit the composite's concept of sustainable development. The mandate focuses on four major themes: energy and energy efficiency, water/waste water solutions, waste management and pollution control and environment and health and safety, while also performing thorough due diligence on company fundamentals.

Composite Creation Date and Inception Date

The Composite was created on December 31, 2018. The composite's inception was in December 2018.

Currency

Valuations and returns are computed and stated in U.S. Dollars.

Minimum Portfolio Size

There is no minimum portfolio size required for inclusion into the composite.

Calculation Methodology

Results reflect the reinvestment of dividends, income and other earnings.

Gross-of-fees returns are presented before management expenses and custodial fees, but after all trading expenses and withholding taxes.

Net of fees returns are calculated by deducting the maximum institutional fee charged from the gross of fee return.

Composite returns are calculated using asset-weighted returns by weighing the individual account returns using beginning-of-period values.

Internal Dispersion Measure

Internal dispersion is calculated using the asset-weighted standard deviation of all accounts included in the composite for the entire year; it is not presented for periods less than one year or when there were five or fewer portfolios in the composite for the entire year as this is not considered meaningful.

Three-Year Annualized Ex-Post Standard Deviation

The three-year annualized standard deviation measures the variability of the composite and the benchmark returns over the preceding 36-month period. The standard deviation is presented once the composite has three full calendar years of performance. Gross returns are used to calculate risk measures.

Fee Schedule

The maximum management fee for the strategy is 0.70% per annum.

Additional Information

The portfolios in this composite are valued at systematic adjusted fair value. Policies for fair value and systematic adjusted fair value portfolios, calculating performance, preparing compliant presentations, and a complete list and description of firm composites are available upon request at GIPS@AGF.com.

As at December 31, 2022, 100% of this composite was represented by non-fee paying portfolios.

Past performance does not guarantee future results.
